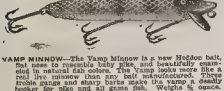
N2387—WILDER-DILG LURE—Trout size, yellow head and yellow feathers	12.00

THE NEW HEDDON "GAME FISHER" MINNOW—The "Game Fisher" floats while at rest, draws well below the surface in a most wig-wag motion. Equipped with two trebla hooks. Length of body 4¾ inches, weight ¾ ounce.

	Per doz.
N2388—Green scale	15.00
N2389—White body, red head and tail	16.00
N2390—Shiner scale	16.00



VAMP MINNOW—The Vamp Minnow is a new Heddon bait, that vases in irresistible baby pike, and beautifully examples in natural fish colors. The Vamp looks more like a real live minnow than any bait manufactured. Three treble gangs and sharp barbs make the vamp a deadly hooker for pike and all game fish. Weighs ¾ ounce. Length 4½ inches.

	Per doz.
N2392 White body, red eyes and tail	16.00
N2393 New pike scale	16.00
N2394—Shiner scale finish	16.00

ARTIFICIAL BAITS

IKE WALTON SINGLE HOOK MINNOW—This new feather bait is a real killer, both casting and trolling, and the combination of red and yellow is very effective. Practically weedless, and is ideal for use in lily pads and weeds where the big ones lie. Equipped with 3/0 O'Shaughnessy Hook. Length of body 4 inches. Length of tail (feather) 1¾ inches. Weight ¾ ounce.

	Per doz.
N2395—Red and white	16.00
N2396—Pike scale, green and yellow tail	16.00
N2397—Shiner scale, green tail	16.00

SOUTH BEND BASS-ORENO—The Bass-Oreno is a wobbler type of bait, similar in general outline to the wonderful oriental bait, successful in game fish in Japan, India, Africa, Cuba, Paris and wherever much like an inferior bait. Not in action in Bass. This bait while primarily designed for all species of fresh water fish, has also proven effective for salt water species such as Striped Bass, Channel Bass, Bonito, etc. Body is 4¾ inches long. Supplied in 6 standard colors as follows: finishes—guaranteed not to crack. Packed one in a box.

	Per doz.
N7134—Red head and white body	13.60
N7136—Rainbow color	13.60
N7138—Imitation frog color	13.60
N7137 White body with red and green decorations	13.60
N7139—Yellow perch scale finish	13.60

	Per doz.
N7139—Nite-Luming finish	13.60

N7142—White body with red and green decorations	13.60
N7144—Yellow perch scale finish	13.60

	Per doz.
N7148—Nite-Luming finish	13.60

SOUTH BEND PIKE-ORENO—As its name implies, the Pike-Oreno is designed especially for Wall-eyed Pike and large Pickerel. However, has proven effective for Bass and other game fish—even Muskie. The Pike-Oreno trawls deep, due to its particular construction. The propeller head is fitted with a nickel-plated, solid brass blade, peculiarly shaped and extending below or beyond the head, so that it revolves deep. The tail is weighted with lead, depending upon the speed with which it is reeled. Has the same diving, darting, wobbling action in motion as the famous Bass-Oreno. Body length is 4¾ inches. Equipped with three treble hooks, extra large. Packed one in a box. Furnished in the following enamel finishes:

	Per doz.
N7145—Red head and white body	16.00
N7147 Rainbow color	16.00
N7146—Imitation frog color	16.00
N7148—White body with red and green decorations	16.00
N7150—Yellow perch, scale finish	16.00
N7151 Red head, aluminum color body	16.00

SOUTH BEND SURF-ORENO—The Surf-Oreno is a surface bait which rides high on the water. Its special light saltmixy creates a swirl and darts more alluring to big game fish. Made of special light wood. Body is 3¾ inches long. Packed one in a box. Furnished in the following standard colors:

	Per doz.
N7182—Red head and white body	13.60
N7183—Yellow body with red and green decorations	13.60
N7184—Solid red color with black nose	13.60

SOUTH BEND MIDGET SURF-ORENO—This bait is of the same general design and construction as the Surf-Oreno only is a smaller and lighter weight bait. Body length is 2¾ inches. Packed one in a box. Furnished in the following colors:

	Per doz.

Matt and Jeff Puzzle

Object— To Separate the Two Parts.

Solution—Take hold of the two loops, using the thumb and finger of each hand. Swing the loop in the left hand to the left and across the left loop. The former left loop will now be on the right side. Press the two parts toward each other at the same time turning the part, now on the right side, away from you and the other side toward you and they will come apart.

Per gro.

BACKYARD RAILROADING

with "American Flyer" Railroads & "Structo" Automobiles

THERE'S more good fun in Backyard railroading than in any game you know. "American Flyer" Miniature Railroads and "Structo" Autos enable you to solve all problems of land transportation.

Giant Dump Structo Truck

A Prize for EVERYONE

Send us a photo and description of the Backyard Railroad you build and we will send you an Engineer's Cap and an order on your dealer for 50c worth of Railroad Accessories. You may also win one of our 23 big prizes—$25.00 to $2.00. Use any equipment you have.

Twentieth Century Limited—the crack train of the "American Flyer" line. This train and twenty-three other electrical and mechanical Minature Railroad outfits together with a complete line of accessories for building Backyard Railroads are described and illustrated in our four color catalog. Send 10c for this catalog and we will include with it a four color catalog of STRUCTO Automobiles, and Horace Wade's story "How to build a Backyard R. R.

American Flyer Mfg. Co. 2223 South Halsted St., CHICAGO, ILL.

"American Flyer" Railroads

and "Structo" Automobiles

Here's great news, boys and girls—this year we have made more "American Flyers" than ever before, so every Toy Store in your town can get a supply. We are also selling "Structo Autos"—you can buy them "Ready Built," or you can get them "Knocked Down" and put the parts together yourself. Remember, The American Flyer Company GUARANTEES all trains to be electrically and mechanically perfect. If any Toy Store hasn't got the "American Flyer" or "Structo" outfit that you want we will ship any of the trains, autos or equipment illustrated, post-paid on receipt of cash.

Stop for Water

Danger!

A full line of both electrically and mechanically operated American Flyer Miniature Railroads at the best Toy Stores.

Take this Magazine to your Toy Store and ask to see these and other Auto and Autos.

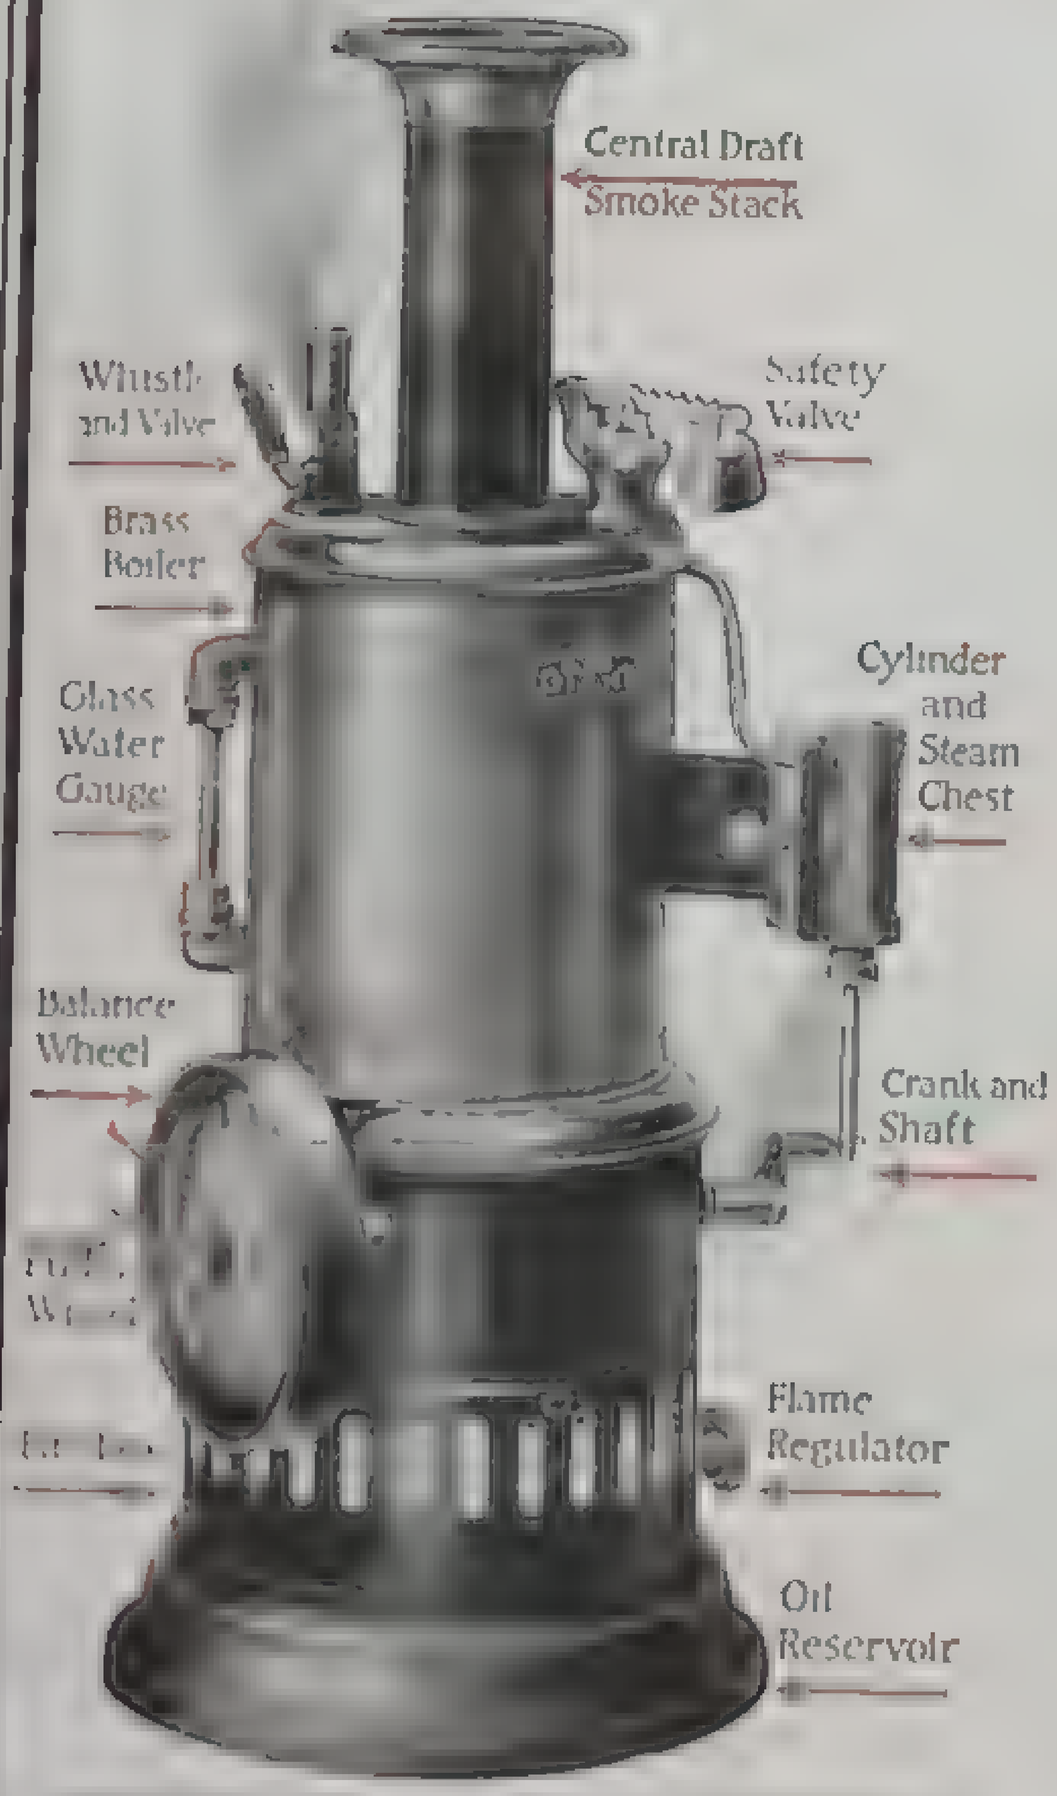
THE "BIG GIANT"

(Trade-Mark Registered)

A Real Steam Engine

Ordinary Kerosene Used as Fuel



For Young Engineers

EVERY young engineer ought to own one of these superb engines. It will not only afford hours of pleasure, but in many [illegible] will develop a taste for mechanical work and engineering [illegible] is designed for running toy machinery at a high rate of [illegible], such as machine shops, mills, forges, etc., can easily be made by the boys. They will thus enjoy both the making and the running of their plant. Power can be transmitted to the machine shop or mill through an attached pulley wheel, with a cord for a belt.

Runs Toy Machinery

BOYS, just think of the fun you can have running this engine [illegible] toy machinery for it! There will be no dull times, even on stormy days, if you have a "Big Giant" in the house. When steam is up the "Big Giant" will develop horse power sufficient to run the buzz saw described on this page and many of the Meccano models, as well as the toy machinery you can make. The engine will also supply steam for a shrill blast of the whistle whenever the engineer so desires. Besides the fun you can have in this way, you will learn many things about steam power and machinery that may help you later in life.

DESCRIPTION

The illustration does not show the full size of the engine. It stands eleven inches [illegible] inches in that and [illegible] is full speed [illegible]. It has a safety valve, [illegible] gauge that will always indicate the exact [illegible] a large balance wheel and other necessary [illegible] for toy machinery now on the [illegible]. The following important [illegible] The boiler is now [illegible], the water gauge; brass whistle base [illegible] finely finished, free from danger of [illegible] for boys offered.

How to get a "Big Giant" Engine

Ask [illegible] to give you his subscription for The [illegible] one year. Send the address to us with the subscription price and 5 cents extra and we will present you with the "Big Giant" steam engine. The subscription must be one that has not been upon our books during the past year, and it cannot be your own. The subscription price is $2.50.

[illegible] will be sent pleased to pay them for getting new subscriptions. When you have got the "Big Giant" steam engine it $2.75.

Young engineers always find the "Big Giant" interesting.

SPECIAL OFFER *Buzz Saw*

This toy (not illustrated) is made of metal throughout, japanned in an attractive color, is strong and durable, and is operated by extending a cord from its pulley wheel to the pulley wheel of the engine.

HOW TO GET IT. [illegible] extra we will include the buzz saw with the "Big Giant" steam engine, when ordered as a premium. [illegible] the buzz saw [illegible] the Engine.

PUBLISHED BY [illegible] PUBLISHING COMPANY DETROIT, MICHIGAN

"Bob, You Be the Conductor—I'll Be the Engineer"

Think of the fun of running a railroad that is all your own! Lionel Electric Trains are exact duplicates of the equipment used on America's greatest railroads. They look alike and work alike. Even the block signals, warning bells, and crossing gates work the same—*automatically*.

A touch of your finger on the Lionel "Multivolt" Transformer sends the Lionel train whizzing round the track, through tunnels, across switches and over bridges. Automatic crossing gates raise and lower as the train approaches and passes by. Warning bells sound danger at the crossings. Electric block signals with real electric lights flash "Caution" and "Clear".

You can slow up the train if you wish or bring it to a stop at the station to take on passengers. Do your own switching. Oh Boy! What a pack of fun for you and your chums and playmates.

Real Boys want the real thing. They want their railroad to be up-to-the-minute in every respect. That's why more and more boys buy Lionel Electric Trains every year. They *know* that Lionel trains are the real thing and *built* so perfect, electrically and mechanically, they will last a lifetime. There is economy in this preference besides pride of ownership and years and years of happiness.

You can buy a complete Lionel Train for as low as $5 75, or you can buy a larger locomotive and track and add to it as you wish. Lionel Locomotives and car bodies are of one-piece all-steel construction, hand enameled and baked like an auto body. For twenty-three years they have been the "standard of the world."

You can see Lionel Electric Trains and Accessories in operation at the best toy, electric, hardware, sporting goods and department stores. Make a date with Dad and Mother to see them.

Send for the new 48 page Lionel Catalog—a handsome book showing the complete Lionel line in actual colors. It's Free. Write Today.

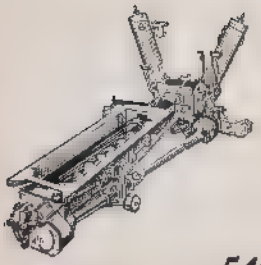
THE NEGRO MOVES NORTH—By E. V. Wilcox

Partial reproduction of a double-page advertisement announcing installation of our 5000th Stoker on Erie Railroad locomotive No. 3160, included in same order as the one below.

40 NEW ERIE MIKADOS DUPLEX STOKER-FIRED

ON THE Erie Railroad, Duplex Stokers are firing the entire lot of 40 new Mikado locomotives recently built and placed in service.



One of these locomotives, No. 3160, has received prominent mention as that on which the 5000th Stoker produced and sold by us in the last ten years, was installed.

Over 100 of our Stokers are giving satisfactory service on Erie freight locomotives. In addition to this, 31 Erie passenger engines (Pacific type) are Duplex Stoker-fired.

A Home and Income
For You in Sunny Florida

Be Independent—Own a Grapefruit and Orange Grove—A Truck or Poultry Farm. Increase Your Income

You Can Start a Grove Today Under Our New Plan

Develop a profit-earning fruit farm without leaving your present position—provide for your future. A small payment now and a few dollars invested each month

A profit-producing fruit grove is a permanent investment and provides protection against old age.

THE RIGHT LAND
IN THE RIGHT LOCATION AT
THE RIGHT PRICE

We Have It—Any Size Farm

These splendid lands are suburban to Tampa, the metropolis of South Florida. Here you find the most healthful, the most delightful climate in North America. For ten years we have been right here helping develop Hillsboro—the banner agricultural County of Florida, and we are still here to serve you and to help you obtain the farm you want, on very easy payments extending over 2 or 3 years' time to suit.

Groves Developed for Non-Residents

If you want to remain in your present position for a few years we can develop a grapefruit and orange grove for you. When you are ready we will clear your land, furnish fruit trees, plant and care for your grove until you are ready to look after it.

We Raise Our Own Guaranteed Citrus Trees in Our Own Nurseries

This insures every purchaser the best fruit trees that can be grown. This also insures a successful grove. We can save you money on planting and caring for your grove.

$300.00 to $500.00 Per Acre Profit

This is not an unusual return for truck farmers in the Famous Tampa district. All kinds of vegetables can be grown. Big prices are paid for early potatoes, Winter cabbage, Bermuda onions, tomatoes, celery and dozens of other vegetables during the Winter and early Spring when the north is covered with ice and snow. Strawberries, Melons, and other small fruits also yield large profits.

Write for Facts About Sunny Florida

IT COSTS YOU NOTHING TO LET US PROVE TO YOU that we have the land you want—in the location you want—at a price you can afford to pay and on the easiest terms you can imagine. Let us show you.

Fill out and mail us the coupon today and receive our large descriptive book FREE!

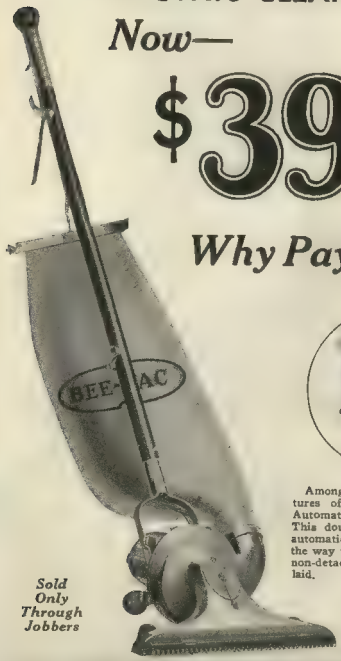
BEE-VAC

ELECTRIC CLEANER

Now—

$39.75

Why Pay More?



Among the many exclusive features of the BEE-VAC is its Automatic Swing-Back Brush. This double, self-cleaning brush automatically swings back out of the way when not needed. Being non-detachable, it cannot be mislaid.

Sold Only Through Jobbers

Ask Your Jobber

for his frank opinion of the new and improved BEE-VAC. Chances are he'll tell you that he sells more BEE-VACS than any other high-grade cleaner. Jobbers everywhere are recommending the BEE-VAC as the greatest money-making opportunity in years.

At the new low price of only $39.75, the BEE-VAC has met with an enthusiastic reception from dealers and users alike. Our series of full-page advertisements in the Saturday Evening Post brought us an avalanche of orders. Now that the high quality and moderate price of the BEE-VAC is firmly established in the public mind, an even greater volume of business should result.

Begin to Cash In Now

With the BEE-VAC on your floor you are prepared to meet every form of competition. In appearance, durability and cleaning efficiency, it is the equal of cleaners costing $10.00 to $25.00 more. Begin now to get your share of the big profits that this cleaner is producing for wide-awake dealers. A single demonstration of the BEE-VAC will convince any thinking person that it is useless to pay more when you can't buy more.

Your jobber carries the BEE-VAC. He is prepared to quote discounts that permit of big profits and make immediate deliveries. Write or wire him—today!

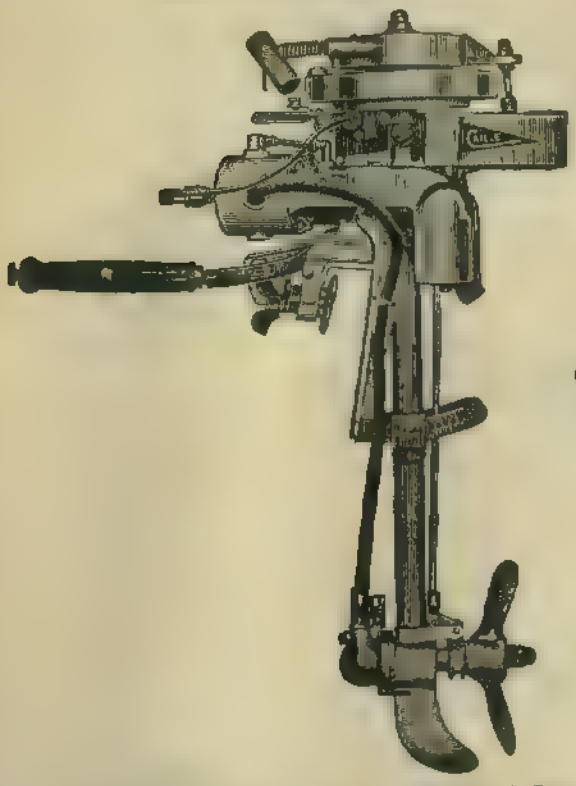
ROWBOAT MOTORS

CAILLE FIVE-SPEED



This is the only Motor built with a five speed Control; 2 speeds ahead; a trolling speed and a full speed at which the ordinary rowboat will be driven at about 8 miles per hour. A slow reverse is furnished together with full reverse. In neutral position, the motor runs idle while the boat lies still. This is the only motor equipped with neutral position. Can be reversed immediately without first going into a speed ahead. Equipped with mechanical starter. The starting device is furnished only with the 5 Speed Models. The extension shaft and adjustable horn permits adapting the motor to a high stern boat or to a boat with the stern cut at an acute angle.

Can be used in either fresh or salt water without any change in equipment. Parts are machined to measurements or limitations of thousandths of an inch according to S. A. E. Standard. A Cord is attached to each motor, requesting the ultimate purchaser to return the cord to the factory to register the motor so that they have on file the name and address of the owner of every motor, each motor being identified by the serial number. Each motor is fully guaranteed by the manufacturers.

SPECIFICATIONS

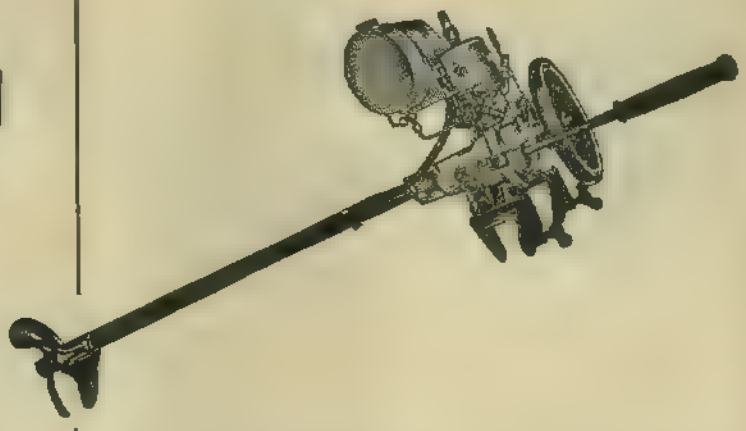
Bore 2⅜ in., Stroke 2½ in., 750 R. P. M., 2 H. P.
Propeller 9½ in. diamter, 12 in. pitch.
Built-in Flywheel Magneto.
Weight each 85 lbs.
Weight packed for shipment 105 lbs.

No. T7640—No starter with Magneto Ignition, each $198.00

T7641—With starter Magneto Ignition only $234.00

ONE IN A CASE

CAILLE LIBERTY DRIVE



This is the only genuine tilting motor on the market. Will tilt automatically when passing over shoals, shallows or sunken obstructions. A strut or skeg protects the propeller from damage. The motor may be tilted by pressing down on the steering handle or tiller. Equipped with a weedless propeller. Weeds may wrap around propeller or shaft and can be quickly thrown off by tilting the motor and allow the propeller to revolve free of water for a few seconds. Equipped with knapsack form of fuel tank which is practically indestructible. Machined as carefully as the 5 Speed model. Not equipped with starting device. These motors will drive a boat faster than others due to direct drive from Crank shaft to propeller without passing power thru the medium of gears. Will give a speed of 2 to 9 miles per hour in a 16 ft. rowboat in quiet water. Furnished with battery or magneto ignition. Equipped with conventional type of Berling Magneto. This motor is fitted with bracket for square stern, adjustable bracket for pointed stern may be had on special order at an additional charge.

The Liberty Drive Motor develops about 2 H. P. The motor, complete, weighs 72 lbs. It can be taken apart and carried in two sections, if desired. It comes to you carefully crated and ready to run. It is fully guaranteed. Weight each 75 lbs.

Weight Packed for shipment 105 lbs.

ROWBOAT MOTORS

COLLE NEPTUNE

A substantially built rowboat motor of standard design to meet the ideas of the conservative buyer.

Heavy Frame with two thumb screws clamps motor to rowboat in a minute and is adjusted to most any height, thickness or pitch of stern.

Motor is Reversible and will run either forward or backward. A turn to right starts motor; to reverse, turn to left, with a little practice can be reversed on spark.

Motor Speeds—From 150 to 800 R. P. M. controlled by timer lever extending under fly wheel. Press button on timer instantly stops motor.

Solid Bronze Propeller of semi-weedless type protected by strut.

All Under Parts of Bronze. The Only Metal Which is Impervious to Salt Water Corrosion.

Plunger Pump equipped with strainer, located on gear housing keeps motor cool in hottest weather.

Water cooled aluminum muffler and exhaust manifold cast in one unit.

Gasoline Tank of heavy tern plate, reinforced, with seams well soldered. Shut-off cock between gas tank and carburetor.

All Bearings of Phosphor Bronze, same formula as specifed by government.

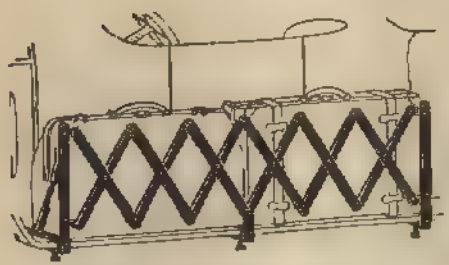
Chrome Nickel Steel Gears contained in water tight housing, packed with grease, shipping w't 100 lbs.

No. F7644—Battery ignition, with waterproof battery and coil box complete, each★ $153.00

No. F7645—Magneto built in fly wheel★ ..... each 171.00

ONE IN A CRATE

LUGGAGE CARRIERS



Body of carrier made of heavy steel, 1 in. wide, ⅛ in. thick. End pieces 1 in. wide and ⅛ in. thick, making it very substantial, are held to body of carriers by high grade steel bolt 5/16 in. thick. Each cross member held together at both ends and in center by a rivet. Each rivet has washer between members making it easily opened and closed.

Does not rattle if fastened securely. Adjustable to 6 feet. Finished in black, heat baked enamel and will not rust. Folds up into a very compact form and can be placed in tool box or under seat when not in use.

No. 5896—W't per doz. 144 lbs., each $2.60

Overshadowing Price Appeal

If prices are a determining factor in the conduct of the automobile business, the Stutz Motor Car Company of America, Inc., with its new Stutz Six and famous Speedway Four models, takes a commanding place.

Never has there been a better opportunity to sell cars of recognized distinction and exclusive appeal at prices that so completely dispel competition.

The Stutz Six at its phenomenal prices is the acknowledged leader in the field of quality sixes. From the standpoint of appearance, performance, and prestige, it is to be compared only with cars selling for many hundreds of dollars more. Both open and enclosed models set new standards of value.

The Stutz Speedway Four—long since acclaimed America's pre-eminent sport car—now is offered at prices that emphasize more than ever its exceeding value. From its very nature, it anticipates the desires of a certain class of select motorists which no other car so completely fulfills.

Combine these striking merchandising advantages of the new and enlarged Stutz line of popularly-priced Sixes and exclusive Speedway Fours with the superior financial and industrial strength of the parent company, and the new and advanced selling franchise for distributors and dealers and the overshadowing appeal of the Stutz line as a *business-getter* and *profit-maker* immediately as well as for the future is at once apparent.

Consequently, the Stutz franchise is in active demand by leading merchants everywhere. We are assigning new territory daily. Write or wire for particulars.

The Car that went Over Big at the New York Show

THIS SYMBOL IN ANY ADVERTISEMENT MEANS: SEE "CHILTON AUTOMOBILE DIRECTORY" FOR COMPLETE BUYING INFORMATION

AFTER all it is the public that determines which cars shall be most profitable for dealers—and no one who saw the enthusiasm of the crowds about the Auburn display at the New York Show can doubt that here is a franchise that means unusual dealer profits for 1923.

Its completeness, now that it includes a smaller Six of all the usual Auburn beauty and distinction, makes the Auburn line available to a great new public which has wanted a car of Auburn quality and reputation, in this compact and economical size. This new Auburn is made in Touring and Touring Sedan types.

Old men in the trade said it was the finest line by far that Auburn had ever shown in the twenty-three years of its successful history. The new body lines of the Standard Auburn Sixes have added even greater attractiveness and salability to a car that has always been unusual in its appeal.

The Brougham, the Sport, with its many splendid color options, the Sedan and the permanent top Touring car, meet every desire of that great market which wants something more in a motor car than mere transportation. A range of prices and models to meet every demand. $1095 to $2245—values unsurpassed.

Auburn is putting behind its product during 1923 a volume of sales producing effort that exceeds anything in its history.

There will be a full year's campaign in full pages in The Saturday Evening Post, liberal co-operation in newspaper advertising, outdoor display and a variety and quality of printed helps that fill every dealer need.

See the Auburn. Estimate for yourself the selling appeal of this splendid and now wonderfully complete line. Ask for the details of the advertising and selling helps, learn about the new liberal non-expiring contract and find out whether your territory is open.

An Auburn franchise means big profits for you in 1923

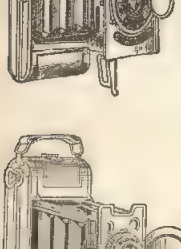
Ansco Vest-Pocket Film Cameras

For Any Roll Film of Standard Make



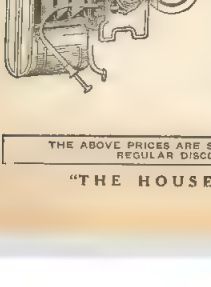
Ansco Vest Pocket Cameras stand today at the pinnacle of photographic success, distinctive in style, equipment and photographic capability. It is so small, so flat, that it can be slipped into vest, coat or hip pocket, ready for instant use.

Ansco Vest Pocket No. 0

Takes pictures 1⅝x2½ inches. Covered with fine seal grain leather. Weighs 10½ ozs. **Self opening and self focusing.** One pressure on the metal button extends and locks the bellows and, as the lens is always in focus, the camera when opened is ready for action. Fitted with single achromatic or Rapid Rectilinear lens and Actus Shutter.

5+6453	With Single Achromatic Lens	**$13.70**
5+6454	With Rapid Rectilinear Lens	**16.50**

For Films for Above Cameras See Page 263



Ansco Vest Pocket No. 2

Takes Pictures 2¼x3¼ Inches

This is a focusing camera and is supplied either with Ansco Anastigmat lens, working at F 6.3, or Modico Anastigmat lens, F 7.5, in Extraspeed Bionic shutter. **An anastigmat lens is of little value unless it can be used at full opening, which cannot be done without focusing.**

It can be used as a fixed focus camera by setting the distance at twenty-five feet and using the F 16 diaphragm opening.

The camera is fitted with a hinged watch-cover lid to protect the lens, has both vertical and horizontal brilliant view-finders, stationary footrests for support in either upright or horizontal position, heavily nickeled metal parts and genuine morocco grain black leather covering. The side arms are so supported within the body of the camera that when extended they afford, by means of their knife-joint tension, absolute rigidity in the lens plane. This is a feature, found in no other folding camera that does not have a platform or bed support.

5+6455	With Ansco Anastigmat Lens, F:7.5, Bionic Shutter.....	**$36.60**
5+6456	With Ansco Anastigmat Lens F.6.3, Bionic Shutter.....	**45.70**
5+6457	Carrying Case with Shoulder Strap.....	**8.90**

For Films for Above Cameras See Page 263

Folding Ansco Cameras

For Any Roll Film of Standard Make

These cameras are round-cornered, made of aluminum and covered with the best grade of seal grain leather, and are divided into three different classes, embracing in each class three of the most popular sizes, designated as Nos. 1A, 3 and 3A Folding Ansco (Symmetrical Class), Nos. 1A, 3 and 3A Folding Ansco (f 7.5 Anastigmat Class).

To make the Ansco series quickly and accurately adjustable for pictures the long way of the film or plate, the cameras are provided with a new patented finder—an exact radius finder, which automatically reverses the position of its plane to correspond with the focal plane of the Ansco; in other words, so that the shape and field of the picture seen of a miniature size in the finder will be identical with the actual picture to be taken on the film. There is, therefore, no chance of cutting off a pretty girl's head or leaving out a tree or other object intended to be shown in the picture.

The automatic adjustable focusing scale is another feature worthy of consideration, for with it changes necessary for different distances are made quickly and with remarkable precision. It may be set for a definite focal distance, and the bellows locked at that point automatically, but if after drawing out the bellows it is found desirable to change the distance, it can be done instantly by shifting the lever.

No. 1-A Folding Camera

Symmetrical Class—Size of Picture 2½x4¼ Inches

5+6458	With Symmetrical Lens U. S. 4 and Bionic Shutter	$34.70
5+6459	Carrying Case, sole leather	7.10

No. 1-A Folding Camera

Anastigmat Class—Size of Picture, 2½x4¼ Inches

The advantage of this class lies in the lens equipment. The cameras are fitted with a Modico Anastigmat lens, F:7.5, which is a little faster than the Symmetrical lens and the equal in definition, flatness of field, and freedom from astigmatism of the most expensive Anastigmat lens. Absolutely perfect definition, as everyone knows, is always desirable, while extreme speed is necessary only occasionally

5+6460	Price with Modico Anastigmat Lens F:7.5 and Ilex Universal Shutter	$43.90
5+6461	Carrying Case, sole leather. Each	7.10

For Films for Above Cameras, See Page 263

Period Cane Chairs and Rockers—SOLID MAHOGANY

The pieces shown on this page are made only in solid mahogany throughout. The refinement embodied in these chairs and rockers is made possible only by the skilled workmanship and the genuine wood used. The lines are particularly distinctive and dignified. The soft brown finish of the pure mahogany wood adds charm to the home. The genuine double strand finely woven cane back and seat make the rockers attractive and appealing.

The period designs are very faithfully carried out. The comfort these articles insure is remarkable.

Hand Rubbed Finish

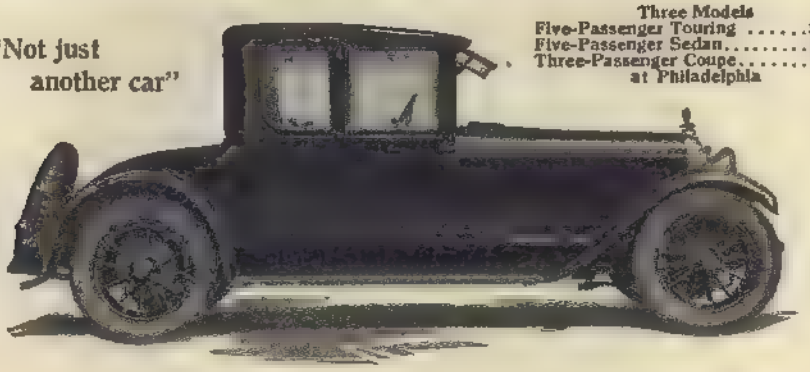
The Beautiful, Powerful, Air-Cooled FOX

"Not just another car"

Three Models
Five-Passenger Touring $2975
Five-Passenger Sedan..... 3975
Three-Passenger Coupe..... 3975
at Philadelphia



A Car With a Reason for Being

The FOX meets the long-standing demand for a car with the beauty and power of the best water-cooled types, plus the admitted advantages of air cooling. In all truth, the FOX is "not just another car."

A noted designer of noted cars, D. McCall White, predicted overhead camshafts and overhead valves for the cars of the *future*. He further prophesied an increase in the number of air-cooled cars. FOX is air cooled and it has overhead valves, operated by an overhead camshaft now—*today!*

The FOX cannot overheat and it cannot freeze! FOX perfected air cooling is the result of Mr. Fox's war experience with the air-cooled machine gun. He applied the principle to the automobile with marked success. Compare the FOX with ANY car!

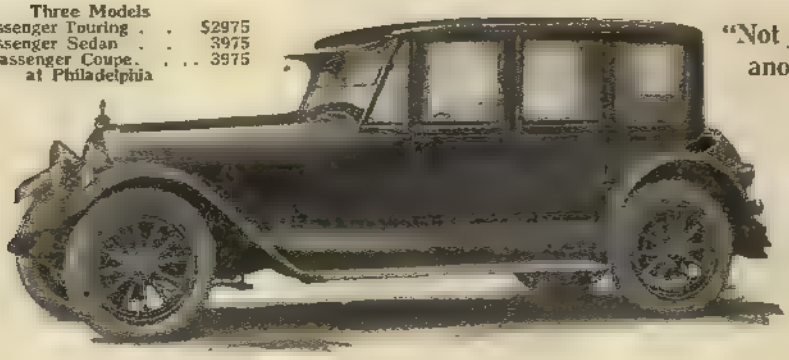
at Philadelphia



"Not just another car"

A Car that is Unusual

There is nothing ordinary or conventional about the looks of the FOX. Its lines are distinctive—a fact apparent to the uninitiated. Its finish is really the last word in fine coach building. Unusual!

Six silent cylinders develop 50 horse-power, to sweep you along the straightaways and up the stiffest grades with ease and agility. Cradled in luxurious comfort, the road is the FOX owner's to dominate at will.

The FOX franchise appeals to the best class of dealer-representation. There are still some valuable territories to be assigned, and we suggest that you write, wire or telephone for our proposition. This, of course, places you under no obligation to go further into the matter.

KING AIR RIFLES

1909 JUNIOR SINGLE SHOT

Blued finish steel barrel and frame, walnut stock, good sight, perfect action, shoots BB shot, length 29 in., w't per doz. 18 lbs.

No. 5010—Per dozen $14.40

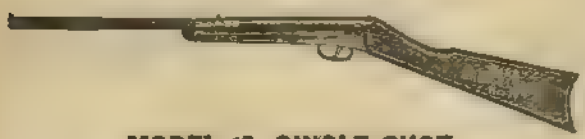
ONE DOZEN IN A CASE

SINGLE SHOT

Lever action, made of one-piece blued finish steel, black walnut stock, carefully adjusted sights, shoots BB shots and darts with accuracy and good penetration, length 31 in., w't per doz. 25 lbs.

No. 5021—Per dozen $24.00

ONE DOZEN IN A CASE

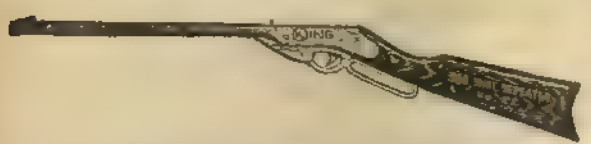


MODEL 17, SINGLE SHOT

The new "King Breech Loading Air Rifle", is the first really good air rifle, at a moderate price, that will shoot darts as well as steel and lead shot with accuracy. It "breaks" about the center of the rifle for loading purposes, has an automatic locking device and is built very substantially. Equipped with a very practical safety trigger. A deep notch in the trigger permits it to "bite" on the lower part of the frame and it is impossible for the plunger to slip off the trigger when gun is cocked. This, however ,does not at all interfere with the pull of trigger, which is very smooth.

No. 5011—Barrel and all metal parts blued, stock of walnut, neatly finished, length over all 32 in., w't per doz. 27 lbs. .....per dozen $32.00

ONE DOZEN IN A CASE



500 SHOT AUTOMATIC REPEATER

Lever action automatic repeater shoots 500 times without reloading, made of best grade highly polished blued steel, with barrel and frame of one piece, walnut stock, open rear sight. Shoots BB Air Rifle shot with accuracy. Length 31 in., all parts interchangeable. W't per doz. 25 lbs.

No. 5022—Per dozen $28.00

ONE DOZEN IN A CASE

KING 1000 SHOT AUTOMATIC REPEATER AIR RIFLES

Lever action, automatic repeater, shoots 1000 BB shots without reloading, made of best grade, highly polished finish blued steel with barrel and frame of one piece, selected black walnut finish stock, carefully adjusted sights. Length 35 inches. This model is identical in appearance to No. 5022 excepting that it is about 4 in. longer and has a heavier stock. W't per dozen about 29 lbs.

No. 5055—Per dozen $32.00

ONE DOZEN IN A CASE

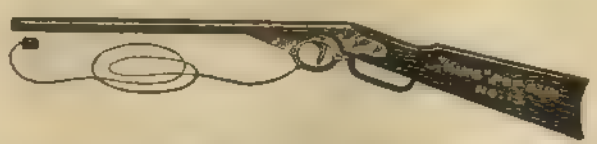
POP GUNS

KING RAPID FIRE

Blued finish on all metal parts, stock and hand piece of polished black walnut, loads automatically, makes a loud report with both forward and backward movement of hand piece, no flying cork, safe, sane and substantial, length over all 27 in., weight 31½ oz. each; weight per dozen 10 lbs., weight per case 36 lbs.

No. 5015—Per dozen $14.40

ONE IN A PASTEBOARD BOX



KING SAFETY LEVER

Lever action, one piece, blued steel barrel and frame, black walnut stock, shoots a cork which is attached to a string and makes a loud report, length 17 in., w't 7¾ oz.

No. 5014—Per dozen $4.00

SIX DOZEN IN A CASE

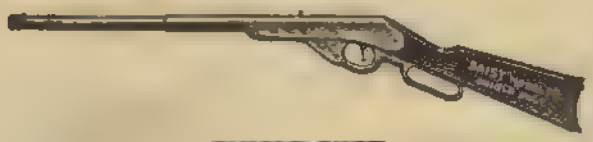
KING LONG DISTANCE

Blued finish steel barrel, black walnut stock, shoots a cork at end of string and makes a loud report, length 21 in., w't 1 lb.

No. 5019—Per dozen $12.00

SIX DOZEN IN A CASE

DAISY AIR RIFLES

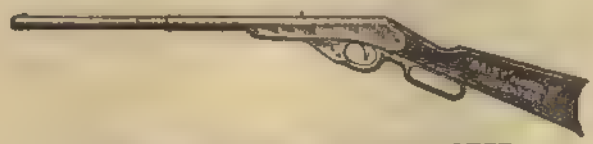


SINGLE SHOT

Lever action, single piece steel barrel, blued finish, walnut finished stock, shoots BB air rifle shot and 17-100 darts, length 31½ in., w't per doz. 29 lbs.

No. 5005—Per dozen $24.00

ONE DOZEN IN A CASE



350 SHOT AUTOMATIC REPEATER

Lever action, 350 shot, shoots BB shot, single piece steel barrel, nickel finish, all parts interchangeable, length 31½ in., w't per doz. 29 lbs.

No. 5007—Per dozen $32.00

ONE DOZEN IN A CASE

500 SHOT AUTOMATIC REPEATER

Lever action, 500 shots, shoots BB shot, working parts of steel and brass, blued finish, black walnut stock, loaded automatically, length 33 in., w't per doz. 40 lbs.

No. 5018—Per dozen $40.00

HALF DOZEN IN A CASE

1000 SHOT AUTOMATIC REPEATER

Magazine Repeater, lever action, magazine holds 1,000 air rifle shot and loads by operating the lever. Turned stock of genuine black walnut, highly polished. Metal parts nickel finish. Shoots with great force and accuracy. This rifle will please all boys. Length 36 in., w't 2 lbs. 9 oz. Packed six in a case, w't 21 lbs.

No. 5012—Per dozen $48.00

MILITARY REPEATER

Lever action, 50 shot, shoots BB air rifle shot, all metal parts finished in gun blue, beautifully walnut finished stock, rear sight open and adjustable, front sight knife type, sling strap and swivel, 45 in. over all, including rubber tipped detachable bayonet, w't per doz. 76 lbs.

No. 5040—Per dozen $80.00

HALF DOZEN IN A CASE

DAISY AIR RIFLES

PUMP ACTION REPEATER

50 shot, shoots BB air rifle shot, metal parts non-rusting gun blue, genuine black walnut stock, hand polished, adjustable sights, length 38 in., w't each 3¾ lbs.

This new pump action repeater operates by pulling the slide toward the stock, the loading action is automatic, fires rapidly from the shoulder, the magazine having a forced feed, is a strong and accurate shooter.

No. 5020—Per dozen $80.00

HALF DOZEN IN A CASE

LITTLE DAISY SINGLE SHOT

Blued finish steel barrel and frame, walnut finished stock, good sight, perfect action, shoots BB shot, length 29 in., w't per doz. 16½ lbs.

No. 5004—Per dozen $14.40

BIG DAISY POP GUN

Nickel finish steel barrel and frame, finished walnut stock, shoots a cork or rubber ball which is attached to a string and makes a loud report, length 17 in., w't 7¼ oz.

No. 5003—Per dozen $12.00

SIX DOZEN IN A CASE

DAISY POP GUN

Smith Non-Tilting Mixers

Smith 4-S, Model C, with low charging platform, gasoline engine.

THERE are two distinct types of Smith Mixers, in all practical sizes the Non-tilting type and the Tilting Type. The difference between the two types is this:

Smith Non-Tilting Mixers are designed so that any portion of the batch can be discharged as desired. The Non-Tilting type is therefore desirable for use with wheelbarrows, trucks, carts, etc., which are not large enough to carry a full batch from the machine at one time.

Smi th Tilting Mixers discharge the entire batch at once and wherever conditions permit this, the Tilting type will be found to be the speediest, most efficient and most economical mixer on the market. It is the only mixer of this type manufactured.

SMITH NON-TILTING MIXERS.

Are made in the following sizes: 4-S, 7-S, 14-S, 21-S and 28-S. Capacities, weights and general information are shown below.

Smith Non-Tilting Mixers Size	4-S	7-S	14-S	21-S	28-S
Capacity in mixed concrete per batch	4 cu. ft.	7 cu. ft.	14 cu. ft.	21 cu. ft.	28 cu. ft.
Capacity in unmixed material per batch, Note 1	6 cu. ft.	11 cu. ft	22 cu. ft.	31 cu. ft.	42 cu ft.

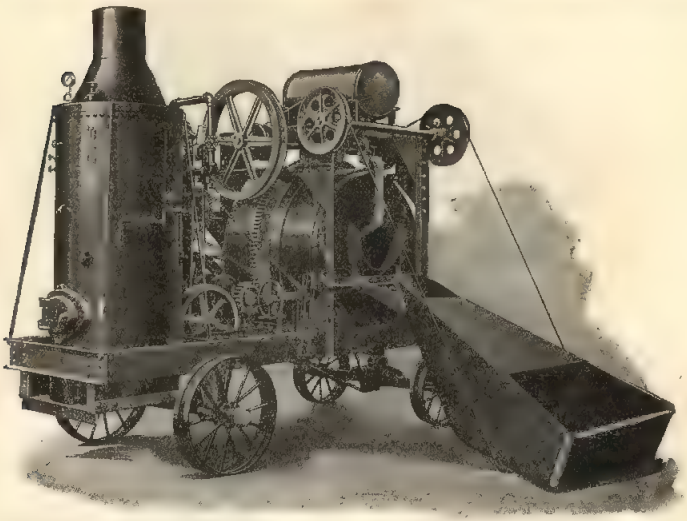
Smith Non-Tilting Mixers



Smith 14-S with Steam Engine and Boiler, on Trucks, with Power Loader and Water Tank.

SMITH 14-S MIXER.

THE Smith 14-S is known as the "half yard" mixer. Its speed in loading, mixing and discharge is typical of all Smith Mixers.

It can be furnished on skids or on steel trucks, with power loader, gated batch hopper or standard feed chute, and with gasoline or kerosene engine, steam engine and boiler or electric motor.

See table beneath description of No. 4-S, Model C.

All Smith Mixers, Tilting or Non-Tilting, have the famous Smith End-to-Center mixing action, which thoroughly hydrates every particle of cement and produces perfectly mixed concrete of a very lasting quality.

Boiler plate steel is used in all Smith drums. Twenty-one years of experience have proved this to be the best material—strong, light, durable, tough, cannot be cracked by freezing, cannot be cracked by pounding; developes a polished surface, easy to keep clean.

Heavy duty construction throughout characterizes all Smith equipment.

The complete stock of repair parts carried at Kansas City, insures the best of service always.

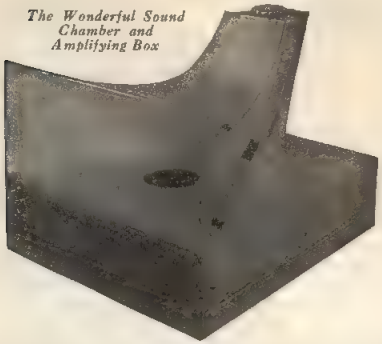
The Ampliphone

The Only Phonograph with An Extra Sound Chamber

An Exclusive Ampliphone Feature

The Wonderful Sound Chamber and Amplifying Box



The above illustration represents the sound chamber and amplifying box. This is constructed of the most resonant material known to science. Accommodating itself to every intensity and reflection of sound, greatly enlarging the volume of sound, yet retaining that deep rich tone that gives the Ampliphone that prestige and power of leadership. For depth and volume of tone it cannot be surpassed. It has no metal throat, being made of wood entirely up to where it joins the tone arm. When the sound waves are traveling down the horn reach this opening they are diverted into this sound chamber where each tone is given full chance to vibrate, giving the hearer a smooth tone, appealing clear, well rounded, musical and scientifically true.

On the

Ampliphone

the voice is re-humanized; instruments of brass stand out in perfect individuality and timbre; while stringed instruments have restored to them the vibration essential to satisfying performance.

Contains albums for the filing of records. Price **$248.50** list. Retail Price, $225.00 net. Shipping weight about 225 pounds

The Ampliphone

will find its place in your home and your heart, your innate love for the true beauty of music instinctively tells you that here is a phonograph that plays as you would play, with an indescribable delicate warmth—and sings as you would sing, with feeling and enchanting sympathy.

This marvelous fidelity to original tone value is attributed to the patented amplifying tone chamber, a triumph of human ingenuity and skill.

WHILE the amplifying chamber greatly enlarges the volume of sound, it is of such sonorous depth and softness, that every quality of music from the Ampliphone is cadenced to unspeakably thrilling sweetness.

Ladies' Knitted Bathing Suits

Our Ladies' Bathing Suits are created to meet the demand of discriminating buyers who seek garments entirely out of the ordinary. They are built to an ideal, fit, style and quality paramount, a strictly quality, not a quantity product. The fabric is especially knitted in the finest pure worsteds, in a tight, smooth, even stitch to insure elasticity and shape retaining qualities. Every detail is carefully carried out, each button matches its background, shoulder reinforcements of knitted fabric (not cloth, as is commonly used), extra large double gussets in seats, each suit has a pocket with button flap on trunks Free easy armholes. **Give actual bust measure.**

Ladies' Bathing Suit

One-piece, conservative yet artistic. Two band stripes on skirt. The neck and armholes are also striped in the following colors:

5+7586 Black and Kelly.
5+7587 Myrtle and Scarlet.
5+7588 Peacock and Gold.
Each **$11.40**
5+7589 Hose to match.
Per Pair, **$3.00**

WRIGHT AND DITSON'S

Wright & Ditson rackets weighing 13 oz. and over are guaranteed by the manufacturers for 30 days after date of purchase. Rackets on which claim of defect is made must be forwarded for inspection and all transportation charges paid by the sender.

Used by National Champions and prominent players throughout the country. The frame carefully selected for playing quality and balance. Has green binding and trimming on the throat, 5½-inch handle. Long and narrow shape especially adapted for stroke players and for overhead work; handle is the same size throughout playing surface, which gives the player the same grip when playing from back of the court as at the net

No. 37—Gold Star, in weights 13½, 14 and 14½ oz. .....each $18.00

Named in honor of the famous Davis Cup. Made of choicest materials especially selected, oval in shape, dogwood re-inforcement and black walnut laminated concave throat, angle stringing, 5½ in. handle.

No. 35—Davis Cup, in w'ts 13½, 14 and 14½ oz. .....each $18.00

Oval shape with concave white dogwood throat; frame made of well seasoned second growth ash in the new style chamfering, making a fine appearing and durable racket; double center stringing. Red, white and blue binding where strain in playing comes on frame. 5½-inch handle.

No. 34—All American, in weights 13½, 14 and 14½ oz.....each $10.50

Strung with good quality gut, extra center strings, shoulders reinforced, beveled frame, light cherry throat. Very practical racket for medium price. In light, medium and heavy weights.

No. 21—Champion .....each $8.00

This racket has for a long time been one of the most popular among the medium priced rackets. Strung with good quality gut bound at shoulders and on frame where the strain comes. Made in light, medium and heavy weights.

No. 23—Longwood .....each $8.00

Frame made of selected white ash, mahogany throat. Strung with good quality gut, extra strings in center. Reinforced at shoulders with binding. Made in light, medium and heavy weights.

No. 26—Park .....each $4.80

Very popular low priced racket with extra center strings, well finished throughout. Light, medium and heavy weights.

No. 27—Hub .....each $4.00

"R. WALLACE" SECTIONAL
Silver Plate

THE HUDSON

The Hudson is an "R. Wallace" Sectional pattern in which the beauty of the Colonial motif is enhanced by a touch of modernism. Here sturdiness is combined with slender grace, and its balance in the hand is as pleasing to the touch as the design is appealing to the eye. The Hudson has the bright finish.

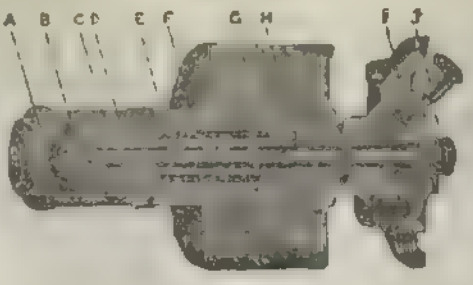
FAN MOTORS

EMERSON

Emerson 1923 Model Desk Fans and Oscillators are packed one in a Box and are supplied by the Factory complete with Ten Foot Parallel Cord and Rotating Edison Plug, attached to Motor, with Direction Sheet, ¼ pint Can of Oil and Five Year Guarantee Coupon attached to Motor.

The Illustration Herewith is a Photograph of an actual Cross Section of the Emerson Induction Armature, Fan Hub and Shaft. This Bearing is Entirely Different in principle from the Bearings of Ordinary Types of Desk Fans. Instead of a Rotating Shaft of Soft Steel, to which the Armature is Pinned, the Shaft of the Emerson Fan is a Hollow Steel Spindle (F) Pressed Firmly into the Rear Housing of the Motor (I). The Armature (G) Rotates upon this Shaft and is Entirely Separate from the Shaft. A Stud (E) passes through this Shaft and Holds a Retaining Screw with Washers (B) at the Front end to keep the Armature in position.



The Construction of Wearing Surfaces of this Bearing has been proven by Experience to be Highly Satisfactory for a Bearing of this Character. The Hollow Shaft or Spindle is of Case Hardened Steel, while the Armature Hub Running on this Spindle is of Soft Cast Iron. It Seems that no Better Combination of Wearing Surfaces can be Procured.

The Soft Porous Iron Absorbs the Oil, and in a Short Time the action of the Hardened Steel Surface of the Shaft Develops a Glaze on the Iron which is an Ideal Bearing Surface. Tests made on Fans which have seen many years of Continuous Service show this Bearing to be in even Better Condition than when the Fans left the Factory.

In addition to the Armature Hub Midway Between the Bearing Surfaces is Recessed, leaving a Space between the Shaft and the Cast Iron Hub. This Recess is Filled with Lubricating Grease when the Fan Motor is Stored. Insuring Perfect Lubrication for Some considerable Time Even should the User Fail in the Ordinary Precaution of Supplying Oil to the Bearing.

One of the Secrets of the Success of this Bearing is the fact that it is Sealed at the Front End and Practically Sealed, so far as the Entrance of Dirt is Concerned, at the Rear End. Oil Remains on the Bearing Surfaces Until its Lubricating Qualities are Exhausted, and Dirt, Sand and Dust Floating in the Air Cannot Enter the Bearing to Cut and Grind it.

All Types and Sizes of Emerson Alternating Current Desk and Oscillating Fans are Equipped with the Hardened Steel Oil-Tight, Dust-Proof Bearing Described Above.

The Armature Hub (C) is threaded at the Front End to Receive the Fan Hub (A) which is Screwed on Firmly Against a Leather Washer which makes an Oil-Tight Joint Between the Solid Fan Hub and the Armature Hub. Thus, the Front end of this Bearing is Sealed Oil-tight, Eliminating any Possibility of Oil Reaching the Fan Blades to be Scattered Over Furnishings or Decorations.

The Simple and Wonderfully Effective arrangement for Lubricating this Bearing has been Largely Responsible for its Success During the Fifteen Years it has been in Use. Oil is Inserted through the Oil-Cup (J) and Runs into the Center of the Hollow Shaft, through the Slotted Holes (D-H) in the Shaft, Directly to the Bearing Surfaces of the Armature, where it is needed.

All Sizes of Emerson Desk and Oscillating Fans for Both Alternating and Direct Currents are Equipped with Fan Blades of a Patented Design Selected after Exhaustive Experiments with Blades of Different Characteristics. The Original Parker Design used on Emerson 12 inch Fans has been Successfully Modified to Meet the Requirements of 8 inch Fans and 16 inch Fans, but Retains the Essential Features which have Made this Design so Valuable.

The Parker Blade is a Rigid Sheet of Brass with a Curved Cutting Edge. The Rear Edge is so Shaped as to Minimize the Vibration which Results in the Hum of Ordinary Desk Fan Blades.

The Smallest Emerson Fan May be Converted to the Bracket Position without Extra Parts

Where Necessary this Blade is Made unusually wide near the Hub to Project Air from the Center as well as from the Outer Circumference of the Fan. The Pitch or Dip of Parker Fan Blades is Considerably Greater than Found in a majority of Competitive Makes, Enabling these Fans to Project Air to a Great Distance without Objectionable Noise.

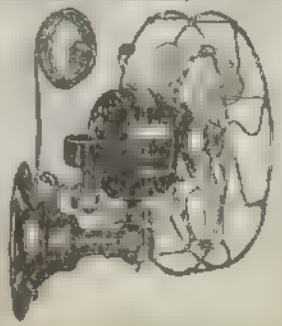
All Emerson Fans for Alternating Current are Fan Motors of the Induction Type. This is the Simplest Known Form of Motor and, in the Design Employed for Emerson Fan Motors, has Neither Brushes nor Commutator, nor Moving Contacts of any Kind.

Emerson 1923 Models Oscillators have valuable Improvements in the Mechanism, by which the Range of Oscillation may be varied from 15° to 90°, of the stationary position secured by adjusting a Single Thumb Lever below the Gear Case. The Mechanism has been greatly Simplified and all loose parts eliminated.

A new feature is the Adjusting Collar beneath the Motor, by which the direction in which the breeze is thrown may be instantly changed to put the breeze where it is wanted without re-adjusting the Base. This feature is particularly valuable where the Motor is installed as a Bracket Fan with Base fastened to the Wall. The Adjusting Handle in the Collar points in the direction in which the breeze will be thrown.

12 inch Oscillating Desk Fan

These Oscillators are Equipped with a Hinged Base Permitting the Blades to be Tilted Up or Deflected as may be Desirable. By Withdrawing the Thumb Screw at the Hinge, this base may be Adjusted to the Angular Position, and the Base Fastened Directly to the Wall. The Hinged Joint is so Designed that the Motor would not be Damaged by Falling Forward, Even Should the Thumb Screw be Fastened Insecurely. When Used as a Bracket Fan the Blades May be Tilted Up or Deflected as well as when Used as a Desk Fan, Permitting the Oscillators to be Placed Well Above the Occupants of a Room and Tilted Down to Distribute the Breeze over Many Persons, without Annoyance to those Nearest to the Fan.



12 inch D. C. Oscillating Fan in Bracket Position
(Blades may be Deflected to Throw Breeze Down when Mounted on Wall)

Owing to the Wide Diffusion of Air Secured with Oscillating Fans, the Blades of Emerson Oscillators are Adjusted to Throw a Stronger Breeze than Thrown by Non-Oscillating Fans of Corresponding Styles. As a Result, Emerson Oscillating Fans Consume a slightly Larger Amount of Current than Corresponding Sizes of Emerson Swivel-Trunnion Fans, but for any Extra Current Required by the Motor the User Receives Full Value in Increased Volume of Air Delivered.

All Emerson Oscillating Fans are Three-Speed Positive-Acting Geared Types, not Dependent on air Reactions for their Swinging Movement. As a Result these Fans Oscillate Steadily in any Position as Desk or Bracket Fans.

Emerson Oscillators have all the Other Valuable Features of Emerson Swivel-Trunnion Fans, Described on Previous Pages. They are Induction Fans without Brushes, Commutator or moving contacts of any kind. Motors of this kind, Equipped with the Oil-Tight, Dust-proof Bearing of the Emerson Fan, are sure to give long Service.

These Fans Should not be Confused with Oscillators Depending on Moving Vanes and Uncertain Air Reactions for their Swinging Movement.

ELECTRIC FANS

EMERSON

NON - OSCILLATING — SWIVEL TRUNNION — DESK OR BRACKET — THREE SPEED

For Alternating and Direct Currents

Specifications

Parker (Patented); Brass; Four Blades. Heavy Steel Guards; Black Enameled.

Motor and Base Finished in Black Enamel.

Three Speed Induction Motors, no Brushes or Moving Contacts.

Dust Proof Bearings; Convertible Desk Bracket Base; Complete with Cord and Separable Plug.

This Nine inch Fan Will be Found to be Very Popular on Account of its Quietness, Light Weight and Low Price; Very Satisfactory for Small Room but Will Not Move Nearly as Much Air as the 12 inch Size.

Diameter, 9 inches; 4 Blades; 110 Volts; 60 Cycles; Approximate Weight Each, Net, 12 lbs.; Weight, Packed, 23 lbs.

AC SPARK PLUG STOCK CABINETS

LARGE SIZE

On all orders for 140 plugs or more this cabinet will be given free of charge on request.

It stays on the job all the time, increasing your spark plug sales, due to its prominent location and convenient arrangement of stock.

It takes up little counter space, yet it places every size and type of spark plug right at your finger tips.

It has a separate section for every type of plug, and each plug is visible. There is mounted in the case a chart showing the correct plug for every type of motor.

This chart gives immediate, accurate information on the type of spark plug required by any motor. Special spark plug knowledge is not required.

When a customer asks for plugs for certain motor, consult the chart and find the correct plug at a glance. It may be locked to prevent loss or theft.

AC 1075 FOR FORDS, TRUCKS AND TRACTORS

½-Inch Regular Size Only

Spring terminal clip permits wire to be instantly detached and re-connected while motor is running. Facilitates testing spark plug and coil. No nut to be unscrewed or lost.

Patented carbon proof porcelain. Saw tooth edges attain sufficient heat to burn oil deposits, thus offering effective resistance to carbon.

New electrode design forms a natural drain so that no oil can lodge in spark gap.

ALBANY HARDWARE & IRON CO.

ARROW WASHING MACHINE

TUB

Tub is made of 20 ounce copper, nickel plated inside and outside. Aluminum cover.

Holds 15 gallons of water, with a washing capacity of 60 pounds of clothes an hour.

Conveniently located drain, threaded for standard garden hose connection, quickly drains the tub

MOTOR

The motor of ¼ H. P. is installed on an insulated base and can be operated on an ordinary household electric light circuit with ordinary lighting fuses.

There is sufficient power to wash the clothes and operate the wringer at the same time

WRINGER

Split-top type aluminum frame wringer that swings and automatically locks in five positions and will not operate unless locked in one of the five positions.

Wringer cannot be swung from one position to another while the rolls are in motion.

Quick action safety release and pressure screw on top.

Balloon type rolls 2 inches in diameter that run in wooden bearings.

Reversible water drain.

FRAME

Heavy channel steel frame to which the tub and driving mechanism are firmly fastened is finished with two coats of white Duco.

The three legs will not permit the machine to tip on an uneven surface.

Three extra large ball-bearing casters

OPERATION

Clothes are washed by water action alone. The water circulator, made of lynite, turns back and forth at a speed of ninety times a minute, causing violent action of the water, surging it up from the outside and drawing it down toward the center, driving strong currents of water through every mesh of the fabric.

Operation is controlled by moving the starting lever

Six moving parts drive the washer, they and the gears run constantly in oil in an oil-tight case which is finished with two coats of white Duco

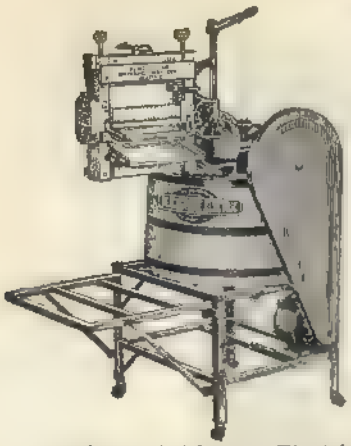
Cycles	Voltage	Packed	Weight	Each
40 and 60	110	crated	265 lbs.	**$155.00**

DEFERRED PAYMENT PURCHASING PLAN

The Blackstone Manufacturing Company has a deferred payment financing plan by which Arrow Washing Machines may be sold to consumers by any dealer who can supply the satisfactory financial qualifications.

For further information dealers should write direct to the Blackstone Manufacturing Company, Jamestown, N. Y

WASHING MACHINES



Swinging Wringer. Electric

Wooden tub of selected stock. Two ply over-lapping cover can be raised or lowered without turning off power Holds 22 gallons of water and drains at bottom through a garden hose connection.

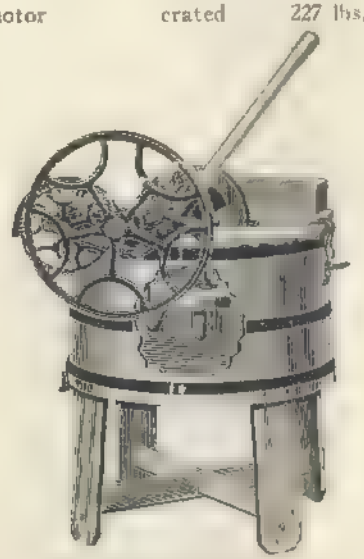
¼ H. P. motor fully enclosed and fitted with cord and plug. Belt protected by a pressed steel guard

Wringer swings to any position. Shielded cog wheels. Patent release instantly removes pressure from rolls.

Angle iron bench, extension folds up. Heavy casters.

Aluminum dasher does not tear the clothes. Cut gears eliminate noise and are either housed or shielded

Cycles	Voltage	Packed	Weight	Each
40 and 60	110	crated	269 lbs.	**$90.00**
Without motor		crated	227 lbs.	**70.00**



Quality. Hand Power

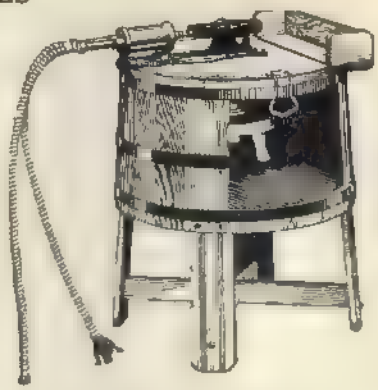
Cypress tub, corrugated side and bottom

Hardwood legs securely cross braced

Safety dasher does not tear the clothes

Perfectly balanced as to fly wheel, cut gears, etc Ball bearings. Double socket for handle, permitting operation either sitting or standing

Packed, crated, weight, 101 lbs.... ... . each, $22.50



Ajax. Water Power

Cypress tub. Corrugated side and bottom. Two ply over lapping lid. Holds 22 gallons of water, drains at bottom.

Rust proof brass motor operates at 20 pounds or more water pressure.

Hardwood legs securely braced with cross pieces and steel rods

Safety dasher does not tear the clothes

All inside castings are galvanized and rust-proof

Packed, crated, weight, 79 lbs. each, **$25.00**

EXTRA HOSE

For Ajax water power washing machine

For	Length	Packed	Weight	Each
Inlet	3 ft.	1	1¼ lbs.	**$1 50**
Outlet	3 ft.	1	1 lb.	**1.25**

VACUUM WASHER

The Rapid

Heavy bright tin, no solder. Hardwood handle. May be dried on stove without danger of melting.

Downward stroke forces air, steam and water through the fabric, causing a vacuum. Finest fabrics are not injured

Packed, 12, weight 30 lbs.. each **$1.00**

WASHING MACHINE DRAINER

No. 400 Siph-O

One 5 foot and one 15 inch red corrugated hose sections, both fastened to faucet connection. 15 inch section has a hose clamp slip on connection for faucet

"Watch Them Sell"

Here is the popular mechanical pencil that is sweeping the country with its sales. Combines all the good points of plain wood and mechanical pencils. Highly polished wood exterior with simple, trouble-proof mechanism. Looks better—writes better—is lighter, more perfectly balanced, and can be refilled easier than any other mechanical pencil.

Everybody buys Autopoint Pencils. Dealers cannot stock them fast enough. Put a display in your window and watch them sell.

MOTO-METERS

BOYCE

The Boyce Moto-Meter is a heat indicator, mounted on the radiator cap of your car so that the radiator temperature is at all times visible while you drive It absolutely insures the vital part of your car, the motor, against damage, and by its use you can tell instantly when the radiator needs water, when the lubricating system needs more oil when the fan belt breaks or slips, when there is dangerous heat congestion anywhere throughout the motor

DE LUXE MODEL

Identical in every respect with the Standard, except that it is heavily silver plated and highly finished. Size 3¼x6 inches.
Regular equipment includes a Schlaich lock.

	Wt. each	Each
De Luxe	1 lb	$15.00

One in a box; ten in a carton

STANDARD MODEL

A perfect heat recording instrument, with extremely broad ribbon bore thermometer tube. Size 3¼x5¾ inches.

	Wt. each	Each
Standard Model	1 lb.	$10.00

One in a box, ten in a carton.

UNIVERSAL MODEL

Slightly smaller than the standard model, finished in all nickel. Beveled crystals. Size 3x5 inches.

	Wt. each	Each
Universal Model	¾ lb.	$7.50

One in a box; ten in a carton.

UNIVERSAL MODELS WITH CAR NAME PLATES

We carry in stock the following Universal models, equipped with car name plates: Buick, Dodge, Hupmobile, Oldsmobile, Studebaker and Stevens

JUNIOR MODEL

Very accurate and suitable for medium sized cars. Size 2¾x1¾ inches

	Wt each	Each
Junior Model	½ lb	$5 00

One in a box; ten in a carton.

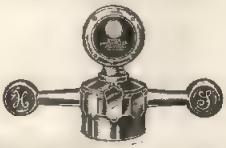
MIDGET MODEL

Designed especially for use on small cars. Polished nickeled frame, with beveled crystals both front and rear. Identical with more expensive Boyce Moto-Meters, for the larger types of cars. Size 3½x4¼ inches.

	Wt. each	Each
Midget Model	¾ lb	$3 50

One in a box, ten in a carton.

FORD ARISTOCRAT MODEL



Recording instrument same as on the Ford special model, but is equipped with a special Schlaich Lock Cap, which not only prevents theft, but also serves as a handsome ornament. Size 7¼x4¼ inches.

	Wt. each	Each
Aristocrat	1½ lbs.	$7.00

One in a box; ten in a carton.

INSERTS FOR ARISTOCRAT MODEL MOTO-METERS

By using these Special Inserts with the Ford Aristocrat Moto-meter and radiator cap it is possible to attach the Ford Aristocrat Model to any of the cars shown below
The threaded part of the Insert is screwed on the radiator opening and the moto-meter is held in place by a set screw.

No.	For car	Wt each	Each
F11A	—Star	5 ozs.	$0.50
F11	—Chevrolet	2 ozs.	.50
F18	—Maxwell and New Overland	3 ozs.	.50

One in a carton.

MOTO-METERS

BOYCE

FORD SPECIAL MODEL

With Special Ford Cap

Designed especially for use on Ford cars. It has a broad thermometer tube, which is easily readable even at a distance. Beveled crystals both front and rear. Finished in polished nickel. Size 2½x4¼ inches.

	Wt. each	Each
Special Model for Ford	¾ lb.	$4 00

One in a box; ten in a carton.

NEW MODEL H DISTANCE TYPE

This instrument is for dashboard installation only. It has a radium treated dial, making it easily readable at night. It is extremely accurate and easily installed.

	Wt. each	Each
New Model H Distance Type	1 lb.	$12 00

MOTO-METER LOCKS

SCHLAICH

The radiator cap may be unscrewed for filling the radiator, but the lock prevents the moto-meter and cap being stolen, or forgotten after filling the radiator, as it cannot be removed from the car after chain and bar has been inserted in the radiator opening.

No.	Size	Models	Each
1	¾ in.	DeLuxe and Truck and Tractor	$2.00

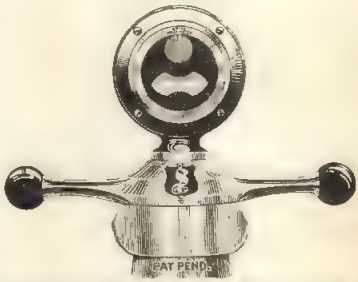
Average weight each, 1½ lbs
One in a box

LASCO SPORT



The black tips are made of a solid composition which is rust, water and acid proof and will always wipe up to a brilliant black lustre. Black and nickel monogram shields, with polished nickel cap. The cap is permanently applied to the car and is locked by means of brass cups which are expanded on top of the locking set screws, preventing their removal. The hinge is strongly braced and cannot be twisted or broken off. Opens and closes instantly on a one-eighth turn, has no keys, or locks to bother with.

PRICES DO NOT INCLUDE MOTOMETERS

	Each
Ford, Chevrolet and Star	$6.50
Junior, Standard and Special	7.00
Extra Monograms	.15

In ordering specify your make and model of car
Average weight, 1½ lbs. each. One in a box.

STANDARD

Molded from either bakelite or condensite. It looks like rubber but is as hard as flint and practically unbreakable. The top is corrugated with brass insertion, machined threads. Carried in stock for late models of popular cars.

Specify year, model and make of car when ordering.

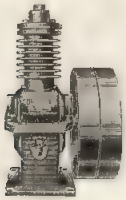
AIR COMPRESSORS

BRUNNER

MODEL 11



Bore, 3 inches; stroke, 4 inches; capacity, 5 cubic feet at 310 R.P.M. to 7.5 cubic feet at 450 R.P.M. Splash lubricated. Tight pulley has extra heavy rim and acts as a fly wheel. Operation unusually smooth and quiet for this type.

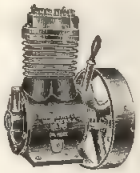
It will handle any tank up to 80-gallon capacity with motor of about 3 H. P.

Unlike other cheap single cylinder compressors, this model has all ground finishes, hammered rings, forged rod, forged crank, brass valve cages, and the usual Brunner features. It has not, however, the same grade of iron, nor the extreme accuracy and close fits of the Brunner divided load models.

Height, 22 inches; length, 14 inches; length over pulley, 18 inches (2¼-inch face); net weight, 120 pounds; shipping weight, 160 pounds; outlet for ½-inch iron pipe.

No.		Each
11	—With 14-inch Flywheel Pulley	$48 00
11A	—With 14-inch Tight and Loose Pulleys	53 00

MODEL 102



Twin cylinder 1⅛x2½ inches. Divided load type, displacing 2.6 cubic feet at 350 R.P.M. to 3.4 cubic feet at 450 R.P.M. Splash lubrication to pistons and main bearings as well as to connecting rods. All surfaces ground.

With any storage tank up to 50-gallon capacity, it can be run with ½ to 1 H. P., depending upon speed and pressure. Pressure in a 32-gallon tank can be raised from 100 pounds to 175 pounds in about 12 minutes, compressor turning at 350 R.P.M.

Special air uses, such as pneumatic tools or air driven gasoline pumps, will necessitate larger compressor, but for average use the Model 102 is the ideal investment.

Height, 13 inches; length, 6½ inches. width over two 2-inch pulleys, 10 inches. Outlet for ¼-inch pipe. Net weight is 50 pounds; shipping weight, 70 pounds.

No.		Each
102	—Without Pulleys	$55.00
102A	—With 9-inch Tight and Loose Pulleys (furnished unless otherwise specified)	61.00
102B	—With 14-inch Tight Pulley	59.00
102C	—With 14-inch Tight and Loose Pulleys	65.00
For vacuum service, common intake fitting		Extra 3.50

If sub-base, as shown in illustration, is not desired, deduct $5.00 from list price.

BELT DRIVEN GARAGE OUTFIT NO. 110

For Garages and Service Stations Housing 50 to 75 Cars

	Each
1 No. 11 Belt Driven Compressor, 14-inch Tight and Loose Pulleys	53.00
1 65-gallon 18x60-inch Seamless Air Tank (for 200 pounds working pressure)	90.00
1 Model "B" Air Gauge	3.00

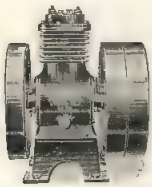
	$144.95

GARAGE AIR COMPRESSORS

BRUNNER

MODEL 105



Twin Cylinder 2½x3 inches. Divided Load. Capacity, 6 cu. ft. at 350 R.P.M. to 8 cu. ft. at 475 R.P.M.

Larger shops need a compressor of this size, and with tank of 60 to 80-gallon capacity it makes a splendid installation. Owing to the divided load design, only 1½ to 2 H.P. is required to operate this large compressor even at 200 pounds pressure.

Valves are steel, mushroom style, in brass cages. Rods are forged steel with S. A. E. white metal split bearings. A safety valve is built in each cylinder. Main bearings are bronze, ingeniously oiled. Oil gauge and filler are on exposed flank of crankcase.

Very compact, measuring only 22½ inches high, 16 inches long, and 18 inches wide over pulleys. Net weight is 184 pounds; shipping weight, 235 pounds. Outlet for ½-inch iron pipe.

No.		Each
105	—Without Pulleys or Flywheels	$100.00
105A	—With Flywheels (No Pulleys)	112 00
105B	—With 16x2½-inch Tight and Loose Pulleys and Flywheel	125 00

OUTFIT NO. 165

For Garages and Service Stations Housing 60 to 90 Cars

1	No. 105 Belt Driven Compressor, 16-inch T. & L. Pulleys and Flywheel	$125.00

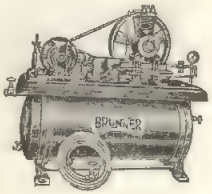
		$243.65

AIR COMPRESSOR UNITS

BRUNNER

MODEL 932



Complete automatic air plant, with 2.5 cu. ft. Brunner No. 102 compressor, ½-H.P. motor, unloader, controller, adjustable belt tightener, 32-gallon seamless steel tank, and accessories. All joints machined and locked. Every part replaceable, and accessible.

The most popular type of compressor unit is found in this Brunner model. Used the world over by accessory and tire stores, oil stations, car agencies and repair shops—everywhere, in fact, except where special pneumatic tools or appliances require greater volume of air. In average service the No. 932 will run at a daily cost of about 15 cents, and will continue in good form fifteen to twenty years.

Model 932 is silent at any pressure. Belt is doubly adjustable. Unloader-controller maintains tank pressure and relieves starting load. In fact, air supply is constant, and automatically maintained without attention or effort by the user

Weighing 430 pounds net, this model comes fully equipped. Stands 40 inches high, and measures 18x45½ inches on the floor. Shipping weight is 565 pounds. Tank outlet tapped for ¼-inch pipe line. Hose line is 25-foot length, genuine "Resistoil," with fittings.

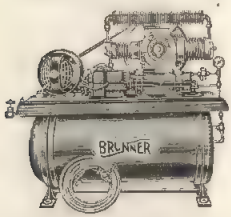
No		Each
932	—With 1-phase A. C. 110-220-volt 60-cycle motor	$325.00
932A	—With 1-phase A. C. 110-220-volt 25-cycle motor	340.00
932B	—With 1-phase A. C. 110-220-volt 40-cycle motor	340.00
932C	—With 110-volt direct current motor	325.00
932D	—With 220-volt direct current motor	325.00
932E	—With 32-volt direct current motor	330.00

Motors not listed are specially quoted on application.

AIR COMPRESSOR UNITS

BRUNNER

MODELS 939, 949 AND 969



The Brunner two-stage outfit is built with the safest and most expensive tank—drawn seamless steel, that will endure for years without developing annoying leaks or deteriorating to the point of becoming a public menace. The entire assembly follows engineering soundness, as typified by the use of such a tank. The unit, at any reasonable speed or any pressure, is silent, free from vibration, and runs smoothly without rattle or the familiar thump-thump of common two-stage outfits.

The Brunner Model 939 is the fastest-working ¾ H.P. unit built. Pressure in the 32-gallon tank rises from zero to 175 pounds in less than twenty-five minutes. A pressure rise of 25 pounds is a matter of five minutes or less. The answer is not excessive speed; it is the astonishing efficiency produced by dual valves, larger intercooler and snugly fitted, polished pistons. No other machine approaches this air delivery with a similar motor.

Equally good proportional results are had with the larger models, 949 and 969. The first of these mounts the same compressor, but with 1-H.P. motor, and with 45-gallon seamless steel air tank. The No. 969 also uses the same compressor and 1-H.P. motor, with a 65-gallon seamless steel tank. Pressure rise is produced in about equal time by all three units, as the compressor is proportionately speeded to tank size in each case. It is obvious that the smaller unit has the longest life, but the larger assemblies, running at higher speed, are nevertheless in great favor with oil stations and other busy establishments.

MODEL 939

Horse power, ¾; capacity, 3 cu. ft. per min.; tank size, 32-gallon; weight, 625 pounds; height, 40¼ inches; floor space, 19¼x45½ inches; shipping weight, 630 pounds.

	Each
1-phase A. C. 110-220-volt 60-cycle motor	$370.00
1-phase A. C. 110-220-volt 25-cycle motor	394 00
1-phase A. C. 110-220-volt 40-cycle motor	394.00
110-volt direct current motor	372 00
220-volt direct current motor	372.00
32-volt direct current motor	372.00

Other motor equipment specially quoted

MODEL 949

Horse power, 1; capacity, 4 cu. ft. per min.; tank size, 45-gallon; weight, 650 pounds; height, 45½ inches; floor space, 24x45½ inches; shipping weight, 774 pounds.

	Each
1-phase A. C. 110-220-volt 60-cycle motor	$410.00
1-phase A. C. 110-220-volt 25-cycle motor	434.00
1-phase A. C. 110-220 volt 40-cycle motor	434.00
110-volt direct current motor	412.00
220-volt direct current motor	412.00

Other motor equipment quoted on request.

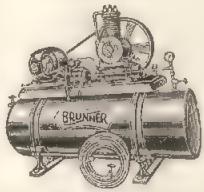
MODEL 969

Horse power, 1; capacity, 4½ cu. ft. per min.; tank size, 65-gallon; weight, 756 pounds; height, 45½ inches; floor space, 24x60 inches; shipping weight, 950 pounds.

	Each
1-phase A. C 110-220-volt 60-cycle motor	$440.00
1-phase A. C. 110-220-volt 25-cycle motor	464.00
1-phase A. C. 110-220-volt 40-cycle motor	464 00
110-volt direct current motor	442.00
220-volt direct current motor	442.00

Motors of other types at relative prices.

MODEL 965



Completely equipped, automatic, heavy duty unit for all manner of air service. 1½ H.P. motor drives Brunner No. 105 Compressor (6 cu. ft.) and quickly recharges the 65-gallon seamless air tank when automatic controller "cuts in." Motor starts "no load." All joints machined and locked.

The operation of this type outfit is as smooth and silent as an 8-cylinder motor. Nevertheless, Brunner practice of grinding all fitted joints is carried out, locked cap screws are used to clinch the power plant on the saddles, and the heavy, seamless tank is clamped in place with four heavy iron straps. Years of constant operation will not affect the rigid stability of this rugged and reliable outfit.

Has ample capacity for the largest and busiest filling station, even handling three or four air driven gasoline pumps. Pneumatic truck tires are quickly inflated from the large tank. No degree of air demand will find it unready or inadequate.

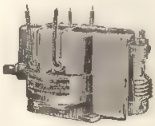
While space is not wasted, and the whole assembly is very compact, the entire unit is not small. The top of the compressor reaches 48½ inches from the floor; length over all is 65 inches, and extreme width is 22 inches. The weight, 775 pounds, is too great for overhead location. Shipping weight is 970 pounds.

No.		Each
965	With 1-phase A. C. 110-220-volt 60-cycle motor	$560.00
965A	With 2 or 3 phase A. C. 220-440-volt 60-cycle motor	539.00
965B	With 1-phase A. C. 110-220-volt 25-cycle motor	580.00
965C	With 2 or 3-phase A. C. 220-440-volt 25-cycle motor	560 00
965D	With 220-volt direct current motor	615.00

Other motors are supplied at special prices.

AUTOMATIC PRESSURE CONTROLLERS

BRUNNER



In connection with any motor driven compressor outfit up to 5 H. P. a Brunner controller will automatically maintain tank pressure at any pre-determined maximum up to 200 lbs. Usual setting is for 145 lbs. maximum and 120 lbs. minimum, but maximum setting may be adjusted. At any setting, however, the "cut-in" will be 25 lbs. below the "cut-out" pressure. The Brunner controller is furnished in two models, suited to various motors. These may be used with any motor driven outfit, Brunner or other makes. They are reliable, accurate, safe and durable. A controller saves profitable time, insures service to your customers, avoids dangerous pressures, and saves current by operating compressor only when air is needed.

Model		Each
M	For A. C. motors up to 2 H. P. 220 V (inclusive), or 110 or 220 Volt D. C. motors up to ½ H. P. (inclusive)	$ 35.00
E	For D. C. motors, ¾ H. P. to 2 H. P. (inclusive), for current up to and including 220 volts	110 00

Every Boy and Girl In Your Community Will Want a

"CENTURY" BICYCLE

Better bicycles—just read our specifications and you'll realize that no better parts or equipment can be obtained. That's why "Centurys" stay sold and give satisfaction.

Here's Why The "Century" Is Such a Good Bicycle

Construction

FRAME—20 gauge seamless tubing.
JOINTS—Flush reinforced fishtail.
CRANK HANGER—Drop forged, 1 piece.
SPROCKET—Special design, machined, polished.
SPOKES—Standard Co's best.
CHAIN—Roller, ½ inch pitch, easy riding.
CUPS AND CONES—Lathe turned from solid bar, polished.
MUD GUARDS—Steel, braced, enameled to match frame.

Equipment

COASTER BRAKE—"New Departure"
FRONT HUB—"New Departure."
TIRES—U. S. chain tread.
SADDLE—"Troxel."
HANDLE BARS—"Kelly" triple plated, motorcycle rubber grips.
PEDALS—"Surplus," rubber tread, ball-bearing.
STAND—Channel iron, latches to mud guard.

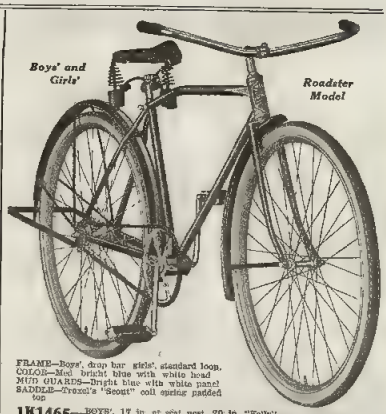
Finish

The "Century" rich, smooth, lasting finish is obtained from anti-rust and primary coats, hand rubbed and sanded, then finished with deep rich enamels, applied with air brush and over-baked to a hard china-like surface.

Trim

All "Century" bicycles have a white head with spears, outlined and striped in harmonizing colors.

Century



Boys' and Girls' *Roadster Model*

FRAME—Boys', drop bar girls', standard loop.
COLOR—Med. bright blue with white head.
MUD GUARDS—Bright blue with white panel.
SADDLE—Troxel's "Scout" coil spring padded top.

1K1465—BOYS', 17 in. st. seat post, 20 in. "Kelly" handle bars, 3 in. extension, 26 in. tires, 5½ in. crank hanger, 1 in. crate. Each ***25.00**

POST HOLE AUGERS

CRUSO

CRUSO, Vaughan pattern, 1 in. wrought steel pipe standard, malleable iron tee and point, two forged steel blades, hardwood handle, length over all 48 in. Works best in dry soil.

Nos.	N26	N27	N28	N29
Size	6	7	8	9
W't, doz., lbs.	60	65	70	75
Per dozen	$27.00	28.00	29.00	29.00

THIRD DOZEN IN A BUNDLE

FENN'S PIPE HANDLE

Made of the highest grade materials, with galvanized pipe standard.

Blades high carbon steel, flexible enough so sticky soil may be loosened. When operated in sticky soil auger should not be completely filled.

Bottom end of each blade shaped correctly to lead tool into ground with very little pressure. If auger is filled full of dry earth or sand and then given a half turn, it will compress dirt against closed top and lift out dry soil.

Between the shank of each blade and the standard of the auger is an adjusting wedge. When these wedges are raised and the bolt tightened, the tops of the blades are drawn closer to the standard, which opens the blades at the bottom.

STORE LADDERS

For Factory Shipment Only

MYERS

Clear Georgia pine ladder. Varnished. Open panel sides, 5 inches wide. Malleable iron dowel tees support each step on both ends. Fixtures malleable iron. Self-adjusting trolley with 3-inch anti-rattler wheel with cushion rubber tires and turned steel bearings. Double angle steel track suspended from ceiling by lag screws. Complete with clamp, bracket and end stops.

The floor wheel or travelers are 5 inches in diameter, composed of metal sides with cushion rubber tires, clamped in such a position that they cannot become loose. They run on a steel axle without friction or noise.

Myers Ladder Complete

Width of ladder, 12 inches. Width of steps, 5 inches.

Each

Average shipping weight each, 50 lbs (any length ladder)... $29 00

Myers Steel Trolley Track

Per foot

Complete with hangers. Weight per foot, 2 lbs.....$0.80

Rubber Tires for Track and Floor Wheels

Each

Weight each, ¼ lb $0.65

Floor Wheel Complete

Weight each, 1 lb $1 40

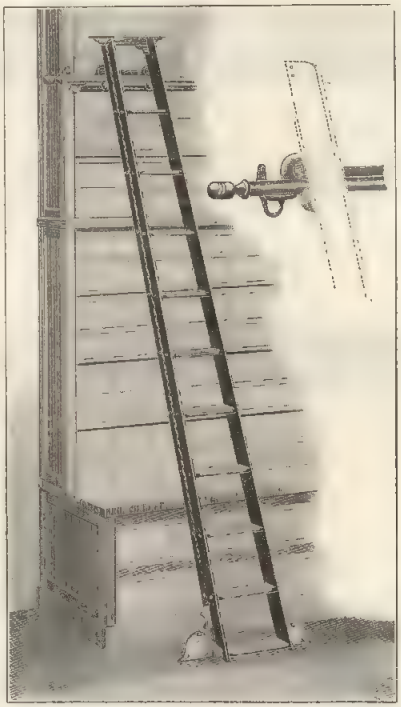
Upper Trolley Complete

Weight each, 20 lbs $12 50

Directions for Ordering Myers Store Ladders

Give exact height to ceiling and length of each track. If height of ceiling varies give height of ceiling at each end and center of each run of track.

CHICAGO



STRAIGHT. TROLLEY TYPE

Made of yellow Georgia pine with plain sides, or natural finish oak with ornamental open work sides. Japanned mountings. Consists of two wheels each at top and bottom. Track is open, permitting the use of large wheels. A special device prevents tipping of ladder, and it cannot possibly get off the track.

When so ordered the Chicago Ladders are made to turn corners or follow any crooked or curved track.

No. 9—

Each

Yellow Pine, Natural Finish, with plain sides. Shipping weight, 50 lbs. each $34 00

Selected Oak, Natural Finish, with ornamental open work sides. Shipping weight, 50 lbs. each 48 00

Per foot

Double Steel Track for Chicago Ladders, with wood center, complete with hangers, screws, etc. Weight per foot, 1 lb. $0.60

Wood ceiling strips.....20

Curves for track .....Extra 6.00

To order the Chicago Ladders, give the height of ceiling, length of each track and number of ladders wanted for each run. State whether ceiling is plastered, wooden ceiling or open joists. Ceiling strips will only be sent when expressly ordered. Any suitable strip of wood, five inches wide, will answer the purpose, and can usually be supplied by the customer and saves the freight.

STORE LADDERS

BICYCLE

For Factory Shipment Only

FURNISHED EITHER BENT OR STRAIGHT, FOR FLOOR OR BASE SHELF

Noiseless steel track on either base shelf or floor, supports the entire weight of ladder and operator, relieving all liability of ladder falling or shelves sagging. Turned pole at top guides the upper end of ladder in moving it. Top of ladder has two hooks which fit over pole, preventing it from tipping backward. Fitted with extra wide top shelf for convenience in handling stock.

Prices are for ladders 10 foot and under. For ladders over 10 foot add $2 00 per foot.

No. 1—For Base Shelf or Floor.

HOW TO ORDER BICYCLE OR IOWA LADDERS

Refer to cut on this page and give the following measurements: D to C, D to A; A to B; B to S, B to S feet and B to S inches. State length of track wanted and the number of uprights of all kinds in the shelving, and say what they are, whether solid uprights, partition boards, turned spindles or whether iron brackets are used to support the shelving. Be sure and send both a front view and the end view diagram of your shelving and tell us all you can about it. The more we know of your shelving the better we can serve you.

AUTO

No. 7 Auto

Straight. For Floor

This ladder used where it is not desirable to have track on the floor. It is guided by upper guide alone. The hooks are arranged to slide in a slot so as to adjust themselves automatically to the position of the pole, permitting the bottom of the ladder to be pulled out from the shelving for easy climbing, or to be pushed up close to be out of the way. Adapted for short runs and cramped places where room is limited. Nickel plated or japanned finished mountings, provided with smooth treads to run on bare floor. This ladder can be equipped with a "disengager," without extra charge so it can be easily shifted from one track to another.

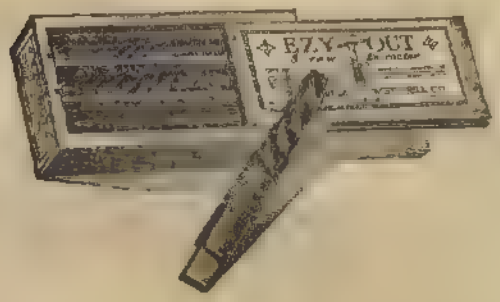
"EZY-OUT" SCREW EXTRACTORS



The removal of a broken screw has been one of the meanest of all repair jobs, and in proportion to its size, it may be one of the most expensive of breaks. Heretofore its removal has often required hours of aggravating labor—principally because the mechanic has never had anything but make-shift tools for the work.

In the "Ezy-Out" Screw Extractor, you have a tool expressly designed for the quick and easy removal of broken set and cap-screws, studs, stay-bolts, pipe fittings, etc.

Instead of fussing for hours with files and punches or drifts—as in the past—merely drill a hole in the broken screw and insert the proper size "Ezy-Out" Screw Extractor—twisting it as though tapping with a left-hand tap. The twist forces spirals to grip the sides of the drilled hole and then, as additional force is brought to bear on the tap wrench, the screw begins to "come" out—after which it is an easy matter to spin it out on its own threads just as if it had never broken off at all.

The simplicity of the job, is in direct contrast to the aggravations accompanying the time-honored, tedious method of the past. The whole operation now need consume but a fraction of the time hitherto required, and it is accomplished without endangering the threads of the hole.

They are the only tool designed solely for this work, and they quickly repay their owner, many times over, in time, trouble, tools and production saved.

No. 6590—"The Garage Set" containing extractors No. 1 to 6 inclusive as described below .....per set **$8.00**

Size No.	Diam. at Small End	Diam. at Large End	Length of Flute	Length Over All
1	1/10	3/32	⅜	2
2	3/32	5/16	⅝	2⅜
3	⅛	⅜	1	2 1/16
4	5/16	11/32	1⅛	3
5	¼	7/16	1⅜	3⅜
6	⅜	15/32	1⅝	3¾

NOTE—The best results will be obtained by using the largest "Ezy-Out" Screw Extractor possible for any given screw.

PACKED 1 SET IN A BOX, W'T EACH ¾ LBS.

AMERICAN BEAUTY ELECTRIC IRONS

Specify Exact Voltage Wanted. We Can Not Make Shipment Without This Information.

Voltages vary throughout the country. Satisfaction results when the voltage of the Electric Heating Device is in harmony with that of the circuit on which it is used, particularly the voltage of the circuit at the point where the device is connected. Most of our devices are made in the following wide voltage ranges. All electric irons, toasters, water heaters, disc heaters, percolators, tea kettles, curling iron heaters, etc., can be furnished from factory in the following ranges: 95-104, 105-114, 115-125, 190-209, 210-229 and 230-250. Stock items are for 110 and 220 volt circuits, in ordering, always specify the exact voltage of the circuit on which the device is to be used **Each device has its voltage** range stamped clearly on it—on its heating element and iron. If there is any doubt as to whether the particular device you are ordering will fulfill the requirements you have in mind, **you had better first take the matter up with us, for we cannot exchange goods once heated.**

AMERICAN BEAUTY

Stock Voltage 32, 110 and 220.

Represents the highest art of making electric flat irons. Gives perfect satisfaction, because plenty of heat is made and concentrated evenly on the ironing surface.

Guaranteed to be free from inherent electrical or mechanical defects for one year.

Size 6½×3⅜ in., 525 watts, voltage 110 or 220, w't 6½ lbs.

No. F19016E—Extra element for 32 volt irons, each★ $3.25

ONE IN A CARTON; SIX IN A CASE

LITTLE BEAUTY

Perfect for light ironing, such as handkerchiefs and laces, it is most attractive to travelers who so often wish to do their own ironing rather than trust small, delicate and choice articles to an unknown laundry. Another useful feature is the curling iron stand which comes with every iron. Curling iron tongs can be slipped into the stand and heated quickly. Curling iron tongs are not included.

Size 5¼×3⅛ in., 350 watts, voltage 110 or 220, w't 8 lbs., complete with cord and plug.

No. EE3BE—Four case lots, 24 irons, each $7.00

No. E3BE—Case lots of 6 irons, each $7.00

ELECTRIC IRONS

HOTPOINT

The iron with the hot point, cool handle and attached stand. Heating element is in two sections, arranged "V" shape on the soleplate. The sections meet at the point of the iron, thus supplying most heat where most heat is needed because, in ironing, the point is pushed forward into the damp goods.

Nickel plated, has cord attachment plug and interchangeable switch plug. Heating element guaranteed for one year.

No. 206E—575 watts, 4x6½ in., **for 110 volts,** w't 6 lbs., ...each *$6.75*

No. 42CDE—Contacts...each *$0.06*

No. 596KE—Handles.....each *$0.20*

No. 366CDE—Case halves, each *$0.15*

HOT POINT AUTOMATIC

This iron has an automatic feature, by means of which the current is cut off when the highest ironing temperature has been reached, thereby preventing waste of current.

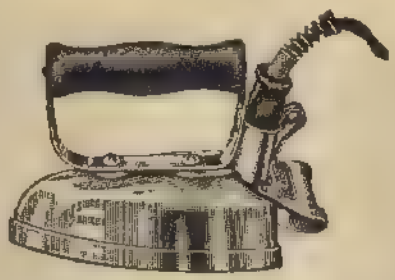
The current is restored by merely pushing in the switch button, located on the side of the iron just under the handle bow.

This iron has the hot point, cool handle, attached stand, hinged plug cord protector and the cantilever handle—all the distinctive features of the other Hot Point Irons.

No. 207E—575 watts, 4x6½ in., for 110 volts, finish polished nickel top pressed steel, w't 6 lbs., each $12.50

ONE IN A BOX

EDISON FAMILY



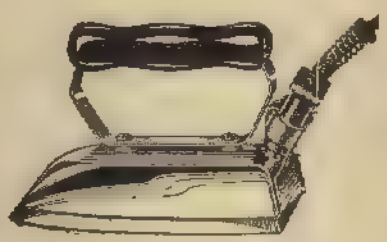
Has nichrome heating element and is identical with the Hot Point except that it has not the hinged plug or thumb rest, and is not as highly finished. Has attached heel stand.

The parts and repairs for this iron are interchangeable with the 206E Hot Point iron.

No. 215E—575 watts, 4x6½ in., for 110 **Volts,** w't 6 lbs., complete with cord and plug .....each $7.00

ONE IN A BOX

DOMESTIC



Licensed Marsh Patent.

EXTRA ELEMENTS

No. F140E—Each★ *$1.75*

SUNBEAM

Heavily nickel plated and highly polished. Heating element insulated in genuine sheet mica. Removable monel metal (non-arcing) terminal posts. Has extra quality nickel plated and polished stand.

In design and finish this is one of the handsomest irons on the market, and the heating element is guaranteed for one year. Furnished complete with nickel plated stand, peacock blue cord and plug. Weight 6 lbs.,

No. 53E—110 volt, 583 watts, each *$7.50*

No. F053E—82 volt, each★ *$8.00*

ONE IN A CARTON; SIX IN A CASE

UNIVERSAL

The Universal Round Heel, bevel edge iron was designed to overcome the serious fault of "gathering or wrinkling" the material on the back stroke of the iron. It "fits the work" and adopts itself to the many gathered parts of womens and childrens garments.

Heating element guaranteed for one year.

No. 909E—One piece seamless brass nickel plated hood, nickel plated base, ebonized handles, 110 volt, 580 watts; Complete with 6 ft. cord and plug and reversible heat proof standard, w't 6¼ lbs....each $9.10

ONE IN A BOX

Voltage Desired Must Be Specified in Ordering.

★ Items Marked Thus ★ Are Shipped From Factory Only.

WAAGE THREE HEAT ELECTRIC IRONS

NEW MODEL

The iron with the patented heat regulation, which can be used for all classes of ironing.

The high heat does the work of a 9 lb. iron, adapted to the heaviest work, such as linen table cloths, bed spreads, etc.

The medium heat does the work of any ordinary 6 lb. iron, such as starched wearing apparel. The low heat does the work of a 3 lb. iron such as silks, and delicate fabrics.

Flanges on ends prevent handle from heating. Edges are ground to avoid cutting or wrinkling. Has cast iron top which keeps the iron hot long after the current is turned off.

No. 123E—110 volt, low heat 175 watts, medium heat 450 watts, high heat 600 watts, with 7 ft. cord and plug and two piece attachment plug, w't 6 lbs. .....each $9.80

ONE IN A CARTON

WAAGE THREE POUND TOURIST IRONS

Stock Voltage 110.

No. 311E—Beautifully shaped and finished, full nickel plated, with attached heel stand, size 5¾x2⅜ in., complete with cord and plug, uses 350 watts, w't 3 lbs. ....each $6.30

ONE IN A BOX

EXTRA CORDS AND PLUGS

No. 45E—Cord complete with 6 ft. cord, Plugall Plug and attachment plug .....each $2.25

PLUGS

No. 44E—Plugall with spring to fit any iron, each .....

No. 23E—Plug only for 206E Hot-Point Iron, each $0.90

No. 25E—Plug only, for **No. 909E** Universal Irons .....each $0.50

No. 803E—For "American and Little Beauty" with contact sleeves and non-kink springs, each $0.60

No. 308E—For Sunbeam and Domestic Irons .....each $0.75

IMPORTANT!

The elements for Electric Flat Irons and Heating Appliances are guaranteed for one year only, if you have any elements burn out during that time, and wish them replaced, it will be necessary to send to us or to factory, the old element, if replacement is to be made no charge. None of the factories will supply new elements free, unless defective ones are returned.

Presentation Series

The Presentation Series of Elgin Watches is the last word in the Gift Idea as applied to modern business and social requirements. * *

All models of this series come in de Luxe gift boxes. The velvet plaque is removable, making a handsome cigarette or jewel box. * * *

THE Presentation Series of Elgin Watches embodies the new 19 Jewel C. H. Hulburd Movement—in the 12-size extremely thin bridge model.

All watches of this new series have the Invar-Steel Balance, which minimizes temperature variation and makes for remarkably accurate timekeeping. Eight Adjustments, within exceptionally narrow limits.

Solid silver embossed dial, with raised gold figures.

THESE superfine movements are cased in a pleasing variety of new and exclusive designs in White, Green and Yellow Gold. Each individual Presentation Watch is a distinctly different creation. Dial and hands are varied to blend with the design of the case.

Prices of Presentation models Range from $300 to $500 according to design of case.

All watches of this series are made of the finest obtainable materials, finished and engraved by Elgin's most skillful craftsmen.

Elgin High Grade Watches

(Complete Watches)

The CORSICAN

$175—

SERIES of 12-size thin model Elgins—with the characteristic Bow "shaped like Napoleon's campaign hat" — has become very popular. The movement is the Lord Elgin 21 Jewel, with 8 Adjustments and finest craftsmanship throughout.

Sterling silver dial, with beautiful new glazed finish, and hands designed in harmony with the raised gold numerals.

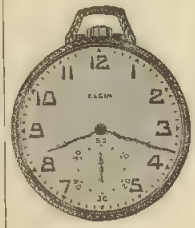
Three Corsican models, in 14K Gold. All retail at $175 All come in handsome individual gift boxes.

In Green Gold with White Gold Bezel and Back
In White Gold with Green Gold Bezel and Back
In All White Gold
$228.58

(Complete Watches)

The CLASSIC

$150—



THE Classic Series of 12-size thin model Elgins presents the 19 Jewel Lord Elgin Movement, with 8 Adjustments and exquisite workmanship throughout

The new Classic case is of original design, beautifully balanced, and comes in two finishes —14K White Gold and 14K Green Gold. The glazed finish back and the fine border engraving are new and attractive.

The dial is of silver, with raised gold numerals and hands that conform to the dial design.

Both Classic models retail at $150 and come in handsome gift boxes, $155.02

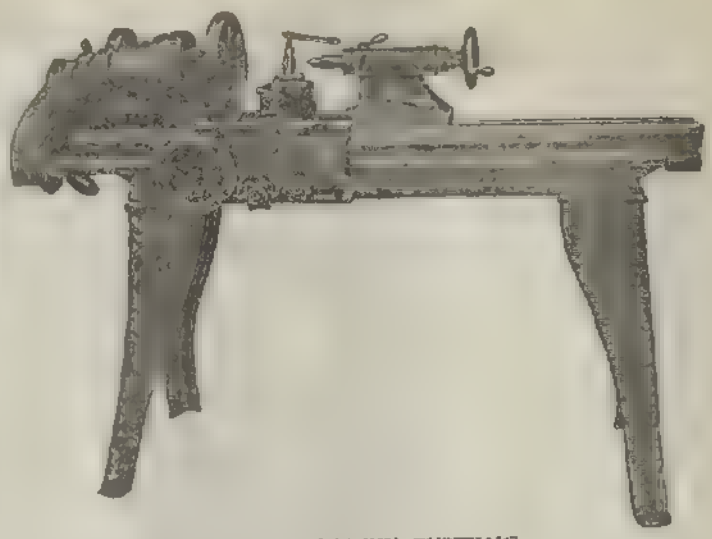
GLOBE



15-INCH SCREW CUTTING

Especially Adapted for Garage and Machine Shop Use; Will Handle All Lengths of Automobile Shafts and Axles and Cranks for 6 Cylinder Engines, in Automobile Work to the Highest Degree of Accuracy.

Carefully built from Highest Quality Materials; All Castings are of the Finest Grey Cast Iron; Main Bearings are of Phosphor Bronze; Cut Gears and Accurately Turned Bearings Assure Long Wear and Smoothness in Operation.

The Globe 15-inch Lathe, is Equipped with Automatic Power Cross Feed and Automatic Longitudinal Feed of Carriage which can be Engaged Only One at a Time. The Lead Screw is Split and Driven by Worm, the Thread of the Lead Screw is not Used and Worn out in Ordinary Turning, but is Used Only in Thread Cutting. The Half Nut is of Sufficient Length to Produce an Absolutely Accurate Thread.

Bed is Rigid, Cross Ribbed by Heavy Box Braces Cast in At Short Intervals Entire Length; Has Three V's and One Flat Way for Front Bearing of Carriage and Tail Stock. Rack is of Steel, Cut from the Solid Bar.

Head Stock is Equipped With Improved Reverse, Spindle Cone has Four Steps for 1 3/4 inch Belt. Spindle is of Special Spindle Steel Accurately fitted, has a 1 1/8 inch Hole its Entire Length. Centers are No. 3 Morse Taper. Bearings are the best Phosphor Bronze with Ample Oiling [illegible] and are Adjustable for Wear.

Tail Stock is Offset to Allow Compound Rest to Swivel Parallel to Bed and is Provided with Set-Over for Turning Taper. Tail Stock Center is Self-Ejecting.

Carriage is Strong, with Wide Deep Bridge; has T Slots for Clamping Work for Milling and Boring. Both Automatic Cross Feed and Automatic Longitudinal Feed are Operated from the Front of Apron and but One Feed at a time can be Engaged. Both feeds are Driven by a Splined Screw and Worm so that **the Thread of the Lead Screw is Used for Screw Cutting Only.**

Thread Cutting. Lathe is Indexed to Cut Standard Threads from 4 to 40 Right or Left, Including 11 1/2 Pipe Thread, and by Compounding the Gears furnished Many Other Threads Can be Cut.

Graduation The Compound Rest is Graduated in Degrees. The Cross Feed Screw has Micrometer Thread and Collar Reading to **One-thousandths** of an inch.

Equipment Consists of Large and Small Face Plates, Plain or Compound Rest, Two Steel Centers, Center Rest, Change Gears, Adjustable Stop for Screw Cutting, a Set [illegible] Cross Gear Guards Complying with Labor Commission Requirements, Necessary Wrenches and Oil [illegible] Friction Countershaft.

High Grade Kitchen Cabinets

POLISHED METAL AND WHITE PORCELAIN SLIDING TOPS

Complete With Glass Jar Equipment

Clean. Sanitary. Durable.

Exceptional Finish

Nickel Trimmed

Sliding Top

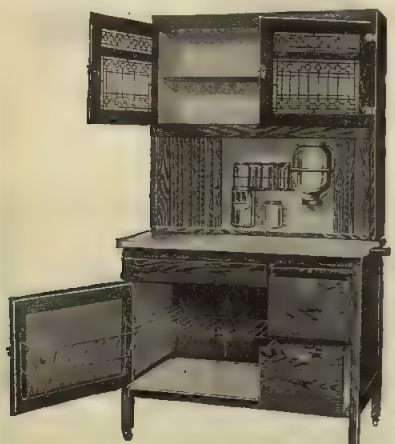
Metal Base Pan.

This kitchen cabinet is of modest proportions, neatly nickel trimmed and fitted with nickel refrigerator hardware. Completely equipped with glass jars. Interior of top compartments smoothly white enameled. Drop roll curtain allows unobstructed working surface inside. Roll floor bin with sifter. Height, 70 in., width, 40 in., depth, 26 in. Weight crated, 330 lbs.

No **28-32M/109** Polished metal top..... $63.00
No **28-32F/109** White porcelain top..... 71.00

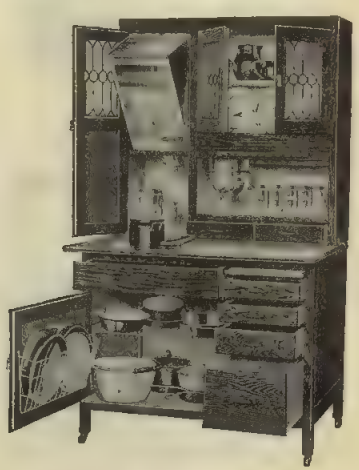
The latest design in kitchen cabinets. A work guide and cabinet combined. Nickel trimmed refrigerator hardware. Drop roll curtain. Two tray drawers. Large lower cabinet. Metal floor bin. Top cabinet similar to our No. 74-16M/109. Full glass jar equipment. Metal bread and cake drawers. Handy revolving and adjustable seat attached. Beautiful and very practical.

No **75S-35EM/109** Polished metal top..... $88.00
No **75E-35EP/109** White porcelain top..... 96.00



This is a very desirable cabinet because of the enlarged upper cabinet compartment. The floor bin has been omitted and placed in the second drawer with bread board in the lower drawer. Side roll front curtains allow maximum working space on the sliding top. Nickel trimmed. Interior of top compartment white enameled. Complete glass jar equipment. Height, 70 in.; width, 40 in., depth, 26 in. Crated weight, 310 lbs.

No **42-30M/109** Polished metal top..... $52.00
No. **42-30F/109** White porcelain top..... 57.00



A cabinet complete in every detail. An exceptionally large drawer space—seven drawers. Large lower cabinet space with shelf and bracket. Metal bread and cake drawer. Sliding top. Roll front curtain. Glass front inclining floor bin. Complete glass jar equipment. Interior of top compartment white enameled. Height, 70 in. width, 40 in. depth, 26 in. Crated weight, 360 lbs.

No **74-16M/109** Polished metal top..... $76.00
No. **74-16F/109** White enameled top..... 84.00

These styles may also be obtained in all white enamel finishes. Write for prices. F. O. B. Northern Indiana factory.

OUR NEW SNOW WHITE KITCHEN TIME-SAVER

This Cabinet is complete in every way and in addition has the advantage of being one of the best constructed on the market.

Specifications

Height, 5 ft. 8 in.; width, 3 ft. 5½ in. Depth, top, 12 in.; base, 2 ft. 1 in. Exclusive roller bearings. Complete enameled in snow white. The most attractive cabinet made.

No. T6½/108 "Snow White" Cabinet. Each...$80.00

F. O. B. factory.

White Enamel Inside and Outside.

Nickel Plated Refrigerator Hardware.

Beautiful. Sanitary. Durable.

Dust-Proof Construction.

This cabinet, like the others, is made of kiln dried softwood, carefully prepared and enameled, which will not check or peel when subjected to the heat and moisture of the ordinary kitchen. All doors are white enamel paneled. Entire cabinet is nickel trimmed, fitted with refrigerator hardware. Front drop roll curtain. Complete glass jar equipment. Metal bread and cake drawers. Sliding top. Metal base pan in lower cabinet. Tilting flour container with sifter.

No. 28E-26EM, 108 Polished metal top $68.00
No. 29E-26BP, 108 White porcelain top 73.00

This is a very practical and attractive cabinet. Note the extra roomy compartments on account of omitting flour bin. The two deep drawers in the base are for flour and bread. The two large doors in the upper cabinet are fitted with Florentine glass. Nickel trimmed. Glass jar equipment. Inclining white enameled wood bin for sugar. Full sliding top, food chopper block cutting board, wire trays and shelf metal base pan. Height, 70 in.; width, 40 in.; depth, 26 in. Weight crated, 210 lbs.

No. 43E-30EM, 108 Polished metal top $78.00
No. 43E-30BP, 108 White porcelain top 83.50

F. O. B. Northern Indiana Factory.

PORCE-NAMEL

(Trade Mark Registered)

"THE BETTER KITCHEN TABLE"

F. O. B. Indiana Factory

NOTABLE FEATURES:

"Better Kitchen Tables" must not be confused with kitchen cabinets The hardwood construction and 3-coat finish of "Better Kitchen Tables" are of such a different and higher type that there is no comparison

Backs, Bottoms, Ends and Doors are full 3-ply panel construction

Backs and Ends are finished just as well as the fronts This is a special feature and permits the housewife to set her "Better Kitchen Table" in the center of the kitchen and work around it.

Cupboards, also compartments for flour bins, bread and cake drawers have tight bottoms and sides, making them dust proof. Cupboards are finished inside

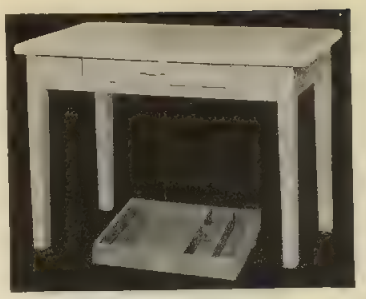
Bread and Cake Drawers and Flour Bin are metal throughout, including covers. Wood front is securely fastened to metal end.

Chopping Block is made of hard maple 1⅛ in. thick, 11x16 in.

Kneading or Mixing Board is made of whitewood ⅝ in. thick, 17x18 in. Has end cleats to prevent warping

Bracket for food chopper is furnished with all "Better Kitchen Tables" when fitted with "Alba-Iron" porcelain top.

Seats are 11 in. in diameter. Swing on arm, revolve on rod. These seats are an exclusive feature and have many advantages over the wood stool commonly used in kitchens.



PORCE-NAMEL—"The Better Kitchen Table"

Three-coat enamel finish. Nickeled trimmings. 2¼ in. solid tapered legs. Drawer full dove-tailed, 18x18 in., boxed in 3 ply bottom Shipped K. D. Weight, 75 lbs.

Built of the Best Kiln-Dried Lumber, Accurately and Perfectly Constructed by the Most Expert Workmen, So That There is Absolutely No Danger of Warping, Swelling, Cracking or Getting Out of Shape. This Means That the Drawers Will Always Slide Easily, That the Various Compartments and Interior of the Whole Cabinet Will Remain Free From Unsightly Cracks or Crevices; Ant Proof Casters.

This Line of Cabinets Has All of the Compartments and Accoutrements Known in Such Pieces of Kitchen Furniture. Each is Supplied With a Complete Set of Glassware, Consisting of Five Spice Jars, One Tea, One Coffee and One Large Bin for Sugar. Except in Instances Where the Latter is Wood. Then There Are Two Flour Bins, Bread Boards, Meat Chopper Blocks, Etc., Especial Care Being Used to Keep All Compartments Dust Proof.

The Tops are Polished Metal or White Porcelain, Forming a Rare Combination of Beauty and Usefulness.

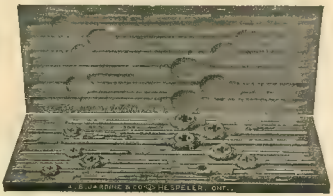
SCREW PLATES

JARDINE LIGHTNING SCREW PLATES

FULL STOCKED



IN HARDWOOD BOX

Furnished with "V" Oversize or U. S. Standard Thread

Each Die is in a Separate Stock and the Stocks of length proportionate to the size of Die. The necessary Tap Wrenches go with each set. Always ready; no changing Dies in Stock. Every Die in the Set can be in use at one time if required. Each Die is held firmly by Screws, and is easily and quickly adjusted to size. Each Stock is provided with a Guide Collar, to lead the Die straight on the Bolt. The Dies have clearance on the face, as well as the underside, and can be used to cut up to a shoulder without alteration or adjustment. There is no plate or other projection on the face of the Die to prevent it cutting right up to a shoulder if required.

	Per Set
Set No. 20—Cuts ¼ to ¾ inch, 7 Stocks, 7 Dies, 7 Taps, 1 Tap Wrench	$ 67.00
Set No. 25—Cuts ¼ to 1 inch, 9 Stocks, 9 Dies, 9 Taps, 2 Tap Wrenches	110.00

Specify Style of Thread required. We will send U. S. Standard unless otherwise ordered

JARDINE LIGHTNING DIES

Used with Sets Nos. 20 and 25

SCREW PLATES

JARDINE SPEED SCREW PLATES

FULL STOCKED

Furnished with "V" Oversize or U. S. Standard Thread

Per Set

Set No. 42—Cuts ¼ to ¾ inch, 7 Stocks, 7 Dies, 7 Taps, 1 Tap Wrench..... **$ 67.00**
Set No. 45—Cuts ¼ to 1 inch, 9 Stocks, 9 Dies, 9 Taps, 2 Tap Wrenches..... **110.00**

Specify style of Thread required. We will send U. S. Standard unless otherwise ordered

JARDINE ADJUSTABLE SPEED DIES

Used with Sets Nos. 42 and 45

The "Speed" is an Adjustable Spring Die, adjusted by means of a Taper Head Screw and Taper Nut in the open side of the Die. The Die is in one piece, being cut through on one side only, so that the two sides cannot get out of alignment with each other. It is held firmly in the Stock by Four Screws, one behind each Cutter, giving perfect support to the Cutters and rendering it as rigid and strong as a Solid Die and also freely adjustable.

Size, Inches.....	¼	5/16	⅜	7/16	½	9/16	⅝	¾	7/8	1	1⅛	1¼
No. of Threads.....	20	18	16	14	12-13	12	11	10	9	8	7	7

KING AIR RIFLES

1909 JUNIOR SINGLE SHOT

Blued finish steel barrel and frame, walnut stock, good sights, perfect action, shoots BB shot, length 29 in., w't per doz. 18 lbs.

No. 5010—Per dozen $14.40

ONE DOZEN IN A CASE

SINGLE SHOT

Lever action, made of one piece blued finish steel, black walnut stock, carefully adjusted sights, shoots BB shots and darts with accuracy and good penetration, length 31 in., w't per doz. 25 lbs.

No. 5021—Per dozen $24.00

ONE DOZEN IN A CASE

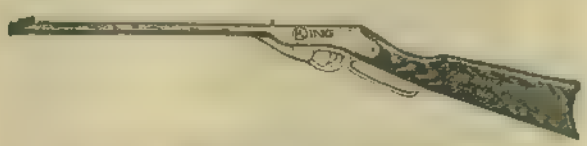
MODEL 17, SINGLE SHOT

The new "King Breech Loading Air Rifle", is the first really good air rifle, at a moderate price, that will shoot darts as well as steel and lead shot with accuracy. It "breaks" about the center of the rifle for loading purposes, has an automatic locking device and is built very substantially.

Equipped with a very practical safety trigger. A deep notch in the trigger permits it to "bite" on the lower part of the frame and it is impossibe for the plunger to slip off the trigger when gun is cocked. This, however, does not at all interfere with the pull of trigger, which is very smooth.

No. 5011—Barrel and all metal parts blued, stock of walnut, neatly finished, length over all 32 in., w't per doz. 27 lbs. .....per dozen $32.00

ONE DOZEN IN A CASE



500 SHOT AUTOMATIC REPEATER

Lever action, automatic repeater, shoots 500 times without reloading, made of best grade highly polished blued steel, with barrel and frame of one piece, walnut stock, open rear sight. Shoots BB Air Rifle shot with accuracy. Length 31 in., all parts interchangeable. W't per doz. 25 lbs.

No. 5022—Per dozen $28.00

ONE DOZEN IN A CASE

KING AIR RIFLES

KING 1,000 SHOT AUTOMATIC REPEATER

Lever action, automatic repeater, shoots 1,000 BB shots without reloading, made of best grade, highly polished blued steel with barrel and frame of one piece, selected black walnut finish stock, carefully adjusted sights. Length 35 inches. This model is identical in appearance to No. 5022 excepting that it is about 4 in. longer and has a heavier stock. Weight per dozen about 29 lbs.

No. 5055—Per dozen $32.00

KING POP GUNS

KING RAPID FIRE

Blued finish on all metal parts, stock and hand piece of polished black walnut loads automatically, makes a loud report with both forward and backward movement of hand piece, no flying cork, safe, sane and substantial, length over all 27 in., weight 31½ oz. each; weight per dozen 10 lbs., weight per case 36 lbs.

No. 5015—Per dozen $14.40

ONE IN A PASTEBOARD BOX

SINGLE SHOT KING SAFETY LEVER

Lever action, one piece, blued steel barrel and frame, black walnut stock, shoots a cork, which is attached to a string and makes a loud report, length 17 in., w't 7½ oz.

No. 5014—Per dozen $4.00

SIXTH DOZEN IN A CASE

KING LONG DISTANCE

Blued finish steel barrel, black walnut stock, shoots a cork at end of string and makes a loud report, length 21 in., w't 1 lbs.

No. 5019—Per dozen $12.00

SIXTH DOZEN IN A CASE

BENJAMIN PUMP AIR RIFLE

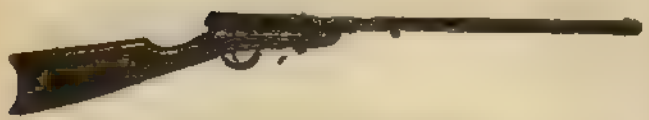
TAKE-DOWN, SINGLE SHOT

Nickel plated barrels, walnut stock, single shot take-down, larger barrel is the pump and air chamber, smaller one is the shooting barrel, length 37 in., w't 2 lbs.

No. 5025—Per dozen $80.00

ONE DOZEN IN A CASE

QUACKENBUSH



TAKE-DOWN, SINGLE SHOT

No. 7—Shoots strong and accurately, 17-100 felted slugs, BB air rifle shot or 17-100 darts, 17 in. round barrel, blued finish, metal parts all steel except inner barrel which is made of brass, American walnut stock, nicely finished, action and trigger gray blue finish, length over all 39¼ in., w't each 2¾ lbs. .....per dozen $129.60

By simply pushing in the barrel the gun is cocked and the breech opened for handy loading. An excellent arm for small game, also well adapted for target shooting.

ONE IN A BOX WITH SIX STEEL DARTS AND THREE FANCY PAPER TARGETS

No. 17-100—Felted slugs for No. 7 Quackenbush and small bore rifles .....per 1000 $2.30

Felted slug prevents leakage of air, desirable for accurate shooting.

ONE HUNDRED IN A BOX

AIR RIFLE DARTS

No. 47—Sharp steel points, with assorted colors, red, yellow and blue flight guides, w't per gro. ⅛ lb., per gross $4.00

ONE DOZEN IN AN ENVELOPE

AIR RIFLE SHOT

STEEL, BULL'E EYE

Put up in strong paper tubes, 225 pellets in a tube, carries further, penetrates deeper, more uniform in size and superior to any other, with the exception of the Daisy "Pump," it fits all air rifles.

Less Than Case Lots.

No. 13—In tubes, w't per doz. 2 lbs., per dozen tubes $0.90

Case Lots.

No. T14—In case lots of 100 tubes, w't, case 22 lbs. .....per case $7.00

Five Case Lots.

KOHLMANN GRAND PLAYER

Features of all our Players: Five-point Frictionless Motor; Divided Hammer Rail; Graduated Lever Expression; Scientifically Perfect Player Action; Positive Governor that insures perfect tempo; Special Transposing Device that regulates tone to five different keys for vocal accompaniment.

WHY YOU SHOULD SELL PIANOS

Our records of sales are proof positive of the high quality and merit of the Kohlmann Pianos We have customers who have sold the Kohlmann for the past ten years, meeting every kind of competition, and are today meeting the great success in the piano field Jewelers are rapidly coming to realize that pianos are easily sold if displayed in their stores. Many jewelers do not carry a stock, but take orders from the one or two samples carried This means a handsome profit at the end of the year from a very small investment. All Kohlmann Pianos are noted for their fine workmanship and tone qualities

Specifications—Newly designed handsome case, finished in mahogany and selected quartered oak, with sliding doors. Colonial trusses and pilasters.

Seven and one-third octaves. Three strings in unison and overstrung bass, full bronze plate, bushed tuning pins, nickel plated brackets double repeating action, pin block made of several layers of hard rock maple, direction of grain alternating successively, convex sounding board, imported wire, and Empire top

Kohlmann Parlor Grand

All Kohlmann Pianos are made with the understanding that quality is never to be slighted to make a low price. Cheaply constructed pianos are not only very expensive to keep in condition, but are never satisfactory. It is to your interest to sell your customers an instrument that will mean added sales for you in the future. You can be sure of a growing piano business if you show the Kohlmann. Every one fully guaranteed.

KOHLMANN PARLOR GRAND

This instrument is beautifully designed, pleasing in its appearance, having hand-carved trusses, plainless and top frame, which gives this piano a very symmetrical and attractive appearance. Is massive in its construction, double veneered inside and out; furnished in beautiful walnut, mahogany and selected quarter-sawed oak veneers, and lined throughout with birds-eye maple. A very substantial back made of six hardwood posts, laminated pin block, consisting of several layers of quarter-inch quarter-sawed Adirondack rock maple, crossing one another at right angles. Sounding board of the best quality of spruce and ribs of the same material, which are notched into the lining. The tie blocks and arms are all laminated construction. Keyboard is so constructed as to withstand all atmospheric changes.

This instrument is equipped with full bronzed plate reaching from top to bottom, bushed tuning pins, copper bass, music wire of German importation and imported German tuning pins. Is equipped with splendid triple repeating action, best quality of 12-pound hammers, and ivory keys.

Height, 4 ft. 9 in., width, 5 ft. 3 in., depth, 2 ft. 3 in.

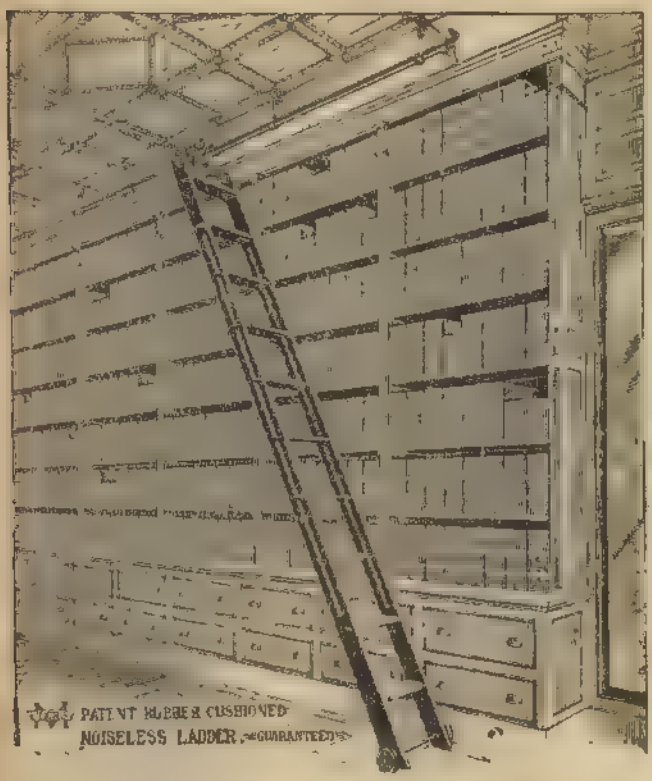
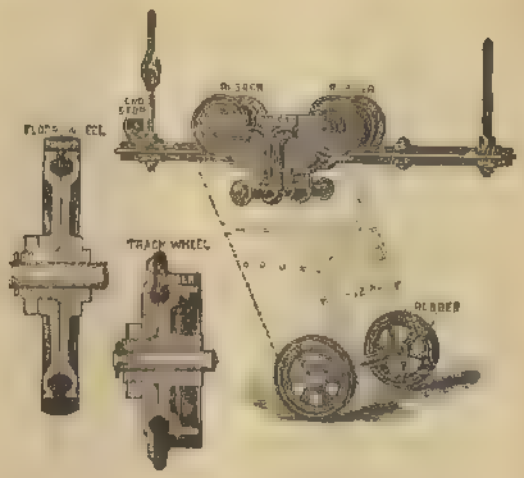
MYERS CUSHION TIRE STORE LADDERS





No. F20—Ladder and Trolley complete, average w't 60 lbs.★ .....each $36.00

No. F30—Truck, complete with hangers, w't per ft. 2¾ lbs.★ .....each $0.55

Do not forget to give height of ceiling. If height of ceiling varies give the height at each end and center of each run of track. Give length of each run of track.

DESCRIPTION

The track is the well known double angle steel rail, which is very neat and strong, and is suspended from ceiling by means of lag screws, either jointed or rigid or by flanged plates and wood screws. By this means the track is placed close to the ceiling and can be leveled on an uneven ceiling without the least trouble, and without any blocking or bridging, as is the case in many other tracks.

The ladder is constructed of the best clear Georgia pine, nicely finished, filled and varnished, has open panel sides 5 in. wide, steps 5 in. wide. Each step is supported at each end with a special malleable dowel tee, which makes the strongest construction possible. The width of the ladder is 12 in.

The trolley is self-adjusting and made of malleable iron, fitted with turned steel bearings and 3 in. anti-rattler wheels turned and bored on lathe and fitted with special rubber tires.

The floor travelers are 5 in. in diameter, composed of metal sides with rubber cushion tires clamped in such a position as to be impossible to get off or come loose. These wheels are placed on a steel axle which revolves with one of the wheels, the other running loose. In this manner the ladder will adjust itself to the floor. With this style trolley, which is noiseless, a great objection in other ladders is overcome.

When the ladder is too long for ceiling, cut off at the bottom and replace the lower traveler shaft by boring new holes at the proper point so as to have the steps of the ladder level.

Each	$40.00★	42.00★

Above Prices Do not Include Track. See Track Descriptions and Prices Below.

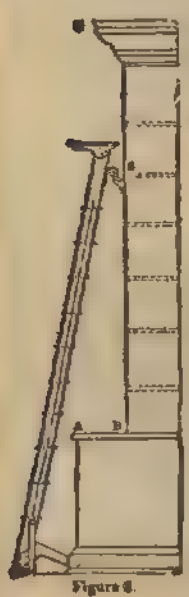

Figure 3.

Bicycle ladders have but two wheels, the track is at the bottom, either on the base shelf or on the floor, so that the entire weight of the ladder and operator is supported from below on a solid foundation and not suspended, holding operator and ladder in perfect balance and eliminating all liability of the ladder sagging the shelving.

A light turned pole guides the upper end of the ladder in moving it. Stout hooks fit over this pole to prevent the ladder from tipping backwards, but not a pound of weight rests on the pole.

Operator stands directly over the wheels, there is no side friction at all and ladder travels as easily as any other bicycle.

The noiseless rail is yielding and resilient, absorbing all vibration due to operation of ladder.

The auto ladder requires no track but runs on flat wheels.

It can be set at any angle or pushed close to the shelving when not in use. It is particularly adapted to short runs, cramped spaces or sloping, uneven floors. The adjusting feature allows guide rail to be placed opposite a shelf regardless of being parallel with the floor.

Track.

No. F22—Steel bronze rail, japanned brackets special pole★	per foot	$0 50
No. F24—Noiseless Fibre rail, japanned brackets, special pole★	per foot	.60
No. F26—Noiseless or nickeled rail, nickel brackets★	per foot	.70
No. F28—For auto ladders, japanned brackets, special pole★	per foot	.40

Approximate weight ¾ lb. per foot.

Any combination of track will fit any of the above ladders, except No. 120 Auto.

No. 22 Track is always sent for Floor Track Ladders, and No. 24 for Base Track Ladders unless otherwise specified.

How to Order Bicycle Ladders. Refer to Figure 3 on this page and give the following measurements: floor to C; floor to A; A to B; and B to S. State whether ladders are to be straight or bent. State length of track wanted and the number of uprights of all kinds in the shelving, and say whether solid uprights, partition boards, turned spindles or iron brackets are used to support the shelving.

★ Items Marked Thus ★ Are Shipped From Factory Only.

MILBRADT ROLLING STORE LADDERS

Showing No. 1 bent ladder, which runs on a track fastened to shelving near the top and runs close to wide base shelf.

The Milbradt Rolling Stepladders are all made to order, and to fit each particular place, of good oak lumber, in the most artistic and neatest style, handsomely finished, are durable and perfectly safe, as they cannot jump the track. They take up the least possible space, run noiselessly and so easily, either empty or with operator upon them, that a slight push will propel a ladder the length of an ordinary store. These ladders have an extra wide shelf at the top, which affords great convenience in handling stock. All iron work on ladders, as well as the brackets to hold up steel track, is malleable, artistic and strong and aluminum finished.

No. F1—Suitable fixtures at the top to run on steel track and rubber covered rollers attached near the lower end to run against the edge of base shelf. Best for all around purposes where shelving is reasonably strong. With fixtures★ .....each **$36.00**

No. F2—For shelving that is not strongly built. Most of the weight of ladder and operator rests on the floor. Runs on a hardwood track at the top and has cushion tired wheels to run on the floor. No track required. Wit fixtures★ ....each **$36.00**

No. F10—Bent ladder that runs on a flat hard wood track screwed on top of original low shelving. When top of shelving is reasonably strong this is the most convenient way to apply a ladder to this style of shelving. With fixtures★ .....,each **$36 00**

No. F15—Trolley or ceiling ladder that suspends from a track fastened to ceiling. Has at the top, suitable iron in which paper filled wheels run noiselessly on the steel track and also has cushion tired wheels that run on the floor. Very strongly built and specially adapted for hardware stores or any place of business where heavy goods are handled. With fixtures, each★ **$36 00**

Showing No. 2 bent ladder, which runs on floor.

Approximate W't Ladder Crated 50 Lbs.

No. F11—Steel Track—For No. 1, regular strength★ per ft. **$0.70**
No. F150—Steel Track—For No. 15★ .....per ft. .70

Approximate W't Steel Track 1 lb. per Foot.

No. F20—Hardwood Track—For No. 2, complete★ per ft. **$0 50**
No. F200—Hardwood Track—For No. 10, complete★ per ft. .50

Approximate W't Steel Track 1 lb. Per Foot.

Showing No. 10 bent ladder, which runs on track screwed on top of original low shelving.

HOW TO ORDER

Ladders as Nos. 1 and 2 give the exact height from floor to top of base shelf; the exact width or projection of base shelf and then the exact height from top of base shelf to top of shelf to which track is to be fastened and the track shell be fastened to a shelf that is about 3 feet from the top.

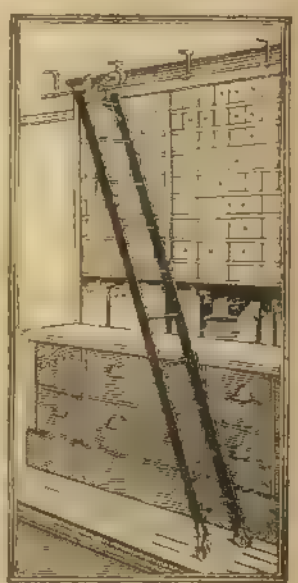
Steel track for ladders No. 1, both regular and extra strong, is 1 inch in diameter and therefore does not block up any space when fastened up opposite the edge of shelf. When ordering steel track give the total length of each line of shelving; second, give distance from center to center of uprights and state how many brackets are required to hold up the steel track. For regular steel track the brackets cannot be more than 4 ft. apart. When the uprights to which bracketts are to be fastened are more than 4 ft. apart, it is necessaary to use extra strong steel track.

Ladder No. 10, give the exact height from floor to top of base; the width or projection of base and then the exact height from base to the top of shelving or cornice on top of which track is to be fastened. Also state how much the cornice or moulding on top of which track is to be fastened, projects out over lower part of shelving.

Trolley ladder No. 15, is only necessary to give the exact height from floor to ceiling and the exact length of each line of track wanted.

To order wood track for ladders Nos. 2 and 10, it is only necessary to state the number of feet required.

For further information write for special Rolling Ladder Catalogue.



Showing No. 15 trolley or celing ladder, which suspends from a track fastened to celing.

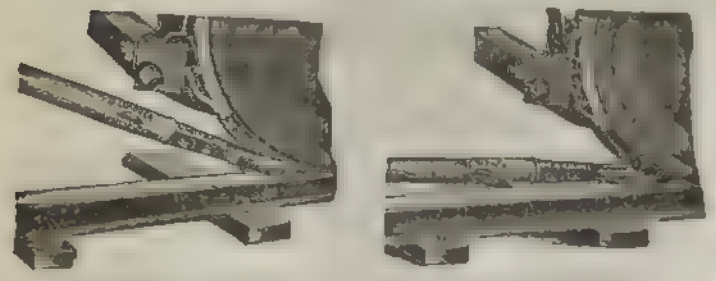
CAR MOVERS

BADGER



At Beginning of Movement — At End of Movement

The Most Powerful Device Made for Handling Freight Cars

Has Two "Never-slip" Four Cornered Spurs, which Catch the Outer Edges of the Rail where it is Soft and Not Alone on Top of the Rail which has Become Case Hardened from Contact with Car Wheels; These Spurs Can be Removed and Turned Three Times and Ends Changed Should the Edges Become Dull; By Use of the Double Spur a Double Hold Upon the Rail is Obtained and Thereby Double Resistance Offered Against Slipping.

It is also Provided with a Cam, which is Pivoted to the End of the Main Lever in Such a Way that when the Handle is Pressed Down it Lengthens and Follows the Wheel, Adding an Immense Rolling Power

So Constructed that when the Handle is Raised to Push the Mover Forward it Raises the Spur from the Rail, thus Doing Away with All Springs, which Weaken and Wear Out and Become a Source of Detriment and Trouble.

Each

No. B—Black Japanned Malleable Iron Socket and Shoe; Special Tool Steel Spurs, Hand Maple Handle, Varnished Two Coats. Length Over All 62½ inches; Diameter of Handle at Socket 2¾ inches; Weight Each 15 lbs. **$12.50**

Loose

SAMSON

Light in Weight, but Powerful and Compact, the Leverage of this Mover Being Compound, as Soon as Pressure is Brought to Bear Upon the Handle the Two Points Will Come in Contact with the Car Wheel at the Proper Rolling Distance from the Point where the Wheel Rests on the Rail and in Consequence the Car Wheel is Forced to Turn Instead of Being Lifted from Track as is the Case with the Ordinary Pinch Bar and Many Modern Car Movers.

CAUTION—When Moving Heavy Loaded Cars, Turn the Cam (0) Back and the Power is Increased Over 25 per Cent. (but the Speed is Decreased). When Moving Light Loaded or Empty Cars Turn the Cam (0) Forward and the Speed is Increased over 25 per cent. (but the Power is Decreased). When the Edge of Spur Becomes Dull, Simply Loosen the Nut on Bolt that Passes Through the Clamp (11) and Shoe (8) and Turn the Spur Over to a Sharp Edge. Keep the Opening Under the Spring (4) Reasonably Free from Dirt, Gravel, etc.

Each

No. S—Black Japanned Malleable Iron Socket and Shoe; Tool Steel Spurs; Hardwood Handle. Length Over All 5 feet 3 inches, Diameter of Handle at Socket 2¾ inches; Weight Each 16 lbs. **$10 00**

Loose

SPARK PLUGS

SPLITDORF COMMON SENSE

This Plug, Which is Really a Mica Plug and Whose Construction is Clearly Shown in the Accompanying Cut, Has Jumped Into Popularity With the Users of Gasoline Motors in a Fashion Which Leaves no Possible Doubt That the Plug is Built on the Right Lines. Those Motors Which are Equipped With Magnetos Have Found it Especially Valuable, as it Seems to be the Only Plug in the Market To-day Which Will Stand the Combined Ravages of the Intense Heat of the Magneto Spark and the Natural Heat in the Cylinder of a Gasoline Motor. Many of Our Sample Sets Have Not Been Taken Out of the Cylinders in Over a Year. The Price is Very Low, and we Make it in All Sizes and Threads.

SPARK PLUG PUMP

MAYO

The Spark Plug Core Slips Out—the Pump Slips In.

It is Adaptable for Use on all 4-Cycle Motors of 2, 4 or 6 Cylinders (Not Operative on 2-Cycle Type) and Offers at Last a Simple and Practical Way of Inflating Tires with Pure Fresh Air Without Resorting to the Laborious Work of Hand Pumping. It Pumps the Air You Breathe, Producing a Perfectly Inflated Tire not Possible with High Speed, Gear Driven, Friction Operated Tire Pumps Which are Noisy, Gear-Stripping, Expensive to Install and Which Actually Pump Only, Greasy Air Into a Tire.

Simply Remove a Spark Plug From Any Convenient Cylinder and Substitute the Pump, With the Hands Only. This is the Quickest Way to Attach the Pump to Any Motor. The Cylinder Occupied by the Pump Does Not Fire. Therefore, with a Dual Ignition System, the Ignition Wire Should be Detached From the Spark Plug Remaining in That Cylinder. For Convenience of Attaching, we Recommend the Use of Our Special Mayo Quick Detachable Spark Plug.

The Core of this Spark Plug Quickly Slips Out; the Pump Quickly Slips In. Both Operations in Two Seconds' Time.

After Connecting the Hose From Pump to Tire, the Motor Should be Started on Low Throttle and Run Slowly From Two to Five Minutes, Depending on the Size of Tire and Pressure Desired. Maximum Pressure, 150 Pounds.

This Device Works Equally Well on Any Size Car, From the Smallest to the Largest. It is Absolutely Fool-Proof and Non-Adjustable, Requiring no Attention Other than an Occasional Drop of Oil.

The Mayo Spark Plug Pump is Strongly Constructed and Designed on the Compound Principle. Pure, Fresh Air, Guaranteed to be the Only Source of Inflation, is Liberally Supplied by the Intake Air Valve, Compounded Into a Small Barrel and Thence Forced to the Tires. The Construction is Simple and Mechanically Perfect Throughout, with no Wearing Parts to Give Trouble or Get Out of Order—Just Like Your Engine with Metal Rings and Metal Valves. Built to Last as Long as Your Car.

The Pumping Piston Operates Only When Motor is Run on Low Throttle. It Locks Automatically when the Engine is Raced, or the Hose Connection Removed From the Tire Valve. Again Operating when Throttle is Lowered or Connection to Tire Completed.

Each Pump, Before it is Packed for Shipment, is Carefully Tested Out on a 4-Cylinder Gasoline Engine.

Size, 10 Inches Long, 2½ Inches in Diameter. Weight, 2½ Pounds. So Small, Light and Compact That it May be Carried Anywhere. Black Enamel Finish with Polished Brass Parts. Packed One in a Case, Complete with 12 Feet of Superior Hose and Pressure Gauge with Connections and Adapters to Fit any Car.

	Each

REVOLVING SCREW AND BOLT CASES

AMERICAN

Tops and Bottoms are Double, with the Grain of the Wood Crossed, Glued and Screwed Together, and Braced with Iron Rods, Which Bind the Whole Firmly Together, thus Making it Strong Enough to Bear Three Times the Weight that Can be Put into Them, and by Which Means They Revolve Perfectly True and Easy.

Iron Standards, Screwed Firmly into an Iron Hub in the Bottom, Make them Perfectly True and Solid.

Regular Cases are Made of the Best Seasoned Tennessee Poplar Finished in Imitation of Cherry. We Furnish Cases of Oak When So Ordered. The Fronts of Drawers are Made of the Best Norway Pine, with the Sizes They Contain Neatly Printed on. No Store that Handles Bolts and Screws is Complete Without One of These Cases, as They Prevent Mixing of Screws and Bolts, thus Enabling Dealers to Keep Their Stock in Good Shape, Making it a Pleasure Instead of a Task to Handle Them. The Drawers are All Provided with Stops to Prevent Their Removal from the Case, Each Drawer Holds a Full Package of Bolts or Screws of the Size and Number Indicated on the Front of the Drawer.

All Numbers on Bolt and Screw Cases Will be Changed to Suit Purchaser Without Extra Charge.

Seneca Cameras

Universally Known for Its HIGH QUALITY and SATISFACTORY RESULTS

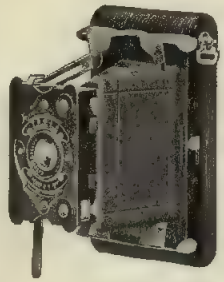
SENECA CAMERAS have become so well known through national advertising and so well liked for their reliable picture taking qualities that the public has come to accept the name **SENECA** on a camera as a guarantee of quality.

For a quarter of a century the manufacturers of **SENECA CAMERAS** have been producing a product "built on honor." If a **SENECA CAMERA** fails in any way to live up to the claims made for it, the Seneca Camera Manufacturing Company stands ready to make good.

SENECA CAMERAS are a quality product. They have a snappy style about them that is distinctively their own. Their superb finish and smart lines will make you proud to be the owner of a **SENECA**. Anyone can take good pictures with a **SENECA**—it's easy.

With every Camera comes a book of instructions that explains clearly the important things to know about making good pictures.

WE DO NOT SHIP CAMERAS ON APPROVAL.



THE SENECA VEST POCKET CAMERA

Takes Any Standard Roll Film

Small size, light weight and reliable picture-taking ability are features that distinguish the Seneca Vest Pocket Camera and make it the proper instrument to select, if you intend touring, hunting or fishing

Although it takes pictures 1⅝x2½ inches, it measures 4⅝ inches from tip to tip and weighs but 8 ounces

It loads easily. The back is removable allowing film to be inserted with ease

To take a picture, it is only necessary to open the protecting door, grasp and pull out the front until it locks in position and the camera is ready for use. The lens is set at universal focus, no estimating of distance is necessary.

The Vest Pocket is well made throughout and covered with genuine leather to withstand rough usage in the pocket

DETAIL DESCRIPTION OF VEST POCKET SENECA

For rectangular pictures 1⅝x2½ in. Capacity, 8 exposures without reloading. Dimensions of camera, 1x2⅝x4⅝ in. Weight, 8 ounces. Focus, fixed, always set. Lens, Meniscus Achromatic, 2½ in. focus Rapid rectilinear 3⅛ in. focus. Anastigmat f.7.5, 3⅛ in. focus or Anastigmat f:6.3, 3⅛ in. focus. Shutter, Deltax or Ilex Marvel (dustproof). Automatic for time, bulb or instantaneous exposures of 1/25, 1/50 and 1/100 part of a second. Bellows, genuine leather. Frame, aluminum. Trimmings, nickel plated fine grain genuine leather covering. View finder, two brilliant.

No. 12/0651 Vest Pocket Seneca with Meniscus Achromatic Lens. Each **$14.56**

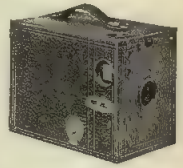
No. 7 0651 For No. 3A **7.50**

When ordering cases give name and catalog number of camera they are to fit.

SENECA BOY SCOUT CAMERA



The Scout is a real camera that exactly suits the boy or girl and yet appeals to older people as well. These rugged little instruments have such wonderful capabilities and are so simple to operate that perfectly satisfactory pictures can be made just as easily by the children as by the grown-ups. Picture making is easy and certain with the Scout Cameras. There is no distance to judge when making an exposure, as the Meniscus Achromatic Lens is fixed focus and will make a clear sharp picture over the entire film to its extreme margins, and the reliable Scout automatic shutter provides for either instantaneous snaps or time exposures. Loads in daylight with any standard film

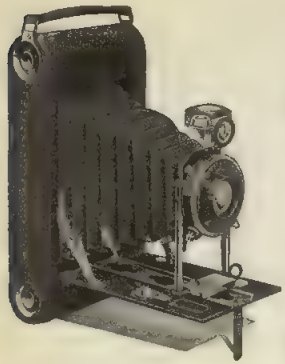
The Seneca Is a Camera of Quality



SENECA ROLL FILM CAMERA

These models hold the distinction of being universally popular. The 3A has the exact dimensions of a postcard size picture—its proportions are pleasing for portraits vertically, and for landscapes, groups and street scenes horizontally. They are so simple to operate that the beginner can make exposures with confidence and ease; so complete are the equipments that the advanced amateur will find every adjustment necessary. The selection of lenses, which determine after all, the quality of the picture, has been made with a careful regard for "snappy," clear cut results. All the shutters are dustproof and automatic, i. e., always set ready for use, and have the convenient push cord release. Cameras are made of aluminum with reinforced wood sides. Substantial nickel plated trimmings, fine and a covering of genuine seal grain leather complete the body of attractive serviceable cameras.

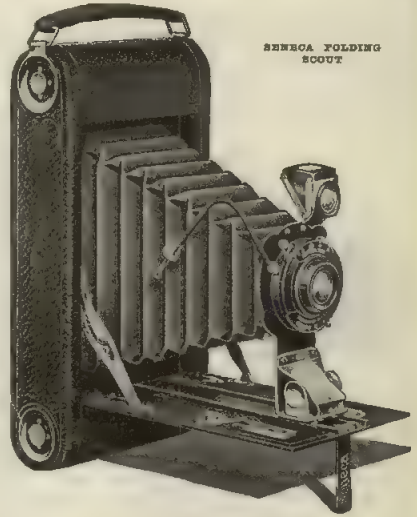
THE SENECA FOLDING SCOUT

Takes Any Standard Make Roll Film



SENECA FOLDING SCOUT

Here is a capable, trim-looking instrument that is easy to load, simple to use and light to carry. It is made in five popular sizes. You can select your favorite.

Probably the biggest feature of the Folding Scout is the extraordinary value that it offers for the money. It is a complete photographic instrument in every respect, efficient, desirable, yet it sells for a price that is reasonable in the extreme.

The body is made of aluminum and seasoned wood throughout. The covering of durable seal grain leatheret assures a long lifetime of wear and service.

Either the Meniscus Achromatic or Rapid Rectilinear Lenses may be had. Under ordinary conditions, when the light is good, the Meniscus Achromatic equipment gives very satisfactory results. With the Rapid Rectilinear Lens a greater range of subjects may be taken and the negatives will stand enlargements.

The Folding Scout is handsomely finished throughout. All metal fittings are in nickel or black enamel.

Details. Size of Camera—No. 101, 2x3¼x5½; No. 102, 2x4¼x5¼; No. 104, 2x4¼x5¾. Capacity without reloading—No. 101, 12 exposures; No. 102, 10 exposures; No. 104, 10 exposures. Lenses—Focus. THE SEVEN-FIVE FOLDING SCOUT

Takes Any Standard Make Film Cartridge

The Seven-Five Folding Scout is the Folding Scout covered with genuine seal grain leather and fitted with a genuine f:7.5 Anastigmat Lens.

Anastigmat Lenses are fully corrected for every optical error and work at much greater speed than ordinary lenses giving brilliant, snappy negatives that will stand enlargement to practically any size.

Four sizes are offered in this model, representing an excellent value to the enthusiastic photographer who wants something better than the ordinary run of cameras.

No. 110/0652	Seven Five Speedster Scout with f 7.5 Anastigmat Lens and Gammax or Ilex Marvel Shutter.	Size, 2½x4¼ in.		$35.50

"SENECA"—The Camera of Satisfaction and Quality

SENECA SAGAMORE CAMERA

Takes any standard make film cartridge.

A small, light, compact instrument Measures just 6½ in from tip to tip, and weighs less than 20 oz. It takes pictures 2¼x2¼ in—a size that has the double advantage of being well proportioned itself and just right for enlarging. The Sagamore body is formed from seamless solid aluminum covered with the finest grade of Morocco leather The all-metal body gives strength without weight, the Morocco leather covering, beauty without sacrificing durability. The special back the one-piece metal front and the self-leveling radius finder are three exclusive features of the Sagamore Camera. The Sagamore back can be put on or taken off the camera in less than one second This enables you to load the camera in one quarter of the time usually taken for this operation. This is extremely important when taking pictures of sports or races when every second counts. The one-piece metal front insures absolute alignment of the lens with the film. This is absolutely necessary in order to have the pictures sharply focused. The self leveling radius finder visualizes the picture exactly as it will finally appear. When the subject is shown level in the finder, you can be certain that it will appear exactly the same in the finished picture. The greatest advantage of the Anastigmat lens is its ability to give a fully-timed negative with a short exposure. These lenses are fully corrected for all optical errors, are able to render minute detail even to the edge of the picture, and because of their great speed are admirably fitted for speed and indoor photography. The amateur who has been using a camera with the rapid rectilinear or a single lens will welcome the f 7.5 Anastigmat, for with it makes it possible to secure anastigmat pin point definition in his pictures at a reasonable price. The f 6.3 and f 4.5 Special Anastigmat and Bausch & Lomb Tessar Lenses are remarkable for the definition obtained at the full aperture of the lenses. The f.4.5 lens has twice the speed of the f 6.3 Anastigmat, which is 60% faster than the average lens. These lenses are unequalled for the most difficult speed photographs, for home portraiture, groups, landscapes and other applications of the art. The Betax is an automatic shutter having speeds of 1, 1/2, 1/5, 1/10, 1/25, 1/50 and 1/100 part of a second besides time and bulb exposures The Ilex General Shutter is also automatic and has fractional speeds of 1/10, 1/25, 1/50, 1/100 and 1/200 second and time and bulb exposures. Either the Auto or the Ilex General Shutter is furnished with the f 7.5 equipment. The Optimo has speeds of 1/2, 1/5, 1/10, 1/25, 1/50, 1/100 and 1/200 part of a second besides time and bulb exposures. This shutter is used with f 6.3 and f 4.5 lenses for speed work The Ilex Acme Shutter has speeds of 1, 1/2, 1/5, 1/10, 1/25, 1/50, 1/100 and 1/200 part of a second besides the usual time and bulb exposures. This shutter is also admirably adapted for speed work with the fast f:6.3 and f:4.5 lenses. The Sagamore is a camera that will appeal strongly to the best possible in a convenient sized speed camera. Because it is made of the best materials obtainable, it will withstand rough usage and can be carried in the pocket. The Seneca Sagamore, the latest addition to the Seneca Tribe, will up-hold our reputation for reliability which has been built up by making only the best cameras for over a quarter of a century.

Details: For pictures 2¼x3¼ in. Capacity—Six exposures. Dimension of camera—6½x3x1¾ in. Weight—20 oz. Camera body—Solid aluminum, leather covered in Morocco grain. Front—Rising and falling, new style. View finder—Self-leveling, brilliant, collapsible, reversible and numbered to sun scale. Tripod sockets—Two. Film chamber—Hinged, removable with spool pins. Bellows—Genuine Russian leather Shutter—Betax or Ilex General Optimo or Ilex Acme Lens—Special Anastigmat f 7.5, f 6.3 or f 4.5 or Bausch & Lomb Tessar, ser. IIb, f:6.3and ser. Ic, f:4.5. Focus of lends—3¼ in. Instruction book containing full directions for operating with every camera

THE NO. 2 SAGAMORE

Takes Any Standard Film Cartridge

This splendid little Camera takes sharp clear pictures 2¼x3¼ in.—an excellent size in itself and ideal for enlarging. Small, light and compact, the No. 2 Sagamore will give absolute satisfaction because its picture taking abilities are extraordinary, due to careful selection of lenses and shutters and expert adjustment of these important camera parts. Either of three lens equipments is given—Meniscus Achromatic, Rapid Rectilinear and f 7.5 Anastigmat The shutters furnished are admirably adapted to the possibilities of the lens and are accurate and dependable.

Details: Size of picture—2¼x3¼ in. Size of camera—6¼x3x1¾ in. Capacity without reloading—Six exposures. Weight—Twenty ounces. Lenses—Single Achromatic, Rapid Rectilinear or f 7.5 Anastigmat Shutters—Deltax or Ilex Marvel, speeds of 1/25, 1/50 and 1/100 second, time and bulb exposures, Gammax or Marvel, Betax or Ilex General. Body—Solid aluminum covered with seal grain leatheret. Front—One-piece solid front. View Finder—Brilliant, collapsible. Tripod Sockets—Two Film Chambers—Hinged, removable with spool pins Bellows—Improved, water-proof.

No 120/0653	No. 2 Seneca Sagamore with Single Achromatic Lens and Trio or Ilex Marvel Shutter	$19.20
No. 121/0653	No. 2 Seneca Sagamore with Rapid Rectilinear Lens and Trio or Ilex Marvel Shutter	$22.10

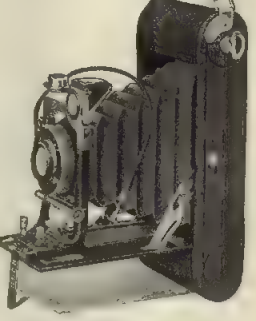
SENECA METAL TRIPOD

Seneca Metal Tripods are made of heavy gauge seamless brass tubing. The lower legs, which telescope, are finished in polished brass—the upper in black enamel. Three sizes are furnished—No 1A503, having three sections, No. 1A509, having four sections, and No. 1A510, having five These Tripods are invaluable for taking time exposures, portrait work and for flashlight photography They are light in weight, compact and extremely rigid.

	Sections	Closed	Extended	Weight	Price
No 300/0653	3	17 inches	43 inches	16 ounces	$3.50
No 400 0653	4	15 inches	50 inches	20 ounces	4.50
No 500 0653	5	16 inches	55 inches	24 ounces	5.00

SENECA CHIEF CAMERA

Every One Is Fully Guaranteed



For any standard make of film cartridge

The demand for a thin model camera has fostered the Seneca Chief. A camera of this kind makes a strong appeal to the picture lover Its lightness and compactness allows it to be carried easily in the pocket. In character and finish it is striking and elegant. And, speaking of ability and service, there is no photographic condition any camera could meet that it will not meet more effectively. Seneca skill and ingenuity have created it and placed it at the disposal of the public It is the result of ideas calculated to vastly improve the construction and performance of cameras. It shows how high ideals of scientific experiment and progressive development have been rigidly maintained

Details: No 1A for rectangular pictures 2½x4¼ in., No 2C, 2¾x4¾ Capacity, No. 1A, 12 exposures, No. 2C, 10 exposures without reloading. Weight, No 1A, 24 oz., No. 2C, 26 oz. Dimensions of camera, No. 1A, 3⅝x8¾x1⅜, No. 2C, 4⅛x8⅞x1⅝, Camera, aluminum, genuine leather covered. Front, rising and falling operated by rack and pinion, also lateral slide. Bellows, genuine Russia leather. Film chambers, hinged, removable with spool rims. Tripod sockets, two. View finder, brilliant, collapsible, cleanable, with sprirt level attached. HIGHEST QUALITY IMPORTED BARBERS' RAZORS

S. R. DROSCHER'S FAMOUS "SWEEP" RAZORS are unequalled in quality, finish and workmanship, and are guaranteed to give entire satisfaction.

They are made of the best quality English steel and are twice hand forged to prevent overheating.

Ground by hand by expert grinders after the old approved system. The blades thus remain perfectly cool and retain the original quality of the steel, which is an impossible achievement in machine-ground razors. Every razor is tested and set ready for use. Unequalled for private as well as barbers' use.

No. 206½—½ in. blade, square point, full hollow ground, white ivoride handle .....per dozen **$54.00**

No. 206¾—¾ in. blade, square point, full hollow ground, white ivoride handle .....per dozen **$54.00**

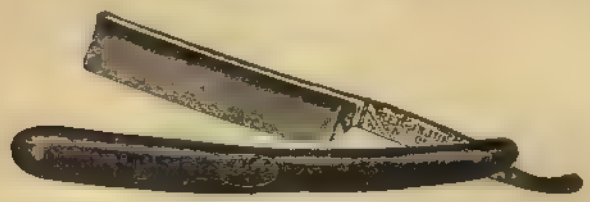
ONE IN A TELESCOPE BOX, HALF DOZEN IN A BOX

Made from the famous "Karbona Special Steel" ground by hand by expert grinders after the old approved system. The blades thus remain cool and retain the original quality of the steel, which is an impossible achievement in machine ground razors. Every razor is tested and set ready for use. Fully warranted—unequalled for private as well as barbers' use.

No. 190½—½ in. blade, square point, full hollow ground, white ivoride handle ... . per dozen **$54.00**

No. 190¾—¾ in. blade, square point, full hollow ground, white ivoride handle .....per dozen **$54.00**

ONE IN A TELESCOPE BOX, HALF DOZEN IN A BOX



H. BOKERS'S "RED-INJUN"
HIGHEST QUALITY ENGLISH STEEL

Full hollow ground, polished, file tang, oval rubber handle.

Tudor Plate

Oneida Community · Made

A NEW Oneida Community Silverware product, that has created a higher plane of quality in the low-priced fields. Selling so rapidly that indications are it will shortly dominate this field as completely as Community Plate now dominates the higher.

Tudor Plate is heavily plated overall with special sectional plating at the point of greatest wear. Two beautiful patterns—The Duchess and The Baronet—made by the designers of Community Plate. Packed in dainty boxes lined with blue.

Each Tudor piece is wrapped in a special transparent tarnish proof casing. A unique and convenient display feature. Silverware reaches customer clean and free from tarnish.

Twenty year Service Replacement Guarantee. A beautiful and durable silverplate at a price within the reach of everyone.

The *Tudor Buffet* gives the line all the remarkable selling advantages of the Petit Buffet in Community.

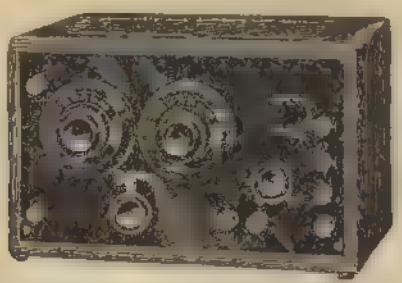
RADIO EQUIPMENT

MONROE REGENERATIVE RECEIVERS

LICENSED UNDER THE ARMSTRONG PATENTS.

All parts of the Monroe set are carefully designed to secure the greatest efficiency. The tuning elements are shielded with a grounded aluminum plate to prevent the annoying effects of body capacity. Special care has been exercised, even in the position of the leads, to make it the most selective single circuit regenerative tuner on the market. Has an approximate range of 150 miles daytime, 800 to 1000 miles at night.



No. 9943E—Mahogany finished case, strongly built, size 11¼×7⅞×7 inches. Tuning consists of a seventeen plate rotary variable condenser and vario—coupler wound with double silk covered copper wire; Filament control rheostat permitting sensitive adjustment, Grid condenser with fixed leak; Primary inductance taps controlled by variable control switch; Bakelite panel and dials plainly marked; Non-loosening sotted nickel plated binding posts; Wave length 180 to 685 meters; Weight each 8 lbs. Batteries, tubes and head are not included. each $49 00

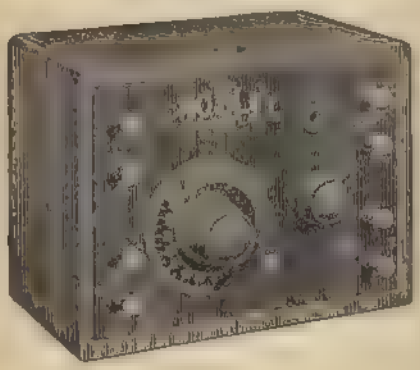
RADIO EQUIPMENT

RADIO FREQUENCY TUNED AMPLIFIERS

R. F. T. A.



This unit is designed to add one stage of radio frequency to the Harko Senior.

When this unit is used in connection with the Harko Senior, an amplifier tube is used in the Harko Senior Unit with the grid leak and condenser bridged or short circuited. The detector tube is then placed in the radio frequency unit, thus this new unit contains the radio frequency tuner and the detector tube and its control.

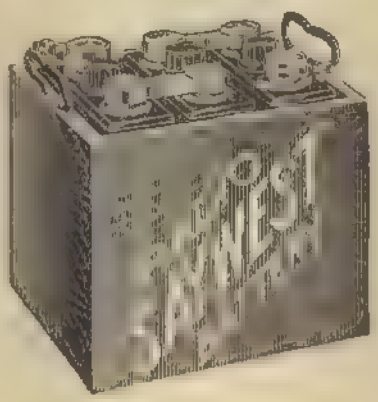
This unit can be added to any of the new type Harko Senior No. V units, and the Crosley Two-Step Audio Frequency Amplifier can be added if desired, making a four-tube set, consisting of one stage of radio frequency, detector and two stages of audio frequency.

The Radio Frequency Unit increases the range and volume of the Harko Senior alone at least ten times, making it far more efficient, easier to tune, having greater range and volume than any type of tuner that we know of coupled with one stage of audio frequency amplificaton. In other words, the combination of the Harko Senior and Radio Frequency Unit are superior to any two-tube set that we know of. This unit also has the advantage of sharper tuning, eliminating interference, and it reduces static to a minimum.

No. F9999E—Size 7½x5¾x4½ in., each 4 lbs., tube, batteries or phones not included .....each★ $12.00

ONE IN A CARTON

SAYWEST "A" RADIO BATTERIES



POLISHED MAHOGANY CASE

These batteries are designed and constructed to give maximum service in Radio Receiving. Equipped with convenient screw type terminals.

Shipment from factory insures fresh stock at all times. They are charged to full capacitiy and are ready for immediate use.

For Radio Sets using one tube amplification a 70 ampere battery is sufficient. For sets using more than one tube amplification, a 90 to 130 ampere battery will give better results.

Guaranteed against defective material and workmanship for two years.

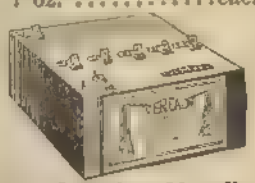
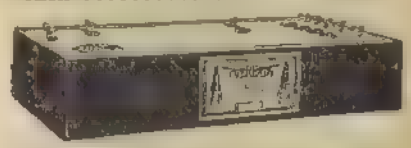
EVER READY "B" BATTERIES

No. 763E—Suitable for use where light w't or small space is essential; contains 15 cells, in waterproof cardboard box with five taps; initial voltage 22½ volts; Length 3⅜ in., width 2 in., height 2⅛ in., w't each 13 oz. .....each $2.10

No. 766E—The most popular size in use; Contains 15 cells of larger size and has long service life; equipped with five positive Fahnestock Spring Clip voltage taps, ranging from 16½ to 22½ volts, making it the most desirable type of use with vaccum detector tubes; Length 6⅜ in., width 4 in., height 3 in., w't each 5 lbs. 7 oz. .....each $3.60



No. 767E—Contains 30 cells of the same size as the 766E. This battery was designed especially for use in connection with vacuum tube receiving sets employing a detector and one or more stages of amplification. In reality it is two 766E Batteries in one box. It is provided with five positive taps ranging from 16½ to 22½ volts for detector tube control, and a 45 volt tap for the amplifier tubes. Terminals are of the Fahnestock spring clip type. Dimensions, length 8 in., width 6⅜ in., height 3 in., w't 9 lbs., each $6.60



No. F746E—Consists of 72 cells, equipped with two coil wire leads enclosed in a wooden box; equipped with Fahnestock clips and gives the following voltages: 16½, 18, 19½, 21, 22½, 45 and 108. It is most widely used in conjunction with loud speaking devices such as Mognavox, where the message must be carried long distances; Length 17 in., width 9 in., height 3½ in.,w't each 20 lbs., each★ $18.00

RADIO EQUIPMENT

BALDWIN HEAD SETS

Manufactured by Nathaniel Baldwin Inc.

The Baldwin mica diaphragm radio telephone headsets are the nearest to perfection among electro—Magnetic receivers. They are used by the U. S. Navy and War Departments and by many foreign governments.

No. 9955E—(type C)—The most popular type of Baldwin receiver. Has large mica diaphragm, 2 5/32 in. in diameter, standard resistance, cloth covered spring steel head band, complete with cord, w't 10 oz.,
per set $18 00

ONE IN A BOX

No. 9956E—Single type C unit with cord, for use with loud speaker horns and phonograph attachments. Has a specially heavy mica diaphragm. This permits power amplification without rattling or cracking of the diaphragm. W't 4 oz. .....each $9.00

ONE IN A BOX

NAVY TYPE HEAD SETS

ELWOOD

A well made standard type for radio work with fully adjustable head band. Covered spring steel bands can be easily shaped to the most comfortable form. All exposed metal parts of head band and receivers are polished nickel finish. Substantially made with polished nickeled brass cups fitted with permanent horse shoe magnets.

Coils have best grade insulated wire and are wound and tested to full resistance. All receivers are rigidly inspected and matched for tone quality.

No. 9922E—2000 Ohms,
per set $10.50

ONE IN A CARTON

Our Very Best is the Very Best.

HEAD SETS

MANHATTAN

Scientifically and carefully constructed, sanitary headband, rubber japanned with no covering, easy to keep clean, adjusted by sliding friction grip, no projections to catch the hair.

The mechanism of the receiver itself is very superior.

The magnets are of tungsten steel, insuring strength of operation with practically no variation.

The correct electrical principles being incorporated into the design, the receivers are of very high efficiency.

The polarity of the winding is indicated within the case and also on the telephone cords. This assures proper connection of the headset in a vacuum tube circuit. W't per set 1¼ lbs.

No. 9904E—2000 ohms,
per set $9.00

No. 9905E—3000 ohms,
per set $10.50

WRENCHES

WALDEN SPEED WRENCHES

Long shank brace socket wrenches are used as speed tools in assembling and dismantling cars. Are most efficient when used on a series of the same sized nuts as on cylinder heads. To gain the most time in removing nuts first release the nut with an offset socket wrench, then spin nut off with Brace or Speed Wrench. These tools are big time savers, and are considered indispensable in garages where they have been tried.

No.	Size, in.	Each.

WALDEN WIRE HANDLE WRENCHES

Wire handle construction and machine turned sockets makes it possible to produce an equally well made and service-tool at much less cost than usual drop forged wrenches. Sockets are steel, machine turned from solid bar and broached accurately to size. Wire handles are proper size and class of material to guarantee service. Sockets are so fastened to the wire they will not turn or loosen.

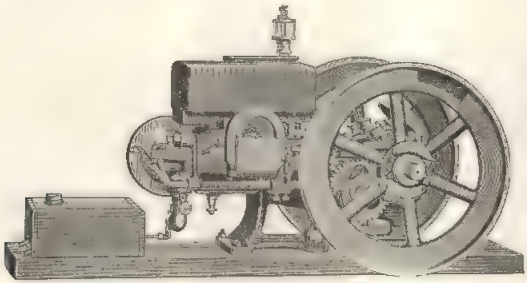
GASOLINE AND DISTILLATE ENGINES

ALAMO



1½ HORSE POWER

The 1½ H. P. Engine is a marvel in design and operation. It is the acme of mechanical perfection, being built on the same general lines as our larger types of engines, by an old established firm which has been a successful engine manufacturer for the past quarter of a century. This engine is intended for light work about the farm. Only a very small amount of fuel is required and the cost of operating this engine is extremely small. It is self-contained, easily moved about, does not require bolting down, and may be operated in any place and for any service within its rated capacity. It is shipped ready to run as soon as the crate is removed and the tank filled with gasoline.

Some of the outstanding features incorporated in our 1½ H. P. Engine:

Main Bearings tilted at an angle to lengthen their life.

Bearings on the governor side of the engine are the same as on the plain side.

Governor weight collar is fastened on the outside of the fly wheel so that it can be easily removed without removing or disturbing the fly wheel.

Removable die cast bearings in the crank end of the connecting rod.

Removable brass bushing in the piston end of the connecting rod.

Quick adjustable speed-changer that can be operated for any desired speed while the engine is running.

Hot type of cylinder head to assist in vaporizing fuel, thereby increasing the efficiency of the engine.

Large and finely balanced fly wheels.

Mixer with one adjustment.

Ground and polished crankshaft.

All machine cut gears.

Grease cups on main bearings.

Positive lock grease-cup on the connecting rod.

Case hardened and ground piston wrist pin.

Webster oscillating magneto.

Equipment

All 1½ H. P. Alamo Stationary Engines are regularly equipped with muffler, Webster oscillating magneto, solid iron pulley, wrenches, oilers and oil can, and a fuel tank of sufficient capacity for one day's run.

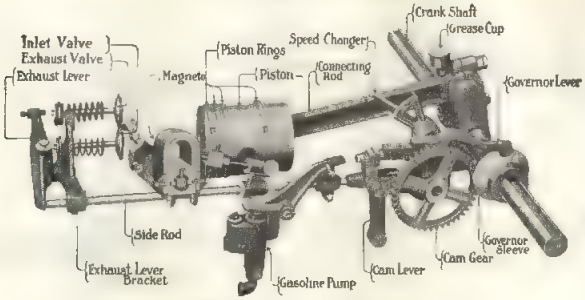
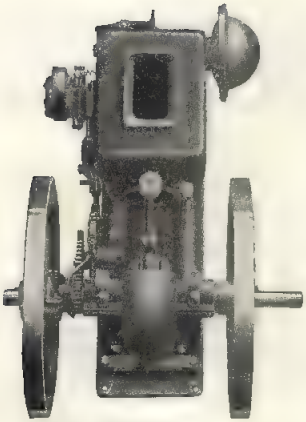
One in a crate.

ALAMO ENGINES



Working Parts of the Alamo Engines



Plan View

The Alamo Engine has no parts that are not necessary and nothing has been left off that would add to its service. All parts are made with ample weight and strength where they are subject to wear. All working parts are in plain sight so that the few adjustments that may be required can be made with ease and with the most simple tools. No special mechanical skill is required to operate an Alamo engine and plainly written instructions accompany every engine so that no former knowledge of machinery is required to handle these engines with ease.

The plan view at the side gives a good idea of the simplicity of design. It also shows the distribution of metal, heavy bearings set at a thirty degree angle and the substantial design of the base between the cylinder and main bearings, where the greatest strength is required.

GUARANTEE

The Alamo Engine Co., guarantees that

Every Alamo Engine is constructed of good material, and built in a workmanlike manner.

That each engine is carefully tested and found to develop its rated horse power under continuous load before leaving the factory. Furthermore, The Alamo Engine Co believes in maintaining a liberal policy in the replacing free of charge f o b factory any part or parts that may become broken if breakage results in faulty material or workmanship. However in returning broken parts for inspection all transportation charges must be prepaid.

It is understood that this guarantee does not apply to repairs required because of misuse or natural wear, nor to batteries or accessories. We will allow no bills for repairs

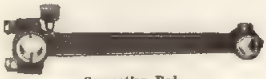
Our engines make good, or we do.

ALAMO ENGINES

Crank Shaft

Crank Shafts—The crank shafts are forged from solid billets of open hearth crank shaft steel. They are carefully machined and ground accurately to size.

Connecting Rod—The connecting rod is of I beam construction, carefully designed of ample length and strength and especially constructed for this service. The piston end is fitted with removable bronze bushings and the crank end of genuine babbitt metal.



Connecting Rod

Carburetor for 3½ to 6½ H. P. Gasoline Engines

Carburetor—The Alamo carburetors are marvels of simplicity and efficiency. Each carburetor is carefully proportioned for the size engine to which it is fitted, and will perfectly control the mixture of gasoline or distillate and air under all conditions of service and climate. The size of the opening of the fuel nozzle inside is controlled by a needle valve which when once set seldom requires any changing regardless of the changes of load or the conditions of the atmosphere. A perfectly working carburetor is of the greatest importance for satisfactory operation of the engine.

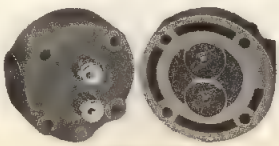
Cylinder and Cylinder Head—All cylinders are cast from a special mixture of charcoal iron which makes a casting of great strength, density and of the greatest wearing qualities. The cylinders are of a pattern which permits of perfect and equal expansion of the cylinder walls so that the cylinder remains perfectly round and straight. The cylinder head is also thoroughly jacketed, and provided with large valves. The valves have cast iron heads and nickel steel stems.

Piston and Rings

Pistons and Rings—The piston is of the trunk pattern, ample length, carefully machined and ground to size. All sizes are provided with four expansion rings perfectly fitted to the grooves in the piston. Oil grooves are also provided to make certain of perfect lubrication of all parts of the piston and rings.

The piston wrist pin is of large size, case hardened, ground and polished, and securely fastened in a manner which makes it quite impossible for it to become loose.

Alamo engines have long been noted for perfect fitting pistons and resultant excellent compression.



Cylinder Head

ALAMO ENGINES

Governor for 1½ to 6½ H. P.

Governor—Alamo Engines govern by the "hit and miss" principle which is now recognized as the most satisfactory manner to govern engines for general hard service. It permits the engine when running on light load to run with a minimum amount of fuel and with the fly wheels, perfectly balanced, and correct working governor, the regulation of speed is exceptionally close.

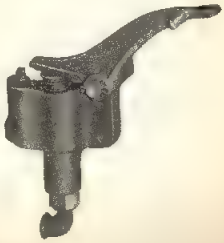
The governor is of centrifugal type. On engines smaller than 9 H. P. the governor is mounted in the fly wheel. The larger sized engines have a fly ball gear driven governor. All have speed regulator so the speed may be varied about 25 per cent. while the engine is in motion and permits the engine to be regulated instantly to the proper speed for various machines.

Governor for 9 H. P. and Larger

Pinion Gear and Cam Gear

Gears and Cam—Only two gears and one cam are used on the Alamo Engine. The gears are machine cut and the cam is ground on a specially designed machine to exact size to insure the perfect movement of the valves and ignition system.

Gasoline Pump—The Gasoline Pump is unique in construction, being operated by a lever so curved as to make its action noiseless. The pump has no packing whatever. The plunger can be easily removed and the ball valve examined without disturbing other working parts of the pump. The gasoline pump for larger engines is slightly different in design and has more capacity.



Gasoline Pump for 3½ to 6½ H. P. Engines

BENT SLEIGH RUNNERS

A CORNER OF OUR RUNNER BENDING DEPARTMENT

Our factory capacity enables us to bend all sizes of Runners from the lightest Cutter Runner up to 12 x 4-in. Logging Sleigh Runners, and we always have in stock a varied assortment of all standard sizes ready to ship on receipt of orders.

All our heavy Runners are made of straight grained Oak stock, well seasoned. They are bent carefully to a uniform standard by expert mechanics and are well housed after bending, ensuring their leaving our warehouse in the best condition for immediate use.

EVERY SHOP SHOULD HAVE A FEW SETS OF STANDARD SIZE RUNNERS IN STOCK, READY FOR THE EARLY SEASON TRADE

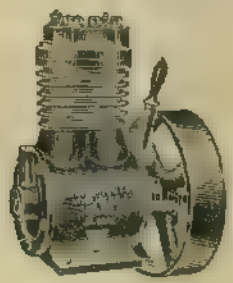
BRUNNER GARAGE AIR COMPRESSORS

We recommend the Brunner Line to our trade as the most efficient and durable line of Garage Air Compressor Equipment manufactured and will guarantee any properly installed Brunner Outfit to give entire satisfaction. We further guarantee every Brunner Air Compressor we sell against defects in workmanship or material for one year.

Every Brunner Air Compressor Piston is equipped with three metal piston rings. Rings, Piston and Cylinders are ground to a perfect fit, which insures great durability and the highest efficiency.

TWO-CYLINDER BELT DRIVEN



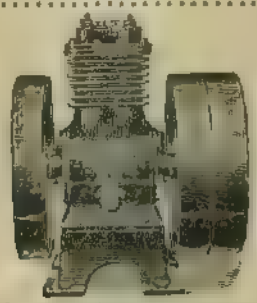
Vertical Type.

This is the Standard Air Compressor for garage service and will deliver more air at higher pressure with less power than any other compressor of equal rating on the market.

We recommend this machine for garages housing up to 60 cars and to be used with air tanks up to 50 gal. capacity.

Requires ½ H. P. for operation, delivers 3 cu. ft. free air per minute at 400 R. P. M. and 175 lbs. pressure. Tested to 300 lbs.

No. F102G—Adjustable safety valve on each cylinder, height 13 in., floor space 6½x10 in.
net w't 38 lbs., shipping w't 65 lbs.—
With 9 in. Tight Pulley only .....each $51.00★
With 9 in. T & L Pulleys .....each 57.00★
With 14 in. Tight Pulley only .....each 53.50★
With 9 in. Pulley and Clutch (as illustrated), each ..... 66.00★



A new model, specifically designed for heavy service and embodying the features of design and construction that have made the BRUNNER line so widely and favorably known. Cylinder dimensions, 2½ in. bore by 3 in. stroke; displacement 6 cu. ft. free air per minute at 350 R. P. M. Suited for pressure up to 200 lbs. The balanced load of the two-cylinder type is a feature of interest to the prospective purchaser. Air cooling is also a feature.

This model is of ample capacity for large garages, filling stations or tire agencies and is particularly adapted to inflation of "giant" pneumatic tires. Appropriate tank and fittings may be had for any purpose to which this model is suited.

No. F105G—Height 22½ in., floor space 16x18 in., w't each 187 lbs.—
Without Pulley or Flywheel .....each $ 90.00★
With Flywheel (no Pulleys) .....each 102.50★
With 16 in. T & L Pulley and Flywheel (as illustrated), each ..... 115.00★

MOTOR DRIVEN

Vertical Type, Two Cylinders.

This compressor is intended for service in garages housing up to 50 cars and in connection with tanks up to 50 gal. capacity.

The Compressor has a capacity of 2½ cu. ft. of free air per minute, has an adjustable safety valve on each cylinder and is driven by a ½ H. P. motor, by a noiseless cloth pinion gear. The motor will readily start the Compressor against 130 lbs. and drive it up to 175 lbs.

Makes a most convenient installation when used in connection with our Model "M" Automatic Controller. Operation from lighting circuit if desirable.

No. F42G—Adjustable safety valve on each cylinder, connected to motor by noiseless cloth pinion gear, height 16½ in., floor space 18½x11 in., w't each 170 lbs.—
With 110-220 V., 60 Cycle A. C. I Phase Motor, each .....$190.00★
With 110-220 V., 25 Cycle A. C. I Phase Motor, each ..... 205.00★

With 110-220 V., Direct Current Motor ..each 185.00★
With 32 V., Direct Current Motor .....each 190.00★

A. C. Motors of Other Than 60 Cycles Furnished at Additional Charge.

AUTOMATIC PRESSURE CONTROLLERS

In connection with any motor driven compressor outfit up to 5 H. P. this controller will automatically maintain tank pressure at any pre-determined maximum up to 200 lbs. Usual setting is for 145 lbs. maximum and 120 lbs. minimum but maximum setting may be adjusted. At any setting, however, the "cut-in" will be 25 lbs. below the "cut-out" pressure. This controller is furnished in three models, suited to various motors. These may be used with any motor driven outfit. They are reliable, accurate, safe and durable.

A controller saves profitable time, insures service to your customers, avoids dangerous pressures, and saves current by operating compressor only when air is needed.

No. FMG—For A. C. Motors up to 3 H. P. (inclusive) or D. C. Motors up to ½ H. P. (inclusive) for voltage not more than 440 .....$35.00★

No. FEG—For D. C. Motors, ¾ H. P. to 3 H. P. (inclusive), for current up to and including 440 volts ..... 110.00★

★ Items Marked Thus ★ Are Shipped From Factory Only.

BRUNNER MOTOR DRIVEN COMPRESSORS

PORTABLE TIRE INFLATOR

This is a well built Motor Driven Portable Outfit for inflating tires without a storage tank, and operates from any lighting circuit.

Has a heavily built two-Cylinder Air Cooled Compressor, bore 1⅛ in., stroke 1¼ in., pistons equipped with three metal rings and geared to a ¼ H. P. Electric Motor by means of a cloth pinion and mounted upon a substantial cast iron sub-base with three wheels. A substantial handle of convenient height is supplied.

Beautiful gloss black enamel finish. 20 ft. electric cord and plug and 20 ft. heavy air hose, tire connection and gauge supplied. Complete and ready to use when removed from crate.

Net w't 110 lbs., shipping w't 160 lbs.

Also furnished as a stationary outfit, but not intended for use in connection with a storage tank.

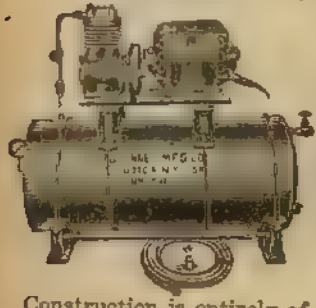
MOTOR DRIVEN ASSEMBLIES

Vertical Type Compressor, Two Cylinders.



The compressor is the standard No. 102 with capacity of 2½ cu. ft. free air per minute direct geared to a ½ H. P. motor. The cloth driving pinion is employed with cut cast iron spur gear reducing the gear hum to a minimum. The power plant is mounted on a substantial iron base which surmounts a 32 gallon BRUNNER air tank recommended for 150 lbs. working pressure.

Construction is entirely of metal, there being no wooden parts which might warp or crack and throw the power plant out of alignment. Equipment, as illustrated, is furnished and this machine is ready for use when uncrated. Hose may be attached to fittings or pipe line may be extended to any part of the building.

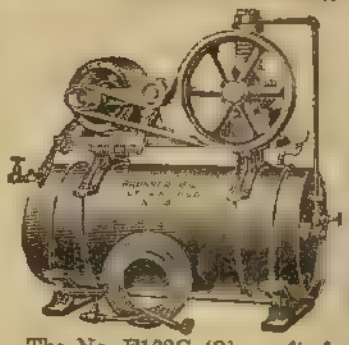
In connection with automatic controller, this machine is recommended for garages housing up to 50 cars.

No. F542G—Height 34 in., floor space 18×36 in. Furnished complete with air gauge, check valve, needle valves, hose line and tire connection. Weight each 340 lbs.—

With 1 Phase, 60 Cycle, 110-220 V., A. C. Motor	$270.00★
With 110-220 V., 25 Cycle, 1 Phase, A. C. Motor	285.00★
With 110-220 Volts, 40 Cycle, 1 Phase, A. C. Motor	285.00★
With 110 or 220 Volt Direct Current Motor	265.00★
With 32 Volt D. C. Motor	270.00★

A. C. Motors Other Than 60 Cycle at Additional Charge.

MOTOR DRIVEN ASSEMBLIES



This assembly was developed to meet the demand for an outfit duplicating the efficiency and economical operation of the No. F542G but employing belt drive to eliminate the gear hum of the latter type. General construction is the same as the No. F542G with appropriate changes in the design of the base to accommodate the belted construction.

The No. F102G (2½ cu. ft. free air per minute capacity) is belted to a ½ H. P. motor with efficient belt tightener The power plant is assembled on a heavy iron base, the whole being mounted on a 32 gallon BRUNNER tank tested to 300 lbs. and suited for 150 lbs. working pressure.

This model is particularly suited to filling stations or sales rooms where noise of gear drive would be objectionable. Garages housing not more than 50 cars will find this machine ample if controlled with BRUNNER automatic controller.

No. F742G—Height 43 in., floor space 18×36 in., w't each 325 lbs.

	Each.

HEAVY DUTY BELT DRIVEN ASSEMBLIES

This completely assembled, ready-to-use outfit has been preferred by those buyers having limited floor space or desiring the quiet operation of a belted machine. The No. F745G is ready to run when removed from the crate and is absolutely complete with automatic controller, hose line, valves, etc. Takn 65 gallon, for 200 lbs. pressure. Controller set for 175-200 lbs. if so ordered.

It is accepted by leading engineers that water cooling is advisable for heavy service but this model possesses unusual efficiency owing to skillful design and closely gauged workmanship and easily surpasses other air-cooled outfits supposedly designed for heavy service. The No. F745G is the closest approach in efficiency and all-round performance of the Brunner Line.

The compressor is Brunner No. F105G two-cylinder 2½×3 in. displacing 5½ cu. ft. per minute. The motor is 1½ H. P. Drive is by 2½ in. endless belt with perfected belt tightener.

No. F745G—Length 69 in., width 24 in., height 48 in., w't 800 lbs.

With 1 Phase, A. C., 110-220 V., 60 Cy. Motor	$505.00★

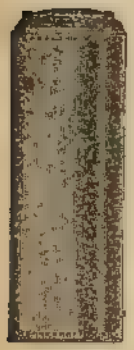
BRUNNER HEAVY STEEL AIR TANKS



Made of best Open Hearth Flange Steel of high tensile strength and absolutely guaranteed for recommended pressures Brunner tanks are slightly more costly than the usual run of tanks but they are SAFE. The garage man who purchases a genuine Brunner Air Tank will find it reliable, durable and safe.

Two types are offered, a standard design and suited to 150 lbs. working pressure, tested to 300 lbs.; and a "special" type for 200 lbs. working pressure, tested to 400 lbs. The standard grade is fully galvanized and is suited to the average installation. The "Special" tanks are black, very heavy, and sholud be specified where pressure above 150 lbs. is used.

BRUNNER AIR PRESSURE GAUGES

These Gauges are exceptionally well made, especially designed for air pressure, and are graduated to 200 lbs.

They are made in Polished Brass Case with Bevel Glass and in Iron Case with Brass Ring. They are of heavy construction and extremely accurate.

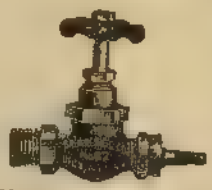
2½ in. in diameter with bottom male connection for ¼ in. iron pipe.

Nos.	FAQ	FBQ
Case	Polished Brass	Iron
Each	$5.00★	3.70★

BRUNNER AIR COMPRESSOR FITTINGS

Good fittings are as essential as a good compressor. Don't retard the effectiveness of a good compressor with a leaky tank or accessory of any description. Select your entire outfit from our list and insure a perfect working, satisfactory machine. We guarantee these fittings to be the best that money can buy, and our line is priced as low as the inferior grades.

NEEDLE VALVES



Heavily constructed of brass and designed for use on compressed air lines carrying pressures up to 200 lbs.

A reliable fitting, much handier than a stop cock.

Male pipe line connection at one end and swivel hose connection at other, to fit 5/16, ¼ or ⅜ in. hose.

Nos.	82¼Q	82⅜Q
Male connections	¼	⅜
Each	$2.50	2.50

For use in pipe line, doing away with an ordinary globe valve. Female connections at both ends.

Air tight and, with proper care, will stay tight indefinitely.

MAIL ORDER DEPARTMENT

Our constant attention in sixty-eight years of business has been given to the perfection of the system of handling mail orders. Our object has always been to handle them with the greatest possible speed, with the result we are enabled, in most cases, to ship mail orders the same day they are received.

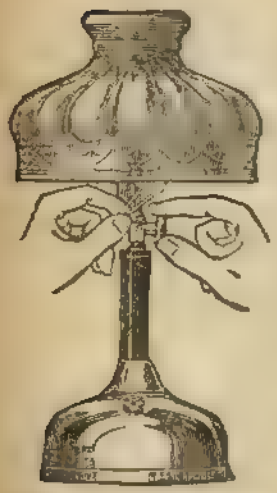
COLEMAN QUICK-LITE GASOLINE LAMPS

Patented May 13, 1919 — Light With Matches — Nationally Advertised



QUICK-LITE ADVANTAGES

BRILLIANT—300 Candle power strong pure white light. Brighter than 20 old style oil lamps or lanterns

SAFE—Can't spill fuel or explode even if tipped over. Can't be filled while lighted.

CLEAN—No greasy wick to trim. No dirty chimney to wash. No smoke. No soot. No odor.

ECONOMICAL—Costs less than one-half cent per hour to use.

CONVENIENT—Make and burn their own gas. Light with matches. Lamp holds 3 pints—burns 18 hours on one filling. Lantern holds quart—burns 12 hours per filling.

DURABLE—Made of brass, heavily nickel plated, and highly polished

MANTLES—All lamps on this page take No. 121 Quick-Lite Junior mantles.

SIZE—All lamps 22 in. high.

PACKING—One in carton complete with shade, two mantles, pump, wrench, hanger, cleaning pick and extra generator.

WEIGHTS—Table lamp, 10 lbs.; Chandelier, 16 lbs.; Bracket, 9 lbs.; Lantern, 6 lbs.

No. R329 **LAMP**—The most popular Quicklite. Featured in all advertising . . . . . each $12 50

No. R307 **LAMP**—With white ribbed shade. . . . . each $12.50

No. R327 **LANTERN**—Is the greatest outdoor light made. Will burn in any weather or climate. Just the light for farmers, watchmen, plumbers, garages, campers, auto tourists and all night work . . . . . each $10.50

No. R320 **CHANDELIER**—For stores, churches, school halls, etc. Two separate burners, operate one or both as desired. Casts no under shadow. With bug proof globe as shown, each . . . . . each $25 00

No. R321 **CHANDELIER**—With white ribbed shade, each . . . . . each $24 00

No. R324 **LAMP**—With beautiful mellotone opal glass green tinted, decorated with dainty hand painted wild roses. A very rich and pleasing light. Popular as a gift lamp. . . . . each $14 00

No. R319 **BRACKET LAMP**—The handy light for rooms with low ceilings, in halls bathrooms, kitchens, over desks, etc. Can be used as wall or table lamp. With white ribbed shade, each. $13 50

No. R318 **LAMP**—Has always been a tremendous seller. Shade is decorated in brown and tan tints overlaid with clusters of foliage and pink wild roses, each . . . . . each $14.00

No. F335C—Same shade as No. 335D except has no flower decorations ★.....each *$5.90*

No. F335A—Same shade except tinted in green, no flower decorations ★ .....each $5.90

USE ONLY GENUINE COLEMAN MANTLES

To get the greatest amount of light and service out of Coleman Lamps, Lanterns and Lighting Plants, you should use only Genuine Coleman Mantles, because—

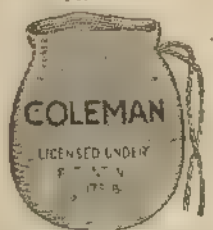
1 They work perfectly with the proper size gas tip and air intake in producing 300 candle power of pure-white light—always restful to the eyes

2 Coleman Mantles are the proper size to insure more efficient and brilliant light than is possible with ordinary mantles

3 Coleman Mantles are full size and non shrinkable.

4 They are properly reinforced at the bottom where the gas pressure is greatest, therefore cannot split at the seam or fall away.

5 They are made by a special process—especially for use on Coleman Quick Lite Lamps, Lanterns and Lighting Plants



Use only the mantles which have the name Coleman on them.

Coleman mantles are now put up one dozen in a pasteboard carton and one gross (12 cartons) in handsome and attractive counter display box

No. 41—Junior Rag 2¼ inches long for Quick-Lite Lamps and Lanterns and all other gasoline lamps using two or more junior size mantles..... per dozen *$1.50*

No. 40—Full size Standard Rag, used on system lamps, where a large high power rag mantle is needed.....per dozen *$2.20*

One dozen in a box.

QUICK-LITE GENERATORS

The Quick-Lite Generator will burn 500 to 800 hours without removing. When finally filled with carbon, replace with extra generator furnished with each lamp. The hole in gas tip, (Q18) is easily cleaned with tip cleaner as illustrated. If tip becomes clogged clean or replace with new tip furnished free with every lamp.

No. 99Q—Generator, per doz. *$6.00*

One dozen in a box.

No. R317—Lamp Crystal Frosted shade with bead fringe to match. Lamp in regular nickel finish. A very attractive lamp for the home .....each *$14.80*

One in a carton.

SHADES

No. R5324—A beautifully decorated melotone opal shade. It softens the light and has a surprising richness about it pleasing to the eye .....each *$3.70*

No. R5318—An opal shade decorated in brown and tan tints with delicate vine and small pink roses, a handsome shade,....each *$3.70*

MICA CHIMNEYS

No. 3327LQ—Complete.....each *$1.00*

BUG SCREENS

No. F333—White asbestos coated wire, for Nos. R307, 317B, R318, R322 and R324 Quick-Lite lamps each★ *$2.50*

GLOBE

No. F321—A globe made especially for the Quick-Lite. It protects the mantles from insects, each★ *$2.50*

Hibbard Hardware for Hard-Wear

★ Items Marked Thus ★ Are Shipped From Factory Only.

THE NEW COLEMAN QUICK-LITE SUPPLY CASE

A "PEACH" OF A DISPLAY—A CONSTANT REMINDER—A SELF-SELLING MERCHANDISER ALL IN ONE

A display case that will work for you. An assortment of "oftenest needed" repair parts.

Brightly colored card in cover lists all parts, contains illustrations, numbers, prices and will be of immeasurable help.

Your stock is before you and will always be a constant reminder to avoid shorts.

The metal box is free. 26 gauge metal-finished in olive green

Walls of compartments are all spot-welded together Case measures 13¾ in. long by 7¾ in. wide by 2⅝ in. deep.

If parts are retailed at their regular individual list prices the contents of each case will sell out at a profit of $15 00 which makes this proposition attractive without even considering the display value of the case at work on the counter.

No 1000QL Quick Lite Supply Case. Containing parts as listed with metal counter display case, each $30 00

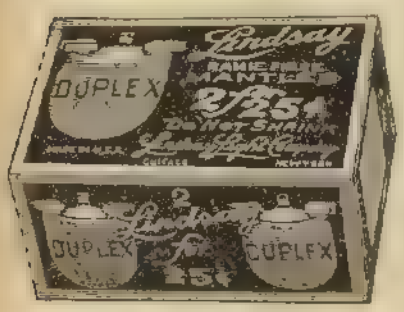
INVERTED GAS MANTLES

No. 100 LINDSAY TUNGSTEN—Special Tungsten Weave, the very highest possible quality. Doubly impregnated. Mounted on standard magnesia support
Per dozen $3.00

One dozen in a box.

No. 80 LINDSAY WIZARD—Double Weave. A well made mantle in great demand by those who prefer a triple weave at medium cost. Mounted on standard magnesia support. Per dozen.....$2.65

One dozen in a box.



LINDSAY DUPLEX

At the popular price of 2 for 25c the Sturdy Lindsay Duplex Inverted Mantle is certain to increase your sales and profits. This wonderful new mantle is packed two in a colored display box.

No. 225—Duplex will double your profits. Per dozen boxes $4.10

One in a tube, two in a box, fifty in a carton.

No. 72 LINDSAY COMET—Special Weave. A low priced mantle of exceptional quality. Mounted on standard magnesia support. Per dozen $2.35

One dozen in a box.

No. 64 LINDSAY MAGIC—Triple Weave. Made to meet the demand for a low priced serviceable mantle. Mounted on standard magnesia support. Per dozen $2.10

One dozen in a box.

No. 5333 LINDSAY FULVALU—Single Weave—good quality. Full value for the money. Mounted on standard magnesia support. Per dozen $1.80

One dozen in a box.

GASOLINE MANTLES

An inverted mantle of excellent quality. Gives a very brilliant light and is a well rounded-out mantle after burning. Gives long and satisfactory service.

No. 777—H. S. B. & Co., gathered bottom, soft tie-on, per dozen $1.10

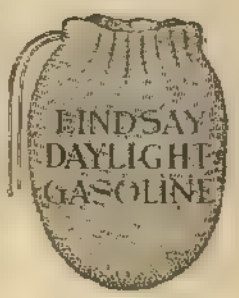
ONE DOZEN IN A PACKAGE. WE DO NOT BREAK PACKAGES

H. S. B. & CO SOFT TIE-ON

A good grade of mantle, has gathered bottom and will not give as good light or service as the sewed bottom.

No. 0118—Junior, for reading or table
Per dozen $1.50

ROSE COLORED, highest quality. Ramie fibre. Has bell shape gathered bottom, casting no shadow. Will not shrink.



No. 43 LINDSAY DAYLIGHT REGULAR, soft. For use on all inverted systems and Gasoline Portable Lanterns
Per dozen ..$1.50

No. 54 LINDSAY DAYLIGHT JUNIOR, soft. For use on all Portable Lanterns.
Per dozen $1.80

One in a Glassine Envelope.

Very highest quality gathered bottom mantles; cast no shadow. High in candle power and will not shrink

No 182 LINDSAY RAMIE JUNIOR, soft. For use on all gasoline portable lamps.
Per dozen ..$1.50

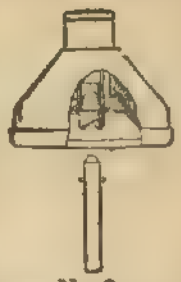
No. 181 LINDSAY RAMIE REGULAR, soft. For use on all inverted systems and lanterns.
Per dozen ..$1.25

Each Mantle in a Glassine Envelope.

IMPROVED DOMO CREAM SEPARATORS

AN UNEXCELLED SKIMMER, PERFECTLY CLEANABLE, POPULAR PRICED

No. TAX.



No. 2.

The small "AX" size, 10x13 in. base and 16 in. tall—for Domestic use only—not more than two cows, has an open solid one-piece bowl convenient to operate and as readily cleaned as a milk bottle. The "AX" size will get more cream than is possible by setting the milk skimming a single cow's milk, 8 to 12 quarts in 10 to 15 minutes. The "AX" size is usually sold without stand, but the solid stand for No. 1 also mounts the "AX".

The Nos. 10, 11, 12 and 12C are equipped with the most efficient disced bowl, described below. They may be mounted on a table or bench to operate successfully, but must stand solid to skim perfectly and not wiggle or vibrate in operation. Any vibration hinders skimming the same as does shaking or stirring milk on which cream is rising.

No. T13 Domo, 25 in. high and T14 Domo, 28 in. high are intended for 8 to 16 cows. These sizes should always be mounted on a rigid stand to avoid jarring. Properly mounted, the Domo always runs smoothly and noiselessly.

DOMO'S loose, overhung, self-balancing, small, all pressed steel bowl, with gears running in a constant oil bath and with bronze brushed bearings insures the smoothest, easiest running.

DOMO'S bowl is most simple and compact as made of fewest parts possible to cleanest skimming, is quickly and completely taken apart to clean as perfectly as a china plate and as readily re-assembled, features of the utmost importance in its daily use.

DOMO'S unexcelled skimming which is of first importance, combined with its superior construction, accounts for its most satisfactory service and the success it enjoys.

DOMO'S bowl discs are mixable, but best skimming results from keeping the discs in the same order after it is put into service. It will also skim cool milk, which however, is discouraged as a wasteful practice.

Kept in condition and handled according to DIRECTIONS, DOMO pays for itself in a short time in the extra cream it takes out of the milk, skimming so perfectly that less than 2 100ths of 1% of fat remains in the skimmed milk, an amount imperceptible except by Babcock test.

DOMO is most handy in consequence of its compactness and simplicity, yet it has the capacity of larger, heavier separators, and excepting the small "AX" and "BX" sizes, has oil bathed gears as illustrated Fig. 1, and with its small, light, highly efficient, loose overhung self-balancing bowl—Fig. 2—and bronze bushed bearings is easiest running.

Nos. T10, T11 and T12. Without Stand.

No. TAX—Domo—Capacity 90 lbs. or 9 gals. per hour, w't boxed 35 lbs., without stand, each $30.00

No. T10—Domo—Capacity 180 lbs. or 18 gals. per hour, w't boxed 50 lbs., without stand, each $40.00

No. T11—Domo—Capacity 220 lbs. or 22 gals. per hour, w't boxed 55 lbs., without stand, each $50.00

No. T12—Domo—Capacity 300 lbs. or 30 gals. per hour, w't boxed 70 lbs., without stand, each $60.00

No. T13—Domo—Capacity 450 lbs. or 45 gals. per hour, w't boxed 112 lbs., without stand, with tank bracket ..... each $70.00

No. T13S—Domo—Boxed with loose stand w't 167 lbs. ..... each $78.00

No. T14S—Domo—650 lb., 65 gal. per hour, boxed, with loose stand, w't 195 lbs. ... each $90.00

EXTRA STANDS

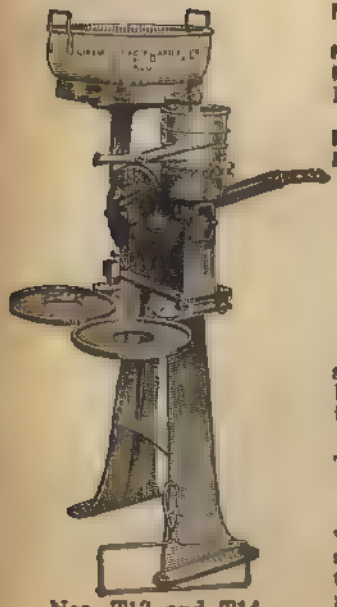
No. T1—For Nos. TAX, T10 and T11 Domos, w't each 45 lbs., loose, extra ..... each $7.50

No. T2—For No. T12 Domos, w't each 50 lbs., loose, extra ..... each $7.50

For list of separate parts and details of operation, see DOMO DIRECTIONS with every separator

No. T3—For T13 Domo, w't each 55 lbs., loose, extra ..... each $8.00

No. T4—For T14 Domo, w't each 55 lbs., loose, extra ..... each $10.00



Nos. T13 and T14. With Stand.

ASK FOR DOMO PRINTED MATTER FOR DISTRIBUTION

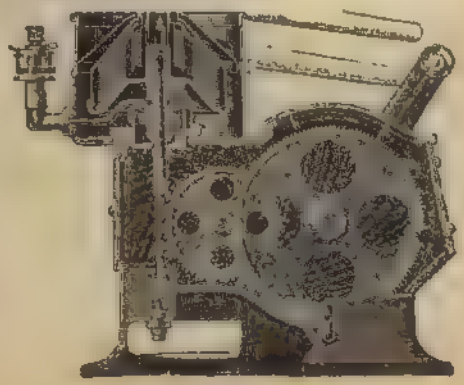
For Domo Repairs see Page 966-967.

IMPORTANT

Every DOMO, when carefully set up so it runs smooth will skim perfectly if operated according to DIRECTIONS, kept in nice running condition and the bowl kept bright and sweet.

See description of DOMO'S details in DIRECTIONS packed with every separator.

Always URGE the purchase of a separator somewhat larger than is needed, as a larger size skims small lots of milk equally clean or when required, the milk of more cows, or the increased quantity of milk when cows are fresh.



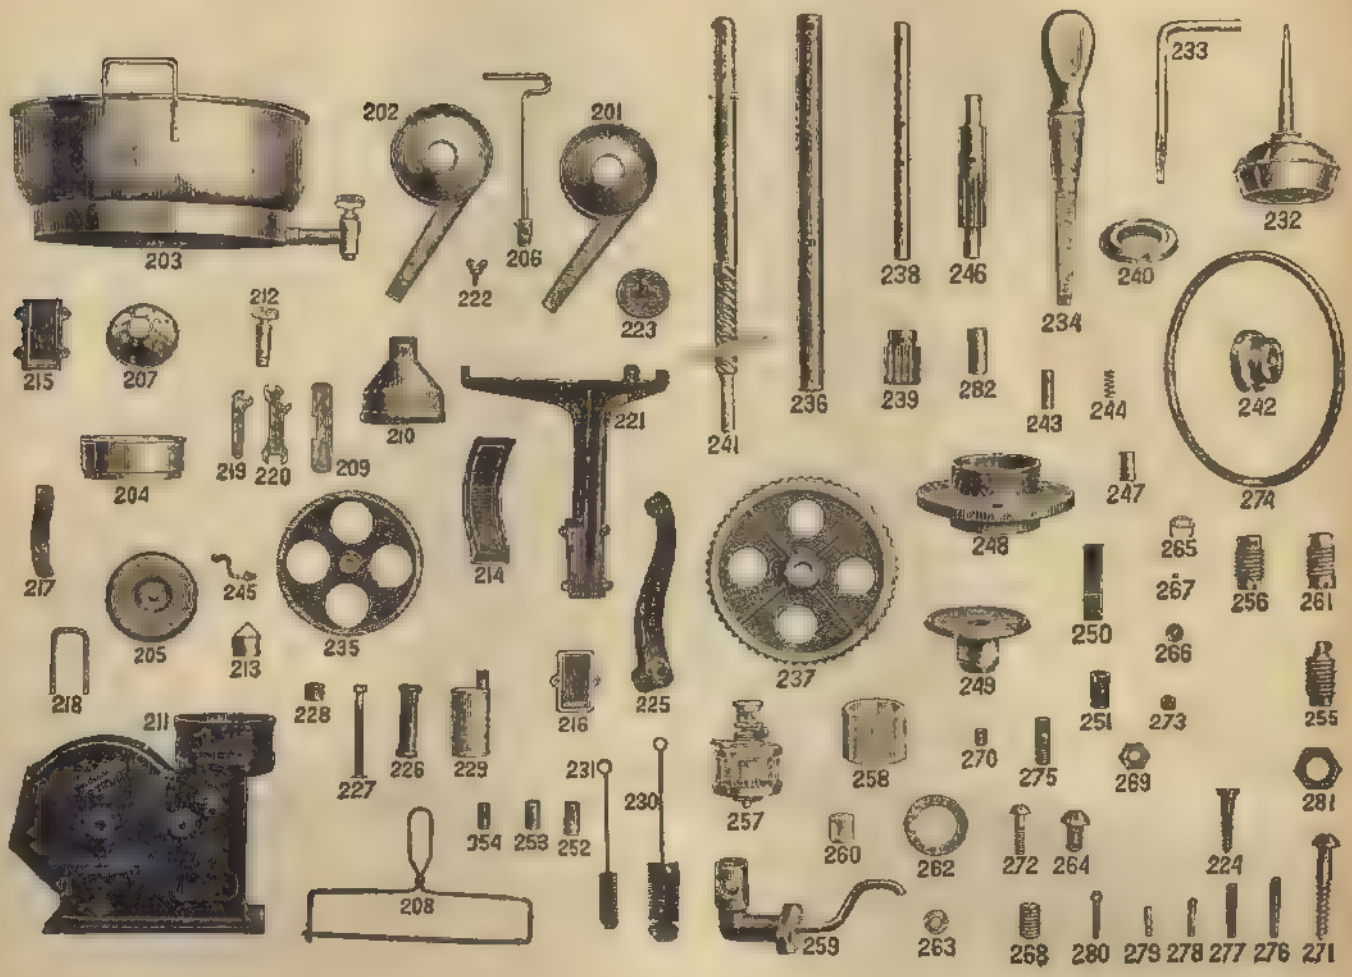
No. 1.

ILLUSTRATIONS OF REPAIRS FOR DOMO SEPARATORS

Nos. 11, 12, 13, 23, 24, 25 and AX

In ordering always specify the number and name of the part and the size of the separtor.

Thus: 1 — No. 274 Ring for No. 12 DOMO



FOR LOW MODEL EXCLUSIVELY

REPAIRS FOR CRUSO SEPARATORS

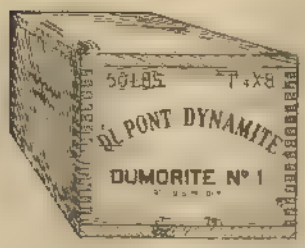
DYNAMITE, FARM AND STUMPING POWDERS

Prices on Application.

DUPONT



A NEW FARM DYNAMITE

Dumorite is a gun cotton nitroglycerine dynamite with the slow, heaving action of 20% dynamite and the strength of 40% dynamite. Its fumes will not produce a headache and it is non-freezing at any temperature. Dumorite is the most effective and economical explosive yet produced for land clearing, boulder blasting and tree-planting. It runs 135 sticks to a box, while the ordinary dynamite contains only 100 sticks to a box. This means approximately ¼ more work for every dollar invested, because stick for stick, Dumorite is the equivalent of any agricultural explosive up to 40%.

No. F11—Dumorite★ .....per hundred pounds $....

ONE HUNDRED AND THIRTY FIVE STICKS IN A BOX

No. F1DX—DuPont Red Cross Farm Powder—For use in sub-soiling, tree planting and stump blasting on the denser soil, made only in 1¼×8 in. cartridges, ½ lb., per 100 lbs.★ .....$....

No. F50DX—DuPont Low Freezing Red Cross Extra. Best dynamite for general use, does not freeze until water freezes, nor thaw until ice melts. Especially valuable for agricultural uses, such as stump and boulder blasting, tree planting, sub-soil blasting and road making. Very insensitive and should not be detonated with anything weaker than a No. 6 cap. Red Cross Extra 40 per cent strength is generally used, except for tree planting and sub-soiling. For these latter uses the 30 per cent grade is recommended. Packed in strong wooden boxes of 25 lbs. and 50 lbs. weight. Standard size cartridges are 1¼×8 in., weighing approximately ½ lb. although special sizes can be furnished if necessary.

Strength, per cent	20	30	40	50	60
Per 100 lbs.	$.....	.....	.....	.....	.....

No. F40DX—DuPont Low Freezing Straight Nitroglycerin.

Strength, per cent ...	30	40	50	60
Per 100 lbs.	$.....	.....	.....	.....

No. F20DX—DuPont Red Cross Low Freezing Ammonia Gelatin.

Strength, per cent	30	40	50	60
Per 100 lbs.	$.....	.....	.....	.....

PACKED IN 25 AND 50 LB. CASES

HERCULES

No. F1AX—Hercules Farm Powder—Recommended for sub-soiling, tree planting and ordinary blasting about the farm, made only in 1¼×8 in. cartridges, ½ lb., per 100 lbs.★ .....$.....

No. F50AX—Hercules Standard, Low Freezing.

For use in cold weather, as well as in spring and fall when alternate freezing and thawing makes blasting with ordinary explosives somewhat uncertain. Most effective and convenient for blasting stumps, breaking boulders, digging wells, quarrying work, etc.

Does not require thawing when the temperature is 30 degree Fahrenheit or above.

Strength, per cent	20	30	40	50	60
Per 100 lbs.	$....	.....	.....	.....	.....

No. F40AX—Hercules Low Freezing Nitroglycerin.

Slower than either dynamite or gelatin, very useful for blasting clay, stumps and stone that is rather soft and seamy, where a pushing, lifting action rather than a shattering effect is desired.

Does not stand exposure to water as well as either gelatin or regular dynamite.

Strength, per cent ...	30	40	50	60
Per 100 lbs.	$.....	.....	.....	.....

No. F20AX—Hercules Gelatin (Low Freezing) or Hercules Standard Ammonia Gelatin (Low Freezing).

In gelatin dynamite, gun cotton is substituted for a portion of the nitroglycerine. Has many advantages in that it is practically water proof, is more dense and makes much less smoke and fumes. Used a good deal for underground mining. Preferred by quarry men because it will get out rock better than other dynamite.

Strength, per cent	30	40	50	60
Per 100 lbs.	$.....	....	.....	....

PACKED IN 25 AND 50 LB. CASES

Dynamite, Caps and Powder cannot be shipped with other goods, neither can they be sent by express, but will be shipped direct from nearest magazine. Each must be shipped separately, except 100 only caps with each 100 feet of safety fuse may be sent up 500 caps and 500 feet of safety fuse. No more than 500 caps may be shipped with any larger amount of safety fuse. Dynamite is packed in cases containing 25 or 50 lbs., net, in cartridges 1¼×8 in.

★ Items Marked Thus ★ Are Shipped From Factory Only.

DYNAMITE, FARM AND STUMPING POWDERS

Prices on Application

DYNAMITE BLASTING CAPS

Always store and carry caps separate from the dynamite. Caps cannot be shipped with dynamite.

DUPONT OR HERCULES

No. F6—Sextuple, 15.43 grains, 1.00 grammes, per 1000★ *$34.20*
PACKED 100 IN A BOX; 1,000 IN A CARTON; 20,000 IN A CASE

BLASTING MACHINES

DUPONT

This machine is chiefly used for shooting wells, prospecting and other blasting where but a few charges are to be fired simultaneously.

F. O. B. Chicago, Xenia, St. Louis, Louisville, St. Paul.

No. P1—Capacity 8 to 10 holes, height of case 11 in., w't 18½ lbs ..... each *$35.00*

The favorite of quarry men and railroad contractors.

No. P3—Capacity 20 to 25 holes, height of case 13½ in., w't 22½ lbs. ..... each *$50.00*

The best size for ordinary quarry work and railroad contractors' use, even if only twenty holes are to be fired at a shot, for the extra current compensates for leaks in the blast line which are sometimes unavoidable.

No. P4—Capacity 30 to 50 holes, height of case 18 in., w't 45½ lbs. ..... each *$80.00*

We believe that the No. 5 is as powerful as can be made and still be easily portable and sufficiently easy to drive to enable one man to get the full current out of it.

No. P5—Capacity 50 to 100 holes, height of case 20½ in., w't 66½ lbs. ..... each *$200.00*

LEADING WIRE

Enough leading wire is needed with each machine to make two leaders of sufficient length to reach from the blast to a safe distance at which the person who operates the machine should stand. Five hundred feet is the quantity usually sold, which means a distance of 250 ft. from blast, but in some cases a greater length of leading wire is needed.

F. O. B. Chicago, Xenia, St. Louis, Louisville and St. Paul.

No. P14—No. 14 B & S gauge copper wire in coils of 500 ft., w't per coil 8½ lbs. ..... per coil *$16.00*

CONNECTING WIRE

This is a pure copper wire perfectly insulated. It is used in connecting the electrical fuses to each other where several charges are to be fired simultaneously, the holes being far apart. A small quantity only of this will be needed if the fuse wires be picked up after each blast, as they can be twisted together and used in place of connecting wire.

F. O. B. Chicago, Xenia, St. Louis, Louisville and St. Paul.

No. P20—No. 20 B. & S. gauge copper wire, 2 lb. spools, 600 ft. on a spool ..... per lb. *$1.60*

Safety of Electric Firing.

Electric firing is by far the safest method, because there is no waiting for the shot to go and no doubt about when it is going to explode. It enables the blaster to retire to an unexposed place in perfect safety and without undue haste, and eliminates all danger of accident because of miscalculation of the time it takes fuse to burn or because of defective fuse, which has frequently resulted in injury to men who have returned to examine a blast about the time it exploded.

Smoke from burning fuse is entirely avoided, an item of no little value in mine work.

ELECTRIC BLASTING EXPLODERS

Copper Wire.

DUPONT OR HERCULES

Electric fuses are the detonators used when dynamite is fired electrically. They consist of a copper capsule containing a detonating charge surrounding a fine platinum wire bridge, which joins the ends of two insulated copper wires. The ends of the copper wires are secured in the copper shell by a composition plug which renders it waterproof. The fuse is fired when a sufficient current is passed through the wires and across the platinum bridge to heat the latter to a temperature high enough to ignite the charge surrounding it.

No. F6E—Double strength—single strength no longer made—heavily insulated, cotton covered exploders, w't of charge 15.43 grains or 1.00 grammes.

BLASTING BY ELECTRICITY

When a good deal of blasting is to be done, it is usual to set off the blasts by means of a battery and electric exploder—called an electric fuse. In this way any number of blasts from five or ten up to forty can be fired at once. This is found extremely convenient when it is necessary to get rid of a very large stump or extra large boulder, as frequently several ordinary sized charges fired simultaneously will destroy an obstacle which would not be affected by the same charges fired successively or by one charge as large as all the smaller ones combined.

Dynamite Caps or Powder cannot be shipped with other goods, neither can they be sent by express. Each must be shipped separately, except 100 only with each 100 feet of Safety Fuse may be sent UP to 500 Caps and 500 feet of Safety Fuse. No more than 500 Caps may be shipped with any larger amount of Safety Fuse.

★ Owing to City Ordinances, we are unable to carry in stock Powder, Dynamite or Caps, so these goods are necessarily for shipment from factory.

★ Items Marked Thus ★ Are Shipped from Factory Only.

BLASTING WITH POWDER

The great advantage that black blasting powder has over high explosives for use in coal mines, building stone quarries and for blasting in soft material is that it exerts a strong push upon the material to be moved and not a blow similar to that exerted by high explosives. This makes black blasting powder very valuable in quarry work where it is desired to obtain material in large blocks.

For use in mining, as the ordinary black blasting powder is in grains, it is impossible to put it in most drill holes unless confined in cartridges, which are usually cylinders of manila paper. Bore holes underground should never be loaded with loose powder on account of the danger of dust from the powder coming in contact with lights and carrying the flames into the main body of powder, thus causing an explosion. However, in quarry work, railroad and other grading it can be poured into dry downward holes. In large chamber blasts, the powder packed in kegs or bags can be placed in the room excavated to receive it.

The cartridges for use in mines can be made by rolling the paper around a wooden cartridge bar of a slightly smaller diameter than the drill hole. The loose edges of the paper are stuck down by means of miners soap, one end of the paper is folded over to close the end of the cartridge, and the stick when removed, leaves a paper cylinder. When the cylinder is filled with powder, the cartridge is completed by folding down the other end.

To spring a hole, explode a stick or two of dynamite in the bottom with very little or no tamping. The explosion forms a chamber or pocket at the bottom, where a large pocket is required, this operation can be repeated with increased charges. When the pocket is thoroughly cooled, pour the powder into this pocket until it begins to come up in the hole, placing the means of ignition as close to the center of the charge as possible. Then tamp the hole solid to the collar.

A uniform and compact tamping is essential with the use of black powder. For tamping black powder charges the material used should be free from small pieces of stone or other hard matter that might produce sparks or damage the fuse, hence stone dust, coal dust, etc., are not considered suitable as tamping. The best material is moist clay, which should be rammed home in layers with a wooden tamping rod, a paper wad being placed between the powder charge and the first layer of clay. In holes having anything but a downward slant the tamping material is best wrapped in short paper cartridges.

Dynamite, Caps and Powder Cannot be Shipped with Other Goods, Neither Can they be Sent by Express, but will be Shipped Direct from Nearest Magazine. Each Must be Shipped Separately, Except 100 only Caps with Each 100 ft. of Safety Fuse May be Sent up to 500 Caps and 500 ft. of Safety Fuse.

BLASTING WITH DYNAMITE

Dynamite is a combination of nitroglycerine with other explosive ingredients, and when properly manufactured is much safer than gunpowder. 40% is the grade most used and is best for quarry work, stump blasting, etc. While 30% is suitable for blasting clay, very soft rock and other material which requires a pushing rather than a shattering effect, 50% to 60% is necessary for very hard rock. 60% is best for breaking boulders, submarine blasting and shooting wells.

To Prepare a Cartridge for Use.

Cut off a piece of fuse the required length and carefully insert the freshly cut end of the fuse in the cap. The fuse should exactly fit the cap. If it is too large, pare it down, and if too small, wrap it with paper till it is the right size. Press the cap down gently until the charge contained in the cap comes in contact with the loose powder of the fuse end, then with the crimpers tighten the empty end of the cap, so that the fuse cannot be pulled out.

The principal precaution to be observed in crimping caps on the fuse is to be careful not to crimp the caps tight enough to cut off the powder train in the fuse, thus preventing the fire from reaching the cap and causing a failure of the blast.

If the place where the blasting is being done is wet, the filling of the cap must be protected, as if allowed to become damp it might cause the blast to hang fire or miss altogether. This trouble can be very simply prevented by smearing the outside junction of the fuse and cap—i. e., where the cap is crimped to the fuse as well as the hole in the cartridge where the fuse enters—with grease, tallow or some similar substance to keep out the dampness.

Now, having prepared the cap as just described, it is ready to be put into the cartridge. Take a pointed stick of wood about the size of a lead pencil and punch a hole in the side of the cartridge about an inch or two from one end, at an angle towards the other end. Insert the cap in this hole and tie the fuse tightly by means of a half hitch.

This prevents the tamping rod from coming in contact with the cap, and keeps the cap from pulling out.

Having prepared the cartridge for use in the manner described, insert it in the bore hole and push it firmly home, being sure it fully fills up the diameter of the hole, for crevices or air spaces greatly lessen the power of an explosive.

Be sure the tamping is done with a wooden rod. Never use a metal tamping rod or a rod having metal parts. An old broom handle makes an excellent tamping rod.

After the charge is pressed home as directed, put in two or three inches of fine dirt or sand, and tamp—pack—lightly. The tamping material should be packed as firmly on top of the charge as can consistently be done without disarranging the cap and fuse in the cartridge. Then fill up two inches more of the hole with tamping material, packing it in a little more firmly. After five inches of tamping covers the charge, the tamping may be rammed as hard as is possible with hand power, without danger of premature explosion. It is not safe to tamp by a blow any stronger than can be given by hand.

BLACK SPORTING AND BLASTING POWDERS

F1SS—Pound Cans—bulk—FFFG, FFG, FG and CG, each★ *$1.20*

King's Semi-Smokeless, all shipments from factory. F. O. B. Kings Mills, Ohio

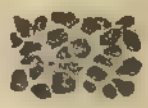
Combines all the best qualities of black powder with the best qualities of nitro powder. Gives the highest velocity of nitro powder with the low bursting strain of black powder. Produces very little smoke and no offensive odor, leaves but the slightest deposit, does not cake or cause leading, pitting or discoloration of gun. Gives a fine pattern, is quick, strong, penetrating, far reaching, always accurate and reliable, and is as safe as any black powder

Requires no priming and nothing better than the ordinary shell, primer and wadding for the highest efficiency. A great powder for field and trap, and especially gratifying to those desiring a better article than black powder and less expensive than nitro powder.

Equal to the best for shot guns, but excels anything yet discovered for rifles and pistols. Suited equally to all calibers, all sizes and kinds of metallic ammunition, attention to size of grain only being necessary in order to secure best results. It gives to the ball great velocity, range, penetration, accuracy and very slight trajectory, at the same time leaving the gun almost absolutely free from fouling. Though having a muzzle velocity of nearly 1,700 ft., it does not strip the ordinary lead ball, or cause leading or wild and unaccountable shots.

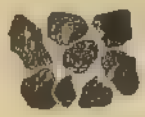
The grains are hard and resemble those of black powder, with a density of weight somewhat less. After months of storing in ordinary powder kegs, in ordinary magazines and in all temperatures, with frequent tests on instruments, there has not been discovered the slightest trace of deterioration, or any material variation in results.

BLASTING POWDERS—ACTUAL SIZE



FFF
For mining very soft or Seamy coal.

FF
For mining soft coal and breaking stone.



F
For mining hard coal and general blasting.

C
For railroad excavations, coal and iron mining, and quarrying hard stone.

CC
For granite and heavy blasting.

NEW IMPROVED GILLETTE SAFETY RAZORS

Here is an invention of intense interest to every man who shaves, a unique principle in Razor—not merely a new style. As a result of the new patented features, the NEW IMPROVED Gillette Safety Razor is the finest shaving instrument ever produced. It uses the well known Standard Gillette Blades and greatly increases their effectiveness. The Fulcrum Shoulder and overhanging Cap provide straight edges acting on the blades to produce an Adjustable Short Fluxure, which results in a straight and extremely rigid shaving edge in all positions of adjustment. The Channeled Guard underlying the adjustable blade edge enables the adjustment to be changed without sensibly altering the angle at which the razor is held in shaving, and also leaves the entire edge free to the beard while guarded from the face

All parts are made with Micrometric Precision in strict conformity with measurements determined by Gillette technical experts after exhaustive research and thousands of shaving tests.

The distinctive Diamond Knurling is used exclusively on the New Improved Gillette Safety Razor.

NEW STANDARD

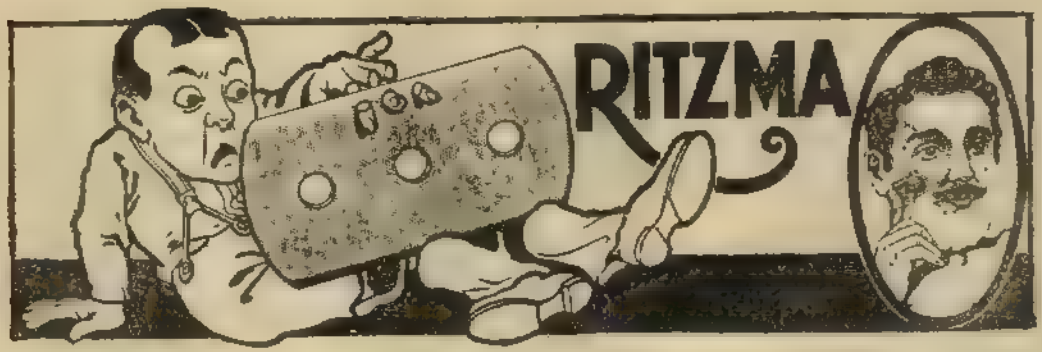
Imported Razor Blades for Gillette Safety Razors



The Celebrated Ritzma Imported Razor Blades

RITZMA—

1 dozen double edged wafer blades in a package,

10 packages in a carton

Per carton $7.20

The above blades are made of superior refined Norwegian steel, specially tempered, hand ground, hand honed and hand stropped. We prefer to have these blades sold in full carton lots.

Special Attention—On account of these blades being imported from abroad they are obliged to undergo an ocean voyage of 3,000 or 4,000 miles. To prevent their rusting, the blades are coated with a composition or substance which it is quite necessary to remove from the blade before shaving, if satisfactory results are to be obtained. Please caution your customers, therefore, as follows:

"Wipe off the Ritzma Blades before using. This can be done by wiping the blade or stroking it back and forth on the palm of the hand, very much the same as you would strop a razor blade on a cushion razor strop."

We have had considerable experience with these blades and we know that they give very satisfactory results if treated in above manner.

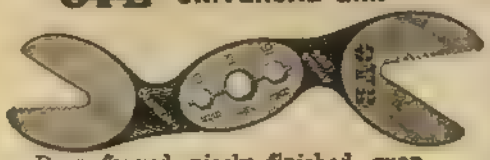
ROYSON

No. 204—6 in., drop forged nickel plated, carefully tempered, consists of 4 open end slotted wrenches fastened together with bolt and wing nut, wrenches fit U. S. Standard nuts on bolts from ⅜ to 7/16 in. diameter, also has 5/16 in. square opening in head of ⅜ in. wrench, w't per doz. 6 lbs. .....per dozen $11.80

ONE IN A BOX; ONE DOZEN IN A CARTON

CVB UNIVERSAL GRIP

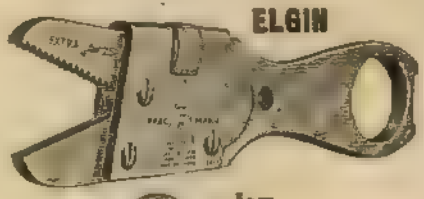


Drop forged, nicely finished, guaranteed first class.

No. 850 CVB—8¼ in., polished raised surfaces, grips from ⅜ to 1 in. diameters, dies for re-threading ⅜, ½ and ⅝ in. bolts, w't per doz., 11½ lbs. .....per dozen $7.50

HALF DOZEN IN A PACKAGE

ELGIN



Jaw.

The upper part of wrench is adjustable and is held open by a spring. It can be closed by the thumb nut until both jaws meet, giving the tool a wide range of work. The extra jaws are very easily adjusted and they renew the wrench indefinitely.

No. 202—7 in., for ⅜ to ½ in. pipe and ⅜ to ½ in. round iron, wrought steel, hardened jaws, nickel plated and polished, w't per doz. 7½ lbs., per dozen $24.00

Extra Toothed Jaws 6.00

ONE DOZEN IN A BOX

The Very Best

BIT BRACE SOCKET WRENCHES

Made of malleable, hardened so as to give the greatest strength. Nicely finished, japanned body, polished head and shank. Each size is accurately drifted to United States standard nut size. A shoulder prevents the nut working far up ino the wrench and the open shank prevents clogging with dirt, also enabling the user to handle dirt, also enabling use of wrench in places where brace would not go.

Square opening for U. S. standard nuts, cap screws and set screws.

SCHOFIELD PIANOS AND PLAYER PIANOS

Schofield pianos and player pianos are manufactured exclusively for Butler Brothers by one of the oldest, largest and best known piano manufacturers in America. These pianos are noted for their unusual beauty of tone, their artistic design and their handsome finish. They appeal strongly to those critical buyers who appreciate true musical worth.

Cases cross banded and double veneered inside and out, Empire Grand top on Upright pianos, metal bronzed plates, nushed nickel plated tuning pins, genuine ivory keys, double repeating piano action, highly finished action rails and action brackets, copper wound bass strings, latest improved metal pedal trap work. The Schofield player pianos pump very easily, automatic tracker makes the music roll track correctly, transposing device enables you to play any music roll in five different keys and all players have latest type bass and treble expression devices and metal tubing.

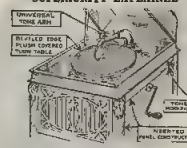
"GRAND OPERA"

Equipped With Universal Tone Arms—

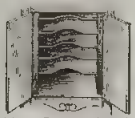
These are the features that make "Grand Opera" the biggest phonograph value on the market: 1 — Universal tone arm which plays all records correctly. 2 — Five ply mahogany or quartered oak panels — the former hand polished, the latter waxed fumed finish. 3 — All panels inserted

On any bill of phonographs we will allow dating terms as follows: Invoice to date as May 1, 2% 10 days, 1% 30 days, net 60 days

A FEW POINTS OF "GRAND OPERA" SUPERIORITY EXPLAINED



Universal Tone Arm plays all records without extra attachments.
Plush Covered Turn Table is superior to most other phonographs which have only billiard cloth on the turntable.
Tone Modifier usually found only in much higher priced machines.
Panel Construction. Each panel is set in a continuous frame which prevents flat surfaces from warping and adds years to the life of the machine.



Record Cabinet. In most machines the record shelves are merely slipped into grooves in the sides of the cabinets. In Grand Opera Phonographs the shelves are built into a box, stained and finished on all sides, then this box is placed in the cabinet and fastened securely with screws.

Ht. 43 in., width 19 in., depth 21½ in., double spring worm gear motor, 12 in. turntable, nickel plated tone arm and parts, automatic stop, piano hinge top. 1 in case, 125 lbs.

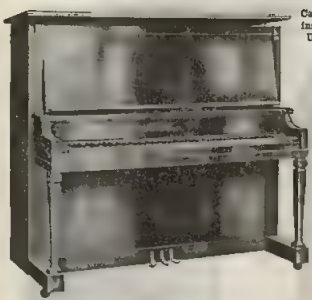
SCHOFIELD PIANOS AND PLAYER PIANOS

Schofield pianos and player pianos are manufactured by one of the oldest, largest and best known piano manufacturers in America. These pianos are noted for their unusual beauty of tone, their artistic design and their handsome finish. Under the name of the manufacturer our customers would have to pay from $100 to $250 more for the identical piano than the prices named below. BUY ONE FOR A SAMPLE AND TAKE ORDERS—SEE DATING AND TERMS BELOW



Cases cross banded and double veneered inside and out, Empire Grand top on Upright pianos, metal bronzed plates, bushed nickel plated tuning pins, genuine ivory keys, double repeating piano action, highly finished action rails and action brackets, copper-wound bass strings, latest improved metal pedal trap work. The Schofield player pianos pump very easily, automatic tracker makes the music roll track correctly, transposing device enables you to play any music roll in five different keys and all players have latest type bass and treble expression devices and metal tubing.

HOLMES & EDWARDS
SILVERWARE

Holmes & Edwards Silver Plate is distinctive and smart and carries with it our guarantee of complete satisfaction so that you can stand back of it with your own reputation.

Holmes & Edwards Silver Plate is nationally advertised and has many exclusive merchandising features, which attract and appeal to the consumer.

All of the goods are packed in a distinctive package and the *Super Roll is an exclusive patented feature* of this line.

The Artcraft and Haddon Hall chests are foremost among silverware containers as being distinctive and can be had only with the Holmes & Edwards line of Silver Plate

TWO ESTABLISHED QUALITIES

SILVER INLAID

The Silver Inlaid process insures against wear. For each staple piece stamped, Silver Inlaid has a cavity made at the back of the bowl and handle where it constantly wears on the table. This cavity is filled with solid silver before plating. This makes the article literally

"SOLID SILVER WHERE IT WEARS"

SUPER PLATE

In this process the articles are plated and finished by the Holmes & Edwards scientific method, embodying distinctive features which add to its wearing qualities.

"PROTECTED WHERE THE WEAR COMES"

BALL BEARING—HIGH SPEED

Details of Tub Construction

Tub—Tub Made of Best Quality Selected Southern Cypress. Inside Corrugations. Cypress will Last Longer and Give Better Satisfaction in a Washing Machine than Any Other Wood. The Tub is Finished Nicely in Natural Wood Finish with a Good Quality of Varnish and is Very Strong in Construction, the Stave Legs Being Well Braced to Prevent Leakage.

All Gears are Underneath the Tub where they are Entirely Out of the Way; no Danger of Catching or Tearing Clothing.

On account of the Special Ball Bearing, Together with the Double Lever and Walking Beam Construction, this Washing Machine Actually Does Run Easier when Loaded Than Any Other High Speed Washer.

Note—This Machine can be Operated Either in a Sitting or Standing Position. Operating Handle is Provided at Lower End with a Metal Stirrup so that Both Hand and Foot Power May be Applied.

Mechanical Principle—The Novel Mechanical Principal of Construction, that is the Double Lever with Walking Beam Connection, not only Equalize the Power, but give Greater Speed to the Agitator than Any Other High Speed Washing Machine.

Ball Bearing—The Ball Bearing Used is Simple, Set up in Vaseline, so that it will not Need Oiling for Years and is Without Question the Easiest Running Bearing Used on a Washing Machine. It is Simple and Cannot Get Out of Order.

Balance Wheel—Extra Heavy; This Part of the Mechanism Actually Takes Off the Major Portion Muscle Power Required to Operate the Old Style, Low Speed Washer.

Castings—All Castings Made of Best Quality Steel, and Every Metal Part of the Machine is not Only Carefully Made and Extra Heavy and Strong but is Finished, Inside and Out, Electro Galvanized by a Sherardizing Process which Finish Does not Peel or Crack as Paint will Do and Effectually Prevents Rust.

Each

No. 22—Inside Dimensions—Diameter at Bottom 23 inches, at Top 20 inches; Depth 12¾ inches; Height to Top of Tub 28½ inches; Height Over All 44½ inches; Length of Wringer Board 15½ inches; Tub Made of Best Quality Cypress, Natural Finish and Varnished; Inside Corrugated, Giving a Perfect Rubbing Surface; All Metal Parts Electro Galvanized Finish, Legs Securely Bolted to Body and Strengthened by Heavy Cross Braces..... **$26.00**

WASHING MACHINES

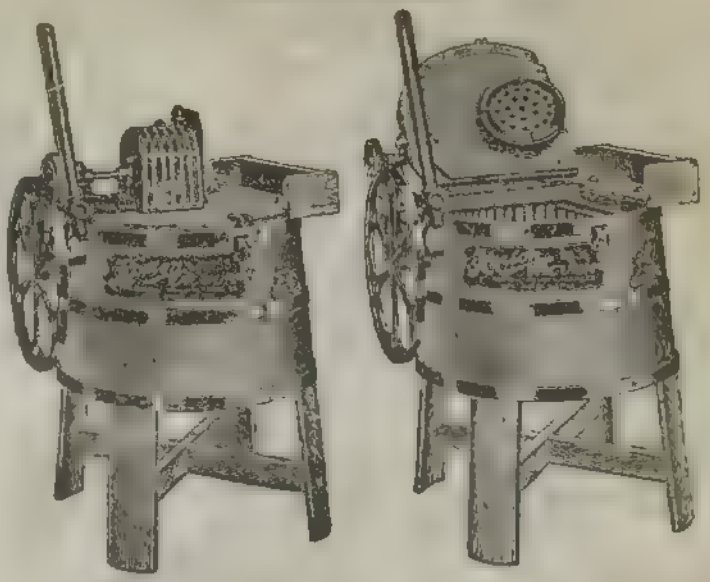
HORTON VACUUM



In This Washer the Plunger, or Agitator, Does 50% More Work with the Same Effort than on Other Machines, Because it Makes 2½ Strokes to Each Stroke of the Operating Lever. This High Speed is Made Possible by the Frictionless Cut Gears and the Well Balanced Mechanism.

Each One of the Many Perforations Acts as a Valve to Let in Air for Suction Each Time the Plunger is Raised Out of the Water.

[illegible] Agitation is Produced by this High Speed Method, but the Machine Must be Securely Closed to Keep the Water and Suds in the Tub.

There are More Real, Common-sense Features in the **Horton Vacuum** Than Any Hand Power Washer on Earth. It Does the Work Speedily and Noiselessly No Matter How Dirty the Load.

Anybody can Operate the Horton Vacuum. The Operating Lever can be Placed in Either of Two Positions, Suitable for Either Child or Grown Person.

Mechanism—Driving Gears are CUT Instead of Cast, Causing the Teeth to Mesh Perfectly and Reduces Friction to a Minimum. It also Makes the Machine Run Much Easier, Perfectly Noiseless, and it Will Wear Much Longer.

Tub—The Tub is Made of the Highest Grade Louisiana Red Cypress [illegible] Thoroughly Seasoned. It is Made Larger on Account of the Easy Running Mechanism, Enabling the Work to be Done More Quickly. It is Full, Corrugated on the Inside by a Special Process to Avoid Splinters.

Finish—The Mechanism (Except the Fly Wheel) is Gold Bronzed. The Fly Wheel and Hoops are Green Enameled. The Tub has Three Coats of Coach Varnish and the Name is on a Beautiful Decalcomania Transfer. These Combinations Give the Entire Machine the Appearance of Parlor Furniture.

Each

No. 35—Weight Crated, 95 lbs.....$23 00

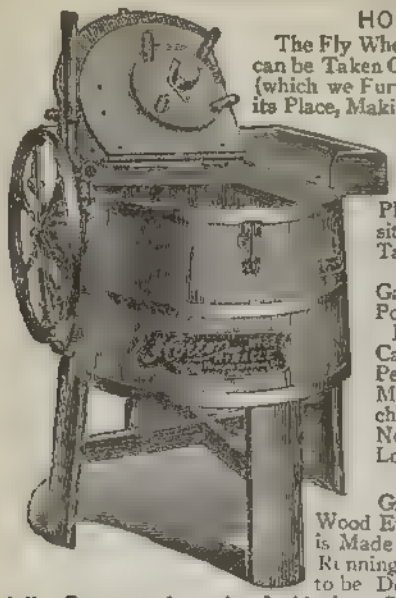
WASHING MACHINES

HORTON MIRACLE



The Fly Wheel on the Regular Miracle Washer can be Taken Off Instantly and a Pulley Wheel (which we Furnish at Small Cost) can be Put in its Place, Making a Gasoline Engine Power Machine. And the Belt Need not be Removed Each Time Lid is Opened.

The Operating Lever can be Placed in Either One or Two Positions Convenient for a Short or Tall Person, Adult or Child.

The Dolly Post is Guarded by a Galvanized Cup, Eliminating all Possibility of Tearing Clothes.

Driving Gears are Cut Instead of Cast, Causing the Teeth to Mesh Perfectly and Reduces Friction to a Minimum. It also Makes the Machine Run Much Easier, Perfectly Noiseless, and it will Wear Much Longer.

The Tub is Made of the Highest Grade Louisiana Red Cypress (the Wood Eternal), Thoroughly Seasoned. It is Made Larger on Account of the Easy Running Mechanism, Enabling the Work to be Done Much More Quickly. It is fully Corrugated on the Inside by a Special Process to Avoid Splinters.

The Mechanism (Except the Fly Wheel) is Gold Bronzed. The Fly Wheel and Hoops are Green Enameled. The Tub has Three Coats of Coach Varnish and the Name is on a Beautiful Decalcomania Transfer. These Combinations Give the Entire Machine the Appearance of Parlor Furniture

CLOTHES WASHERS

RAPID

Makes Clothes Washing Easy. Saves the Knuckles, Saves the Clothes, Saves One-half the Soap. Just the thing for Washing Curtains and Other Delicate Fabrics. The Heavy Part of the Washing is Quickly Done by Placing the Clothes, or Fabric, to be Washed in a Tub of Water or Suds (the Water can be Boiling Hot), and Agitating the Water by a Vertical Motion of the Washer. Fifteen Minutes Time to a Tub of Clothes. This Forces the Water Through the Fabric, and Removes the Dirt.

Per Dozen

No. R—Made of Bright Tin Plate; Very Strong and Durable; All Edges Rounded, No Sharp Edges to Tear Clothes or Fabrics; 40inch Natural Finish Hardwood Handle; 4 Inch Nib Handle Bolted to Large Handle; Length Over All 48 inches; Weight per Dozen 25 lbs..... $14.50

ONE IN A BOX

SELF-SETTING IRON PLANES

SMOOTH BOTTOM

The cutter irons are made from special high grade steel, are thin and easily kept in order.
The malleable Frog and Steel Cap reduce greatly the liability of breakage.
Handle and knob are made of highly finished, thoroughly seasoned rosewood. They are securely fastened to plane with steel rods that have brass screw heads. Trimmings are nickel plated and japanned, giving the planes a very fine finish throughout.

SMOOTH

No. 803—8¾ in. long, 1¾ in. cutter, w't each 3 lbs., each $5 40

No. 804—9 in. long, 2 in. cutter, w't each 3½ lbs., each $5.90

No. 807—22 in. long, 2⅜ in. cutter, w't each 7 lbs. ..... each $9.90

ALL ABOVE ARE ONE IN AN ATTRACTIVE BOX

SELF-SETTING IRON PLANES

CORRUGATED BOTTOM

Corrugated bottom planes are preferred by many users, because of there being less friction from the bottom, runs a little lighter. They have the self setting cutter iron made from special high grade steel.

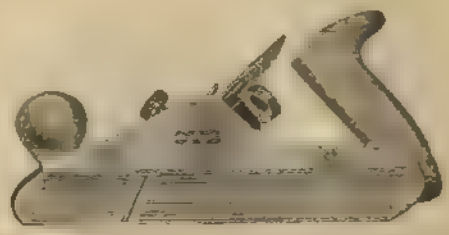
The malleable Frog and Steel Cap reduce greatly the liability of breakage.

The Handle and Knob are made of highly finished, thoroughly seasoned rosewood. These are securely fastened to plane with steel rods that have brass screw heads. Trimmings are nickel plated and japanned. Plane is finely finished throughout.

The self-cutting feature lies in the construction of the plane iron. If taken out to be honed or sharpened, goes back in same position as before removal. The plane cannot chatter because the cutter iron is held rigid at the point by the cap; at the same time the cap screw used for tightening the cap is pressing against the binder plate on top of the cutter iron. This pressure against the binder plate holds the cutter firm its entire length.

SMOOTH

No. 803C —8¾ in. long, 1¾ in. cutter, w't each 3 lbs., each $5.65



No. 804C —9 in. long, 2 in. cutter, w't each 3¾ lbs., each $6.20

JACK

No. 805C —14 in. long, 2 in. cutter, w't each 4¼ lbs. ..... each $7.10

No. 806C —18 in. long, 2¼ in. cutter, w't each 5½ lbs. ..... each $9.10

JOINTER

No. 807C —22 in. long, 2½ in. cutter, w't each 7 lbs. ..... each $10.40

ALL ABOVE ARE ONE IN AN ATTRACTIVE BOX

SELF-SETTING WOOD PLANES

Wood planes are preferred by many because of being lighter in weight than the iron planes.

Wood Planes are made of specially selected beechwood, thoroughly seasoned and dried.

The iron frog with adjustable throat will lengthen greatly the life of these wood planes, as this frog and throat can be moved up to permit the bottom of the plane to be trued up when worn.

The cutter iron can also be adjusted sidewise by loosening the small screw that holds the binder plate to cutter.

Keep cutter iron sharp and properly adjusted, and you will have a plane that is easy to push and will give the greatest satisfaction. In sharpening, care should be taken to keep the cutting edge straight and square with the edge of the cutter iron. Cutting iron can be adjusted sidewise by loosening the set screw that holds binder plate to top of cutting iron.

SMOOTH

No. 835—10 in. long, 2 in. cutter, w't each 2¾ lbs., each $6.20

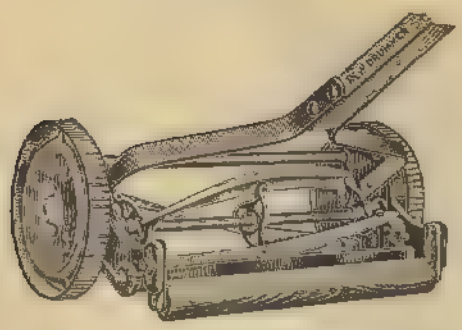
LAWN MOWERS

THE NEW DRUMMER



Guaranteed to be the best low-priced mower ever made. Design new and attractive, very popular on account of lightness of draught. All connecting points machined to exact dimensions, shoulders milled on ends of steel cross rod to produce rigid frame. Wheels made with spoked ring, making a raised tread. Reel shaft is made of best machinery steel, 5/16 in. in diameter and has adjustable brass bushings to make up wear.

Decoration—Dark green wheels, apple green body and gold striping.

8¼ in. wheels, 3 crucible steel blades carefully tempered and self-sharpening, reel 5½ in. in diameter, ⅜ in. cross-rod, screw adjusting cutter bar, malleable iron spiders, hard maple handle and roller.

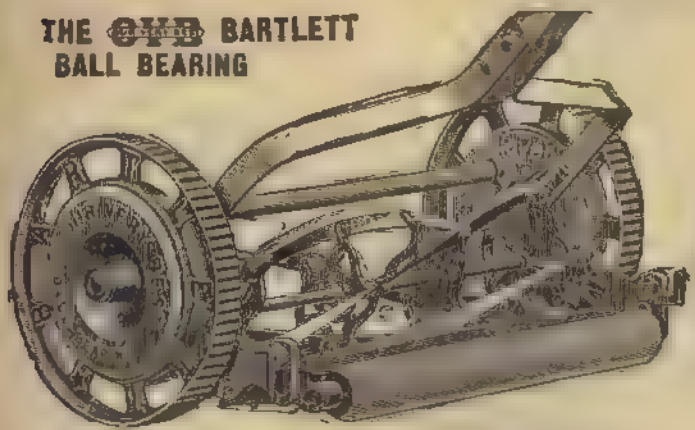
LAWN MOWERS

THE [illegible] BARTLETT BALL BEARING



The [illegible] Bartlett was made first. Cost figured afterwards. The most successful mower we have ever known.

Every blade made of crucible steel in the old fashioned way, hardened and tempered in oil, notwithstanding the fact that it involves six to ten times as much expense as if made of Bessemer or open hearth steel.

We know of numerous instances where this machine has been running for many years without requiring regrinding or any other sharpening than that which can be done by use of a screw driver, in adjusting the under knife so that it is kept in contact with the revolving blades. This feature alone is worth the full retail price of the mower, because it will save the user the expense of sharpening.

Dust proof ball bearing equipment of machine is equal to the finest bicycle or automobile. It costs three times as much to make these parts as it does in the usual style.

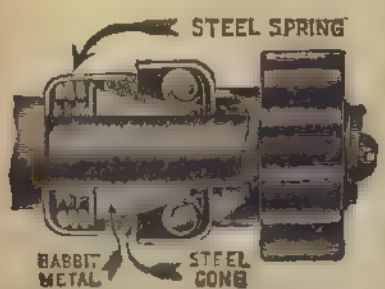
Reels are perfectly adjusted at the factory and it is rarely that adjustment is necessary. Wheel axles are of extra large size and length, made of cold drawn steel shafting. Entire machine is made in jigs on an interchangeable plan, so that if a part is broken or worn out, a duplicate which will work properly can be secured at small expense.

Decoration—Beautifully finished in gold, maroon and blue, striped to enhance color effect.

10 in. driving wheels, 6 in. reel, five highest grade crucible steel revolving knives, upturned dead knife ground on both edges. Three rel braces, 9/16 reel axle with bicycle ball bearings, ¾ in. front cross rod. Hooks for attaching grass catcher, hardwood roller and handle.

Nos.	E115	E117	E119	E121
Cut, in.	15	17	19	21
Weight, lbs.	65	67	71	76
Each	$29.70	33.80	37.80	41.80

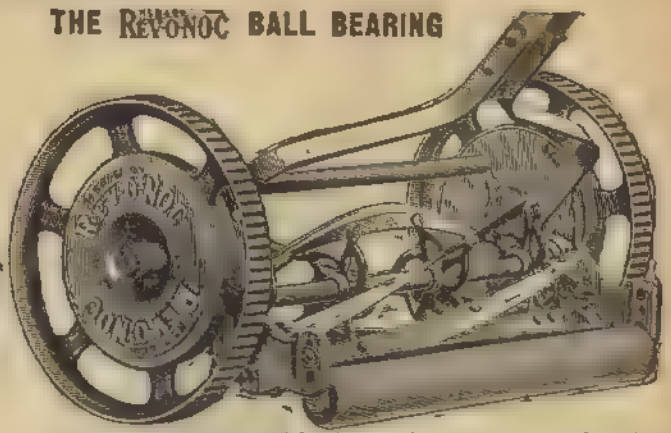
ONE IN A CASE



DESCRIPTION FOR AUTOMATIC BALL BEARING ADJUSTMENT

Automatic ball bearing adjustment consists of a case hardened steel spring, working against a collapsible sleeve, around shaft and inside cone. At the instant all wear and looseness of cone is taken up by spring, sleeve grips shaft, thus preventing any further pressure than is required by most delicate adjustment. Keeps ball bearings perfectly adjusted during entire life of mower. This patent adjustment is used on [illegible], Il-a-noy, Cruso and Paragon Mowers.

THE [illegible] BALL BEARING



Ball bearing parts of high speed steel, tempered under secret process, reel bearings equipped with new patented automatic adjustment.

A ¾ in. steel shaft and double riveted end spiders prevent reel from being sprung and add increased momentum. Five revolving blades of best crucible steel, tempered in oil, shear cut, self sharpening, and ground under water.

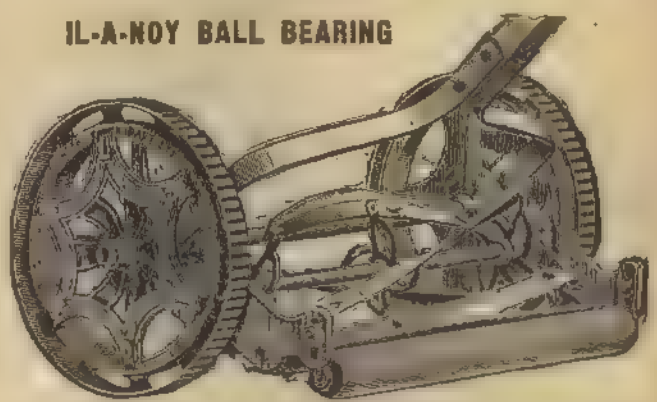
Decoration—Gold and blue striped.

11 in. drive wheels, 6 in. diam., reel ¾ in. shrub rod.

Nos.	E214	E216	E218	E220
Cut, in.	14	16	18	20
W't, lbs	59½	64	65	68
Each	$23.60	25.00	28.30	27.70

ONE IN A CASE

IL-A-NOY BALL BEARING



Very high grade ball bearing, of popular new open type construction, holes drilled through center of side plates, through which piece of steel shafting ¾ in. in diam. passes, forming both a shrub guard and an axle for wheels, enabling them to turn on steel bearings. Recesses in shafting accurately placed so that side plates are at right angles with the cutter bar, making a true "four squared" frame.

Four revolving blades of high grade steel, self sharpening and ground under water to preserve temper, reel bearings equipped with new automatic adjustment, ball bearing part of high quality cone steel, carefully hardened.

Decoration—Wheels red and gold, gold reel and bar, green side plates striped in appropriate colors.

10½ in. drive wheels, 6 in. diam., reel, screw adjusted cutter bar, hardwood roller and handle laquered to protect from weather.

Nos.	E314	E316	E318	E320
Cut, in.	14	16	18	20
W't, Ibs.	57	61	64	63½
Each	$19.10	19.90	20.90	22.30

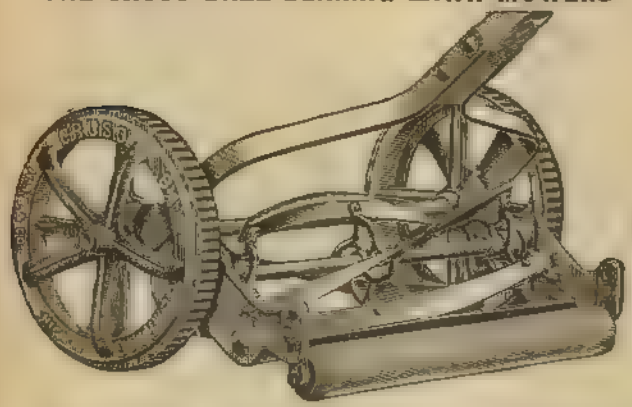
LAWN MOWERS

THE CRUSO BALL BEARING LAWN MOWERS



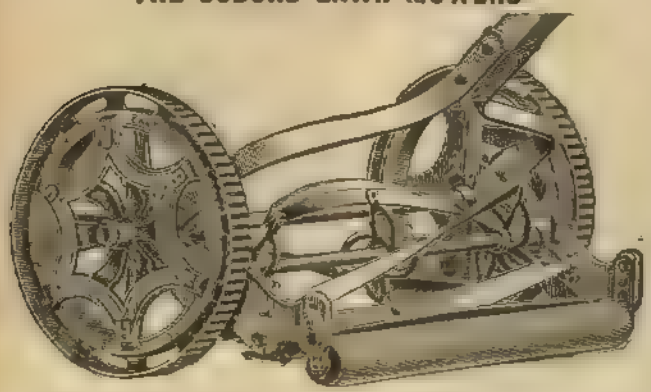
The "CRUSO," ball bearing, 9 in. wheels, four blade crucible steel reel, 5½ in. in diameter, carefully tempered and sharpened. Automatic, self-adjusting, ball bearing cones. Strongly built frame construction. A very satisfactory ball bearing mower at a low price.

Decoration—Gold and aluminum.

Nos.	E414	E416	E418
Cut, in.	14	16	18
W't, lbs.	49	51	53
Each	$16.70	17.30	17.90

ONE IN A CASE

THE SUBURB LAWN MOWERS



Without doubt the best plain bearing mower ever built. All parts accurately machined and fitted, wheels turn on steel bearings, which add to the easy running qualities of this mower. Blades of excellent quality crucible steel, water ground and self sharpening, concave edge to allow user to preserve perfect cutting edge if mower is re-ground or re-sharpened. Reel rigidly constructed and ratchet indestructible. Reel spiders and roller brackets made of malleable iron preventing possibility of breakage, bracket made with gudgeon entering roller 2¼ in. instead of an iron pin driven into roller, so that roller runs noiselessly and does not split.

Decoration—Gold wheels, sky blue frame, silver trimmings.

10½ in drive wheels, 6 in. reel, four revolving blades, cutter bar screw adjusting, reel bearings fitted with brass bushings and a screw adjustment.

Nos.	E614	E616	E618
Cut, in.	14	16	18

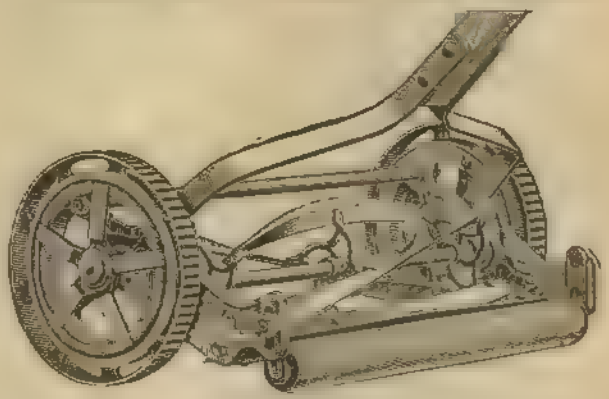
Each	$16.40	17.30	18.20

ONE IN A CASE

PARAGON BALL BEARING LAWN MOWERS

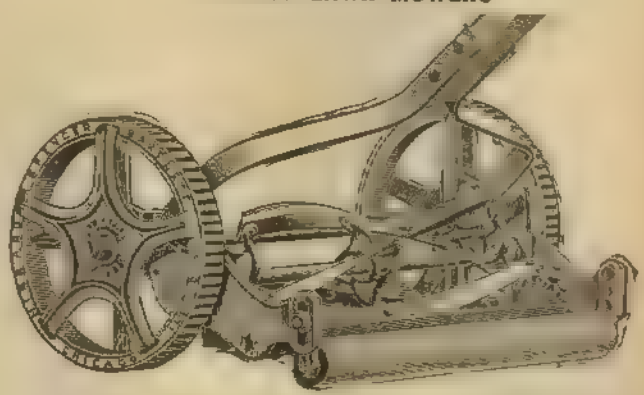


8 in. wheels, 4 crucible steel blades carefully tempered and sharpened, reel 5½ in. in diameter, self-adjusting ball bearing cones, finished in gold and aluminum with red trimmings.

Nos.	E514	E516	E518
Cut, in.	14	16	18
W't lbs.	43	45	47
Each	$15.00	15.60	16.30

ONE IN A CASE

GLENCOE LAWN MOWERS



A medium priced mower, graceful in outline, light in weight, yet strongly constructed, with best quality materials and workmanship throughout. Cutter bar bed plate planed to true surface, so stationary knife can be firmly riveted to it and have a perfect and even bearing. This together with the fact that the reel is a perfect cylinder produced by accurate grinding, insures a smooth cut lawn. Adjusting screws of cutter bar operated from top and against a finger extending from main body of bar, making it impossible to spring bar, as in adjustments where the two screws act against each other on either side of a pivotal point. Both screws being on top, it is necessary to turn mower upside down for adjusting.

Decoration—Empire red and gold bronze.

9 in. drive wheels turning on steel bearings, four revolving blades of crucible steel. Thoroughly hardened and self-sharpening, 5½ in. reel, shrub guard, reel bearings equipped with a lock nut screw device for taking up all wear.

Nos.	E714	E716	E718
Cut, in.	14	16	18
W't, lbs.	43	51	52

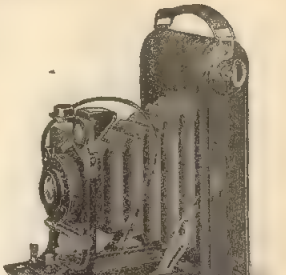
"Seneca Chief" Roll Film Cameras

Nos. 1A and 2C. For Any Roll Film of Standard Make

The Camera De Luxe—the Last Word in Camera Efficiency

The Seneca Chief is a handsome, well made Camera. It was made with the idea of providing the very best possible in hand cameras and is furnished in two sizes: No. 1A takes pictures 2½x4¼ inches. The No. 1C takes pictures 2⅝x4⅞ inches. This Camera is noteworthy on account of its superior construction and unfailing ability to get pictures. Equipped with the "Kwikset" focusing lever which is so simple that accurate focusing can be done by the most inexperienced photographer.



Details—No. 1A for rectangular pictures, 2½x4¼ inches. No. 2C, 2⅝x4⅞. Capacity No. 1A, 12 exposures; **No. 2C,** 10 exposures, without reloading. **Weight, No. 1A,** 24 ounces; **No. 2C,** 26 ounces. **Dimensions of Cameras, No. 1A,** 3⅝x8¼x1⅝; **No. 2C,** 4⅛x8⅝x1⅝. **Camera,** aluminum, genuine leather covered. Front, rising and falling, operated by rack and pinion, also lateral slide. **Bellows,** genuine Russia leather. **Film Chamber,** hinged removable, with spool pins. Tripod Sockets, two. **View Finder,** brilliant, collapsible, cleanable, with spirit level attached. **Lens,** rapid symmetrical, speed, f 8, No. 1A, 5¼-inch focus. No. 2C, 5⅝-inch focus. Woolensak Anastigmat, speed, f 7.5, No. 1A 5¼-inch focus. No. 2C, 6⅛-inch focus. Woolensak Anastigmat speed, f 6.3, No. 1A 5¼-inch focus. No. 2C, 6¼-inch focus. **Shutter,** Victo or Autic Automatic (dustproof) and Optimo Automatic extra speed (dustproof). Manual of Photography and Instruction Book.

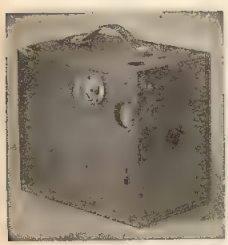
Ansco Buster Brown Box Cameras

For Any Roll Film of Standard Make



Nos. 2, 2A, 2C and 3

The Box Buster Brown line is designed with special reference to the wants, capabilities and aims of boys and girls. These cameras are essentially for snapshot photography, requiring no focusing. They are practical instruments in every respect and will produce the best work demanded within their scope. They are made of well-seasoned, well finished and well-assembled wood throughout. The trimmings are heavily nickel-plated and polished, and the box covered with seal grain composition leather.

They are equipped with the Meniscus Achromatic lens (except the No. 2, which has a simple Meniscus lens) and shutter contained within the box and provided for time and instantaneous pictures. The lens has diaphragms with three different sized openings. There are two ground glass finders for horizontal and vertical picture. Noiseless winding.

Prices

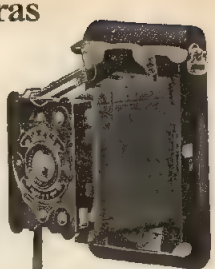
Seneca Roll Film Cameras

For Any Roll Film of Standard Make

The Vest Pocket Seneca



The Vest Pocket Seneca is a practical little Camera combining simplicity, compactness and real picture-taking ability. It takes pictures measuring 1⅝x2½ inches.

Getting good pictures with the Vest Pocket is easy. Open the protecting door, pull out the front which automatically locks in the correct position and the Camera is ready for work. No focusing or estimating distances is necessary; every object six feet or more from the lens will be sharp and clear in the picture.

Details: For rectangular pictures 1⅝x2½ inches. Capacity, 8 exposures without reloading. Dimensions of camera, 1x2¾x4⅞ inches. Weight, 8 ounces. Focus, fixed, always set. Lens, Meniscus achromatic, rapid rectilinear anastigmat F 7.5 or anastigmat F 6.3. Shutter, trio (dustproof) automatic for time, bulb or instantaneous exposures of 1/25, 1/50 and 1/100 part of a second. Bellows, genuine leather. Frame, aluminum. Trimmings, nickel plated, fine grain leather covering. View finders, two brilliant.

Prices

5+6384	Vest Pocket Seneca with Meniscus Achromatic Lens	$14.90
5+6385	Vest Pocket Seneca with Rapid Rectilinear Lens	16.15
5 6386	Vest Pocket Seneca with Anastigmat Lens, speed F 7.5	19.85
5+6387	Leather Carrying Case	2.40

No. 1 Seneca Junior Camera

Makes Rectangular Pictures 2¼x3¼ Inches

The No. 1 Seneca Junior Camera has the handsome, compact construction of the Vest Pocket and takes a much larger picture. The picture size, 2¼x3¼ inches, is ideal.

A special feature of the Junior is the Kwikset focusing bar used in focusing the speedy Anastigmat models. A slight pressure of the thumb and forefinger on this bar quickly and accurately focuses the lens for near, medium or far distance. This device insures sharp, clear-cut negatives.

The f.6.3 Junior is a Camera for extreme speed work. For athletic events, horse races or for pictures of any swiftly moving objects, it is at its best. The f:7.5 lens gives 20% more speed than ordinary camera lenses of the Rapid Rectilinear type. F:6.3 is 61% faster than the Rapid Rectilinear Lenses.

Details: For rectangular pictures 2¼x3¼ inches. Capacity, 6 exposures without reloading. Dimensions of camera, 1⅝x5¼x6¾. Weight, 14 ounces. Focus, fixed, always set. Lens, Meniscus achromatic rapid rectilinear, Wollensak and Optimo shutter anastigmat F 7.5, Wollensak and Optimo shutter anastigmat F 6.3. Shutter, trio (dustproof) for time, bulb or instantaneous exposures of 1/25, 1/50, 1/100 part of a second. Bellows, genuine leather. Trimmings, nickel plated, fine grain genuine leather covering. Frame, aluminum. View finders, two brilliant.

Prices

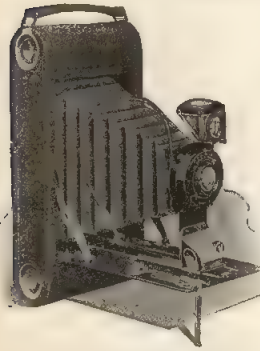
Seneca Folding Cameras

Folding Scout Camera, Nos. 2A—2C—3—3A

For Any Roll Film of Standard Make



To thousands of amateurs who had been forced to the box style on account of the limitations of the purse, the Folding Scout has permitted the pride of owning an upright round end model. Its appearance and convenience at the low cost will continue to invite the attention of thousands of others. Its record as a good picture maker is enviable. It is simple in operation, but sure in its results. The construction is of aluminum with reinforced wood sides in order to secure compactness with a minimum of weight. Seal grain leatherette, waterproof and more durable even than genuine leather, is attached permanently to the body. The genuine leather covering of the bed gives the neat appearance of the more expensive models. Absolute rigidity to the front standard is obtained by the method of attaching it to the substantial brass track.

Detail of Equipment

No. 2A for rectangular pictures 2½x4¼. **No. 2C**, 2½x4¼. **No. 3**, 3¼x4¼. **No. 3A**, 3¼x5½ (postcard). **Dimensions—No. 2A**, 2x3⅜x8½. **No. 2C**, 2x4¼x9¾. **No. 3**, 2x4½x9¾. **No. 3A**, 2x4½x10¾. **Weight, No. 2A**, 24 ounces. **No. 2C**, 27. **No. 3**, 30. **No. 3A**, 30. **Camera**, aluminum with reinforced sides, covered with black waterproof leatherette, seal grain. **View Finder**, collapsible brilliant, reversible. Seneca Roll Film Cameras

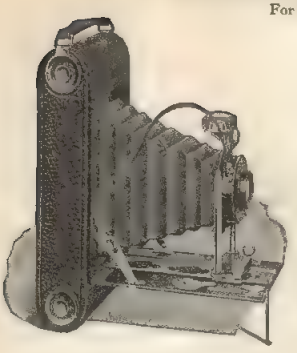
For Any Roll Film of Standard Make



Nos. 1 and 1-A Folding Seneca

These two popular models differ only in the size of the picture they make. Both cameras are favorites with the discriminating amateur and embody every improvement for the successful making of pictures. Aside from the wide range of capabilities found in each of these compact instruments, both embody simplicity in every operation. As featured in the higher priced Senecas, these models are remarkable for their durability, limited weight and beauty in design. The aluminum bodies are covered with the best grade of seal grain leather, all metal fittings being highly nickeled. Either 12 or 6 exposure film cartridges may be used, thus giving added advantage to the tourist. An assortment of optically corrected lenses, with Seneca automatic (dustproof) shutters fitted with push cord releases, completes an equipment for all requirements.

Detail of Equipment

No. 1 Roll Film Seneca, for rectangular pictures 2¼x3¼; **No. 1A**, 2½x4¼. **Dimensions of No. 1,** 2x3⅝x7½, **No. 1A,** 2x3⅞x8½. **Weight, No. 1,** 36½ ounces, **No. 1A,** 31½ ounces. **Camera,** Nos. 1 and 1A, aluminum, leather covered, seal grain. Front, rising and falling, operated by rack and pinion. **View Finder,** brilliant reversible with hood and spirit level attached. Tripod Sockets, two. Nos. 3 and 3-A Folding Senecas

For Any Roll Film of Standard Make

Same General Description as the Nos. 1 and 1A Folding Senecas. Either the Meniscus Achromatic or the Rapid Symmetrical lens may be depended upon for clear pictures; the Rapid Symmetrical being somewhat more carefully corrected. The Rapid Symmetrical Lens allows snapshots under light conditions when the Meniscus Achromatic would require a time exposure. All the shutters are dustproof and automatic and have the push cord release.

The body of the camera is aluminum with reinforced wood sides; all the trimmings are substantial brass nickel plated and the covering is genuine seal grain leather.

Detail of Equipment of No. 3

For rectangular pictures 3¼x4¼. Dimensions, 8 4x4½x2 inches. Weight, 32 ounces. Camera aluminum, leather covered, seal grain. Front rising and falling, operated by rack and pinion. View Finder Brilliant reversible with hood and spirit level attached. Tripod Sockets, two. Film chambers improved with spool pins. Focal Capacity, 6 inches. Bellows genuine Russia leather. Shutter, Uno or Autic Automatic (dustproof). Lens Meniscus Achromatic or Rapid Symmetrical speed f.8. Manual of Photography and Instruction Book.

Detail of Equipment of No. 3-A

For rectangular pictures 3¼x5½. Dimensions, 9¾x4½x2 inches. Weight 37 ounces. Camera aluminum, leather covered seal grain. Front rising and falling operated by rack and pinion. View Finder, Brilliant reversible with hood, spirit level attached. Tripod sockets, two. Film Chambers improved with spool pins. Focal Capacity, 7 inches. Bellows genuine Russia leather. Shutter, Trio or Autic Automatic (all dustproof). Lens, Meniscus Achromatic or Rapid Symmetrical speed f.8. Manual of Photography and Instruction Book.

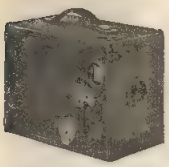
Seneca Box Cameras No. 2—2A—2C Scout

For Any Standard Make of Film Cartridge



The Scout is a real Camera that exactly suits the boy or girl and yet appeals to older people as well. These rugged little instruments have such wonderful capabilities and are so simple to operate that perfectly satisfactory pictures can be made just as easily by the children as by the grown-ups. Picture making is easy and certain with the Scout Cameras. There is no distance to judge when making an exposure, as the Meniscus Achromatic Lens is fixed focus and will make a clear, sharp, picture over the entire film to its extreme margins, and the reliable Scout automatic Shutter provides for either instantaneous snaps or time exposures.

Unusual convenience is found in loading the Scout Camera, as the method is a new and easy one. The film chamber is held in the Camera by a most secure and simplified locking device. Upon releasing one draw clasp and two clamp clips, the film chamber can be easily withdrawn, loaded, returned to place and firmly locked in an instant.

These durable and inexpensive picture making instruments, made entirely of wood and metal, are the lightest and most compact upon the market. There may be higher priced cameras, but, considering their low cost, none better. They are made by the same workmen who turn out the higher priced Senecas.

Leatherette furnishes a waterproof as well as a durable covering. The attractive trimmings are of substantial brass with a heavy nickel plating.

Both finders are accurately and securely adjusted to show what objects will appear in the picture.

Detail of Equipment

Winding Key—Improved and noiseless.

Shutter—Automatic for time or instantaneous exposures.

View Finders—Two for horizontal or vertical pictures.

Diaphragm—One on No. 2 size and three on the No. 2A and No. 2C.

Film Chambers—Improved, quick loading.

Covering—Seal grain leatherette.

Dimensions—No. 2, 3⅝ x 4⅛ x 5⅜ in. No. 2A, 3½x5¼x6 inches. No. 2C, 4⅛x6⅞x6⅛ inches.

Weight—No. 2, 12 ounces. No. 2A, 17 ounces, No. 2C, 21 ounces. (Actual wt.)

Capacity—No. 2, six exposures without reloading. No. 2A, twelve exposures. No. 2C, ten exposures.

Lens—Fixed focus Meniscus first grade on the No. 2 Meniscus Achromatic. Achromatic Lens on No. 2A and 2C.

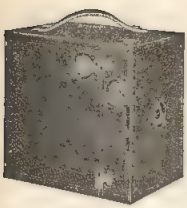
For Films for Above Cameras, See Page 263

Seneca Box Cameras Nos. 3 and 3A Scout

For Any Standard Make of Film Cartridge



This model is made for the 3¼x4¼ and the popular postcard size pictures and combines all the simplicity of the smaller sizes.

The camera itself is fixed focus—always ready to take a picture. The lens is not only carefully selected, but carefully adjusted in each camera. The shutter is carefully designed to eliminate the difficulties of ordinary shutters, it runs over a flat metal plate, and has a patented device to prevent double exposures. Sand and dust are kept out by a dust hood, which comes close to the revolving disk. It can be loaded and unloaded in daylight. The method of loading allows the entire film chamber to be removed from the side and every movement of the operation to be visible to the eye and easy to perform.

The Scout is the lightest, most compact and most substantial camera upon the market. It is not a pasteboard toy, for it is made entirely of wood and metal, and the durable leatherette covering with nickeled brass trimmings gives it a handsome appearance. Suitable for old or young and just the thing to complete the pleasure of that holiday afternoon.

Detail of Equipment

Dimensions—No. 3 4½x5¼x5⅞ inches. No. 3A, 4¾x6½x6¾ inches.

Weight—No. 3, 20 ounces. No. 3A, 26 ounces.

Capacity—No. 3, 6 or 12 exposures. No. 3A, 6 or 10 exposures.

Lens—Nos. 3 and 3A, fixed focus Meniscus, first grade.

Shutter—Automatic improved for time or instantaneous exposures.

View Finders—Two, for horizontal or vertical pictures.

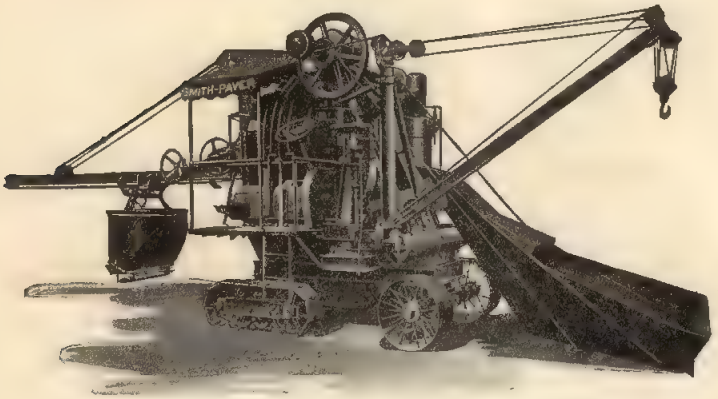
Smith Paving Mixers



Smith 14-E Paving Mixer with Gasoline Engine,
Water Cooling Tank, Boom and Bucket, Caterpillar Traction, All-steel Ball-bearing Derrick.

EXCLUSIVE SMITH FEATURES
Highest Drum Design

Low over all height (12 feet, 9 inches for 21-E) so that it passes under bridge and trolley wires.

Boom seven feet from ground—bucket holds more than full batch.

Steep angle for distributing chute.

Simple control for swinging of boom and chute.

Gears all enclosed.

Double pivotted loading skip, attaining a 55 degree discharge angle to insure quick, clean discharge.

Automatic skip brake, which prevents dropping of skip, except when released by lever.

All-steel, ball-bearing derrick, built as a unit of the paver itself, not depending upon extra wheels for support—for use with batch boxes and industrial cars. Stays in alignment, does not become jammed—The only efficient derrick made.

End-to-center mixing action—speediest and most thorough.

Clean discharge from drum.

The world's record of 779 linear feet of 16 foot road, 8 inches thick, was made by a 21-E Smith Paving Mixer.

One in a Box

KLAXON 3—MOTORCYCLE

Made to be Used on Motorcycle or Bicycle. Has the True Klaxon Warning Note; Operates by Pressing Push Rod; Short Projector.

		Each
No. K3MF—All Black; with Bracket for attaching to Frame, Weight Each, 5 lbs.	**$6 35**	4.75

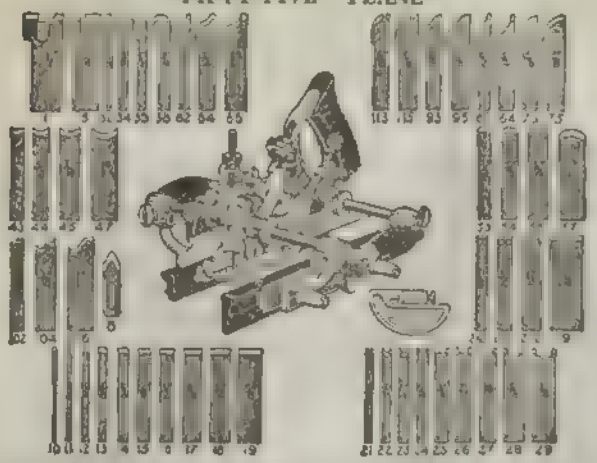
One in a Box

Whenever Electric Klaxon Horns are Wanted with Voltage Other than as Shown, We Can Furnish Same by Shipping Direct from Factory

COMBINATION PLANES

STANLEY

"FIFTY-FIVE" PLANE



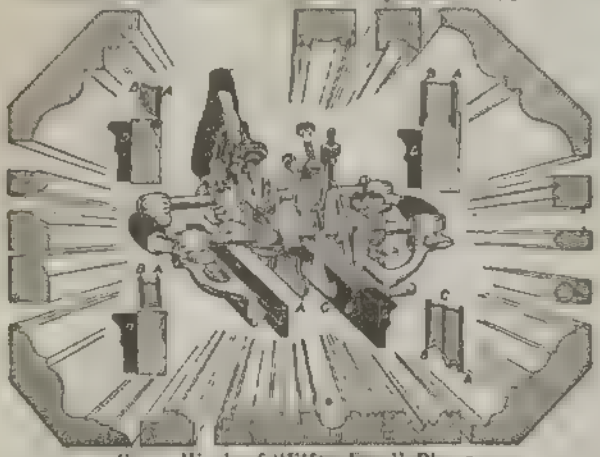
This Tool, in Addition to Being a Beading and Center Beading Plane, a Plow, Dado, Rabbet, Filletster, and Match Plane, a Sash Plane and a Slitting Plane, is also a Superior Moulding Plane, and will Accommodate Cutters of Almost any Shape and Size. In fact, it is "A Planing Mill Within Itself."

The Regular Equipment Sent with the Plane Comprises Fifty-two Cutters, all of which are Shown in the Cut. These Cutters, Together with the Plane and all its Attachments, are Packed in a Neat Steel Box.

All Metal Parts of the Plane are Nickel Plated. The Handle and Fences are Made of Selected Rosewood, and Every Part is Well Finished.

Each

No. 55—Nickel Plated, With 52 Cutters, Weight Each 15¼ lbs. . . . **$43 50**



Some Work of "Fifty-Five" Plane

The Samples of Work Illustrated, Show Some of the Mouldings that can be Made with Cutters Regularly Furnished with this Plane.

When it is Considered, that in Addition to the Fifty-two Regular Cutters, with Four Special Cutters, the Plane will Take Practically any Form of Cutter Desired, its Wide Range of Work will be Appreciated.

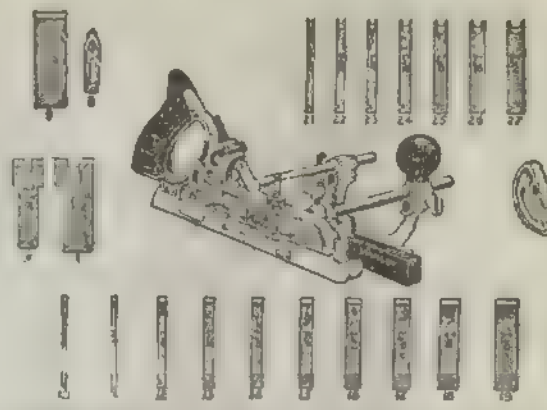
The Plane has: A Main Stock, "A", which Carries the Cutter Adjustment, a Handle, a Depth Gauge, a Slitting Gauge, and has a Steel Bottom Forming a Bearing for One Edge of the Cutter. A Sliding Section, "B", with a Steel Bottom Gives Bearing for the Other Edge of the Cutter and Slides on Arms Secured in the Main Stock. This Bottom can be Raised or Lowered so that, in Addition to Allowing the Use of Cutters of Different Widths, Cutters can be Used having One Edge Higher or Lower than the Edge Supported in the Main Stock. An Extra Support or Stop is Necessary for Cutters which First Enter the Wood at a Point Between the Outside Edges, and is a Benefit for Such Cutters which, if the Plane were Accidentally Tilted, Would Tend to Gouge the Work. The Auxiliary Center Bottom, "C", which can be adjusted for Width or Depth, Fulfills this Requirement. Fence, "D", has a Lateral Adjustment, by means of a Screw, for Extra Fine Work. The Fences can be Used on Either Side of the Plane, and the Rosewood Guides can be Tilted to any Desired Angle up to Forty-five Degrees, by Loosening the Screws on the Face. Fence, "E", can be Reversed for Center Beading Wide Boards.

The Plane is Fitted with Spurs for Working Across the Grain, and a Special Cam Rest, to be Located on the Front Arm when Working at a Distance from the Edge of the Board, to Keep the Fence from Sagging, or on the Rear Arm on Certain Work, to Prevent the Possibility of the Plane Rocking. All parts are Interchangeable.

The Four Small Cuts in the Corners, Show how the Bottoms Should be Set for Different Forms of Cutters and the Great Importance of Having the Fences Adjusted so that the Cutters will Not Run.

COMBINATION PLANES

STANLEY



"FORTY-FIVE" PLANE

Seven Tools in One in Compact and Practical Form. 1—Beading and Center Beading Planer. 2—Plow. 3—Dado. 4—Rabbet and Filletster. 5—Match Plane. 6—Sash Plane. 7-Slitting Plane.

The Plane has Two Principal Parts; a Main Stock and a Sliding Section. The Main Stock Carries the Handle, Cutter Adjustment, a Slitting Tool, Depth Gauge, and Forms a Bearing for One Edge of the Cutter. The Sliding Section Slides on Two Arms Secured in the Stock and has a Bearing for the Other Edge, Allowing Cutters of Different Widths to be Used. A Fence also Slides on These Arms for Use when Working as a Plow, Beader or Filletster, to Gauge the Distance from the Cutter to the Edge of the Board, and to Keep the Cutter at Right Angles to Same. When Used as a Filletster, the Fence Slides Under the Bottom of the Plane and Determines the Width of Cutter Exposed to the Work.

The Plane is Fitted with Spurs for Use Across the Grain, etc., and can be Used either Right or Left Hand.

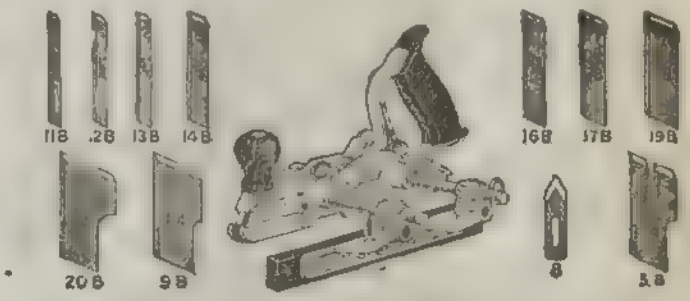
With Each Plane are Furnished Twenty-one Cutters, all of which are Shown in the Cut. The Cutters, Together with the Plane, are Packed in a Neat Steel Box.

All Metal Parts are Nickel Plated. The Handle, Knob and Fence are Made of Selected Rosewood. For Beading at a Distance from the Edge of a Board, Attach Cam Rest (see Cut at Right of Plane) to the Front Arm Between the Sliding Section and Fence to Prevent the Fence Sagging. In Certain Work Attach same to the Rear Arm to Prevent the Plane from Rocking.

Each

No. 45—Nickel Plated, With 21 Cutters; Weight Each 9½ lbs. **$22 00**

One in a Box



PLOW, DADO, FILLETSTER AND MATCHING

Skew Cutters are the Feature of this Plane. It Consists of a Main Stock Carrying a Spur, a Depth Gauge and a Slitting Cutter, a Sliding Section Carrying a Spur and Forming an Extra Sole for the Plane, and a Fence Rosewood Face, which can be Set for Either Plow or Filletster Work.

Each

No. 46—Nickel Plated Cast Iron; Rosewood Handle and Knob; Length 10½ inches; Six Cutters, Comprising 5 Plow and Dado Bits, ⅛, 3/16, ¼, 5/16, ⅜ and 1¼ inch Fillister Cutter, 1¼ inch Rabbet and Slitting Cutter; Weight 4¼ lbs. **$15.50**

One in a Box

DADO

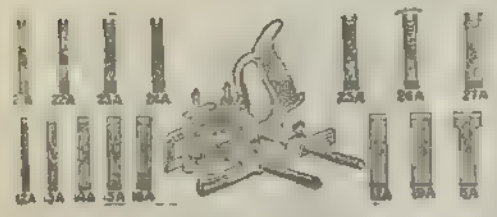
This is the Main Stock with Spur, Slitting Tool, Depth Gauge and the Sliding Section with Spur, Used in Plane No. 46, but Without the Fence, and with Fewer Cutters.

Each

No. 47—Nickel Plated Cast Iron; Rosewood Handle and Knob; Length 10½ inches; Six Cutters, Comprising 5 Dado Bits, ⅛, 3/16, ¼, 5/16, ⅜ and 1¼ inch; also one Slitting Cutter; Weight 3¾ lbs. **$12.20**

One in a Box

COMBINATION PLANES



STANLEY PLOW, BEADING OR MATCHING

This is a very handy tool for light work. It consists of a main stock carrying a spur and a depth gauge, and forming a support for one side of the cutter; a sliding section, carrying a spur and forming a support for the other side of the cutter, and a fence with a 5-inch adjustment. The handle is metal, being a part of the main stock. Each

No. 50 —Nickel Plated Cast Iron; Length 9½ inches, Fifteen Cutters, comprising 7 plow and dado tools, 1/4, 5/16, 3/8, 7/16, 1/2, 5/8 and 3/4 inch, 7 beading tools, 1/8, 3/16, 1/4, 5/16, 3/8, 7/16 and 1/2 inch; and a 1/4 inch tonguing tool; Weight 3¼ lbs. $12.00

SPECIAL BOTTOMS FOR "45" PLANES

In order to work Hollows and Rounds, or a Nosing Cutter in the No. 45 Plane, it is necessary to substitute for the sliding section especially formed bottoms, which are called by the same name as the cutters they are designed to carry, that is Hollows, Rounds or Nosing Tools.

A Hollow and its Cutters will form a **Round** on the Mouldings being worked. A Round and its Cutters will form a **Hollow**. A Nosing Tool and its Cutters will form what might be called an exaggerated Round. It is very largely used for shaping the edges of shingles. Hollows and Rounds are made in pairs and a complete set consists of six, comprising one Hollow, one Round and two Cutters. The price of a Nosing Tool includes one Cutter.

Per Pair

✣No. 6—Hollow and Round; ⅛-inch Cutters; Work ¾-inch Circle. $3 30

✣No. 8—Hollow and Round; ⅛-inch Cutters; Work 1-inch Circle. 3 30

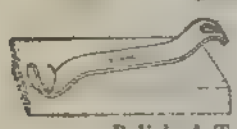
✣No. 10—Hollow and Round; ¾-inch Cutters; Work 1¼-inch Circle 3 50

✣No. 12—Hollow and Round; 1-inch Cutters; Work 1½-inch Circle 3.50

Each

✣No. 5—Nosing Tool; 1¼-inch Cutters; Work 1¼-inch Circle.... $2 60

CORNERING TOOLS



STANLEY

These tools are used by Pattern Makers and all wood-workers for rounding sharp edges. They have a different size cutter at each end and their form is such that no depth gauge is required.

Polished Tool Steel; Length 5½ inches.

Per Dozen

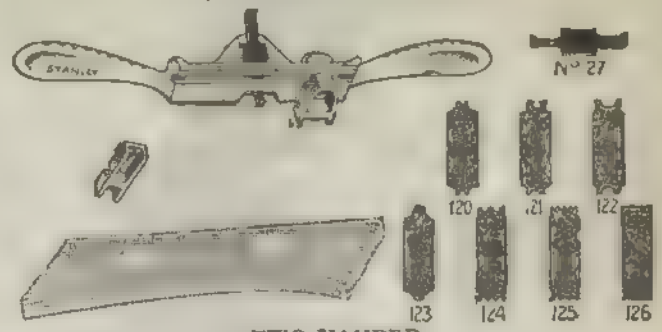
No. 28—⅛ and ¼ inch Cutter; Weight per Dozen 1½ lbs..... $6 50

No. 30—¼ and ⅜ inch Cutter; Weight per Dozen 1½ lbs..... 6 90

Half Dozen in a Box

BEADING TOOLS

STANLEY UNIVERSAL



TWO-HANDED

This is an excellent tool for beading, reeding or fluting straight or irregular surfaces and for light routering. The sample illustrated shows some of the work that can be done with its use. With each beader are furnished a square gauge for straight work and an oval gauge for curved work. There are also furnished eight cutters sharpened at both ends and embracing the following assortment, 6 single beads, ⅛, 3/16, ¼, 5/16 ⅜ and ½ inches, 2 fluting tools, 3/16 and ¼ inches; 4 reeding tools, (2 beads 3/16 inch, 3 beads ¼ inch, 3 beads ⅜ inch and 4 beads ½ inch), 2 routers ⅛ and ¼ inch, and a ⅝ inch blank, which latter cutter the owner can file up as he desires.

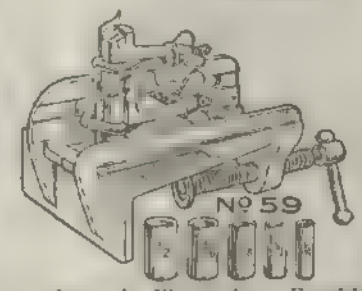
The handles are curved so as to insure ample room between the workman's hands and the surface of the work.

Per Dozen

No. 66—Iron, Nickel Plated; Length 11½ inches; Eight Cutters; Weight Each, 1½ lbs..... $37.70

Twelfth Dozen in a Box

DOWELING JIGS



STANLEY

This Tool is made for the purpose of enabling the user to Bore Dowel Holes in the Edge End of Surface of Work with the greatest Ease and Accuracy. It will Cut any thickness of Material up to 3 inches.

It also will be found an excellent Bit Guide for Mortising. When making Dowel Holes with the Doweling Jig the Steel Guide is Automatically Set to guide the Bit properly when the Jig is Clamped to the work as shown in Illustration. Furnished with Five Steel Guides 1¼ inches Long; One each ¼, 5/16, ⅜, 7/16 and ½ inch. To allow for Variations in Size of Bits the Guides are made 1/100 inch Larger than the Sizes given.

Each

No. 59—Nickel Plated Cast Iron Body, 5¼ inches Long; Weight each 1½ lbs..... $4.00

One in a Box

DOWEL SHARPENERS

STANLEY

This Tool is the Reverse of the Countersink and can be Sharpened with equal Ease. By its use Dowel Pins can be Sharpened Rapidly and Uniformly.

Per Dozen

No. 22—Made of Malleable Iron; Nickel Plated; Sharpens Dowel Pins up to ¾ inch; Weight per Dozen 1½ lbs..... $6.90

Half Dozen in a Box

DOWEL PLATES

Used for Making Wood Dowel Pins

Made of High Grade Tool Steel; Full Polished and properly Tempered.

Per Dozen

No. 79—Has Holes for making Five different Sizes of Dowel Pins, ¼, 5-16, ⅜, 7-16 and ½ inch Diameter; Size of Plate 6x1½x⅜ inch; Weight each ½ lb..... $13.20

Romance Chocolates

"TRUTHFULLY PURE"

40 to 50 ORLEANS ST 77 to 85 COVE ST

East Boston, Mass., Nov. 14, 1922.

Mr. Carroll J. Swan, N. E. Mgr.,
Ruggles & Brainerd, Inc.,
Representing The Quality Group in Color,
44 Bromfield St., Boston, Mass.

My dear Mr. Swan:

Now that our campaign on ROMANCE Chocolates is well under way this Fall, I am pleased to tell you that its success has far exceeded our expectations.

As you know, we have never before expended a dollar in National Advertising. Frankly, we were a bit skeptical about it, and about your magazines for the advertising of our product.

We knew we had a splendid line of goods in ROMANCE Chocolates, but we had only a limited amount of money to spend this year. When you finally sold us we decided to put all our eggs in one basket and to use The Quality Group in Color exclusively.

We are all mighty glad now that we made that decision.

With the beautiful effects we could get in Color; with the chance to show our package in its original colors, coupled with the great Dealer and Consumer influence of those splendid magazines - Atlantic Monthly, Century, Harper's, Scribner's, Review of Reviews and World's Work - we felt the effect at once.

After our campaign had been laid out, long before the first advertisement appeared, we had a round-up of our Jobbers and explained the campaign to them. These Jobbers had all placed their Fall orders, but on the strength of the advertising plan they gave us additional orders amounting to many times the amount of our whole advertising appropriation.

Then the Merchandising that we did, including the letters your magazines sent to the Jobbing Trade, brought enthusiastic response from all over America. Our New Jersey Jobber sent in an order a short time ago for the advertised ROMANCE line, the largest individual order for any one package we ever received in this factory.

To show you the effect of this upon the general Jobbing Trade, I will give you excerpts from a few of the many letters received.

We have been told by other advertising men, such as the representatives of The Curtis Publishing Co., who have solicited our business, that we have done a remarkable advertising feat on our limited appropriation.

We have heard from every angle:

In enthusing our own Sales' force and our Jobbers' Sales force.
In creating Interest and Action among Jobbers and Retailers
In Consumer influence.

And best of all, in orders all along the line, we have made one of the most remarkable successes in National Advertising.

You will be glad to learn that we have decided to give you an order for The Quality Group in Color in 1923 several times larger than the one this year, the one that made us National Magazine Advertisers.

Very truly yours,
E R Ricketts
Vice President and Sales Manager

MR. RICKETTS has told the sales story of ROMANCE Chocolates.

This experience is not unusual.

It is just another success for The Quality Group—another example of a quality product seeking to win The Quality Market, and going about it in a sensible, logical way.

We have always said that a modest advertising appropriation behind a quality product in The Quality Group, backed up by our merchandising co-operation, whether in black and white, two (2) colors, or four (4) colors, will do more business than a similar amount of money expended in any other way.

Ask us what kind of a sales campaign you can have for:

$11,460. $19,800. $22,920. $25,200.

Chocolates

Here's part of a letter from J. A. Cummings Co. of Pittsburg, Pa. "Two boys on Monday and Tuesday took orders for over 50 Advertising Deals without anything to show the Retailers except to tell them we were going to advertise in these magazines. We want to help in making this Campaign the biggest that has ever been put over. It can be done if you get your other Jobbers' salesmen cooperating 100% as you have done."

From the Clearfield Candy Co., Clearfield, Pa. "We are mighty glad to see that you are going into a big advertising campaign as it certainly will be a boost to ROMANCE. We are not stocking anything else."

Harry Guttman & Co., Cincinatti, Ohio. "Enclosed find order for goods that we must have at once as we are entirely out of everything. ROMANCE Advertising Deals are going great, and if the boys keep up the good work we will have to increase our order."

Here's another sample quotation in a letter from the biggest strictly candy Jobbing house in America - Gard & Margolies, Brooklyn, N. Y. "We thank you for the enthusiasm that you and Mr. Swan, together with Mr. Ruggles, so kindly instilled in our Sales force at the meeting. To show you the result, our men went out and sold 50 Advertising Deals the next day. If this keeps up, and it no doubt will, we will have to triple our order." (Each of the Deals referred to involves the purchase of at least $48. worth of goods.)

The talks on our Campaign that you and we have given to our Jobbers' salesmen have, as you see from the above letter, created enthusiasm and inspired confidence in our company and in our product. We appreciate your offer to extend these talks to Jobbers' salesmen who have not already met with us.

Now, as to Retail Trade. The effect has apparently been just as great. The Deals are have been more receptive to the message of the salesmen, and they themselves, seeing the advertising, have been influenced to get in touch with us. Already this week we have had calls from five different Retailers here in Boston alone, inquiring about our goods and saying that many of their best customers had asked for ROMANCE Chocolates.

For example, Mr. Berkowitz of Berkowitz Bros., Newark, N.J. wrote us a few days ago commenting upon the effect of the Advertising on Retailers in his section, saying, "Did not have any trouble to sell 24 dozen boxes to 18 customers this afternoon."

Out at the Pharmacy near the Peter Bent Brigham Hospital, the manager told us that many of the staff and physicians at the Hospital, who were the best people on his books, had been in asking for ROMANCE Chocolates.

We are now also cashing-in on Direct results from the General Public. The Consumer-effect of the magazines seems to be splendid. We have had a great number of orders from the general public throughout the country, all of whom seemed pleased with ROMANCE Chocolates. In many cases, as a result of demand from Consumers, where territorial conditions warrant it, we have turned these orders over to the Jobbers, who in turn have actually secured new accounts from Retailers who had never handled our line before.

As a result of this Campaign and the increased Sales we have had to step up our production. The Plant has been working to full capacity ever since the Advertising started. If this business continues we will be obliged to enlarge our Plant and double our capacity.

CHURNS

DAZEY

DAZEY PRINCIPLE

Sanitary—Because Nothing to Absorb the Cream and Become Rancid as with Wooden Churns. Can be Sunned Without Warping and Without Handling Entire Churn. Just Lift the Receptacle Out.

Cleaning—Is as Easily Accomplished as Cleaning an Ordinary Tin Pail, Because there are No Cracks or Complicated Gearings Inside. Not a Single Bearing Inside of Receptacle.

Temperature—Correct for Churning is Quickly Obtained by Placing the Receptacle or the Whole Churn in Hot or Cold Water.

Time—The Powerful Dasher Aided by the Square Corners of Receptacle. Produces a Scientific Agitation, Making it Possible to Churn in from 2 to 5 Minutes.

Yield—More Butter is Produced with the Dazey Dasher by Rolling All Butter Making Properties up with the Butter Fat into Grains.

Labor—Working of Butter is Eliminated by the Dazey; Because the Globules in Building up in their Natural Condition have Squeezed out all the Milk and Formed into Hard Uniform Sized Grains. To Wash off Outside of Grains is all that is Necessary.

Frame—Iron and Steel; **Covers**—Two-piece White Maple; **Dasher**—Seasoned White Maple, Dazey Patented Construction; **Knobs**—No. 1000 Enameled Wood, No. 1600 Porcelain Handle; **Dash Rods**—No. 1000 Tinned Steel, No. 1600 Steel Heavily Nickeled; **Gear**—Best Grade Cast Iron; **Faucets**—Brass, Nickel Plated; **Receptacles**—Made of Highest Quality Charcoal Tin Plate; **Finish**—Frames have Two Coats Bright Aluminum; Receptacle Outside Enameled Blue.

GENUINE HOHNER HARMONICAS

HOHNER BOY ASSORTMENT

No. 425—Assortment consists of one dozen Harmonicas in a variety of styles and keys, **to retail at $1.00 each,** mounted on a very attractive cut-out easel printed in six different colors,
per asst. $8.00

These assortments of Hohner Harmonicas are very attractively gotten up and should be in the stock of every retail dealer.

TO RETAIL AT 50 CENTS EACH

No. 1 Assortment—Consists of 12 genuine Hohner Harmonicas in 3 different styles, assorted keys. Packed in a handsome display carton adapted for counter display, per assortment $7.60

TO RETAIL AT $1.00 EACH

No. 2 Assortment—Consists of 12 genuine Hohner Harmonicas in 5 different styles, assorted keys. Packed in a handsome, flat display carton adapted for counter display .....per assortment $11.50

The Hohner collapsible display cabinet is one of the handsomest and most practical harmonica displays that has ever been devised. It sells harmonicas. Comprises 3 trays of the best seasoned wood so ingeniously arranged and constructed as to permit the opening and closing of the entire cabinet in a moment's time.

The cabinet is elaborately finished in a rich dark mahogany, piano polish with attractive lettering on the cover.

The cabinet when open displays the entire contents of 38 harmonicas at one time, when closed resembles a handsome jewel case and occupies less than a square foot of space. Will increase your harmonica sales 100%.

No. 400 Assortment—Consists of:

16	Harmonicas	to retail at	$0.50 each	$8.00
6	Harmonicas	to retail at	.60 each	3.60
6	Harmonicas	to retail at	.75 each	4.50

			Total retail value	.....$26.10

Per assortment $29.50

ONE ASSORTMENT IN A BOX

Hohners revolving display stand is built of thoroughly seasoned wood of 1¼ in. thickness, obeliscal in shape, mounted on a metal disc connected by the means of a cylindrical bar to a set of durably constructed clockworks of sufficient strength to revolve the obelisk for over 3½ hours with one winding.

The entire stand is finished in a deep rich mahogany piano polish with very attractive silver pressings and having the number and retail price of each harmonica stenciled in a neat design on obelisk.

Measures 32 in. high, by 10½ in. square at base, and 6¾ in. square at the top. Stand displays 36 assorted genuine Hohner Harmonicas, fastened by means of steel spring clamps.

Each instrument is an excellent seller.

Extra handles . Per doz. .. . $3.60

WASHING MACHINE DRAINERS

HOUSEHOLD WATER PRESSURE

PENBERTHY

Designed to transfer water or other liquids from washing machines, wash tubs, cellar pits or any place where there is an accumulation, by means of ordinary water pressure. No electrical, steam or other operative power required.

It takes the maximum amount of water from the tub with the minimum amount of water operating the ejector. It is handy to have around the house, saving much back-straining and lifting. Made of cast aluminum, white enameled.

The average washing machine holding 8 gallons of water with a water pressure of 20 lbs. can be emptied in about 1¾ minutes; with a water pressure of 30 lbs., about 1¼ minutes. The capacity of this drainer, gallons per minute lifting water 2 feet at a pressure of 40 lbs., is 7¼ gallons and a pressure of 50 lbs. is 8 gallons.

No.	Length	Ship. wt. each	Each
6	7 in.	¾ lb	$4.50

Six in a display carton.

ADAPTERS

PENBERTHY

To convert ⅜, ½ and ⅝ or ¾-inch plain bibbs into a standard threaded ¾-inch bibb. Used also in connection with the Penberthy Household Ejector, to connect the part "A" to a plain bibb.

	Ship. wt. each	Each
Adapter	½ lb.	$0.70

One in a carton

TUB STANDS

Light, strong steel, take less room than benches. Aluminum finish. 4 feet on casters.

DIETZ "SCOUT" LANTERNS

This is the smallest hand lantern ever offered to the public. Many lanterns of this size have been introduced, but most of them were ornaments or toys, whereas Dietz "Scout" is practical and will burn steadily in wind or storm. Its construction is good, and while light in weight, will prove serviceable. This lantern sells at a moderate price.

No. R505—Bright tin, size of wick ⅝ in., will burn 10 hours, height overall 7¾ in., shipping w't per doz. 13½ lbs. .....per dozen $12.00

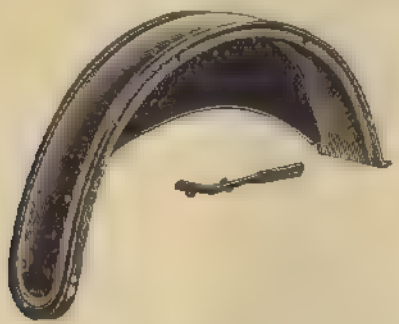
COMMERCIAL FENDERS
FOR FORD CHASSIS

When a Ford car is converted into a commercial car, a pair of these fenders are necessary as the fenders which are furnished with the Ford chassis will not allow a body to be put on. The fenders here shown are made of heavy gauge steel with two coats of lustrous black enamel, baked on. They match the front fenders and are easily attached. Two in a set.

Commercial fenders adapted for one ton Ford trucks, for use with all truck units and Smith Form-A-Trucks, extra heavy steel, two irons and apron, very rigid and strong.

No. F7431

1 pair to a crate, w't 33 lbs.★ .....per pair $6.00
5 pair to a crate, w't 135 lbs.★ .....per pair 5.80



This Fender is designed to be used on Ford trucks, wherever a Ford has been remodeled into a delivery car. Easily installed. Finished in black enamel to match the front fenders furnished with Ford cars.

No. F7430

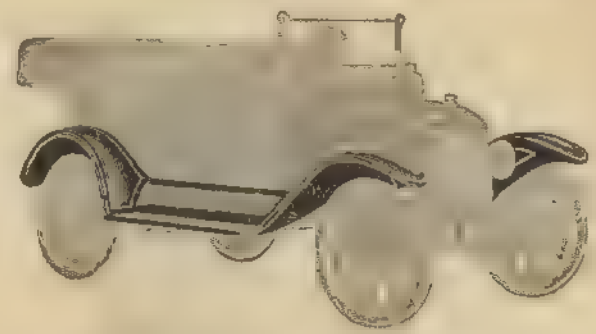
1 pair to a crate, w't 35 lbs.★ .....per pair $6 00
5 pair to a crate, w't 130 lbs.★ .....per pair 5 80

HOODS
—FOR FORD CARS—

Made of heavy gauge steel, finished with two coats of black enamel. Hood is of four-piece construction, hinged in center and on each side. This construction is in general use today and will last the life of the car. For all 1917 to 1921 Ford cars. Will change the appearance of a 1915-1916 Ford when used with our No. T7457 Radiator to that of a 1921 Model.

No. F7398—1721—1 pair to a carton, w't 22 lbs., each★ $6.00
No. F7399—5 pairs to a crate, w't 80 lbs., each★ 5.80

LAWCO INTERCHANGEABLE FENDERS



FOR 1917 TO 1921 FORD CARS

These Fenders are duplicates of the regular equipment on 1921 Ford cars and can be attached easily to all Models of 1917 and later. Made of the same gauge of material as used in the Ford Fender and finished with two (2) coats of high grade black enamel.

No. W7426—W't per set 85 lbs. .....per set $19.80

ONE SET IN A CRATE

RUNNING BOARD SHIELDS

The Shields are made to fit Ford cars manufactured from 1917 to 1921. Exact duplicates as furnished on 1921 cars, manufactured of heavy gauge steel finished in two coats of black enamel. These shields will fit all Model T Fords, 1911 to 1921 if our No. W7426 Fenders are used in connection with them on 1911 to 1917 Models.

No. W7427—1 pair to a crate, w't 31 lbs., per pair $6.70
No. F7428—5 pairs to a crate, w't 105 lbs., per pair★ $3.00

SHIPPING FACILITIES

With our immense stock and very modern facilities for shipments we are enabled to fill orders with unequaled promptness. On some of the roads we have special through cars which enable us to reach distant points 24 hours ahead of shipments made in the regular way.

No. 2714G—9-16 in. bore, 1 in. long spindle arm bushing, per dozen $0.48

SPENCER AXLE AND DRIVE SHAFTS

Interchangeable, guaranteed to be correct as to size and workmanship and at least the equal of the factory product in every respect. They are accurately machined and ground and subjected to process inspection after each operation, as well as rigid final inspection, then carefully oiled to prevent rusting, and packed.

Exhaustive tests conducted by our metallurgical engineer have demonstrated that the addition of Molybdenum produces a steel combining strength with toughness to a greater degree than any alloy steel heretofore developed. In our decision to use Molybdenum steel exclusively for Spencer Shafts we considered above all else quality and mechanical perfection regardless of cost.

No. 2505G—Axle Shaft, for 56 in. only, w't each 8 lbs. each $2 00

No. T2595BG—Drive Shaft, w't 10 lbs. ..... each $4.50

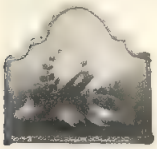
Charming wall and floor lamps

The Wall Ette, Lamp Ette and Floor Ette are very artistic, yet the most practical electric lamps produced.

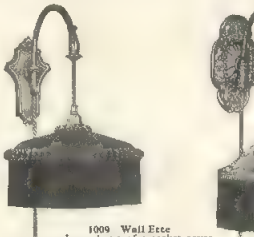
The Wall Ette is hung from a wall as is a picture. The light and shade are suspended from a rich silk rope and may be adjusted to any height.

The Floor Ette has all the charm of the most beautiful bridge lamps. The wiring is concealed in a silk rope which holds the light and shade. The shade arm may be swung to any position and the light and shade raised or lowered as desired.

The Lamp Ette is a portable lamp that both beautifies and serves.

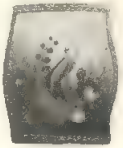


1008 Shield
1 light; width, 6¼ inches. An attractive hand decorated parchment shield square sides. Each, $3.70



1009 Wall Ette
Is made up of a socket cover, husk, 12-in arm attached to an ornamental wall plate, with a silk wire rope and metal tassel with silk cord and plug. The design is handsome and artistic. No wiring required, ready for hanging to the wall like a picture. It is equipped with 7-ft silk cord which connects with the end of the cord supporting the light and shade. This number is furnished regularly in old ivory and old gold. Wall plate and arm with silk rope to harmonize. Special finishes, antique gold or antique silver will be furnished at 20 per cent additional cost. Each, $20.00

1010 Wall Ette
Has the same characteristics as Wall Ette No. 1009 excepting that the wall plate is of different design. This is a very popular number. Furnished regularly in old ivory or old gold. Special finishes, antique gold or antique silver, will be furnished at 20 per cent additional cost.
The Wall Ette, unlike permanently attached wall bracket fixtures, may be hung on the wall to fit the furniture. Each, $20.00

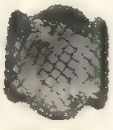


1011 Shield
1 light; width, 5¾ inches. Ova shield especially good for Lamp Ettes, candlesticks and wall lights. Each, $3.20

2004 Floor Ette
The stand is made of decorated wrought iron, finished in gold leaf and black with polychrome trimmings. The solid metal stem is twisted near the center to add gracefulness to the lamp. The top is capped with a jewel and the arm is decorated. The rich silk rope and pendant harmonize. The arm may be turned in any direction and the light and shade raised or lowered to any position. This is a very graceful and beautiful number.
Complete with silk cord and plug, shade extra.
Each, $50.00

2003 Shade
Silk brocaded top with silk lining and 6-inch silk fringe. Colors: Rose, blue or black and gold. Each, $20.00

1016 Round shade
4¾ inches diameter, covered with good quality georgette with silk lining and interlining. Good for use on candlesticks, lamp ettes and lighting fixtures.
Colors, Taupe over rose, blue over rose. Each, $2.80



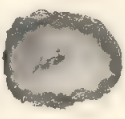
1016 Shield
1 light, width, 4¾ in. Metal over silk, giving a very neat effect. Colors: Taupe or blue.
Each, $2.20

1013 Lamp Ette
A beautiful lamp attached to a rich silk brocade braid at the other end of which is an ornamental plaque to act as a counterweight—that is the Lamp Ette. It drapes scarf-fashion over the chair or head of the bed.
Lamps are carried regularly in old gold finish with gold braid and in old ivory finish with the following braids: Rose or blue.
Complete with silk cord and plug, shades extra. $11.50

1012 Ovai shade
Shirred georgette top, lined with silk, beaded edge. Colors, Rose, blue or black and gold. Each, $4.80

2016 Floor Ette
A richly hand carved wooden base and ornamented stem and arm. Finished in gold leaf and black with polychrome trimmings. Stem is capped with a jewel. Silk rope and pendant to match.
The arm may be swung to any position and the light and shade raised or lowered to any height. Electrical connections are made by means of an extra length silk cord and plug which are a part of all Floor Ettes. Wiring is concealed in the silk rope. Shade is extra.
Each, $50.00

2005 Shade
Pleated silk top lined with silk. Has 6-inch silk fringe and valances, trimmed with runching. Colors: Rose, blue or black and gold. Each, $21.00



1017 Shield

REVERSIBLE RATCHET HANDLE

This is a Reversible All-Steel Ratchet Handle that Can be Reversed by Turning Small Set Nut by Simply Turning Wrench Over. A Simple and Practical Handle.

Each

No. M350—Nickel Plated Steel; Length, 10 inches; Weight Each, 1 lb., Weight Each, 1¼ lbs. $3 00 2.00

One in a Carton

RATCHET HANDLE

Made of Heavy Steel Sheet. Holds the Socket Firmly Until Ready to be Removed; To Reverse, Simply Turn Handle Over.

Each

No. M355—Satin Nickel Finish; Length, 8 inches; Weight Each, 12 ozs; Weight Each, ¾ lb. $1.50 1.00

One in a Carton

SOLID "T" HANDLE

For Equipment Purposes, this Solid "Tee" Handle is Ideal.

Made of ½ inch Special Bar Steel.

Each

No. M331—Length, 11 inches; Width, 7⅞ inches; Burnished Nickel Finish; Weight Each, 9½ lbs. ..... $0 75 .50

Six in a Carton

OFFSET SOCKET WRENCH HANDLE

An Offset Socket Handle of Good Length for Leverage and Overstrong for Service. Made of ½ inch Steel Bar.

Each

No. M320—Length, 10 inches; Burnished Nickel Finish; Weight Each, 7¾ lbs. ..... $0 40 .27

Twelve in a Carton

SPEEDER TYPE HANDLE

For Interchangeable Sockets.

A Speeder Handle for All Interchangeable Sockets, and with these Sockets the Handle Produces Speed Brace to Wrenches of Sizes from ⅝ to 1½ inches. Made of Special ½ inch Steel Bar.

Each

No. M359—Length, 18¼ inches; Burnished Nickel Finish; Weight Each, 9½ lbs. ..... $1.10 .75

Six in a Carton

SOCKET WRENCH HANDLES
MOSSBERG

UNIVERSAL JOINT

Allows the Direct Application of Socket Wrenches Upon Nuts and Set Screws in the Most Inaccessible Places; May be Used at Any Angle, Yet Takes Direct Power; Used with Long Extension or ½ inch Square Socket.

Each

No. M336—Length, 4 inches; Rust Proof Black Finish; Weight per Dozen, 6 lbs. ..... $0.75 .50

Twelve in a Carton

EXTENSION BAR

For Use with Ratchet Handle, Screw Driver Bit, Universal Joint, and All Sockets.

Each

No. M351—Length, 9½ inches; Burnished Nickel Finish; Weight Each, 8¼ lbs. ..... $0 80 .56

Twelve in a Carton

TAPPET WRENCH SETS
EDELMAN

A New Set of Thin Wrenches, Made of Best Grade of Steel, Properly Case Hardened and Nicely Finished, Comprising the Following Sizes: ¼, 5/16, ⅜, 7/16, ½, 9/16.

There are Six Double End Wrenches, Two of Each Size for Adjusting Valve Tappets. This Set Will Take Care of Valve Tappet of Almost Every Car Made.

Per Set

No. TWS—Weight per Set, 2 lbs. $1.60

One Set in a Leatherette Case

SEXTO

Set Composed of Six Very Thin Wrenches with an Opening at Each End, Which are so Made that They Will Get into All Kinds of Corners.

Will Handle the Following Size Nuts: 3/16 inch, ¼ inch, 5/16 inch, ⅜ inch, 7/16 inch, ½ inch, 9/16 inch, 5/8 inch, 11/16 inch, ¾ inch, 13/16 inch, ⅞ inch and 15/16 inch.

Fastened Together by a Connecting Screw, Making a Neat, Compact Set.

Handsome Display Stand Furnished with Every Order of 15 or More Sets.

Per Dozen

No. SR—Fully Nickel Plated and Polished; Weight per Dozen, ¾ lb. $10.80

One Set in a Box; Fifteen in a Display Case

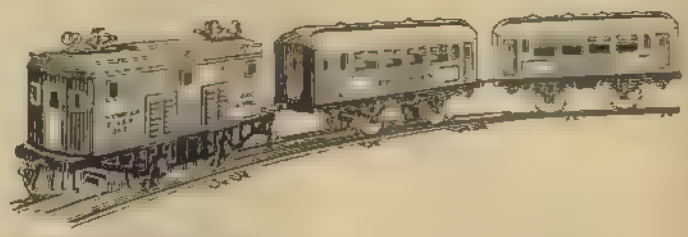
"Made in America" "American Flyer" "The Train with the Guarantee" Registered U.S. Patent Office

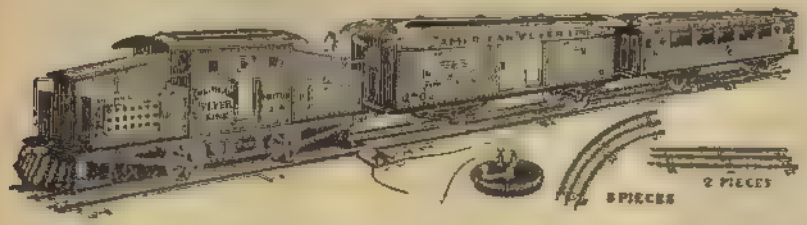
ELECTRIC TRAINS

Made by the same careful workmen that have made our mechanical trains so famously popular. **Engines are modeled from the latest type New York Central electric locomotives and are by far the best miniature electric locomotives on the market.**

These trains can be run on 3 or 4 dry cells, or by connecting up a transformer to your electric light socket, if, it is, 110-volt, 60 cycle alternating current. Be sure to read the instructions very closely before trying to operate these trains.

No. 1101—Electric Type Locomotive without headlight, length 6¼ in., two No. 1120 Pullman cars, length 5⅝ in each, length of train 21 in., 8 pieces, track including 1 track terminal and rheostat.....per dozen $80 00

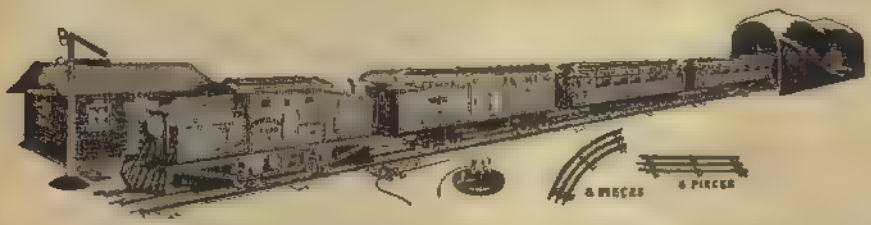




No. 1201—Length of train 24½ in. Electric locomotive, baggage car with sliding door, passenger car of largest type single truck. One improved rheostat.

Eight pieces curved and two pieces straight track, including one terminal section, w't per set 4½ lbs., per dozen sets.....$100.00

No. 1217—Length of train 31 in. Electric locomotive with large protected headlight, baggage car with sliding doors, two passenger cars. Cars have double trucks. Eight sections of curved and four of straight track, including one terminal section. Length of track 125 in. One improved rheostat, w't per set 6 lbs.....per dozen sets $128.00



This is our most complete outfit.

No. 1221—Length over all 31 in. Electric locomotive with large protected headlight, baggage car with sliding doors, two passenger coaches, (double truck cars). Eight sections curved and six of straight track. Length of track 145 in. One terminal section, station, double arm semaphore, tunnel and improved rheostat, w't per set 8 lbs., per dozen sets.....$160.00

No. 1227—Length overall 31 in., consists of a locomotive with protected headlight, a large size baggage car with sliding doors, two large passenger cars. All the cars are equipped with swivel bolster trucks and disappearing couplers. 1 pair of switches 1 cross over, 16 pieces of curved and two pieces of straight track, length of track 245 in., w't each 8 lbs., per dozen sets.....$192.00

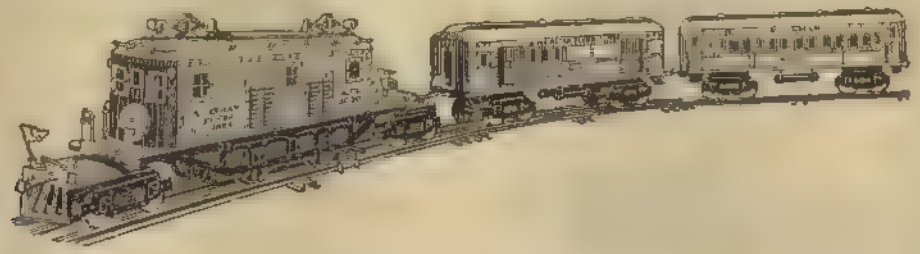
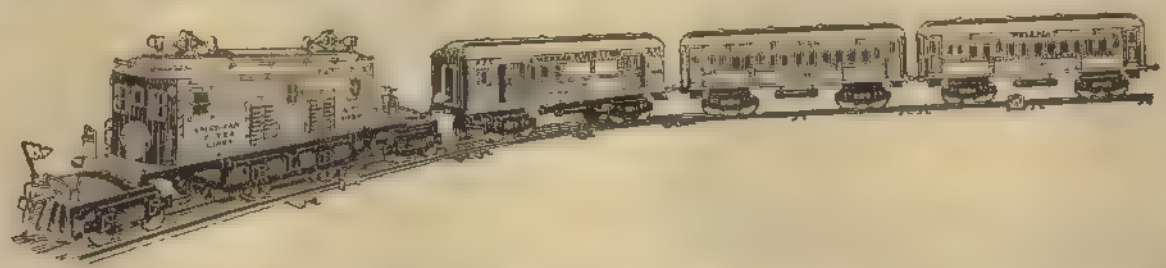
ELECTRIC TRAINS

Made by the same careful workmen that have made our mechanical trains so famously popular Engines are modeled from the latest type New York Central electric locomotives and are by far the best minature electric locomotives on the market.

These trains can be run on 3 or 4 dry cells, or by connecting up a transformer to your electric light socket, if, it is, 110-volt, 60 cyle alternating current. Be sure to read the instructions very closely before trying to operate these trains.



No. 1305—Locomotive No. 3020 with headlight and Patented Automatic Reverse, length 10 in., U. S. Mail Car No. 3000. 1 Pullman Car No 3001, length of cars 10½ in. each., length of train 33½ in., 8 pieces curved, 6 pieces straight., track including track termina. and rheostat., length of track 142 in. ..... per dozen $277.30



Twentieth Century Limited. No. 3020 Electric Type Locomotive with headlight and Patented Automatic Reverse., length 10 in., U. S. Mail Car No. 3002., Pullman Car No. 3003, and Pullman Car No. 3004 with imitation Tail-light.

No. 1307—All cars electric lighted; length of train 45 in., 8 pieces curved track and 12 pieces straight, including track terminal and rheostat; length of track 202 in. ..... per dozen $.

No. 1306—Cars not electric lighted; length of train 45 in., 8 pieces curved and 10 pieces straight track; length of track 182 in. ..... per dozen $...

TRANSFORMERS

No. 1249—Cord and plug, 50 watt capacity with five control steps., air cooled for alternating current; Suitable for operating trains Nos. 1101 and 1201; For use only with 110 volt A. C. Cycle current; width 3½ in., height 2½ in. ..... per dozen $60.00

No. 1250—Type B, capacity 100 watts. For use of alternating current only, 110 volt, 60 cycle, primary. Secondary voltage, 4, 6, 8, 10 and 12 volt. Equipped with Fahnestock patented connection clips. 6 ft. of black cord with separable plug. Transformer is positively air cooled. Does not have any patch to melt and burn children or ruin carpets. This transformer has twice the capacity necessary to operate American Flyer trains. Suitable for operating most any type of electrical toy,

per dozen $70.40

"Made in America" "American Flyer" The Train with the Guarantee Registered U.S. Patent Office

The engines are of latest design made of highest quality cast iron and are beautifully decorated.

The clock-works of the "American Flyer" engines are equipped with steel pinion and patented winding devices and are the strongest mechanical toys on the market. Each one carries a six months' guarantee.

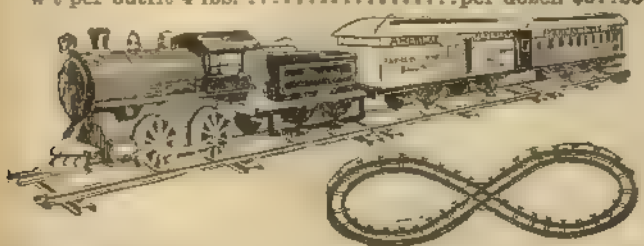
The cars are made of heavy sheet metal, beautifully lithographed in various colors. The cars are made up of baggage, passenger, various freight cars and caboose.

The tracks are made of heavy tin. Each section of track is 10½ inches long.

No. 0—Length over all 16¾ in., engine No. 0, tender No. 328, passenger car No. 1107, eight sections of track forming circle 82 inches in circumference, w't per outfit 3 lbs., per dozen $26.60

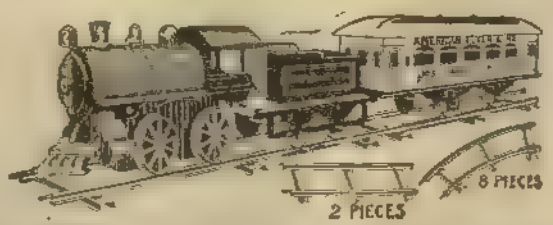
NOTE—Brake and Piston Rods on this Engine

No. 2—Length over all 24½ in. Engine No. 2, **speed governed** with piston rod and brake, large tender No. 120, baggage car No. 1108, with sliding door, passenger car No. 1107, eight pieces of curved and two pieces of straight track form oval 103 inches in circumference, w't per outfit 4 lbs. ..... per dozen $37.30

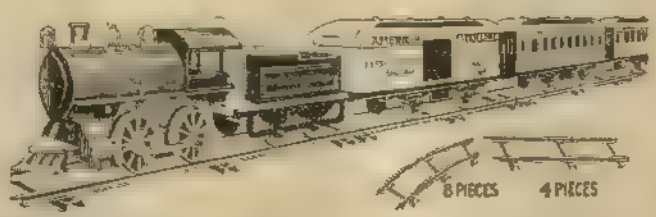


No. 5—Length over all 24½ in., engine No. 13, **speed governed,** piston rods and brake, tender No. 120, baggage car No. 1108A, with sliding door, passenger car No. 1107, fourteen pieces of curved track and crossover, forming figure eight, circumference 165 inches, w't per outfit 4½ lbs. ..... per dozen $49.30

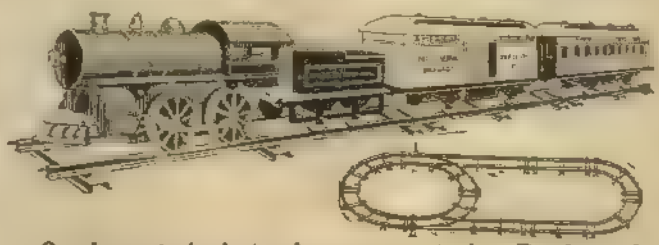
No. 15—Length over all 27 inches. Large engine No. 15, **Speed governed,** piston rods, brake and automatic brake stop, large tender No. 120, large size baggage car with sliding door No. 1105, large size passenger car No. 1106 with double trucks and disappearing couplers. Eight pieces of curved track and four pieces of straight track, including automatic brake rod stop, circumference 124 inches, w't per outfit 5 lbs.... per dozen $65.30



No. 1—Length over all 18½ in., **speed governed,** Engine No. 1, tender No. 120, largest single truck car No. 1103, eight pieces of curved track and two pieces of straight track form oval 103 in. in circumference, w't per outfit 3½ lbs. ..... per dozen $32.00



No. 3—Length over all 31 in., engine No. 3, **speed governed,** piston rods and brake, large tender No. 120, baggage car No. 1108, with sliding door, and two No 1107 passenger cars. Eight pieces of curved and four pieces of straight track form oval 123 in. in circumference, w't per outfit 4½ lbs. ..... per dozen $44.00



Our largest single truck passenger train. Track can be made either in an oval or square.

No. 13—Length over all 25 inches, engine No. 13, **speed governed,** piston rods and brake, tender No. 120, baggage car with sliding door No. 1108A, passenger car No. 1107. Ten pieces of curved, two pieces of straight track and two switches form oval and circle. Track length 162 inches, w't per outfit 5 lbs., per dozen $56 00

If you "go to sleep at the switch" operating this train there will be a wreck.

Train can be switched from large oval to small oval by opening or closing both switches.

EACH OUTFIT PACKED IN INDIVIDUAL CARTON BEAUTIFULLY LABELED.

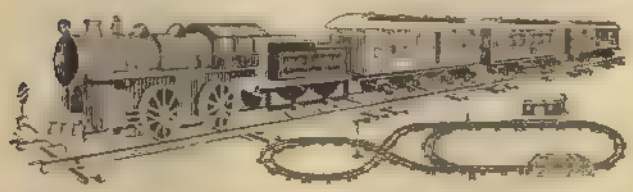
The engines are of latest design made of highest quality cast iron and are beautifully decorated.
The cars are made of heavy sheet metal, beautifully lithographed in various colors. The cars are made up of baggage, passenger, various freight cars and caboose.
The tracks are made of heavy tin. Each section of track is 10¾ inches long.

AMERICAN FLYER

The clock-works of the "American Flyer" engines are equipped with steel pinion and patented winding devices and are the strongest mechanical toy on the market. Each one carries a six months' guarantee.

This is a real set to start a big railroad system with.

No. 19—Length over all 26½ in. Engine No. 18, speed governed, piston rods and brake, tender, baggage car with sliding doors and passenger car. Single arm semaphore, station and tunnel. Eight pieces of curved and four pieces straight track make oval of 125 in., w't per set 7½ lbs. .....per dozen sets $72.00



This is the Twentieth Century Limited of minature trains.

No. 21—Length over all 35 in. Large engine No. 15, speed governed, piston rods and brake and automatic brake stop, large tender, baggage car with sliding doors, two passenger cars. Cars have double trucks. Sixteen pieces of curved and fourteen pieces straight track, including automatic brake stop section, two switches and one cross over, station, single arm semaphore and construction bridge, w't per set 8 lbs.,
per dozen sets $117.30

ALL ABOVE ONE SET IN A STRONG LITHOGRAPHED BOX

PASSENGER STATION

No. 90—Made of heavy sheet metal, beautifully colored in red, white, gray and black. Length 6 in., height 3½ in., w't per dozen 4½ lbs. .....per dozen $5.80

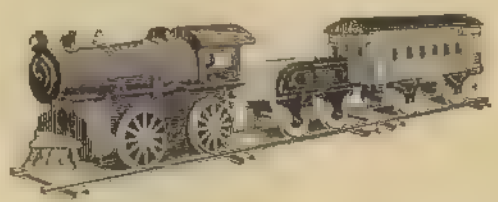
HUMMER TRAINS

Built to meet the demand for popular priced American trains. Constructed by the same skilled workmen who make the "American Flyer" Trains.

Engines are formed from heavy sheet steel, black enameled and latest designs. Clockworks have strong steel spring which pulls "The Hummer" at a great speed.

No. 53—Length over all 15 in., locomotive, tender and one car. Four pieces of curved track, each 15 in. long, w't per outfit 1½ bs. .....per dozen $12 50

ONE IN A CARTON



No. 800—Cast Iron Locomotive No. 328 tender New Pennsylvania Car and four pieces of track forming a circle 62 in. in circumference .....per dozen $18.00

ONE IN A CARTON

TUNNELS

Beautifully decorated with house of red on the side.

No. 82—Length 10 in., heigh 7 in., w't per dozen 6 lbs.,
per dozen $11.00

"Made in America" "American Flyer" "The Train with the Four Rail Inter" Registered U.S. Patent Office

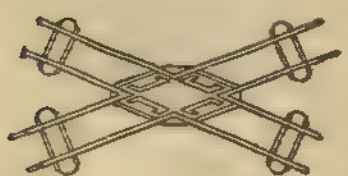
ALL TRACK MADE OF HEAVY STEEL TIN PLATE AND IS "O" GAUGE

MECHANICAL TRACK

No. 1MC—Curved track units with pins on one end only. Eight pieces make a circle, length 10¼ in., per dozen sections $1.15

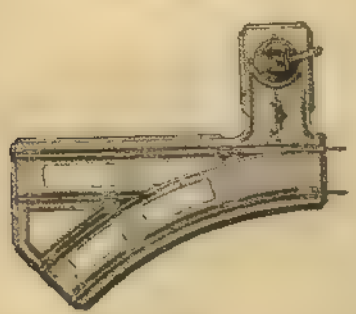
No. 2MS—Straight track units with pins on one end only, length 10¼ in. .....per dozen sections $1.15

CROSSOVERS



No. 3MX—Crossover .....per dozen sections $7.00

SWITCHES



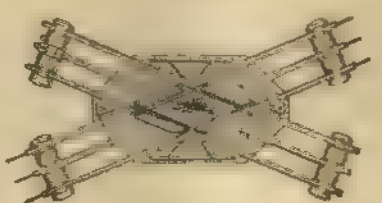
No. 4MF—Switch, Pair Consists of one right hand and one left hand switch, ...per doz. pairs $19.20

ELECTRIC TRACK

No. 5ES—Straight track, made of heavy rolled tin plate, length 10¼ in., w't per doz. sections 1¾ lbs., per dozen sections $2.00

No. 6EC—Curved electric track made of heavy rolled tin plate, length 10¼ in., w't per doz. sections 1¾ lbs., per dozen sections .....$.....

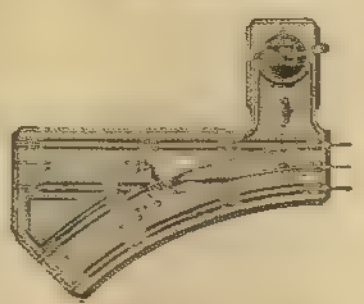
CROSSOVERS



No. 7EX—Electric crossovers made of heavy pressed tin plate, length 10¼ in., w't per doz. 2¾ lbs., per dozen $14 40

ALL ABOVE, ONE DOZEN IN A BOX

SWITCHES



No. 8EF—Electric switches, entire switch made without solder, all parts are die clamped on a strong pressed steel base giving perfect electric contact all the time, whether switch is open or closed, length 10¼ in., pair consists of one right hand and one left hand switch, w't per doz. pr. 1¼ lbs. .....per dozen $32.00

ONE PAIR IN A BOX

OIL TANK CAR

No. 1118—Double Truck . . . . .per dozen $14.40

CAR ASSORTMENTS

No. 11—Consists of six cars, Nos. 1107, 1108A, 1109, 1110A, 1111 and 11119 .....per assortment $2.59

DANGER SIGNALS

No. 206

No. 206—Beautifully decorated, green, white, blue and black, made of heavy pressed steel, height 7 in., w't per doz. 3 lbs. ....per doz. $3.60

No. 2016—Automatic danger signal with light, track terminal and special track; height 8¼ in., per dozen $50 40

No. 2016

TELEGRAPH POLES

No. 209—**Single arm,** made of drawn steel tubing, beautifuly enameled, height 6¾ in., w't per doz. 3 lbs.....per doz. $3.60

SEMAPHORES

No. 207

No. 207 — **Single arm,** beautifully decorated, red, white, and green, made of heavy pressed steel, height 7½ in., w't per doz. 3 lbs., per dozen $3.60

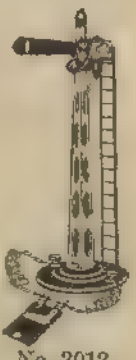
No. 208—**Double arm,** beautifully decorated, red, white, and yellow, made of heavy pressed steel, height 10¾ in., w't per doz. 3 lbs., per dozen $7.00

No. 208

No. 2011

No. 2011 — Mechanical Semaphore, single arm; height 9¾ in., per dozen $10.80

No. 2012—Semaphore with light and track terminal, height 9¾ in., per dozen $28.80



No. 2012

ARC LIGHTS

No. 2009

No. 2009—Complete with wire, track connections and 10 volt frosted bulb, made of heavy cast iron and cast brass, beautifully enameled in green, height 11 in., w't per doz. 12 lbs., per doz. ...$28.80

WATER TANK

No. 2020 — Height 9¾ in., per dozen..$15.00

No. 2020

ELECTRIC LIGHT BULBS

No. 9EB—6 volt, for use on cars semaphores, etc. .....per dozen $5.00
No. 10EBA—10 volt, for use on arc lights, per dozen $6 00

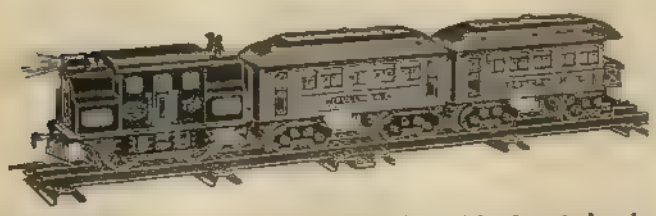
LIONEL ELECTRIC TOYS

In construction, finish and general appearance Lionel Electric Toys are of the highest quality. All locomotive bodies are of sheet steel, not cast iron. They are enameled and ornamented in gold with hand rails, bells, headlights and other fittings of nickled steel. Every Lionel Electric Motor has an electric headlight except No. 159 outfit.

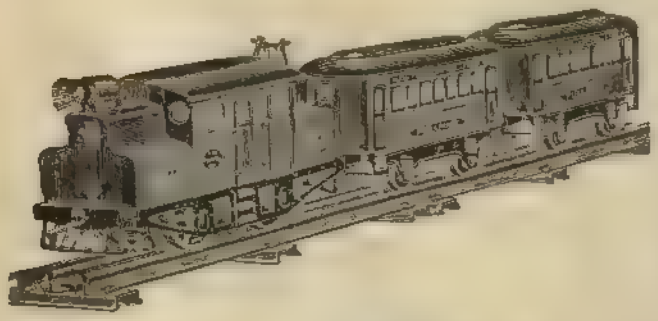
The motor is the most vital part of any electric train outfit. Lionel motors are built for service. All cars are hand enameled, not lithographed. They are decorated in gold, have removable roofs, seats in the interior, and imitation glass in windows and transoms. Being made of heavy gauge metal they are very durable and serviceable. Wheels are nickeled steel. Trucks are flexible, which enables cars to stay on track at high speed.

Track is very rigidly constructed. Track ties are very strong. Insulated third rail makes short circuit impossible. A Lionel Multivolt Transformer used in conjunction with Lionel Train Outfits will result in the utmost satisfaction to the user.

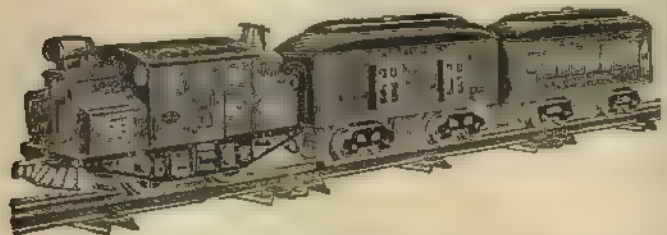
TRAINS



Outfit No. 155—Comprises locomotive with electric headlight, one double truck Pullman Car, one double truck Observation Car, eight sections of OC curved track and four sections of OS straight track, making an oval 49×30 inches. Outfit includes one speed controlling rheostat. Length of complete train 21½ inches. Weight of complete outfit packed in box 6½ lbs., each $13.80



No. 160—Consists of one locomotive with electric headlight, two Pullman cars, eight sections OC curved track and two sections OS straight track, making an oval 39×30 in., and one controlling rheostat. Length of complete train 20 in., w't complete 5½ lbs. .....each $11.50



No. 162—Consists of one locomotive with electric headlight, one double truck Pullman car, one double truck mail car, one controlling rheostat, eight sections OC curved track and four sections of OS straight track, making an oval 49×30 in. Length of complete train 24 in., w't complete 6¾ lbs. .....each $18.00

ALL ABOVE ONE SET IN A LITHOGRAPHED STRONG BOX

MULTIVOLT TRANSFORMERS

FOR ALTERING CURRENT

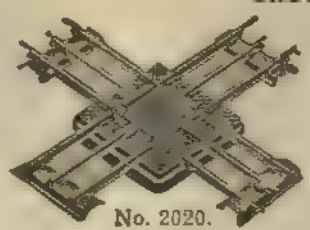
Type B—While primarily intended for operating Lionel or any other make of electrical toys, can be used to good advantage for operating various other electrical apparatus requiring the voltages within their range, such as induction coils, annunciators, bells, burglar alarms, wireless and medical apparatus and a large number of other uses. Multivolt transformers will be found more economical than dry batteries. Type B will operate any size electric train of any make with great efficiency and at low cost, size 2¾×4⅜×3¾ in., w't each 3½ lbs. .....each $6.50

ONE IN A BOX

WHAT IS MEANT BY TOY TRANSFORMER

A toy transformer is an apparatus for reducing the 110 volt house lighting **alternating current** to the few volts necessary for operating electric toys or various other appliances. They are made of electrical sheets with various coils of magnet wire wound over them. These coils are placed in a handsomely black enameled steel case and are surrounded with a sealing wax, which makes them impervious to heat, moisture, etc. The top of the case contains various binding posts and a controlling rheostat which enables the user to either obtain permanent or variable voltages by moving the switch from one point to another. A brass index plate shows the proper posts to use. A flexible lamp cord 7 ft. long is directly connected with the transformer. The standard plug on the end of the lamp cord fits in any lamp socket. For instance, if your house lighting circuit is 110 volts **alternating current** and you require 6 volts to operate a train set or other small electrical apparatus, this voltage can be obtained by connecting the binding posts indicated on the index plate. You turn on the current and whiz, zip goes the train.

CROSSINGS



No. 2020.

No. 2030—Crossing, for use in conjunction with switches, enabling the formation of figure 8 and figure 8 loop. Size 10 in. square. Cross rails are mounted on a solid base perfect insulation which prevents short circuit, w't each lbs. .....each $1.20

THIRD RAIL TRACK

No. 20S—Straight track 10¼ in. long, 1⅜ in. wide, 0 gauge, w't per section ¼ lb. .....per section $0.30

No. 20C—Curved track, for use with straight track, 11½ in. long, 1⅜ in. wide, 0 gauge, w't per section ¼ lb., per section $0.30

WRENCHES

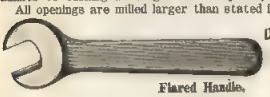
BILLINGS & SPENCER

ENGINEERS AND MACHINISTS

Wrenches have openings milled, edges ground, hardened and heads polished. The opening forms an angle of 15° with the handle, which admits of turning a hexagon nut completely around, where the swing of the handle is limited to 30°.

All openings are milled larger than stated in tables to allow for clearance of +.005 on smaller to +.040 on larger forgings.

DROP FORGED, 15° ANGLE, SINGLE END



Flared Handle.

RADIO SETS

CROSLEY MODEL XL

FOUR TUBE CONSOLETTE

This set is the latest model put out by the Crosley Manufacturing Company, which is similar to the XJ model consisting of four tubes which incorporate one stage of Crosley impedance coupled tuned radio frequency amplification, a detector and two stages of audio amplification. This set is assembled with a loud speaker in a solid mahogany cabinet, mensuring 13⅜ inches high, 23 inches wide and 13⅜ inches deep. The rear of the cabinet is easily accessible by raising the hinged lid, and there is ample room for six or eight dry cells to supply the filament current, and a shelf for the necessary "B" batteries. The cabinet is fitted with doors in the front, which are covered with gold cloth. The right hand door opens to allow adjusting of loud speaker, and the left hand door, upon opening, reveals the operating controls

Provision is made for headphones and plug to tune in on three tubes when it is desired to use headphones. The loud speaker unit, which is supplied without additional cost and built into the set, is connected to the fourth tube

This set has remarkable selectivity, which will permit tuning through powerful local broadcasting stations and bring in distant stations, and will at the same time completely tune out local interference

Model XL—

Receiver only, with loud speaker $132.00

(Less headphones and antenna).

MATERIAL NECESSARY TO COMPLETE ABOVE

For Dry Cell Use

4 only 1½-volt dry cell tubes, standard base, No. C12	$5 00		$20 00
6 only dry "A" batteries, No. 7111	.50	..	3.00
3 only 22½-volt "B" batteries, No 768	1 90	..	5.70
Complete outfit for dry cell use			$160 70

(Less headphones and antenna).

For Storage Battery Use

1 only 6-volt detector tube, No. C300	$ 5 00	.	$ 5 00
3 only 6-volt amplifier tubes, No. C301A	5.00	.	15 00
1 only storage battery, No. R39W, (80 amp. hour)	20.50	.	20 50
3 only 22½-volt "B" batteries, No. 768	1.90	..	5 70
Complete outfit for storage battery use			$178 20

(Less headphones and antenna).

CROSLEY TYPE 3C

THREE TUBE CONSOLETTE

Armstrong Regenerative

Since radio broadcasting came into existence there has been a need for a complete receiver handsome enough to grace any living room and at the same time efficient. The 3C meets this demand

The 3C is completely self contained, all batteries and necessary equipment being housed in the cabinet. The cabinet is made of mahogany, finished in light brown mahogany.

3C is a regenerative receiver with a detector and two stages of audio amplification. A filament switch is provided so that the tubes can be turned out without turning the rheostats. A jack is provided for plugging in headphones on one stage of amplification and leaving the self contained loud speaker attached on two stages

The loud speaker (which is of special design) is also contained in the cabinet. All of the latest improvements are incorporated in this receiver, such as the new Crosley molded condenser, molded sockets, unique type of regeneration, etc

The multistat allows the use of any style tubes

The right door opens to allow adjusting the loud speaker. The left door upon opening reveals the operating controls, and the top lifts readily for making connections and changing tubes

When the few simple adjustments have been made, the doors may be closed entirely to conceal the apparatus, the music and voice pouring through the grilled door.

Type 3C—

Receiver only, with loud speaker $121 00

(Less headphones and antenna)

MATERIAL NECESSARY TO COMPLETE ABOVE

For Dry Cell Use

3 only 1½-volt dry cell tubes, standard base, No. C12	$5.00	..	$15 00
4 only dry "A" batteries, No. 7111	50.		2 00
2 only 22½-volt "B" batteries, No 768	1 90		3 80
Complete outfit for dry cell use			$141 80

(Less headphones and antenna)

For Storage Battery Use

1 only 6-volt detector tube, No. C300	$ 5.00	..	$ 5.00
2 only 6-volt amplifier tubes, No. C301A	5.00	..	10.00

2 only 22½-volt "B" batteries, No. 768	1 90		3 80
Complete outfit for storage battery use			$160 30

(Less headphones and antenna).

RADIO SETS

CROSLEY MODEL XJ
FOUR TUBE

Consisting of One Stage of Tuned Radio Frequency, Detector and Two Stages of Audio Frequency Amplification

The new XJ is equipped with a phone jack, so that it is now possible to plug in on one stage of audio frequency, detector and one stage of radio frequency for headphones. Removing the phone plug automatically switches to the loud speaker binding post which is always connected from the rear. Binding posts have been eliminated from the front of the panel, so that all connections, other than the phone plug, are made from the rear, eliminating unsightly wires from the front of the table. A filament switch has been provided, so that the tubes can be turned out, leaving in tune any station, and eliminating the necessity of disconnecting battery clips or turning out the rheostats. New knobs and dials have been provided. The new large knob gives vernier control to the condensers.

The Crosley tuned radio frequency circuit, refined and improved is found in the XJ. This wonderful circuit is made possible through the use of Crosley variable condensers on account of their low internal resistance and freedom from body capacity effects. The Crosley Manufacturing Company originated this circuit, the first successful method of control of radio frequency amplification. Crosley tuned radio frequency amplification makes it possible to tune sharply to any wave length between 200 and 600 meters, which is impossible with transformer coupled radio frequency amplification.

Consisting of One Stage of Tuned Radio Frequency, Detector and Two Stages of Audio Frequency Amplification

All of the units are mounted on genuine Formica panel with sub-binding post panel of the same material. Heavy buss bar wiring is used throughout, making this set substantial for shipment.

The panel is mounted in a solid mahogany cabinet, natural brown, rubbed mahogany finish

Model XJ—
Receiver only (less headphones and antenna) $60.00

MATERIAL NECESSARY TO COMPLETE ABOVE

For Dry Cell Use

4 only 1½-volt dry cell tubes, standard base, No. C12	$5 00	$20 00
6 only dry "A" batteries, No. 711	50	3 00
2 only 45-volt "B" batteries, No. 767	5 00	10 00
Complete outfit for dry cell use		$93 00

(Less headphones and antenna)

For Storage Battery Use

1 only 6-volt detector tube, No. C300	$ 5.00	$ 5.00
3 only 6-volt amplifier tubes, No. C301A	5.00	15.00
1 only storage battery, No. R38W, (80 amp. hour)	20.50	20.50
2 only 45-volt "B" batteries, No. 767	5.00	10.00
Complete outfit for storage battery use		$110.50

(Less headphones and antenna)

Loud Speaker Can Be Attached To This Set

CROSLEY SUPER XJ
FOUR TUBE

Consisting of One Stage of Tuned Radio Frequency, Detector and Two Stages of Audio Frequency Amplification. Incorporates Armstrong Regenerative and Miner Superdyne Features

The circuit used in the Super XJ has been pronounced by leading authorities throughout the country as the most efficient of the latest radio developments, enabling perfect regeneration, control of tuned radio frequency amplification with a minimum re-radiation and increased range, volume and selectivity

There are two stages of audio frequency amplification, which permit the operation of a loud speaker when receiving near by as well as far away broadcasting stations. A phone jack is provided so that headphones can be used on one stage of audio frequency, detector and one stage of radio frequency, when desiring to tune in long distance stations. Removing the phone plug automatically switches to the loud speaker binding posts which are always connected from the rear.

The large knobs on the dials permit Vernier control of the condensers; also, through the use of a filament switch all the tubes may be turned out, leaving in tune any station, and eliminating the necessity of disconnecting battery clips or turning out the rheostats.

All of the units are mounted on a genuine formica panel with the sockets and binding posts mounted on a sub-panel of the same material. The cabinet is made of solid mahogany, with a natural brown, rubbed mahogany finish

Model Super XJ—
Receiver only (less headphones and antenna) $71.50

MATERIAL NECESSARY TO COMPLETE ABOVE

For Dry Cell Use

4 only 1½ volt dry cell tubes, standard base, No. C12	$5 00	$20 00

3 only 6-volt amplifier tubes, No. C301A	5.00	15.00
1 only storage battery, No. R38W, (80 amp. hour)	20 50	20.50
2 only 45-volt "B" batteries, No. 767	5 00	10.00
Complete outfit for storage battery use		$122.00

(Less headphones and antenna.)

Loud Speaker Can Be Attached To This Set

RADIO SETS

CROSLEY TRIRDYN 3R3
THREE TUBE

Armstrong Regenerative

This three-tube Tridyne 3-R-3 receiver gives the efficiency and volume of a five-tube receiver. It consists of one stage of non-reradiating, non-oscillating radio frequency amplification. Armstrong regenerative feed-back detector, licensed under U. S. patent No 1,113,149, reflexes back on the first tube for first stage of audio frequency, and a third tube provides a second stage of audio frequency amplification.

This set has only two major tuning controls. These two dials can be calibrated accurately so that stations can be logged and returned to at will

A selector coil is provided on the receiver to be used sometimes during local interference in connection with some types of antenna, in order to provide greater selectivity.

Can be used satisfactorily with a very small indoor antenna which provides loud speaker volume even on long distance stations. Excellent results have been obtained without any antenna, using only a ground wire connected to the antenna binding post.

The Tridyn, or 3R3, gets its name from the combination of radio frequency, regeneration and reflex and also the fact that the set uses only three tubes.

It is encased in a beautifully finished, solid mahogany cabinet.

No. Tridyn 3R3—
Receiver only (less headphones and antenna) $71.50

2 only 6-volt amplifier tubes, No. C301A	5.00	10.00
1 only storage battery, No. R39W, (80 amp. hour)	20.50	20.50
2 only 45-volt "B" batteries, No. 767	5.00	10.00
Complete outfit for storage battery use		$117.00

(Less headphones and antenna).

Loud Speaker Can Be Attached To This Set

CROSLEY TRIRDYN SPECIAL
THREE TUBE

Armstrong Regenerative

The Crosley Tridyn Special is exactly the same as the Tridyn 3R3, except the solid mahogany cabinet is larger. There is sufficient space inside to house all the 6-inch No. 6 dry cells and the "B" batteries required when standard dry cell tubes are used Home furnishing experts have declared that the Tridyn Special is the most beautiful radio receiving set ever manufactured and radio experts have acclaimed it to be the most efficient. The Special Tridyn and the loud speaker placed on a library table, will be a welcome addition to the home from an artistic standpoint.

No. Tridyn Special—
Receiver only (less headphones and antenna) $82.50

CROSLEY MODEL 52
THREE TUBE

Armstrong Regenerative

The Crosley 52 is a new three tube Armstrong regenerative receiver, licensed under U. S. Patent 1,113,149. It consists of tuner, regenerative detector, two stages of audio frequency, phone-jack to plug in on two tubes and filament switch to turn off the "A" and "B" batteries when the set is not in use. This receiver is unusually efficient, will provide loud-speaker volume on distant stations under practically all conditions, and is in every way an ideal receiver for the home. The parts are mounted on a beautifully grained panel of highest grade insulating material, and are in a hardwood, mahogany finished cabinet.

Model 52—

Receiver only (less headphones and antenna) $33.00

Loud Speaker Can Be Attached To This Set

CROSLEY TYPE 3B
THREE TUBE

Armstrong Regenerative

The Type 3B fills a want for a high grade, three-tube regenerative receiver at moderate cost. In appearance and efficiency it needs no apology for low price. Its dull black panel, engraved with white letters, highly polished, black dials and knobs, and nickel trimmings, form a pleasing contrast to the beautiful piano-finished, solid mahogany cabinet, making it a "thing of beauty" for the most magnificent home. In combination with the battery cabinet, it becomes a decoration to any room as a finished piece of furniture.

This receiving set will operate with either dry cell or storage battery tubes. It is equipped with a Crosley multistat, designed to control properly the filaments of any type of tubes. The Type 3B is equipped with the Crosley Model "D" condenser, having molded plates. It also has a phone jack so that tuning may be done with headphones on detector, and one stage of audio frequency amplification. When the phone plug is removed, signals are automatically transferred to three tubes and the loud speaker, providing the latter unit has been added to the set

This receiver is in every way suitable for operation of a loud speaker of any standard make, and will furnish signals of sufficient volume to be heard all over the house under reasonably good conditions, from far-away stations

Type 3B—

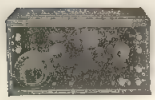
CROSLEY MODEL 51

TWO TUBE



Consists of a detector and one stage of audio frequency amplification. It uses two standard storage battery or dry cell tubes, and is licensed under Armstrong U. S. Patent 1,113,149. This receiver will bring in local stations on the loud speaker at all times, and under average conditions will also bring in distant stations on the loud speaker.

The Crosley 51 is unusually selective. It incorporates standard sockets so that all makes of tubes may be used

The various units are mounted on beautifully engraved grained panels inside of hardwood, mahogany finished cabinets, which enclose all parts and tubes.

Model 51—

Receiver only (less headphones and antenna) $20.00

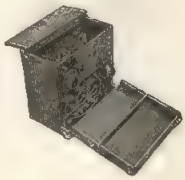
CROSLEY MODEL 51P—PORTABLE

TWO TUBE



Armstrong Regenerative

This is the new Crosley portable set. It is the Crosley model 51 two-tube receiver mounted in a leatherette covered carrying case, having nickel-plated trimmings and a leather handle. It has a compartment for a pair of headphones and a compartment large enough to hold three No. 7111 "A" batteries or three standard 6-inch dry cells and three No. 764 Eveready vertical, intermediate size, 22½ volt "B" batteries, thus providing for an ample power plant for continuous use over a reasonably long period of time with the popular dry cell vacuum tubes. This receiver can be used as a stationary set in the home or as a portable set to "take your entertainment with you" for camping trips, outings, etc. It is licensed under Armstrong U. S. Patent 1,113,149

Model 51P

Receiver only (less headphones and antenna). $27 50

RADIO SETS

CROSLEY MODEL VI
TWO TUBE

The Crosley Model VI cabinet is of hardwood, Adam brown mahog any finish, and compares favorably with the finest piece of furniture in a most particular housewife's parlor. This set combines one stage of tuned radio frequency with a tuner and audion detector.

The one stage of tuned radio frequency amplification not only amplifies the signal before it reaches the detector, enabling the detector to work more efficiently, but it also eliminates the interference to a wonderful degree

Tuning is very simple and this set alone will bring in distant broadcasting stations under almost all conditions. It consists of two tubes and has at least six times the volume of most one tube sets. Local broadcasting stations come in loud enough to be heard all over the room with a horn

Model VI—

Receiver only (less headphones and antenna) $26 00

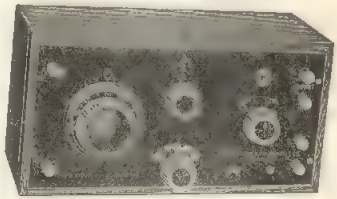
CROSLEY TYPE V
ONE TUBE



Armstrong Regenerative

Wonderful efficiency, simplicity of operation and low cost are the chief factors in the growing success of the Type V Regenerative Radio Receiver. They are the things that have made the receiver the most popular on the market. This set is well known, thousands of them having been sold.

The Type V is a long range receiver. Stations from coast to coast are heard under ordinary conditions. Signals are clear and distinct.

A Crosley multistat, the universal filament control rheostat, is used in this receiver. This is a new and exclusive Crosley feature which permits use of any make of tube.

Type V— Receiver only (less headphones and antenna) . $17 50

MATERIAL NECESSARY TO COMPLETE ABOVE

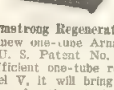
CROSLEY MODEL 50
ONE TUBE



Armstrong Regenerative

The Crosley 50 is a new one-tube Armstrong regenerative receiver, licensed under U. S. Patent No. 1,113,149. We believe this to be the most efficient one-tube receiver ever put on the market. Like the model V, it will bring in, under average conditions on headphones, broadcasting stations at a distance of one thousand miles or more.

The various parts of the new model 50 are mounted on a beautifully grained panel of highest grade insulating material, nickel plated trimmings, mounted in mahogany finished hardwood, cabinet having hinged lid. This receiver has standard socket, and is equipped with a Crosley multistat, which enables the user of any standard storage battery or dry cell vacuum tube

Model 50— Receiver only (less headphones and antenna) $16.00

MATERIAL NECESSARY TO COMPLETE ABOVE

For Dry Cell Use

1 only 1½ volt dry cell tubes, standard base, No. C12	$5.00	$ 5.00
Note—If desired, one C299 tube with an adapter can be used. C299 tubes are $5.00 each, adapters are $0.75 each.

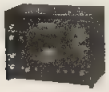
Complete outfit for storage battery use . .		$43 50

(Less headphones and antenna)

AMPLIFIER UNITS

CROSLEY MODEL 50A
TWO STAGE



Designed to match the new model 50 receiver. This unit is equipped with a filament switch for shutting off the current from the "A" and "B" batteries. When used in connection with the Crosley 50, it gives the equivalent of a three-tube regenerative receiver.

Model 50A
Amplifier only (less tubes) $20.00

ADDITIONAL MATERIAL NECESSARY TO COMPLETE ABOVE

For Dry Cell Use

2 only 1½ volt dry cell tubes, standard base, No. C12 $5.00 . $10.00
Note—If desired, two C299 tubes with adapters can be used. C299 tubes are $5.00 each. adapters are $0.75 each.
4 only dry "A" batteries, No. 7111 . . .50.. 2.00
1 only 45 volt "B" battery, No. 767 ... . .. 5.00.. 5.00

Amplifier outfit for dry cell use $37.00

For Storage Battery Use

2 only 6 volt amplifier tube, No. C301A ....$5.00..$10.00
1 only 45 volt "B" battery, No. 767 . . . . . 5.00.. 5.00

Amplifier outfit for storage battery use (less tubes) $35.00

CROSLEY MODEL 51A
ONE STAGE

Designed to match the Crosley 51 receiver. When used in connection with the Crosley 51, it gives the equivalent of a three-tube regenerative set. A Crosley multistat and standard socket permit the use of any make of amplifier tube. The cabinet of the Crosley 51A matches the cabinet of the Crosley 51 perfectly the combination forming a neat and attractive radio set

Model 51A
Amplifier only (less tube) $15 00

ADDITIONAL MATERIAL NECESSARY TO COMPLETE ABOVE

For Dry Cell Use

1 only 1½ volt dry cell tube, standard base, No. C12 $5.00..$ 5.00
Note—If desired, one C299 tube with an adapter can be used. C299 tubes are $5.00 each, adapters are $0.75 each.
2 only dry "A" batteries, No. 7111 ..... .50.. 1.00
1 only 45 volt "B" battery, No. 767 ..... 5.00.. 5.00

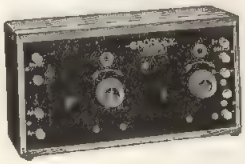
Amplifier outfit for dry cell use (less tube) $26.00

For Storage Battery Use

1 only 6 volt amplifier tube, No. C301A .....$5.00..$ 5.00
1 only 45 volt "B" battery, No. 767 ..... 5.00.. 5.00

Amplifier outfit for storage battery use (less tube) $25.00

CROSLEY MODEL IV
TWO STAGE



Designed for use with any audion detector unit, especially with the model VI. When attached to this receiver, the combination will be similar to the Type 3B.

Squeals and howls, so common in many of the amplifiers on the market, are unknown to owners of the Two-Stage Amplifier, which makes desired signals more audible and eliminates undesirable ones This unit does not produce volume, it amplifies it. In fact, it increases the volume of the model VI approximately 100 times.

It has been found that owners of the model VI, at first satisfied with using headphones, later desire to add a loud speaker, but before they can do this they must purcrase a two-stage amplifier. The amplifier was designed for them, and has met with tremendous success

Model IV—
Amplifier only (less tubes) $20.00

ADDITIONAL MATERIAL NECESSARY TO COMPLETE ABOVE

For Dry Cell Use

2 only 1½-volt dry cell tubes, standard base, No. C12 $5.00..$10 00

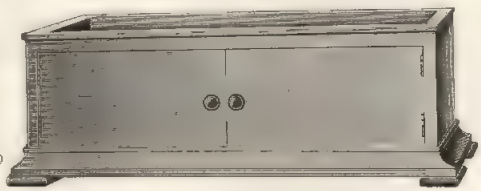
Amplifier outfit for storage battery use $35 00

BATTERY CABINETS



This beautiful battery cabinet is designed for use with the Crosley receivers. It is finished in brown mahogany. There is ample room for three "B" batteries and six dry cell "A" batteries. There is also room for headphones and other accessories. The cabinet is strongly built, and its neatness makes it in keeping with the most artistic surroundings.

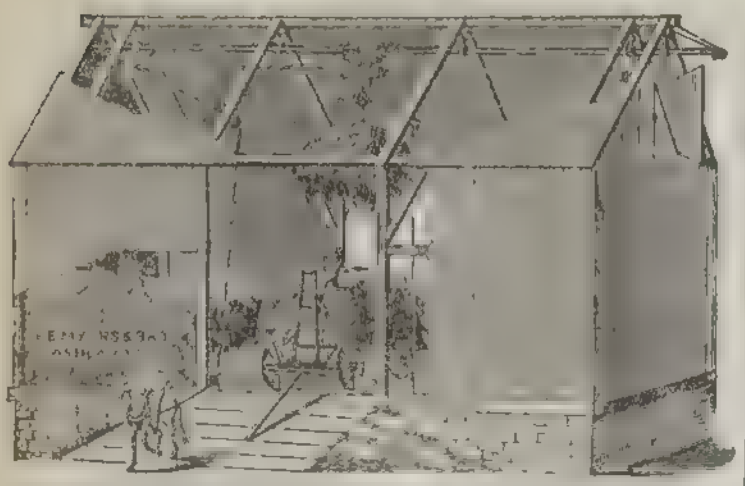
HAY CARRIERS

MATERIALS REQUIRED AND DIRECTIONS FOR PUTTING UP CARRIERS

MYERS



DIRECTIONS FOR ERECTING MYERS PATENT STEEL TRACK

Scaffold by placing rope from rafter to rafter, say 6 feet from ridge pole or peak and about 10 feet apart. Then place extension ladder across the ropes with board to stand on. Now nail one rafter bracket at each end of barn and draw a line from one end to the other and stretch tight. Then nail all rafter brackets even with this line. You are now ready to put up the track, which can be done in sections. Hoist near to rafter [illegible] then place hanging hook over rafter bracket and finish by putting in bolt.

Material Required for a Steel Track Outfit for Different Length Barns

For a 40 foot Barn—One hay unloader. 36 feet Steel Track. 19 Hanging Hooks. 19 rafter brackets. 5 Knot Passing Pulleys. 1 Fork or 3 Slings. 6 Floor Hooks. 110 feet ¾ inch Manila Rope. 50 feet ⅜ inch Check Rope. 40 feet ⅜ inch Reverse Rope.

For a 50 foot Barn—One hay unloader. 48 feet Steel Track. 25 Hanging Hooks. 25 Rafter Brackets. 5 Knot passing Pulleys. 1 Fork or 3 Slings. 6 Floor Hooks. 130 feet ¾ inch Manila Rope. 55 feet ⅜ inch Check Rope. 50 feet ⅜ inch Reverse Rope.

For a 60 Foot Barn—One hay unloader. 54 feet Steel Track; 28 Hanging Hooks 28 Rafter Brackets. 5 Knot passing Pulleys. 1 Fork or 3 Slings. 6 Floor Hooks. 160 Feet ¾ inch Manila Rope. 60 feet ⅜ inch Check Rope. 60 feet ⅜ inch Reverse Rope.

For a 70 foot Barn—Hay Unloader. 66 feet of Track. 34 Hanging Hooks. 3½ lbs. Bracket Nails. 5 Fig. 1120 Pulleys. 1 Fork or 3 Slings. 6 Floor Hooks. 190 feet ¾ inch Draft Rope. 70 feet ⅜ inch Check Rope. 70 feet ⅜ inch Reverse Rope.

For an 80 foot Barn—Hay Unloader. 78 feet of Steel Track. 40 Hanging Hooks. 40 Rafter Brackets. 4 lbs. Bracket Nails. 5 Fig. 1120 Pulleys. 1 Fork or 3 Slings. 6 Floor Hooks. 210 feet ¾ inch Draft Rope. 80 feet ⅜ inch Check Rope. 80 feet ⅜ inch Reverse Rope.

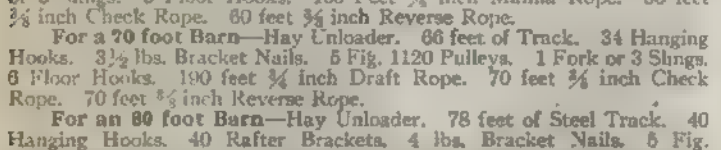
Different Lengths of Barns will use track, hanging hooks and rope in same ratio as above.

If required to take hay in at end of Barn and have rope pass down at far end to horse, add amount of draft rope. If draft rope be returned to same end of barn and then down, this requires about one-fourth more draft rope.

Place pulley to draw the carrier back into the mow directly under and in line with track, and not as seen in cut. Do not allow steel track hanging hooks to project below casting under track through which they are screwed, as they will interfere with carrier.

This cut, Fig. 430, shows how steel track should be put up and how rope is tied from one rafter to the other close under the track to make stop for carrier at end of barn. Also shows how Rafter Brackets are placed.

How to Reverse Carrier—Set Fork in hay. Tie ends of rope together, to which horse and weight are attached. Pull on small rope until knot comes to the floor, then untie rope. Fasten weight C on small rope, change Pulley A to floor hook H. This reverses carrier for opposite direction without leaving the floor or climbing up. Use all knot passing pulleys. For taking in hay at end of barn use V shaped brace for track support, as shown in cut.



Illustrating how Track should be placed in Barn; also how Rope and Pulley should be placed.

NEY MFG. CO.

MATERIAL FOR STEEL TRACK FOR CARRIERS

When Taking in Hay at End of Barn

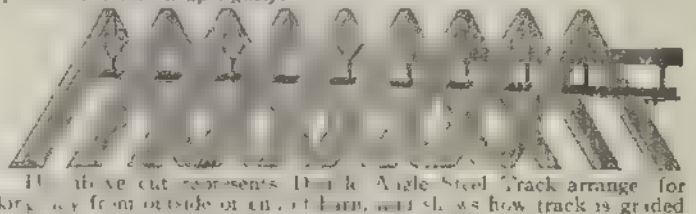
1 Fork Carrier.
Track the Required length for Barn
1 Track Eye or 1 Hanger Hook and 1 Rafter Bracket for each Rafter.
8 Knot Passing Pulleys.
8 Floor Hooks.
1 Swivel Rope Hitch.
1 Harpoon or Grapple Fork.
Draft Rope ¾, ⅞ or ⅞ inch; when team is at same end of barn as hay is taken in—length equal to twice the length of track, plus three times the distance from floor to track.
When team is at opposite end of barn to where hay is taken in—length equal to once the length of track, plus three times the distance from floor to track
When team is at center (side) of barn—length equal to 1½ times the length of track plus three times the distance from floor to track, plus half the width of barn.
Trip Rope ⅜ inch—length equal to distance from point of elevation to opposite end of track.
For barn having center (side) drive same as above, except 5 pulleys and floor hooks.

SLING CARRIERS

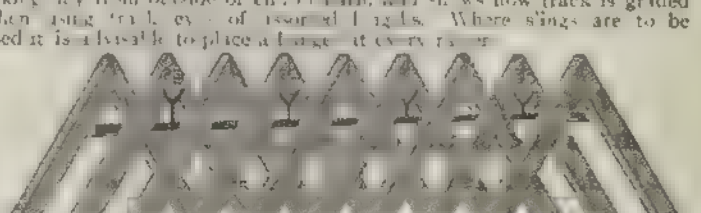
Substitute Sling Pulley for Fork Pulley in carrier and three slings and add 15 feet to length of Draft Rope.

DIRECTIONS FOR PUTTING UP DOUBLE ANGLE STEEL TRACK

Put up the track in sections or by clamping the entire length together. The track may be graded by the use of assorted track eyes or put up with all one size as desired. See that the rafter brackets are properly nailed and that the track eyes are as near the center between rivets in the track as possible; this increases the strength of the track. Bolt trip block on track over point at which you wish to elevate. See that the bolts on trip block are drawn up tightly.



[illegible] cut represents Double Angle Steel Track arrange for taking in hay from outside of end of barn, and shows how track is graded when using track eyes of assorted lengths. Where slings are to be used it is advisable to place a hanger at every [illegible]



This cut represents Double Angle Steel Track graded from ends to center of barn when track eyes of assorted lengths are used. It greatly assists the return of carrier after discharging its load. Also checks speed of carrier after leaving bumper or trip block.

MATERIAL FOR WOOD TRACK CARRIERS

Same as for Steel Track Carriers, except that a wood track carrier, wood track and wood track hanger eyes are used.

DIRECTIONS FOR MAKING WOOD TRACKS

Use 4x4 hardwood or pine scantlings dressed down to 3¾ inches; or use two 2x4 pieces and spike them together, breaking joints

4x3 inch can be used by blocking down the stop to fit the carrier and to engage the lock.

DIRECTIONS FOR PUTTING UP WOOD TRACK

Use a track hook to every rafter over the point of elevation and preferably throughout the entire length of track, but a hook at every second rafter will answer except at point of elevation. Let all nuts into the track so they will not interfere with the carrier. Make sure the track is at the proper depth where the trip block or bumper is placed. It may be necessary to block it down or set it into the wood

DIRECTIONS FOR REVERSING CARRIERS

Pull carrier to stop block, let the pulley drop out of carrier. Take rope out of pulley at end of barn and while standing beneath the carrier give the rope a little slack and give it a throw to obtain a half turn in the swivel. Re-thread the pulleys in the end of the barn you wish to operate in, and the carrier is ready for operation.

Before pulling large rope out of pulleys tie a small rope to end of it so that the small rope will be through pulleys for pulling up the large rope the next reverse.

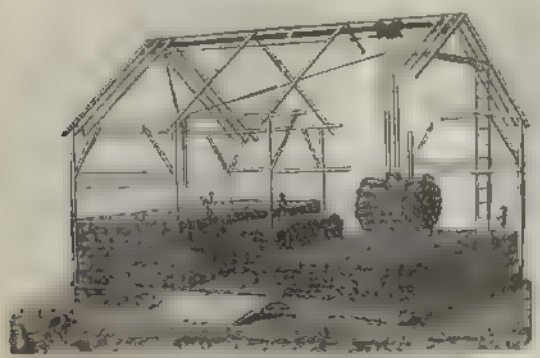
HAY CARRIERS

DIRECTIONS FOR PUTTING UP WIRE CABLE AND DERRICKS FOR STACKING

Take four poles or 4x4 scantling about 30 feet long; cut a slot in the top of each about ¾ inch wide and 4 inches deep for cable. Bore a hole for a ½ inch bolt about 1 inch above the bottom of the slot, to prevent cable from coming out while raising. Place carrier bumper complete on cable about at center. Place cable in slots, under bolts, then secure a single clamp about 40 feet from each end of cable to prevent the poles from sliding in. Bolt cross pieces together with ¾x10 inch bolts. Place carrier on cable between cable clamps. Make loops at each end of cable, using double clamps for the purpose. Thread carrier and pulley with rope and fasten pulley near one of the single clamps. Fasten loops on ends of cable to cross sticks for guys and erect derrick by raising one set of poles just high enough so they will stand without slipping at bottom then raise both sets at about the same time, alternately with each set until cable is stretched taut. Now fasten bumper to cable at opposite end from pulley over point which you wish to elevate. Place second pulley to stake in ground nearly under the first pulley placed and it is ready for operating.

MATERIAL FOR WIRE CABLE CARRIER AND DERRICK FOR STACKING

1 Cable Carrier,
1 Harpoon or Grapple Fork.
2 Single Cable Clamps.
2 Double Cable Clamps.
2 ¾x10 inch Carriage Bolts.
130 Feet ¾, ⅞ or ⅞ inch Rope.
2 Pulleys.
4 Poles 4x4 inch, 30 feet long.



This cut shows Carrier in use, unloading wheat or corn fodder in Barn with Sling Carriers. Fork Carriers can not be used for this purpose.

LUMBER REQUIRED TO BUILD A HAY RACK

Have All 2 inch Stuff Dressed on Both Sides, and inch Stuff on One Side. Two Pieces 2x8, 16 feet for Bed Sills. Have Bed Sills 6 inches Narrower in Front than in Rear. Two Pieces, 2x4, 14 feet, Cut in Two for Top Cross Pieces. Six Pieces, 2x4, 16 feet, One for Front Ladder, One for the Four Button Cross Sticks Under the Bed Sills, and Four for the Top Longitudinal Pieces. Two Pieces, 2x6, 12 feet, to Cut into 6 feet Lengths for Sides of Wheel Boxes. Spike from Underneath the 2x4 Longitudinal Pieces. Two Pieces, 1x6, 16 feet (Fencing) to Cup up to Cover Wheel Boxes. Two Pieces, 1x12, 10 feet to go in Front of Wheel Boxes to front End. The Above are for 14 inch Clamps; 16 inch take Larger Cross Pieces or Bed Sills.

HAY CARRIERS

Illustrations showing Method of using and operation of Sling Carriers.

SLING CARRYING LOAD

Will positively hold any weight load without chafing the rope: Automatic, permits the load to be carried to the mow at any elevation from the floor.

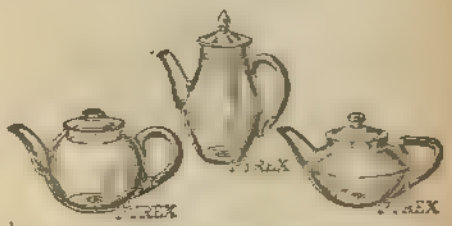
TEA POT ASSORTMENT

The Smartest Thing in TEA POTS



MAKING PERFECT TEA BY SIGHT

The new Pyrex Transparent Tea Pots make better tea with the usual methods by showing at a glance when the tea is just the right strength for serving and the tea actually tastes better because it sparkles so appetizingly through crystal clean Pyrex. Pyrex Tea Pots are so beautiful in design that they harmonize with the finest table service.

Not only beautiful on any table but most practical for every meal use. The hottest water will not break them. The deep rim prevents the lid from dropping off when the tea is poured. They clean easily, never craze nor tarnish and still look new when handed down to the grandchildren.

Made of the same wonderful transparent material used in making the famous Pyrex Transparent Ovenware.

Pyrex Tea Pots are made in three beautiful designs in all the useful sizes.

PYREX HOUSEHOLD SETS

Four of the most useful items—Packed in handsome Gift Box—White with Blue Ribbon Band.

Containing 14 staple items—Useful for many purposes in every kitchen, every day—

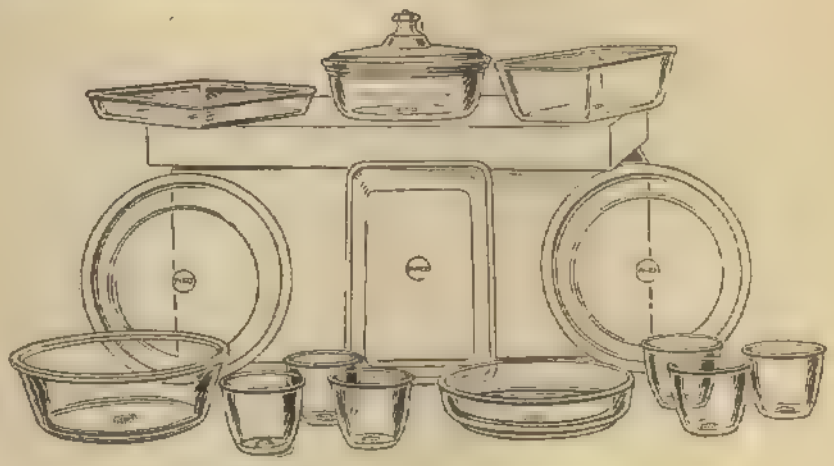
Contents

1 268 1½ qt. Round Casserole
1 231 10½x6½x2 in. Utility Pan
1 135 1 qt. Round Baker
1 466 2 qt Round Pudding
1 212 9½x5½x2¾ in. Bread Pan
2 209 9½ in. Pie Plates.
1 234 9½x7⅝x1¾ in. Biscuit Pan
6 426 6 oz. Custards

No. 10—Set of 14 pieces, per set $10.00

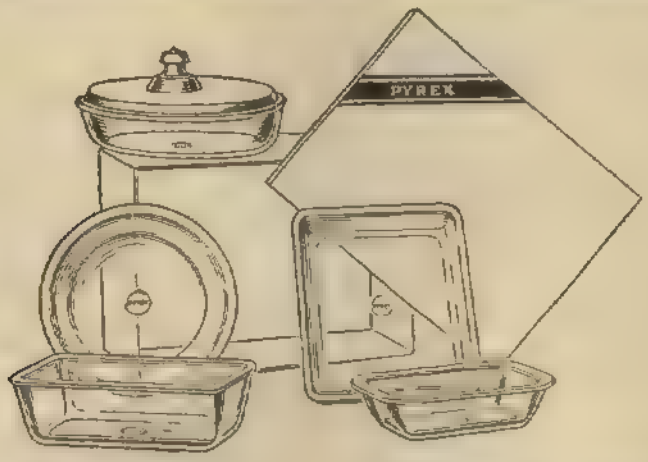
No. 1416—Set of four pieces, per set $7.00

ONE SET IN A BOX



GIFT SETS

FOR WEDDINGS, ANNIVERSARIES, PRIZES, BIRTHDAYS, SHOWERS—IN FACT, ANY TIME WHEN A GIFT OF DISTINCTION IS DESIRED. PACKED IN SPECIALLY ATTRACTIVE BOXES.



PLAIN WARE

No. 5—
Each set contains
1 No.284—½ qt. Oval Casserole.
1 No. 212—9½x5½x2¾ in. Bread Pan.
1 No.208—8½ in. Pie Plate.
1 No. 234—9½x7⅝x1¾ in. Biscuit Pan.
1 No. 145—7⅞x5¾x2 in. Baker.

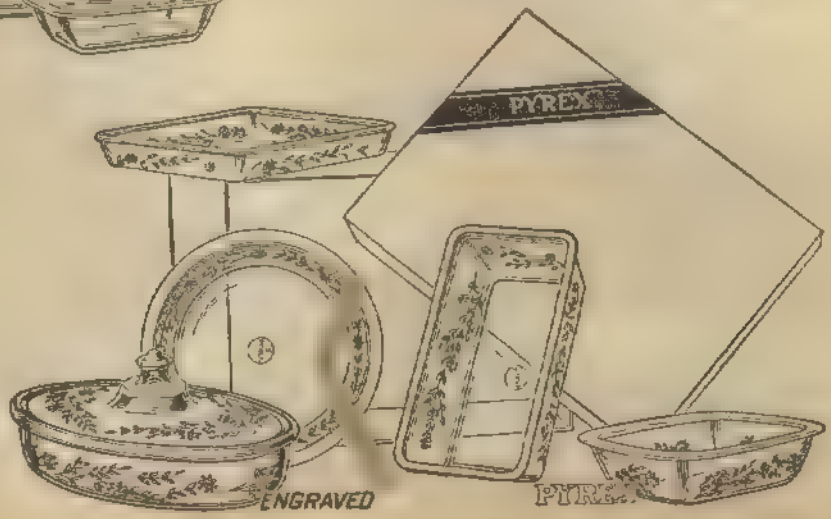
W't per set 10 lbs., per set $5.00

ENGRAVED WARE

No. 5E2—

Each set contains:
1 No. 284E—1½ qt. Oval Casserole.
1 No. 212E—9½x5½x2¾ in. Bread Pan.
1 No. 208E—8½ in. Pie Plate.
1 No. 234E—9½x7⅝x1¾ in. Biscuit Pan.
1 No. 145E—7⅞x5¾x2 in. Baker.

W't per set 10 lbs., per set $8.00



DIAMOND EDGE "SAFETY PRESS BUTTON" KNIVES

(U. S. Patents 812, 601 and 845,130)

TRADE MARK REGISTERED IN THE U. S. PATENT OFFICE

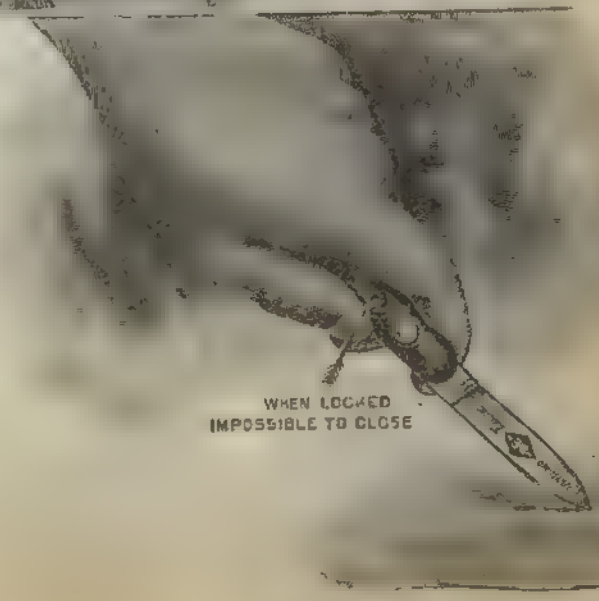
TRADE MARK REGISTERED IN THE U. S. PATENT OFFICE

The *DIAMOND EDGE* "Safety Press Button" Knife is a Convenient Automatic Fly-Open Pocket Knife, Which Can be Opened and Closed With One Hand; No Danger of Breaking Finger Nails, and Can Be As Easily Operated With Gloves On the Hands As Without; the Trouble Experienced in Opening An Ordinary Pocket Knife When Fingers Are Benumbed With Cold is Entirely Overcome in the Safety Press Button. The Most Valuable Features of This Knife, However, Lie in the Fact That the **Blades Can Be Locked Either In An Open or Closed Position,** Avoiding Any Possibility of Injuries, Caused by Accidental Opening While in the Pocket or Closing While Being in Use. **When the Safety is Pushed Into Position the Blades Are Positively Secure and Safe Against Opening in the Pocket. This Knife is the Only One On the Market Possessing This Very Important Feature.**

The Life of a Safety Press Button Knife is Practically Long and the Mechanism Will Be Found in the Same Good Order When the Blades are Entirely Worn Out As When the Knife Was Purchased. It Has Other Pocket Knife Advantage as Compared With An Ordinary Pocket Knife, As On the *DIAMOND EDGE* "Safety Press Button" There is No Friction Whatever On the Tangs of the Blades. On the Ordinary Type of Knife the Blade Springs Wear Away the Tangs, Causing the Points to Rise Above the Handle. This Can Never Occur in the "Safety Press Button." The Points Will Positively Not Rise Above the Handle Unless the Shape of the Blades Should be Changed. This Feature We Can Sole[illegible] to Our Knife, Owing to the Construction of the Locking Mechanism.

This Pattern is the Result of About Fifteen Years Thought on the Subject of Automatic Fly-Open Knives, and We Have Finally Produced an Article Free From All Undesirable Elements So Commonly Found in This Class of Knives. The "Safety Press Button" is a Distinct Departure From the Original Mechanism of the Old Style Press Button and a General Improvement in Appearance and Effectiveness

Second to Appearance and Effectiveness in the Design of the "Safety Press Button," We Considered the Strength and Durability of the Various Parts and Mechanism. These Points Are of Vital Importance in a Knife of This Character and One Which Could Never Be Claimed For the Old Style Press Button.



The Design Throughout is Superior and More Symmetrical Than the Old Style; the Blades Are Fuller and the Handles Are More Shapely From Every Point Considered

The Workmanship is of the Highest Class Used in the Production of Any Pocket Knives in the World. They Are Made On the Interchangeable Plan; That Is, Each and Every Part of Any Knife is An Exact Duplicate of a Similar Part of Any Other Knife of the Same Size or Style.

Blades Made of **Highest Grade English Steel,** Properly Hardened and Tempered to the Most Desirable Degree of Hardness So That They Will Hold Their Edges and Will Not Break Off, Chip Out or Become a Feather Edge. All Materials Are of Best Quality and the Most Suitable Which Can be Procured on the Market.

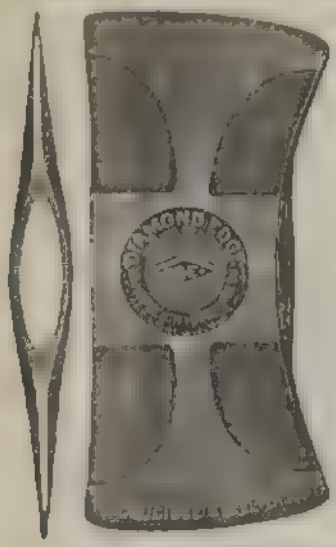
DOUBLE BIT AXES



★DIAMOND EDGE
TRADE MARK REGISTERED IN THE U.S. PAT. OFFICE

PHANTOM BEVELED
Polished and Labeled; Carmine Painted Bevels

DIAMOND EDGE Axes are Recognized as Being the Best Made. They are Hand Tempered by an Improved Process; Every Axe Carefully Tested Before Leaving the Factory. This Practically Prevents Axes with Flaws or Soft Cutting Edges Reaching the User. It also Insures Uniformity of Temper, without which an Axe will Not Hold a Fine, Sharp Cutting Edge.

Highest Grade **Crucible Steel** Bit, Carefully Tempered and Ground. Soft Steel Body. **The Eyes are Punched** from Solid Steel and will not Stretch nor Break, as Occurs with Axes Having a Rolled or Welded Eye. The Eye is Tapered from the Outer to the Inner Opening; this Holds the Handle Firmly and Prevents its Splitting.

This Practically Prevents Axes with Flaws or Soft Cutting Edges Reaching the User. It also Insures Uniformity of Temper, without which an Axe will not Hold a Fine, Sharp Cutting Edge.

Highest Grade **Crucible Steel** Bit, Carefully Tempered and Ground, Soft Steel Body. The **Eyes are Punched** from Solid Steel and will not Stretch nor Break, as Occurs with Axes Having a Rolled or Welded Eye. The Eye is Tapered from the Outer to the Inner Opening; this Holds the Handle Firmly and Prevents its Splitting.

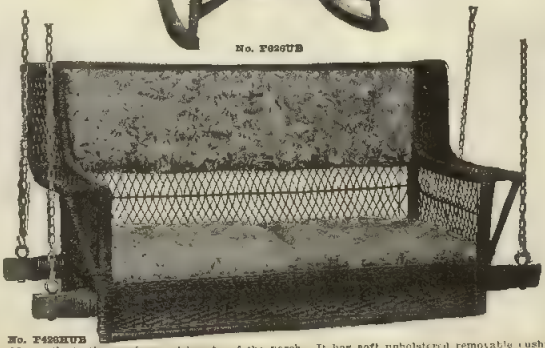
PORCH SWINGS

The vogue of enclosed porches and sun parlors have made a larger demand for the better grade swings. We have therefor discontinued the cheaper outdoor grades which at best were only suitable for one or two seasons' wear. The Swing shown below is of the same high quality as our Supreme Fibre Furniture.

A Very High Quality Article in Every Way.



No. F426HUB

Made in—
4 ft. length
5 ft. length
6 ft. length
Either Plain or Upholstered.

This Porch Swing will add greatly to the comfort & beauty of the porch. It has soft upholstered removable cushion seats over springs and a tufted upholstered back. The arms are wide and comfortable. The frame is rigidly made and covered with the highest grade of fibre. Guaranteed in every respect. It is made regularly in 5 ft. length.

NOTE—If wanted in different finish than old ivory, state color desired.

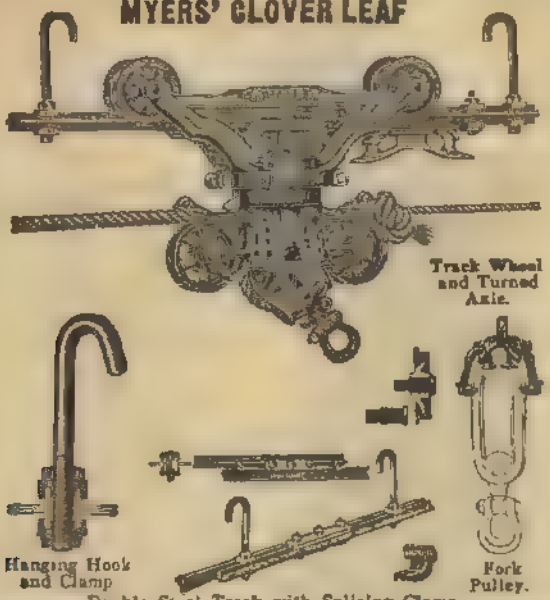
HAY CARRIERS

MYERS' CLOVER LEAF



Double Steel Track with Splicing Clamp.

This combination machine (both swivel and reversible) can be reversed by drawing the rope through from end to end or by turning the swivel.

It is constructed with flanged wheels revolving on ⅝ in. turned steel bearings. The lock is composed of three parts and has no springs. The carrier has a large, flaring mouth to receive the fork pulley. The pulley can swing backward or forward without becoming detached. This swinging fork pulley is a decided advantage when used for filling a mow above beams, as it relieves all side strain from car.

No. N114—Hay Carriers, for double steel track, malleable iron, aluminum finish, ⅞ in. turned steel axles, swivel and reversible, possible force lock, no springs, w't 27 lbs., each $12.75

No. A644—Double Steel Track, with splicing clamps, lengths 6 and 12 ft., w't per foot 2 lbs., per foot $0.35

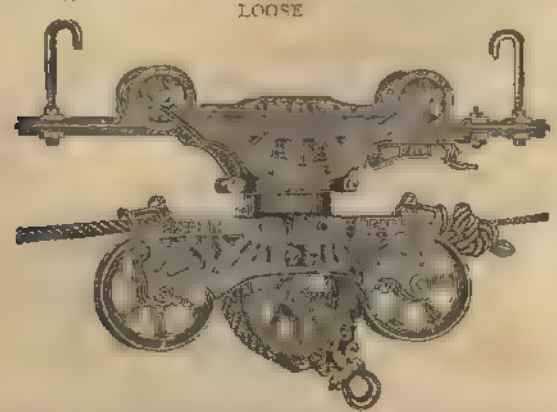
No. 302—Hanging Hooks, 6 in. measured after bending, with clamps w't per doz. 8 lbs. ..... per dozen $2.60

No. 824—Extra Slicing Clamps, w't per doz. 14 lbs., per dozen $3.60

No. 1046—End Stops, for **double** steel track, per dozen $1.90

No. 1085—End Stops, for **single** steel track, per dozen $1.20

LOOSE



No. N124—7 in. sheaves, with 1 7/16 in. steel bearings with groove suitable for carrying wire cable or ⅞ in. Manila or Sisal draft rope, w't 37 lbs., otherwise same as No. 114. each $15.75

LOOSE

HIBBARD

Rafter Bracket.

No 25 Hanging Hook.

Showing No. 20 Track.

No. N4—Hay Carriers, for double angle steel track, malleable iron, painted red with two coats of baking enamel, turned iron bushings, swivel and reversible, open bell, for fork or sling, w't 24 lbs. .....each $10.00

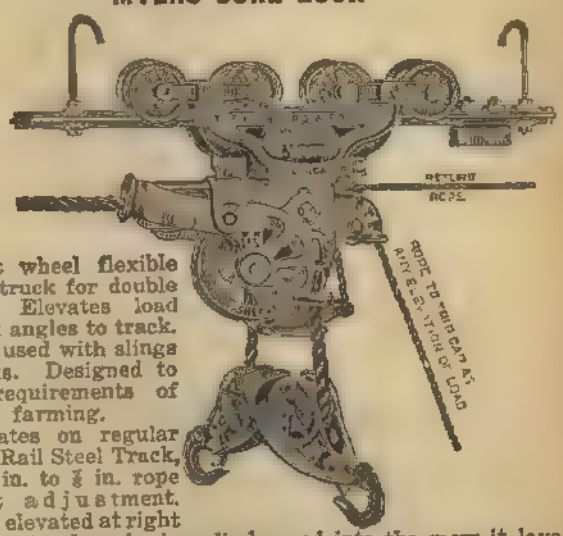
No. A20—Steel track, lengths of 6 and 12 ft., w't per foot 2 lbs. $0.25

No. 25—Hanging hooks, 5½ in., w't per doz. 4½ lbs., per dozen $2 20

No. 45—Rafter brackets, steel, w't per doz. 2½ lbs., per dozen $1.15

LOOSE

MYERS SURE LOCK



Eight wheel flexible engine truck for double track. Elevates load at right angles to track. Can be used with slings or forks. Designed to meet requirements of modern farming.

Operates on regular Double Rail Steel Track, uses ⅝ in. to ¾ in. rope without adjustment. Load is elevated at right angles to track and when discharged into the mow it lays parallel with the load on the wagon requiring less labor in distributing hay over mow. Operates automatically, tripped by sling pulleys striking plate immediately under machine; also arranged with separate trip rope which allows load to be carried into mow at any elevation desired.

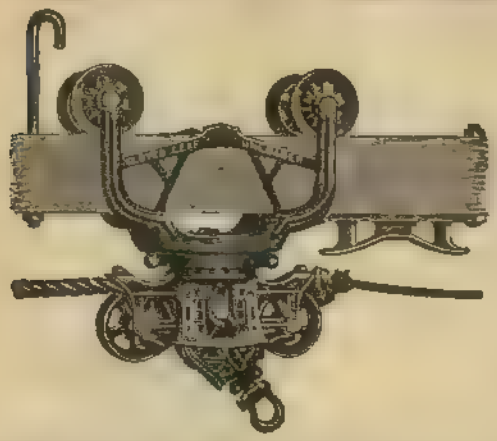
Construction—A long heavy wheel-base, truck with eight large truck wheels mounted on turned steel axles. Rope wheel 7 in. diam., fitted with 1 7/16 in. machined steel bearing. Rope lock arranged so that pressure on rope is proportional to weight of load, by which it is controlled. Rope lock so powerful that smooth faced rope jaws only are necesary, eliminating all wear on rope.

No. N40—Myers Sure Lock sling unloader, rope draft for double steel track .....each $24.00

LOOSE

HAY CARRIERS

MYERS' CLOVER LEAF—WOOD TRACK



AN AVERAGE OUTFIT CONSISTS OF ONE CARRIER, TWELVE HANGING HOOKS, TWELVE RAFTER BRACKETS, FIVE PASS KNOT PULLEYS AND TWO FLOOR HOOKS

This carrier is identical in construction throughout with the steel track carrier, with the exception of the size of track. It is adapted for 4x4 in. wood track.

No. N120—Hay Carriers, malleable iron, aluminum finish, ⅜ in. turned steel axles, swivel and reversible, positive force lock, no spring, w't 32 lbs.....each $12.75

No. 267—Hanging Hooks, ¼x10 **in.,** measured after bending, w't per doz. 9 lbs. .....per dozen $1.90

No. 268—Hanging Hooks, ¼x14 **in.,** measured after bending, w't per doz. 12 lbs. .....per dozen $2.25

No. 45—Steel Rafter Brackets, w't per doz. 3 lbs., per dozen $1.15

Directions for Making Wood Track.

The track may be hardwood or pine scantling, 4x4, dressed to about 3½ in. width. If not convenient to get this size for the full length, 4x2 or 4x5 may be used by nailing a piece on where the stop is placed, so as to fit the carrier and operate the lock properly. The pulley used to pull the carrier back in mow should be directly under and in line with the track. Always put an extra hook over the load near the stop.

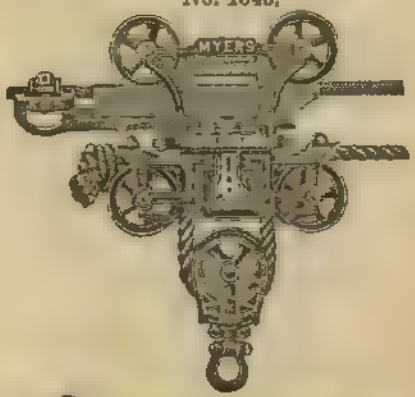
All Myers hay carriers are made of malleable iron throughout. They are constructed with flanged wheels revolving on ⅞ in. turned steel bearings. The carriers have a large flaring mouth to receive the fork pulley when approaching from any direction. The swinging fork pulley is a decided advantage in drawing hay into a well filled mow or over a beam.

The locking device is composed of three pieces and is so arranged as to grasp the fork on both sides of the frame.

LOOSE

MYER'S CABLE OR ROD

No. 1043.



No. 431.
Single Cable Clamp.

No. 432.
Double Cable Clamp.

The knocker is one of the special features of this machine. It is so arranged that it swings loose on the track, and stands immediately under the cable, under any and all circumstances. It is held to the cable by means of a steel sleeve through which the cable passes. The sleeve is attached to the knocker by means of two bolts, and can be removed at any time without taking down the cable. The knocker is located at any desired point on the cable by means of an ordinary cable clamp.

AN AVERAGE OUTFIT CONSISTS OF ONE CABLE CARRIER, ONE HAY FORK, 150 FT. ⅜ IN. GALVANIZED CABLE, TWO SINGLE CABLE CLAMPS, TWO DOUBLE CABLE CLAMPS, TWO ⅜x10 IN. CARRIAGE BOLTS FOR SECURING POLES TOGETHER, 150 FT. ½ IN. MANILA ROPE, TWO PULLEYS AND FOUR POLES 4x4 1N. x 30 FT. LONG

No. N165—Hay Carriers, for cable or rod track, malleable iron, aluminum finish, with ⅜ in. turned steel axles, double lock, w't 31 lbs. .....each $12.75

No. 431—Single cable clamps, 2 pieces, bolted, easily removed, w't per doz. 9 lbs. .....per dozen $5.40

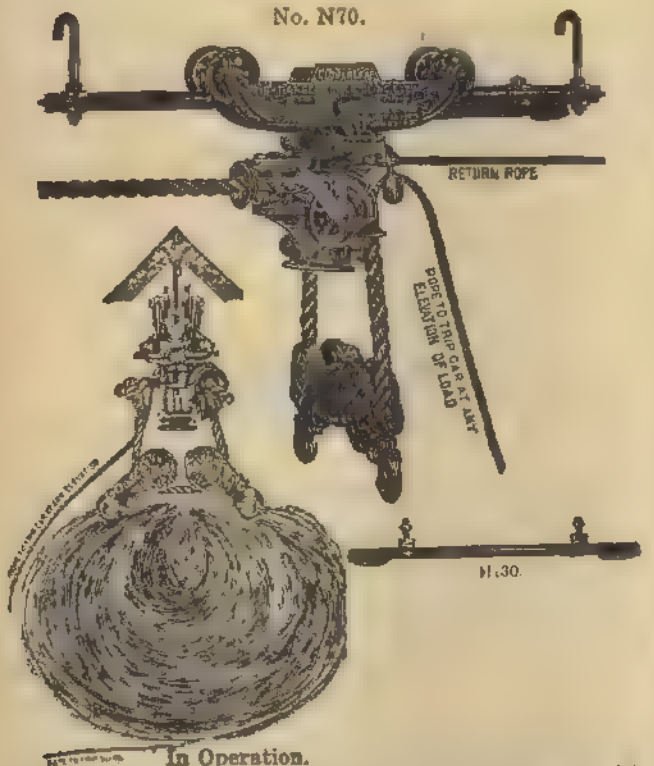
K. hay carrier, No. 19 for Haymaker, Imperial, and Myers' old style single rail hay carriers, No. 276 for Myers' hay carriers, with 4½ in. sheave fork pulley, double and single steel track, and No. 69 for Porter's Meadow King hay carriers.

All Nos. .....each $0.75

MYERS' HAY CARRIERS

MYERS' RIGHT ANGLE FORK AND SLING ELEVATORS

No. N70.



In Operation.

Machine so arranged it elevates load at right angles with track, with the result that when load is discharged in mow it lies parallel with load on wagon, a feature not accomplished by sling carriers, unless they use special right angle pulleys which add one-half horse power to the draft.

If operator overloads carrier, rope slips through the lock, causing it to wear. This has been overcome on the right angle fork and sling elevator, as it is so arranged that tension of rope is regulated entirely by weight of load. The result is that it is impossible for rope to slip through lock, hence no chafing of the rope. Lock adjusts itself to any size rope, ¼ to 1 inch.

The right angle for and sling elevator operates automatically and is tripped by the sling pulley striking a plate immediately under the carrier. It is also arranged with a separate trip rope, by the use of which the load may be carried into the mow at any elevation desired without drawing entirely to the top of the barn.

Many farmers prefer to use two forks, one attached to each pulley.

With Two Sure Grip Pulley Blocks, ¾ in. Turned Steel Bearing, Double or Triple Hoist.

No. N70—Sling Carriers, for double steel track, annealed malleable iron, improved rope lock and locking device, balance lock, w't 52 lbs. .....each $24.00

No. 130H—Knocker for No. N70 Sling Carriers, each $1.50

No. A644—Double Steel Track, with joint clamps, in lengths 6 or 12 ft., w't per ft. 2¾ lbs. .....per foot $0 35

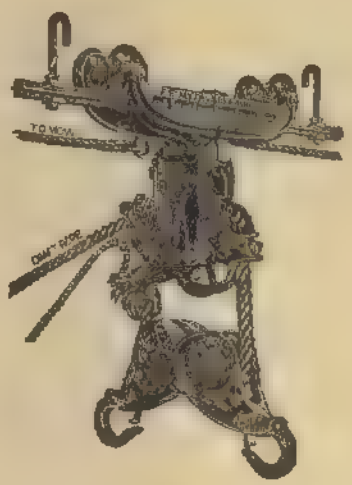
No. 302—6 in. Hanging Hooks, with clamp, measured after bending, w't per doz. 8 lbs. .....per dozen $2.60

No. 824—Extra Joint Clamps, w't per doz. 14 lbs., per dozen $3.60

No. N1139—Triple Hoist Pulleys, for No. N70 Carriers, w't 60 lbs. .....per dozen $9.00

LOOSE

MYERS' CROSS DRAFT



The draft rope running direct from the carrier to the floor permits the use of a much shorter draft rope and less walking for the horse than is the case with the other style of sling carriers. The carrier is so constructed that a knocker or stop block is not required. Large rope sheave carrying the rope revolves on large steel axle. Extra heavy and long truck distributes the load over a greater portion of the track. The truck is adjustable in width. Can be used on any make of steel track except the Hunt, Helm & Ferris Co.

No. N80—For use on No. A644 double steel track, entire weight of load bears on locking device, therefore the heavier the load the greater the pressure on the lock, no chance for the rope to slip, main rope sheave fitted with lugs which engage the dogs, stopping the revolving of the wheels and assisting the rope lock, holds load at any elevation whenever team stops, and runs to mow from that point, track wheels 3¼ in. in diam., and revolve on ¾ in. turned steel journals, frame or truck extra heavy and long, positive force lock, no springs, w't 34 lbs., each $24.00

LOOSE

DIRECTIONS FOR REVERSING CARRIER

Set fork in hay. Tie ends of rope together, to which horse and weight are attached. Pull on small rope until knot comes to the floor, then untie ropes. Fasten weight on small rope, change pulley to floor hook, This reverses carrier for opposite direction without leaving the floor or climbing up. Use all knot passing pulleys. For taking in hay at end barn use V-shaped brace for track support, as shown in cut.

MATERIAL REQUIRED FOR A STEEL TRACK OUTFIT FOR DIFFERENT LENGTH BARNS

For a 40-foot Barn—One Hay Unloader, 36 feet Steel Track, 19 Hanging Hooks, 19 Rafter Brackets, 5 Knot Passing Pulleys, 1 Fork, 6 Floor Hooks, 110 feet ¾-in. Manila Rope, 50 feet ¾-in. Check Rope, 40 feet ¾-in. Reverse Rope.

For a 50-foot Barn—One Hay Unloader, 48 feet Steel Track, 25 Hanging Hooks, 25 Rafter Brackets, 5 Knot Passing Pulleys, 1 Fork, 6 Floor Hooks, 130 feet ¾ in. Manila Rope, 55 feet ¾ in. Check Rope, 60 feet ¾ in. Reverse Rope.

For a 60-foot Barn—One Hay Unloader, 54 feet Steel Track, 28 Hanging Hooks, 28 Rafter Brackets, 5 Knot Passing Pulleys, 1 Fork, 6 Floor Hooks, 160 feet ¾ in. Manila Rope, 60 feet ¾ in. Check Rope, 60 feet ¾ in. Reverse Rope.

For a 70-foot Barn—Hay Unloader, 66 feet of Track, 34 Hanging Hooks, 3½ lbs. Bracket Nails, 5 Fig. 1120 Pulleys, 1 Fork, 6 Floor Hooks, 190 feet ¾-in. Draft Rope, 70 feet ¾-in. Check rope, 70 feet ¾-in. Reverse Rope.

For an 80-foot Barn—Hay Unloader, 78 feet of Track, 40 Hanging Hooks, 40 Rafter Brackets, 4 lbs. Bracket Nails, 5 Fig. 1120 Pulleys, 1 Fork, 6 Floor Hooks, 210 feet ¾-in. Draft Rope,80 feet ¾-in. Check Rope, 80 feet ¾-in. Reverse Rope.

Different lengths of barns will use track, hanging hooks and rope in same ratio as above.

If required to take hay in at end of barn and have rope pass down at far end to horse, same amount of draft rope. If draft rope be returned to same end of barn and then down, this requires about one-fourth more draft rope.

DOUBLE STEEL TRACK

Put Together Before Shipping.

All Double Steel Track is put together as shown in illustration before shipping. The advantage of this plan is that in erecting the only thing necessary is to attach the splice clamps. Instead of old method of breaking joints in center of rail, a long, heavy clamp is used. This plan is recommended, as it adds all the advantages of the single rail, and makes the double rail more desirable for dealers to handle.

How Track Should Be Placed.

Showing how track should be put up and how rope is tied from one rafter to the other close under the track to make stop for carrier at end of barn. Also how rafter brackets are placed, and how pulley should be fastened.

Directions for Erecting Myers' Patent Steel Track.

Scaffold, by placing rope from rafter to rafter, say 6 ft. from ridge pole or peak and about 10 ft. apart. Then place extension ladder across the ropes with board to stand on. Now nail one rafter bracket at each end of barn and draw a line from one end to the other and stretch tight. Then nail all rafter brackets even with this line. You are now ready to put up the track, which can be done either in sections or by clamping the entire length together. Hoist near to rafter brackets by ropes. Then place hanging hook over rafter bracket and finish by putting in bolt.

Material Required—One reversible carrier, track the required length of barn, one hanging-hook and rafter bracket for each rafter, five malleable knot passing pulleys, one fork, two floor hooks, one rope hitch, enough ¾ or ⅞ in. rope to operate the carrier—usually takes from 125 to 160 ft., but depends upon length of barn—¾ in. reverse rope the length of track, trip rope required length.

HAY RACK LOOPS

Showing Loop in Use.

These are designed to bolt on the ends of cross timbers of the hay rack, so that the side stakes of the basket of the rack will fit therein at the end of the timbers as shown in cut. Will hold the 2x4 in. stake securely having its lower end made tapering.

No. N42—HIBBARD, steel painted blue, w't per doz. sets 96 lbs. .....per dozen sets **$16.50**

ONE SET OF EIGHT PIECES IN A BUNDLE, WIRED

HAY RACK LOOPS, BRACKETS, ETC.

HAY RACK BRACKETS

WENZELMANN

Furnished with 7/16 inch rod

A Set Consists of Wrought Steel Clamps, Brackets, Upper Washers, Lower Clips and Nuts.

The Intermediate Bracket adds much to the bearing surface at the cross section, and being studded and flanged, keeps the timbers from twisting or slipping.

The Clamps are placed astride the timbers and have double the strength of bolts.

The Bed Sills and cross pieces absolutely cannot twist out of shape when these fixtures are used, as is the case in the old method of construction with bolts, nails, etc.

The grooved Steel Upper Washer renders it impossible for the clamp to cut into the cross piece. The lower steel clip or washer keeps the bottom cross pieces from splitting.

By using the Wenzelmann Hay Rack Fixture boring of holes in timbers is not necessary. By their use the full strength of timbers is retained, and does away with the holes, which simply collect water and hasten their decay.

ONE SET IN A BOX

TAKE-DOWN HAY RACK CLAMPS

Steel Bar Passes Through Malleable Iron Loop, Held in Place by Malleable Key.

The special advantage of this clamp over the Wenzelmann is that the hay rack is built in two sections and held together by two wedge shape pins, this enables one man to place rack on the wagon or remove it without assistance.

In addition to this, the lower part composed of sills and lower cross pieces making an ideal body for hauling wood, timber, lumber and such things not conveniently handled with an ordinary wagon box. By the use of a set of stake irons it may be transformed into a hog rack.

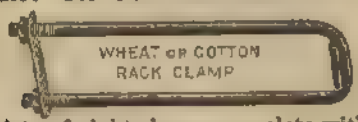
This is the most convenient form of hay clamp now on the market and is thoroughly recommended.

No. N06—Hay sills 2×8 in., cross timbers 2×4 or 2×6 in., w't per doz. sets 216 lbs., per dozen sets $45.00

No. N07—Hay sills, 2×10 in, cross timbers 2×6 in., w't per doz. sets 252 lbs. ..... per dozen sets $48.00

ONE SET IN A BOX

WHEAT OR COTTON RACK CLAMPS



A set consists of eight clamps complete with upper washers, lower clips and nuts.

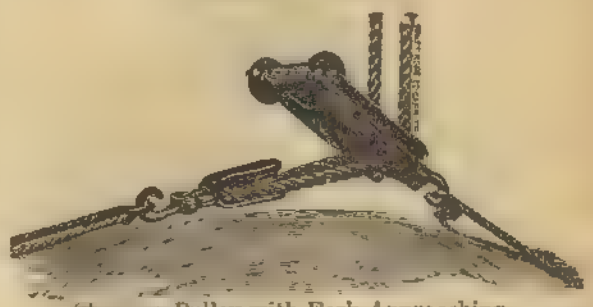
Used for building racks to haul sacked grain, baled hay or cotton in bales. When in place the sills and bottom cross pieces are securely clamped together, making a most substantial construction.

No. N1—Wheat or Cotton, sills 2×8 in., w't per doz. 144 lbs., per dozen sets $24 00

No. N2—Wheat or Cotton, sills 2×10 in., w't per doz. 156 lbs. ..... per dozen sets $25.50

ONE SET IN A WOOD BOX

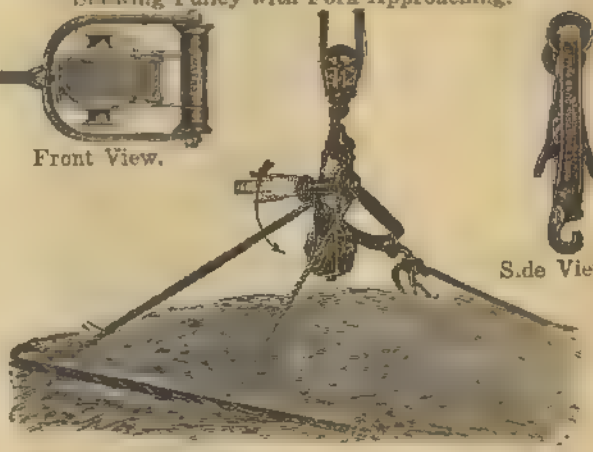
SLING PULLEYS



Showing Pulley with Fork Approaching.

Front View.

Side View.



Showing Pulley after Load Has Been Compressed.

Can be used with any make of hay carrier, except 7 in. Sheave Carrier, without a change of fork pulley or using a registering head. It is so arranged that it cannot be misplaced on the load as it can be used either side up and in connection with any shape or style of fork pulley.

With this sling attachment the hay is deposited in the mow in the same relative position as on the wagon, and not crosswise as on many sling carriers

No. N3—**Nellis,** harpoon, single point, spring steel, w't per doz. 144 lbs., each $6.75

MYERS', automatic grapple tines and arms of high carbon spring steel, locks of best annealed malleable iron, spreads 55 in.

This fork is unlike any other, inasmuch as it is not only balanced at all points, but in addition the natural pull on the trip rope closes the fork and locks it securely, thus returning it to the load all ready to enter the hay, without any attention whatever from the operator as to setting of locks, etc.
No. N617—4 tines, **double** grapple, w't 40 lbs. .....each $15.75
No. N619—6 tines, **triple** grapple, w't 47½ lbs. .....each $18.00
